FOREWORD

The ninth annual Crime and Justice report has been prepared pursuant to the responsibilities assigned to the Division of Criminal Justice Services by Chapter 654 of the laws of 1974.

This is the first year Crime and Justice has been prepared by the newly formed Bureau of Criminal Justice Statistical Services of the Office of Policy Analysis, Research, and Statistical Services. The Bureau's creation brings together the information systems used in the preparation of this report. The consolidation of these systems is an initial step toward the future enhancement of these information systems and, in turn, the annual report.

This report presents not only offense and arrest data, but also includes data on the processing of felons, probation, corrections, parole, and victim compensation. The inclusion of data from this wide range of criminal justice agencies has allowed the preparation of an annual report that is truly representative of the State's criminal justice community.

The Division is most appreciative for the cooperation and support of nearly 600 police departments, sheriffs' offices and specialized police agencies that provided offense and arrest data. Their participation has proven invaluable in the prepartion of this report. We also wish to express our gratitude to District Attorney and Special Prosecutor offices throughout the State for their continued cooperation and assistance in providing data on the processing of felons. The Division is also indebted to the Chairman of the Board of Parole, the Chairman of the Commission of Corrections, the Commissioner of Correctional Services, the State Administrator of the Courts, the Chairman of the Crime Victims Board, the Director of the Division for Youth, and the Director of Probation for the supplementary data provided by their respective agencies.

We believe that the contributions and counsel of those who have participated in the preparation of this report have allowed us to provide the people of the State of New York with a clear insight into issues of crime and justice in New York State.

Richard J. Condon
Commissioner

STATUTORY AUTHORITY

The collection, analysis and dissemination of criminal justice data in New York State is authorized by Sections 837, 837-a and 837-b of the Executive Law, to wit:

"§ 837. Functions, powers and duties of division

The division shall have the following functions, powers and duties:

... 4. In cooperation with the state administrator of the unified court system as well as any other public or private agency,

... (c) collect and analyze statistical and other information and data with respect to the number of crimes reported or known to police or peace officers, the number of persons arrested for the commission of offense, the offense for which the person was arrested, the county within which the arrest was made and the accusatory instrument filed, the disposition of the accusatory instrument including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pled guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-a. Additional functions, powers and duties of the division

In addition to the functions, powers and duties otherwise provided by this article, the division shall:

1. Collect and analyze statistical and other information and data with respect to the number of persons charged with the commission of a felony by indictment or the filing of a superior court information, the felony with which the person was charged therein, the county within which the indictment or superior court information was filed, the disposition thereof including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pleaded guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-b. Duties of courts and peace officers

1. It is hereby made the duty of the state administrator of the unified court system; and of every sheriff, county or city commissioner of correction and head of every police department, state, county or local, and also railroad, steamship, park, aqueduct and tunnel police and town constables, of every district attorney, of every probation agency; and of head of every institution or department, state, county, and local, dealing with criminals and of every other officer, person or agency, dealing with crimes or criminals or with delinquency or delinquents, to transmit to the commissioner not later than the fifteenth day of each calendar month, or at such times as provided in the rules and regulations adopted by the commissioner, such information as may be necessary to enable him to comply with subdivision four of section eight hundred thirty-seven. Such reports shall be made upon forms which shall be supplied by the commissioner.

2. Such officers and agencies shall install and maintain records needed for reporting data required by the commissioner and shall give him or his accredited agents access to records for the purpose of inspection.

3. For every neglect to comply with the requirements of this section, the commissioner may apply to the supreme court or an order directed to such persons responsible requiring compliance. Upon such application the court may issue such order as may be just, and a failure to comply with the order of the court shall be a contempt of court and punishable as such."

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1975, pursuant to Chapter 654 of the laws of 1974. In assuming that responsibility, the Division was also committed to providing relevant data to the National Uniform Crime Reporting program administered by the Federal Bureau of Investigation and to disseminating this information to the New York State criminal justice community. This publication is the ninth annual report produced in discharge of that responsibility.

Uniform Crime reports submitted monthly by police agencies in New York State are the basis for much of the material contained in this report. These reports include information on Part I offenses, Part II offenses, location and time of the offense, value of property stolen, Part I arrests, Part II arrests, law enforcement officers killed or assaulted and number of law enforcement employees. In 1983, all 590 law enforcement agencies participated in the Uniform Crime Reporting program and agencies with multi-county jurisdictions reported separately for each county within their jurisdictions.

Police agencies also submit supplementary reports on homicide and arson offenses. These detailed reports allow for a more in-depth analysis of these serious crimes.

In addition to the Uniform Crime Reporting data contained in this report, we have provided data on felony arrests, felony drug arrests and felony indictments and dispositions. The arrest material is derived from the Computerized Criminal History (CCH), which is based on the arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with section 160.20 of the Criminal Procedure Law. Felony arrests and felony drug arrests are presented for each county from 1979 through 1983. The felony indictment and disposition material is reported by District Attorneys and Special Prosecutors throughout the State pursuant to Section 837a of the Executive Law. This material includes data on felony indictments, felony drug indictments, felony dispositions, felony drug dispositions and median time from indictment through disposition.

Information from other criminal justice agencies is included in this report to present, in one volume as much information as possible about the criminal justice system. Agencies that have submitted data and are included in this report are: the Office of Court Administration, the Division of Probation, the Department of Correctional Services, the Commission of Correction, the Division of Parole, the Division for Youth and the Crime Victims Board.

For many reasons not all offenses come to the attention of the police. Victims may feel too embarrassed to report a crime or that the loss sustained was too small to report or believe that there is nothing the police can do. Victimization studies have confirmed that many offenses are never reported. When an offense is cleared, it is usually done by one or more arrests. However, there are exceptional circumstances when an offense may be cleared without an arrest. Exceptional clearances result when the police know who the offender is, where he is, and have enough evidence to support an arrest but are prevented from doing so because of some reason outside their control.

The UCR data included in this report are divided into seven main segments:

A. Part I offenses including:

1. Criminal Homicide

   a. Murder and Non-Negligent Manslaughter
   *b. Negligent Manslaughter

2. Forcible Rape

3. Robbery

4. Aggravated Assault

5. Burglary

6. Larceny

7. Motor Vehicle Theft

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime nationwide and to show trends in crime.

We have also provided greater detail regarding:

a. Type of weapon/force used

b. Type of location in which the crime was committed

c. Number of offenses cleared

d. Type and amount of property stolen and recovered

B. Part II offenses including:

8. Arson
   Commercial, Residential or Motor Vehicle

9. Kidnapping

10. Controlled Substance
    Sale/Manufacture-Opium Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs

11. Dangerous Weapons
    Handguns, Other Firearms, Explosives, Other Weapons

12. Bribery

13. Sex Offenses

14. Extortion

15. Forgery & Counterfeiting

16. Prostitution & Vice
    Promoting Prostitution, Prostitution and Patronizing Prostitutes
17. Stolen Property
18. Coercion
19. Criminal Mischief
20. Fraud
21. Gambling
    Bookmaking, Numbers & Lottery, All Other Gambling
22. Offenses Against Public Order
23. Embezzlement
24. Simple Assault
25. Offenses Against the Family
26. Driving Under Influence
    Alcohol, Drugs
27. Unauthorized Use of Vehicle
28. Possession of Burglar Tools
29. Liquor Law Violations
30. Disorderly Conduct
31. Public Drug Intoxication
32. Loitering
33. All Other Offenses

C. Age, Sex, Race and Ethnic Origin of Persons Arrested

1. Persons Under 16 Years of Age (Juvenile)
2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part I and Part II offenses, as described above.

NOTE: The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

D. Law Enforcement Officers Killed or Assaulted

Statistics are provided on the number of New York State law enforcement officers killed or assaulted. A description in some detail, of the conditions under which the officers were assaulted is also provided.

E. Homicide Analysis

This portion of the report provides detail on homicides committed in New York State, describing the victims and circumstances under which such homicides occurred.

F. Arson Analysis

This portion of the report provides additional detail concerning arson. The analysis describes the types of structures involved, distribution of activity and clearance rates.

G. Domestic Violence

Statistics are shown relating to the incidence of Domestic Violence in New York State. The statistics are presented by the geographic locations of New York City, Suburban Counties and Upstate Counties.

To combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

It is important to note that without the collaboration of the law enforcement agencies and cooperation of other criminal justice agencies, this report would not be possible.

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1983 Crime and Justice are based on 1980 census data and updates provided by the United States Department of Commerce - Bureau of the Census and the New York State Department of Commerce.

The PROBLEM

OFFENSES

For over 50 years certain criminal offenses have been used as a crime index to assess the level of criminal activity within an area. The Index offenses were selected because of their seriousness or frequency of occurrence.

The Index offenses are murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft.

Comparisons of crime rates between police agencies or counties should be made with extreme caution. The crime rates published in this report are based solely on offenses reported or known to the police and the size of the resident population. Additional factors which may influence crime rates are density of population, geographic location, social attitudes, economic conditions, number of law enforcement officers, seasonal and transient populations, and rural or urban environments.

Index Offenses

Index offenses declined 8.8% in New York State from 1982 to 1983. The 1,029,391 Index offenses reported in 1983 are the fewest reported since 1978 and show a drop for the second consecutive year.

Violent Offenses

Violent offenses (murder, forcible rape, robbery and aggravated assault) dropped 7.4% from 1982 to 1983. The 161,216 violent offenses were the lowest number of violent offenses reported in five years. Violent offenses accounted for 15.7% of the Index total. The clearance rate for violent offenses was 37.7%.

Non-Violent Offenses

Non-violent offenses (burglary, larceny and motor vehicle theft) declined 9.1% from 1982 to 1983 and reflected a drop for the second year in a row. This was also the lowest number of non-violent offenses reported in the last five years. The clearance rate for non-violent offenses was 13.7%. Non-violent offenses constituted 84.3% of the Index total.

Murder

Murder and non-negligent manslaughter dropped 3.0%, down from 2,011 in 1982 to 1,951 in 1983. Homicide offenses have declined for the third successive year, and reflect the fewest number of homicides reported in the last five years. Murder offenses were cleared at a 74.4% rate. New York City reported 83.1% of the murder offenses in New York State.

Forcible Rape

Forcible rape offenses increased from 5,132 in 1982 to 5,280 in 1983, a rise of 2.9%. This was the only Index offense to show an increase from 1982 to 1983. Weapons were employed in 50.8% of the rape offenses. Rape offenses were cleared at a 49.5% rate and made up 3.3% of the violent offenses. New York City reported 69.4% of the forcible rape offenses.

Robbery

Robbery offenses registered an 11.9% decrease, down from 107,514 in 1982 to 94,733 in 1983. Robbery offenses make up 58.8% of the violent offenses. The robbery offenses were the fewest reported in the last four years. The percentage of robberies involving handguns declined for the second consecutive year. Robberies were cleared at a 23.2% rate. New York City reported 88.8% of the robberies in New York State.

Aggravated Assault

Aggravated assault offenses dropped 0.4% from 1982 to 1983. The 59,252 aggravated assaults reported in 1983 were the fewest reported since 1978 and reflect a gradual decline over the past five years. Handguns were used in 14.6% of the aggravated assaults and all other types of weapons were employed in 62.8% of the offenses. Aggravated assaults accounted for 36.8% of the violent offenses and were cleared at a 58.5% rate.

Burglary

Burglary offenses dropped 15.0% from 1982 to 1983, the largest decrease among Index offenses. The 247,927 burglary offenses were the fewest reported since 1975 when the Division of Criminal Justice Services began collecting data on burglary offenses. Burglary offenses were cleared at a 12.7% rate. New York City reported 58.0% of the burglary offenses in New York State.

Larceny

Larceny offenses declined 4.9% from 1982 to 1983. The 500,513 larceny offenses included larcenies of any amount, and accounted for 48.6% of the Index offenses and 57.7% of the non-violent offenses. This was the lowest number of larceny offenses reported in the last four years. Larceny offenses were cleared at a 15.5% rate. Larceny offenses were divided almost equally between New York City and the rest of the State.

Motor Vehicle Theft

Motor vehicle theft declined 12.6% in New York State from 1982 to 1983. New York City reported a 13.7% drop while Upstate was down 8.5%. New York City reported 77.4% of the motor vehicle thefts in New York State. Motor vehicle thefts were cleared at an 8.1% rate in New York State. New York City reported a clearance rate of 6.1% compared to 15.3% Upstate. The 119,735 motor vehicle thefts reported in New York State in 1983 were the fewest reported in the last five years.

Part II Offenses

A total of 1,376,337 Part II offenses were reported in 1983, a 1.4% drop from the 1,395,881 reported in 1982. Part II offenses comprise all offenses not included in Part I offenses and range in seriousness from kidnapping to disorderly conduct. The clearance rate for Part II offenses was 70.4%. This high clearance rate is influenced by cases where the offense and arrest occur almost at the same time.

Property Stolen

In New York State, the value of property stolen during the commission of Index offenses was $1,105,627,213 in 1983, 10.1% below the 1982 total of $1,230,342,667. Stolen vehicles accounted for 46% of the value of property stolen in 1983.

PART I OFFENSES REPORTED/KNOWN TO POLICE
AND RATE PER 100,000
NEW YORK STATE
1983 - 1982

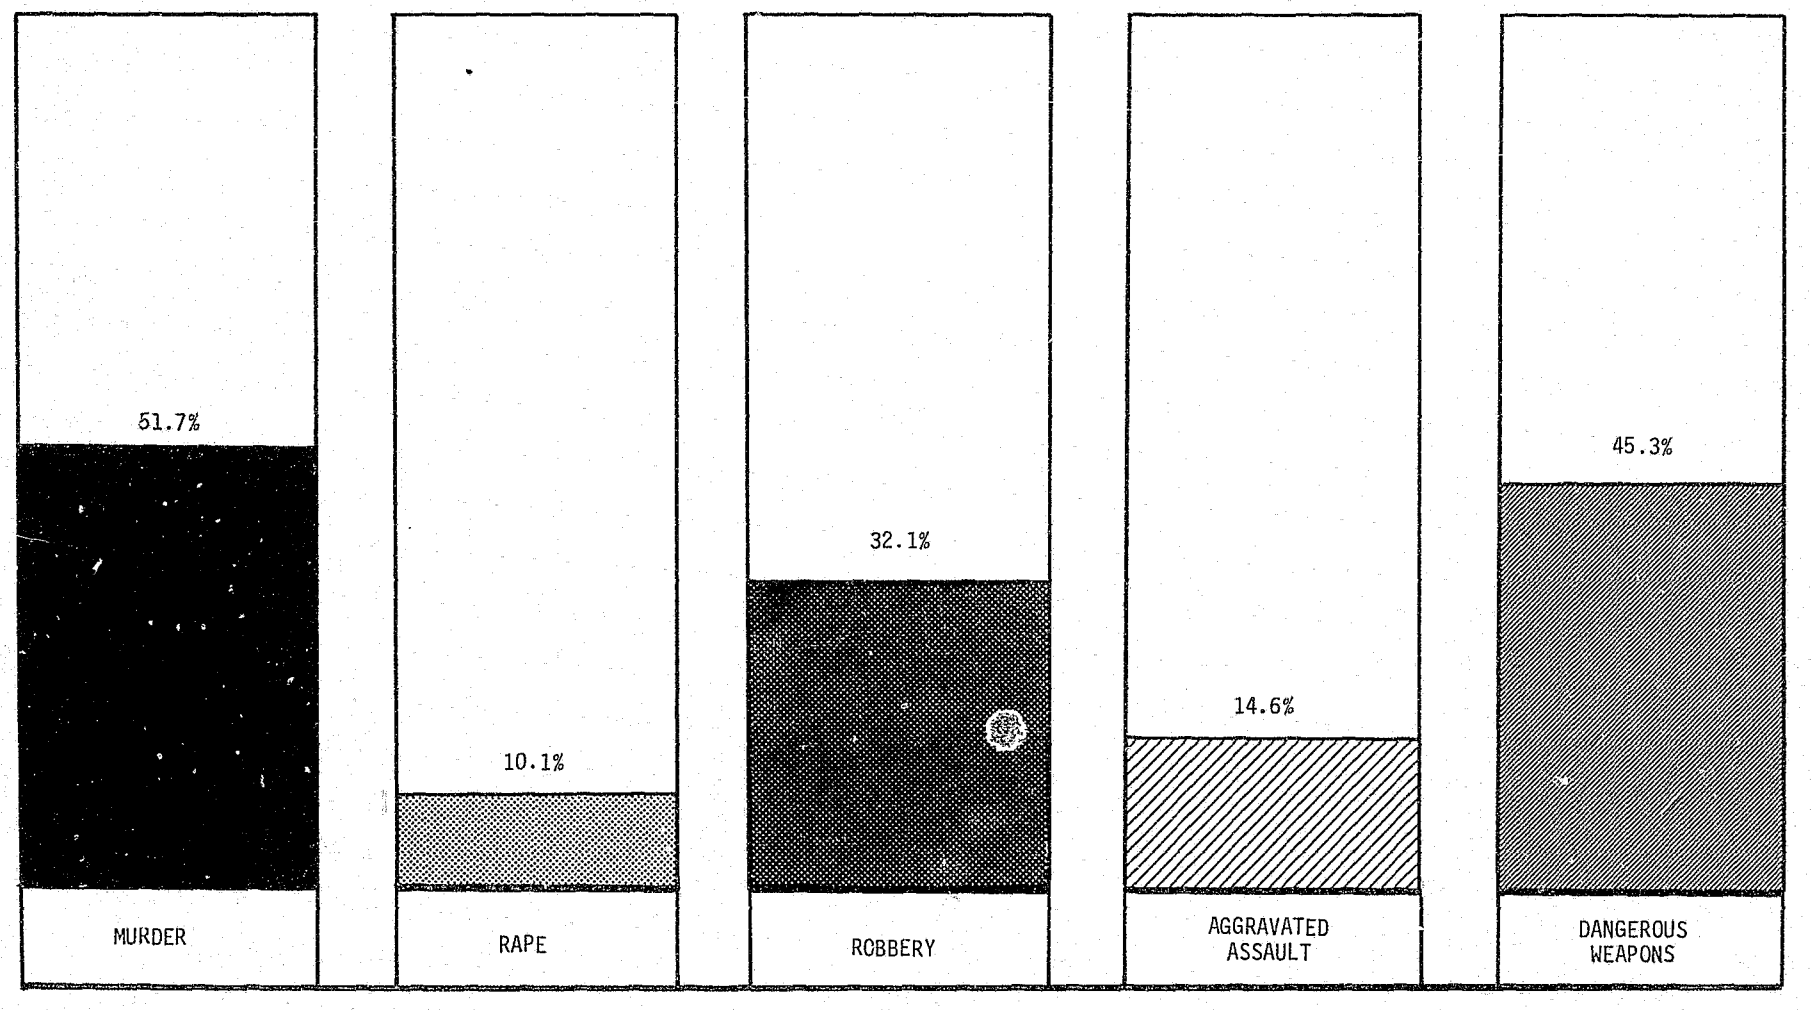
PERCENTAGE OF HANDGUNS INVOLVED IN SPECIFIED OFFENSES
NEW YORK STATE
1983



HOMICIDE 1983

The Offense[1]

Table 1 presents data on homicides by month and area for New York State from 1979 through 1983. There were 1,965 homicides during 1983.[2] The downturn in homicides noted in 1981 and 1982 continued during 1983. There were 96 fewer homicides in 1983 than in 1982, a decline of 4.7 percent. There were 212 fewer homicides in 1983 than in 1981, a decline of 9.7 percent. While the last three years have witnessed declines, the number of homicides in 1983 was still above that for 1977 (N=1913), and 1978 (N=1818). In 1982, the most recent year for which comparable national data are available, New York State's homicide rate of 11.4 per 100,000 inhabitants was the ninth highest among the fifty states.[3] In 1978 the rate was 10.3 per 100,000 inhabitants and New York State ranked fourteenth in the country.[4]

Not all areas of the state benefited equally from the decline in homicides.[5] New York City experienced a 4.8 percent decrease from the previous year. The six MPA counties experienced an overall decline of 6.4 percent. The number of homicides for the remainder of the state remained relatively stable.

The total number of homicides per month throughout 1983 was relatively sporadic. For example, there were 101 more homicides committed during December than during the previous month. The fewest number of homicides for the year occurred during February with 119 (6.1%) and the largest number occurred during December with 235 (12.0%)(Table 1).

---

[1]The homicides discussed in this chapter were all those reported through the Supplementary Homicide Reporting system from New York State law enforcement agencies for 1983.

The number of homicides in this chapter are higher than those reported in the Uniform Crime Reports (UCR). The UCR system provides for the deletion of cases from the current year when cases originally reported in prior years have been later determined to be false or baseless (unfounded).

[2]A homicide offense was counted for each victim of a homicide event. For example, if two persons were killed by three offenders during a robbery, this was counted as two homicide offenses.

[3]Federal Bureau of Investigation, Crime in the Unites States 1982, (Washington, D.C.: U.S. Department of Justice, 1983).

[4]Federal Bureau of Investigation, Uniform Crime Reports 1978, (Washington, D.C.: U.S. Department of Justice, 1979).

[5]The regional groups used in this report are: New York City, consisting of the five boroughs of the city (Bronx, Manhattan, Kings, Queens, and Richmond); Other Metropolitan Planning Areas (MPAs), consisting of the six largest counties outside of New York City (Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester); and Other Areas, consisting of the remaining counties.

Homicide was largely a New York City problem. While New York City contained approximately 40 percent of the State's population[6] it accounted for the bulk of the homicides (83.3 percent). The remaining homicides were found in the MPAs (11.2 percent) and the Other Areas (5.5 percent). The distribution of homicides among these three areas has remained essentially unchanged for the last five years (Table 1).

Table 2 presents data for the last five years on characteristics of the homicide event: victim-offender relationship, circumstances,[7] number of victims and offenders, location,[8] and weapon use. Reporting agencies were able to discern the victim-offender relationship in 34 percent of the homicides. Of these, 77 percent were committed by offenders who were considered to be non-strangers. The percentage of homicides committed by non-strangers had increased from the previous year by 36 percent.[9] Homicides usually did not occur in conjunction with another felony, but as the result of an altercation or other circumstance (72.5 percent). Approximately 28 percent of the homicides were related to another felony, and in such cases, the related felony was usually a robbery (73.7 percent).

The vast majority of homicide events resulted in the death of a single victim. Of these single victim offenses, 48.0 percent were killed by a single offender; 11.5 percent were killed by two or more offenders; and 40.5 percent were killed by

---

[6]Bureau of the Census, 1980 Census of Population and Housing: New York, Final Population and Housing Unit Counts, (Washington, D.C.: U.S. Department of Commerce, 1981).

[7]As part of an overall change in their reporting procedures, a submitting agency coded Altercations as Other Circumstances. In order to maintain comparability across jurisdictions for that year, it was decided to merge all Altercation cases into Other Circumstances and to relabel this category as Altercation and Other Circumstances. Within this category, there were a total of 570 altercations, but it was not possible to crosstabulate this category with any other homicide, victim, or offender characteristics. This occurred during 1982 only and was rectified for 1983.

[8]The location indicator had two values: outside and inside. Outside was defined as a location potentially observable by a police officer on routine patrol. Inside was any other location.

[9]These percentages were based only on homicide cases for which the victim-offender relationship was known. This percentage has neither increased nor decreased consistently from 1979 through 1983. It is reasonable to believe that homicides by strangers were less likely to be solved (and therefore to be included in these percentages), thus underestimating the true percentage of victims killed by strangers. If this selection effect remained relatively constant over the years, it would not invalidate comparisons with respect to the percentage distributions across the years.

an unknown number of offenders. For homicides where the number of offenders was known, 76.4 percent consisted of a single victim and a single offender. Of all homicides, 11.4 percent resulted from the action of two or more offenders (Table 2).

Homicides were as likely to occur inside as outside. A firearm was the most common weapon (56.7 percent). When a firearm was used, it was almost always a handgun. Next in frequency of use were cutting or stabbing instruments (25.7 percent), followed by personal weapons such as hands and feet (12.6 percent) (Table 2).

Table 3 shows that in addition to contributing disproportionately to the number of homicide cases in the state, New York City's homicides were consistently different from the homicides in the MPAs and the Other Areas. New York City homicides were more than twice as likely to involve multiple offenders; were more likely to involve a firearm; were more than twice as likely to occur as part of a robbery; and were more likely to occur outside. New York City victims were on the average one year younger than victims outside of New York City. New York City victims were also more likely to be male and were more likely to be black. New York City offenders were on the average two years younger than their counterparts outside New York City. They were also more likely to be male and were more likely to be black (Table 3). These differences in offense, victim, and offender characteristics generally suggested that New York City homicides were more related to predatory and "street" violence than were homicides which occurred elsewhere. Similar patterns were noted in 1980, 1981, and 1982.

The Victims

More than one-half of all homicide victims were 20 to 39 years old. Most were male. Homicide victims were nearly equally divided between white (54.1 percent) and black (44.0 percent) racial categories. The percentages for age and sex were relatively constant during the five year period ending in 1983. The proportions for race were not directly comparable to reports earlier than 1981 because prior to this date hispanic was a category of the race variable. Since 1981, hispanics have been coded as white, black, or other[10] (Table 5).

Victim Sex. Both males and females were usually killed by a single offender, although this percentage was higher for females than for males. Males were usually killed with a firearm and, in a dramatic change from the previous year, usually by a non-stranger. Males were slightly more likely to be killed outside than inside. Females were usually killed by a nonstranger and, in contrast to males, usually indoors. The weapons used to kill female victims were more evenly distributed then they were for males: firearms (38.3%); cutting, stabbing, and bludgeoning instruments(29.2%); and personal weapons (26.7%). Homicides involving female victims suggested a stronger relationship to domestic violence than did homicides in which the victim was a male (Table 9).

---

[10]In 1981 a new variable, Ethnicity, was created which had two values: Hispanic and non-Hispanic. Because ethnicity was underreported and the data received was unrepresentative, this information has not been presented.

Victim Race. There was little relationship between the race of the victim and the weapon used. Slightly over one-half of both blacks and whites were killed with a firearm. There was a stronger relationship between victim race and the victim offender relationship. Black victims were more likely to be killed by a non-stranger (82.0%) than were white victims (73.8%). In terms of circumstances of the homicide, the killing of white victims were related to another felony in 32 percent of the cases compared to 22.7 percent for black victims (Table 10).

Age Interactions. The distribution of homicide victims among the sex and race categories differed by victim age. While the overall percentage of female victims was 19.1 percent, the percentage of females was substantially higher in the extreme age groups: 43.4 percent among victims under ten years of age and 36.6 percent among victims sixty years of age or older (Table 7). Thus, in the extreme age groups, for every 100 female victims there were 156 male victims. For the 10 to 19 age group, for every 100 female victims there were 660 male victims.

The distribution of homicides among racial categories also differed by victim age.[11] Overall, there were 124 white victims for every 100 black victims. This represents an average ratio for all age groups. In the under 10 age group there were only 97 white victims for every 100 black victims. As victim age increases, the proportion of white victims increases. For the oldest age group (sixty years of age and older) there were 234 white victims for every 100 black victims.

The characteristics surrounding the killing of very young victims suggested that they usually died as a result of child abuse. The very young were almost always killed by a single offender, a nonstranger, inside and under circumstances unrelated to a felony. They usually died as the result of a beating. Additional evidence for the assertion that homicides of the very young were the result of child abuse was revealed upon closer examination of the relationship between the victim and the offender. Of all the victims under 10 years of age, two-thirds were killed by their parents. (Most of the remainder were killed by friends or by casual acquaintances (20.2%).

The killing of persons 10 years of age and older proved to be more difficult to characterize. These victims were similar in that they were usually slain by a single offender. While persons in the 10 to 59 age group were usually killed with a firearm, the weapons used to kill elderly victims were distributed among:

---

[11]Racial categories other than black and white have been excluded to simplify the presentation.

firearms (26.6%); cutting, stabbing, bludgeoning instruments (35.2%); and personal weapons (32.8%). Persons in both age groups were equally likely to be killed by strangers. The 10 to 59 age group and the 60 and over age group differed with respect to the circumstances and location of the homicide. The middle age group was similar to the very young in being most likely to be killed during altercations and other circumstances while the elderly were most likely to be killed in connection with another felony. The deaths in the middle age group were evenly divided between inside and outside locations. However, the elderly, like the very young, were most likely to be killed at an inside location. These similarities and differences in the characteristics of the homicides for these three age groups may be a result of the effect age has on how, where, and when persons spend their time.[12] The very young and the elderly spend more of their time at home than the middle age group. While both spend a great deal of time at home, only the elderly are logical targets of felony related homicides, such as robbery.

The Offenders[13]

As was true for victims, the vast majority of homicide offenders were males. Offenders were as likely to be black as white. Offenders, on the average, were younger than victims. These patterns have been fairly consistent for the past five years[14] (Table 11).

The propensity for homicide to be a group activity was greatest among offenders under twenty years of age and declined sharply with age. This was also true for the percentage of homicides which were felony connected. Weapon use did not appear to be strongly related to offender age. Homicides by those over 60 years of age were strongly suggestive of domestic rather than "street" violence: none occurred in connection with another felony; most were by a single offender; most offenders knew their victims; and most occurred inside (Table 14).

A slightly higher percentage of female offenders were white (59.0) than they were black (39.6) (Table 15).

---

[12]Hindelang, Michael J., Michael R. Gottfredson, and James Garofalo. Victims of Personal Crime: An Empirical Foundation for a Theory of Personal Victimization. (Cambridge, Mass.: Ballinger, 1978).

[13]The characteristics of offenders were not known in all cases. The percentages on the characteristics of homicide offenders were based only on those cases where offender characteristics were known and reported. The total number of offenders is a minimum estimate, because of the assumption that all victims killed by an unknown offender were killed by a single offender. There are more reported offenders than victims because several offenders sometimes participated in the killing of a single victim.

[14]This statement does not apply to race because the coding of the race variable was changed in 1981 making comparisons difficult across the 1979 to 1983 time period.

Males were twice as likely as females to have killed using a firearms; two and one-half times as likely to have killed a stranger; twice as likely to have killed in connection with another felony; and two times as likely to have killed at an outside location. The victims of female offenders were non-strangers slightly less than one-half of the time (44.7%),(Table 16).

There were very few differences between black and white offenders with respect to the number of offenders involved or the type of weapon used. For both racial groups, killings usually grew out of altercations and other circumstances (Table 17).

In the aggregate, it appeared that homicide offenders clearly victimized members of their own race. Approximately 87 percent of the white offenders killed white victims, while approximately 81 percent of the black offenders killed black victims (Table 18).

There was a tendency for offenders to victimize persons of a similar age. However, this was not as evident for offenders 16 to 19 years of age; their most frequent targets were 20 to 29 year olds (Table 19).

Summary

These data on 1982 homicides showed strong similarities with data from prior years: the vast majority of homicides occurred in New York City; males predominated both as offenders and as victims; and there were relatively few interracial killings. A majority involved the use of firearms, especially handguns.

Victim age had a strong relationship to the type of homicide. The very young, being physically vulnerable and largely confined to the home, were primarily victims of their parent's violence. Victims 10 through 59 years of age were more subject to slayings at outside locations and during altercations and other circumstances. The elderly were most likely to be killed at an inside location during the commission of another felony, such as a robbery.

When viewed over the last several years, there is some indications that yearly homicide totals may be on the decline. The probability of becoming a homicide victim for inhabitants of New York State has decreased slightly from 12.3 percent in 1982 to 11.4 percent in 1983.[15] New York State's homicide rate ranks ninth among the 50 states, based on 1982 national data.

---

[15]As measured by the rate per 100,000 inhabitants.

*The total number of cases on which the percentages are based is shown enclosed in parentheses. This total excludes cases with missing or unknown data, hence it may differ from the total shown for other variables in this table or from the same variable in other tables. Percentages do not always add to 100.0 due to rounding.

ARSON

This is the fifth analysis of arsons in New York State to be presented in the annual Crime and Justice report. The data for these analyses are derived from a supplementary arson data collection program begun in 1979 under the Uniform Crime Reporting (UCR) System.

Arson is defined by the Uniform Crime Reporting program as a willful or malicious burning, or attempted burning, of a dwelling house, public building, motor vehicle, aircraft, or personal property of another. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. A "cleared" arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime, but for reasons outside police control cannot be taken into custody.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule," whereby an offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson offenses in the UCR Part II offense presentations.

In the tables that follow, reported and cleared arson incidents are categorized according to the region in which the incident occurred, the type of property involved, and the month of occurrence. The three regions into which the data are divided are: New York City (the largest Metropolitan Planning Area in the State), Other Metropolitan Planning Areas (MPAs) and Other Areas. New York City includes five counties: Bronx, Kings, New York, Queens and Richmond. Other MPAs include the six largest counties outside of New York City: Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester. Other Areas are the remaining counties of the State.

Type of property is divided into three categories: structural (residential, commercial, public/community, and other), mobile (motor vehicle and other), and other property. These are more fully defined in the footnotes following the data tables.

As in previous years, estimated values of property damaged were not uniformly reported and therefore were not included in the analysis.

Arsons Reported

There were 11,410 arson incidents reported in New York State in 1983 (Table 1); this reflects a 14.2% (1,887) decline in the number of arson incidents reported in New York State in 1982. Of these incidents, 62.3% occurred in New York City, while the Other MPAs and the Other Areas accounted for 24.3% and 13.4%, respectively.

Arsons of structures accounted for 77.4% of all arson incidents in New York State. In New York City, structural arsons accounted for 84.0% of all arsons reported, while in Other MPAs and Other Areas they accounted for 59.9% and 78.4%, respectively.

Consistent with data from previous years, residential structure arsons remained the most common type of structural arson throughout the state. Examination of these residential structure arsons shows that almost 89% of all "other residential" arsons took place in New York City. Of the "single occupancy" arsons, 83.7% took place outside New York City, and constituted approximately 22% of the total arsons in both Other MPAs and Other Areas.

Commercial structure arsons accounted for 17.5% of all arsons in New York State. A regional comparison shows that Other Areas had a higher proportion of commercial structure arsons, 32.2%, than New York City and the Other MPAs which had 13.9% and 18.7%, respectively. "Other commercial" arsons were the most frequent form of commercial arson in New York State, accounting for 11.9% of the arsons statewide. However, a regional comparison indicates that in Other Areas "commercial storage" arsons dominated commercial arson incidents.

In the mobile arson category, the 2,193 "motor vehicle" arsons reported in New York State accounted for 19.2% of all arsons, while "other mobile" arsons accounted for only 0.8% of all arsons. Almost 59% of the "motor vehicle" arsons occurred outside New York City; 46.1% occurred in Other MPAs while only 12.5% occurred in Other Areas.

Statewide, the months of May and September had the most arson cases, 1,029 and 1,018, respectively (Table 2). In New York City, September was the month with the most arson cases (680) while in the areas outside New York City the month of May had the most cases (411). Statewide, the month of December had the least number of arson cases (772); this pattern was consistent across all three regions.

Abandoned Structure Arsons

The 2,480 arsons that occurred in abandoned structures accounted for 21.7% of all arsons in New York State (Tables 3 and 4). In New York City 26.6% of all arsons involved abandoned structures; such arsons accounted for 15.8% of Other MPAs arsons and 9.2% of the arsons in Other Areas.

Statewide, residential structures were the most common form of abandoned structures to be targets for arson, with the likelihood greater in New York City than in the other two regions of the State. Almost all arsons in the "other residential" category of abandoned structures, 96.3%, occurred in New York City, while only 29.3% of the arsons of "single occupancy" abandoned structures occurred there. Other MPAs accounted for over half, 57.4%, of all "single occupancy" abandoned structure arsons, with only 13.3% occurring in the Other Areas.

Arsons Cleared

In 1983, 1,240 arson incidents were cleared in New York State (Table 5). Of these, 83.2% were structure arsons, of which 52% were residential and 20.1% were commercial. In all three regions of the State, the majority of clearances were for arsons in the residential category. In New York City, clearances of residential arsons accounted for 70.1% of the total cleared, while in Other MPAs and Other Areas these clearances accounted for 43.8% and 41.9%, respectively, of cleared arsons.

Arson Clearance Rates

The 1983 clearance rate[1] for all arsons in New York State was 10.9% (Table 7). This relatively low clearance rate seems to reflect the extreme difficulty in solving a crime in which most of the physical evidence is destroyed.

Arson rates vary by the type of property involved. In the previous year's report the categories for 'all other structures' and 'other property' had the highest clearance rates, 27.7% and 25.0%, respectively. In 1983, however, these statewide clearance rates dropped to 13.8% and 8.8%, respectively. The "public/community" structural category showed the highest clearance rate, 21.0%. "Motor vehicle" arson had the lowest clearance rate, 7.8%.

Clearance rates in New York City ranged from 1.1% to 10.3%, with an average rate of about six incidents cleared for every 100 reported. This represents a slightly higher clearance rate than that reported in 1982 which showed an average rate of five incidents.

Clearance rates in the two other regions of the State were considerably higher, averaging approximately 19 clearances for every 100 reported arsons. There was more variation among the property types, with the lowest rates occurring in the "other mobile" category in Other MPAs and "other property" in Other Areas. "Public/community" arsons were cleared most often in both the Other MPAs and the Other Areas.

As in the previous four years, clearance rates remained relatively stable throughout the year. For the State as a whole, clearance rates ranged from a low of 8.7% in July to a high of 14.9% in March (Table 8).

Arsons Cleared Involving Persons Under Age 18

Two hundred ninty-three of the arson clearances involved persons under age 18 (Table 9). Persons in this age group accounted for 23.6% of all arson clearances in the State; this represents a slight decrease from 1982, when they accounted for 29.2% of the arson clearances. The proportion of "under 18" clearances varied among the three regions. In New York City 10.8% of the clearances involved persons "under 18" while Other MPAs had a clearance rate of 29.7% and Other Areas 30.6%.

Summary

There were 11,410 arson incidents reported in New York State in 1983. Arsons in New York City accounted for 62.3% of these incidents. Statewide, 77.4% of the reported arsons were structure arsons, 53.9% were residential arsons, and 21.7% were arsons of abandoned structures. Clearance rates for arson incidents statewide averaged 10.9%; the averages ranged from 5.8% in New York City to 23.5% in the Other Areas.

---

[1] The clearance rate is the ratio of clearances to the total number of arsons reported, expressed as a precent. Because a 1983 clearance does not necessarily reflect clearance of an offense reported in 1983, the clearance rate should be considered only as a general indicator of processing efficiency.

LIST OF FOOTNOTES
For Arson Tables 1 - 10

[1] Includes Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties.

[2] Includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

[3] Includes warehouses, garages and barns.

[4] Includes stores, restaurants and offices.

[5] Includes churches, jails, schools, colleges and hospitals.

[6] Includes out-buildings, monuments and structures under construction.

[7] Includes airplanes, boats, trailers and recreational vehicles.

[8] Includes crops, timber, fences and signs.

1983
DOMESTIC VIOLENCE IN NEW YORK STATE

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979, to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

The Uniform Crime Reporting System (UCR) is utilized by DCJS as the data collection instrument for obtaining domestic violence data from the local law enforcement agencies. The domestic violence data reflected in this report are based on those offenses which have come to the attention of law enforcement officers, regardless of whether a formal complaint was filed or an arrest made.

For New York City, the 18,752 offenses reported in 1983 is a 13.9% increase over the 16,457 reported in 1982. The large increase in reported offenses in the Suburban New York City counties (Nassau, Suffolk, Westchester and Rockland) is due to the resolution of reporting problems in Suffolk County. The Upstate counties reamins virtually unchanged from 1982.

Statewide, domestic violence offenses reported increased. A total of 38,758 offenses were reported in 1983 as opposed to 31,051 reported in 1982, an increase of 24.8%. As in prior years, this increase is largely due to improved reporting by the law enforcement agencies across the state. Although the reporting continues to improve in most areas, a good deal of work remains to be done. The Field Services and Audit Unit staff will continue to monitor the data collection activity in 1984 and will follow-up on reporting problems on an agency by agency basis.

The RESPONSE

ARRESTS

Arrests in New York State during 1983 totaled 1,086,937, a 1.0% decline from the 1,097,845 arrests in 1982[1]. Males accounted for 85.8% of those arrested and females for 14.2%.

The 173,136 (15.9%) arrests for Index offenses -- murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft -- decreased 3.2% between 1982 and 1983. Burglary and motor vehicle theft were the only Index offenses that witnessed a substantial change in arrests during this period. Arrests for burglaries dropped 11.9% and arrests for motor vehicle thefts declined 14.3%.

Adult Arrests

Adults (persons age 16 or older) accounted for 92.8% of the persons arrested in New York State. Eighty-six percent (86.0%) of the adults arrested were males and 14.0% were female. Teenage adults (persons age 16-19) accounted for 25.9% of the adults arrested.

Arrests for Index offenses accounted for 14.5% of the adult arrests. The 146,129 adult arrests in 1983 for these offenses were 2% below the 1982 total of 149,110. Teenage adults comprised 30.6% of the adults arrested for Index Offenses.

Adult arrests for violent Index offenses -- murder, non-negligent manslaughter, forcible rape, robbery, and aggravated assault -- totaled 48,519, down 0.9% from 1982. Arrests for aggravated assault constituted 49.6% of the arrests for violent offenses and robbery arrests an additional 42.7%; aggravated assault arrests rose 1.0% from 1982 while robbery arrests dropped 2.9%. Teenage adults, who comprised 28.5% of the adults arrested for violent offenses, accounted for 19.2% of the adult aggravated assault arrests and 40.8% of the adult robbery arrests.

Sixty-seven percent (66.8%) of the adult Index arrests were for non-violent Index offenses -- burglary, larceny and motor vehicle theft -- with adult teenagers constituting 31.7% of the adults arrested. Adult teenagers accounted for 42.0% of the adult burglary arrests. There was a 12.5% decrease in adult teenage arrests for burglary compared with the previous year.

Larceny was the Index offense for which adult female arrests were most numerous, accounting for 30.2% of the total adult larceny arrests.

---

[1]This arrest total includes summonses issued for violations of local ordinances.

Juvenile Arrests

New York State reported a total 78,206 juvenile arrests in 1983, 8.0% below the 84,977 juvenile arrests reported in 1982 and 26.7% below the 106,621 reported in 1981. Males represented 82.2% of the juveniles arrested and females 17.8%. Arrests of fifteen year olds accounted for 36.8% of the juveniles arrested and fourteen year olds represented an additional 26.8%.

The "all other" category for juvenile arrests dropped 41.3% from the previous year. The fraud and larceny categories with 15,943 and 14,615 arrests, respectively, had the most juvenile arrests; together they accounted for 39.1% of such arrests. Juvenile arrests constituted 21.2% of all burglary arrests in New York State, 31.8% of all criminal mischief arrests, and 38.1% of all fraud arrests.

New York City

New York City experienced a disproportionate amount of the crime in New York State. While 40.1% of the State population resides in New York City, it reported 68.3% of the total arrests. New York City accounted for 55.2% of the arrests for Index offenses statewide and 75.8% of the arrests for violent Index offenses.

Adults accounted for 94.2% of the arrests in New York City. Total adult arrests declined 0.3% from 1982. Males comprised 86.9% of the adults arrested.

The 43,109 juvenile arrests reported by New York City reflected 55.1% of the juvenile arrests statewide; fifteen year olds accounted for 41.5% of these juvenile arrests and fourteen year olds accounted for 28.5%.

Drug Arrests

A total of 71,733 drug arrests were reported in New York State in 1983, 13.1% above the 63,414 reported in 1982 and 28.8% above the 55,678 reported in 1981. New York City reported 71.8% of the drug arrests.

Marijuana arrests totaled 39,805, 55.5% of the drug arrests in New York State. The majority of marijuana arrests, 76.1%, were for use/possession with the remaining 23.9% for sale/manufacture. New York City reported 59.9% of the marijuana arrests for use/possession and 79.6% for sale/manufacture. Marijuana arrests rose 21.3% in New York City during 1983, while Upstate witnessed a 6.4% decline.

Opium/cocaine arrests accounted for 31.4% of the drug arrests statewide. Arrests for the sale/manufacture of opium/cocaine in 1983 did not change substantially from the 1982 figure; however, the use/possession of opium/cocaine rose 14.0% in New York City and 8.6% Upstate.

Arrest for "synthetic narcotics" and "other dangerous drugs" accounted for a relatively small proportion of the drug arrest statewide, 3.0% and 10.1%, respectively; however, the most significant changes in drug arrests occurred in these two categories. Arrests for the sale/manufacture of "synthetic narcotics" and "other dangerous drugs" showed an increase of 52.7% and 88.1%, respectively, from 1982 to 1983. New York City, with 76.5% of the arrests for synthetic narcotics, reported a 156.0% increase in such arrests while Upstate experienced a 34.0% decrease. New York City also experienced a 115.9% increase in arrests for the sale/manufacture of "other dangerous drugs", while Upstate arrests increased by only 14.1%.

While arrests for use/possession of synthetic narcotics in New York State increased only 5.7%, arrests for use/possession of "other dangerous drugs" increased 58.5%. New York City experienced 112.6% increase in arrests for the use/possession of "other dangerous drugs" while Upstate reported a 15.3% decrease.

Driving Under The Influence

From 1982 to 1983, arrests for driving under the influence of alcohol or drugs increased 10.4% in New York State. When examined individually, arrests for driving under the influence of alcohol increased 10.9%, while arrests for driving under the influence of drugs decreased 21.4%. Arrests for driving under the influence of alcohol accounted for 98.9% of the arrests statewide and driving under the influence of drugs for 1.1%.

Upstate reported 92.7% of the arrests for driving under the influence. Arrests for driving under the influence of alcohol rose 71.6% in New York City and 8.0% Upstate. Conversely, arrests for driving under the influence of drugs decreased by 32.6% in New York City and by 18.1% Upstate.

Race and Ethnic Origin Data

Data on race and ethnic origin were estimated for 493,198 summonses reported from New York City. Existing forms do not provide for the reporting of racial and ethnic data for New York City summonses. Arrest categories that include these estimates are: marijuana usage, criminal mischief, other gambling, liquor law violations, disorderly conduct, loitering and "all other offenses". More than 85% of the summonses are in the "all other offenses" category.

Felony Arrests

There was very little change in the number of felony arrestsreported from 1982 to 1983. Felony arrests totaled 142,485 in New York State in 1983, only 0.4% below the 143,114 reported in 1982. New York City reported a 0.6% increase, while the Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties) decreased 3.6% and Upstate decreased 2.2%.

New York City reported 68.7% of the felony arrests in New York State; Suburban Area of New York City was responsible for 10.8%, with Upstate accounting for the remaining 20.5%.

Statewide, felony drug arrests represented 13.9% of the felony arrests and showed a 6.3% increase from 1982. New York City, which reported 83.4% of the felony drug arrests in New York State, experienced a 9.5% increase in such arrests from 1982 to 1983. Conversely, the Suburban Area of New York City accounted for 6.9% of the felony drug arrests. Felony drug arrests Upstate made up the remaining 9.6% of the State total.

INDICTMENTS AND DISPOSITIONS

The following tables present data on felony indictments[1] and dispositions for 1983 and 1982. This information is obtained from a statistical reporting system based on individual reports of each indictment and each disposition submited by District Attorneys and Special Prosecutors throughout the state. The unit of count in this reporting system is the defendant/indictment; that is:

- when several defendants are named in one proceeding or indictment, each defendant is counted separately; and
- when one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The use of offender based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number -- that is, the number with an equal amount of values above and below it. As a result, median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertains to cases handled during the specified year by the Superior Courts. These dispositions may be for indictments in the same or previous years.

Defendant-Indictments

A total of 45,514 felony indictments was reported in New York State in 1983, 2.3% below the 1982 total of 46,574. New York City reported 60.4% of the felony indictments in New York State and registered a 2.0% drop in indictments. The Suburban area was down 5.2% and Upstate declined 0.6%.

Although the 1983 indictment total was down from 1982, it was the second largest number reported since the inception of the felony processing program in 1973.

From 1982 to 1983, indictments for felony drugs increased 6.1% in New York State. New York City reported a 9.2% increase and the Suburban area was up 3.5% Upstate reported a 6.8% decrease in felon drug indictments.

Class A felony drug indictments were up 21.7% in New York State; each geographical area reflected an increase.

---

[1]The indictment data also includes superior court information data.

Dispositions

The 45,360 dispositions reported in New York State in 1983 were 16.7% above the previous record of 38,873 reported in 1982.

New York City reported a 27.2% increase in dispositions compared to a 4.2% increase in the Suburban area of New York City and a 3.0% rise Upstate.

In 1983, New York City accounted for 61.0% of all dispositions in New York State, while the Suburban Area of New York City reported 15.7% and Upstate 23.2%.

The conviction rate in New York State increased from 83.2% in 1982 to 85.4% in 1983. In 1983, 91.9% of the convictions were by plea compared to 90.2% in 1982. The increase in dispositions from 1982 to 1983 was almost completely accounted for by the increase in guilty pleas.

Trials, resulting in both acquittals and convictions, registered a 2.7% increase from 1982 to 1983. In 1983, 71.9% of the trials resulted in conviction versus 74.3% in 1982.

Youthful Offender adjudications declined, decreasing from 13.1% in 1982 to 11.3% in 1983.

More than two out of three convictions resulted in some form of incarceration. State prison sentences accounted for 40.7% of the conviction total and local jail sentences with and without probation made up an additional 27.4%.

Drug Dispositions

The 6,143 drug dispositions reported in New York State in 1983 reflected a 22.5% increase over 1982.

New York City reported a 39.0% increase in drug dispositions while Suburban area was down 7.8% and Upstate declined 7.0%.

Drug dispositions from New York City made up 72.6% of the State total in 1983 compared to 64.0% in 1982. Suburban New York City reported 13.5% of the drug disposition and Upstate reported 13.7%.

Statewide, the conviction rate for drug dispositions increased from 84.0% in 1982 to 86.8% in 1983.

In New York State, Class A drug dispositions rose 5.3% from 1982 to 1983.

Processing Time

The median time from indictment to disposition for all cases increased from 115 days in 1982 to 120 days in 1983. During the same period the median time for drug dispositions also increased while the median time for Class A drug dispositoins decreased.

DCJS -- DIVISION OF CRIMINAL JUSTICE SERVICES

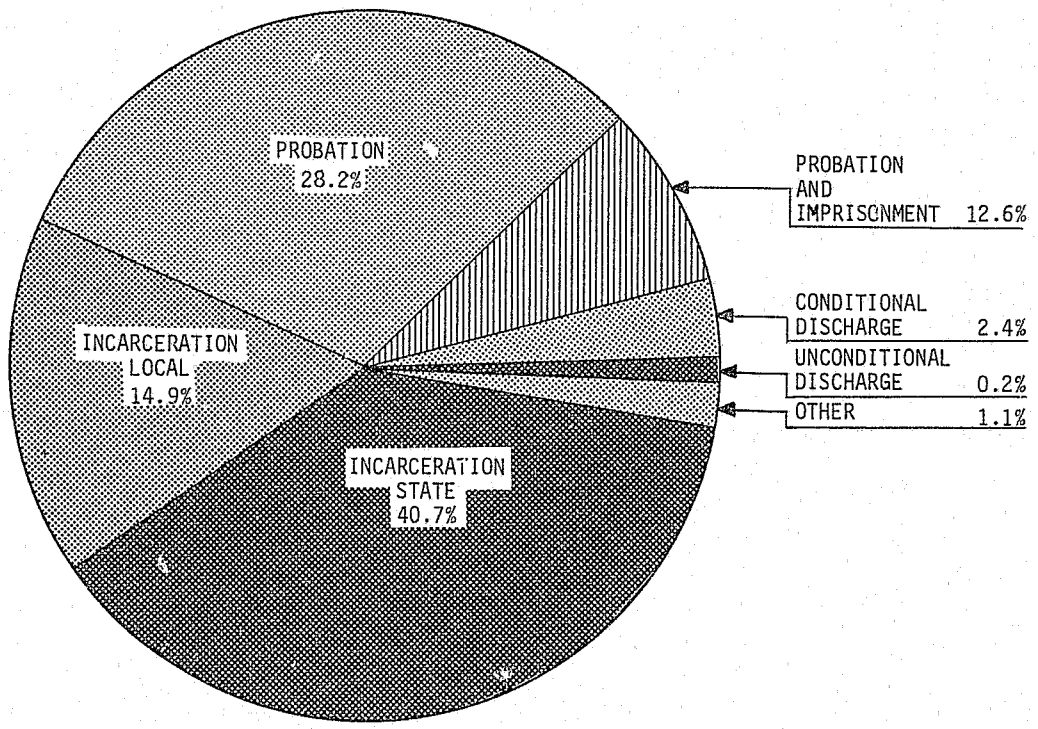
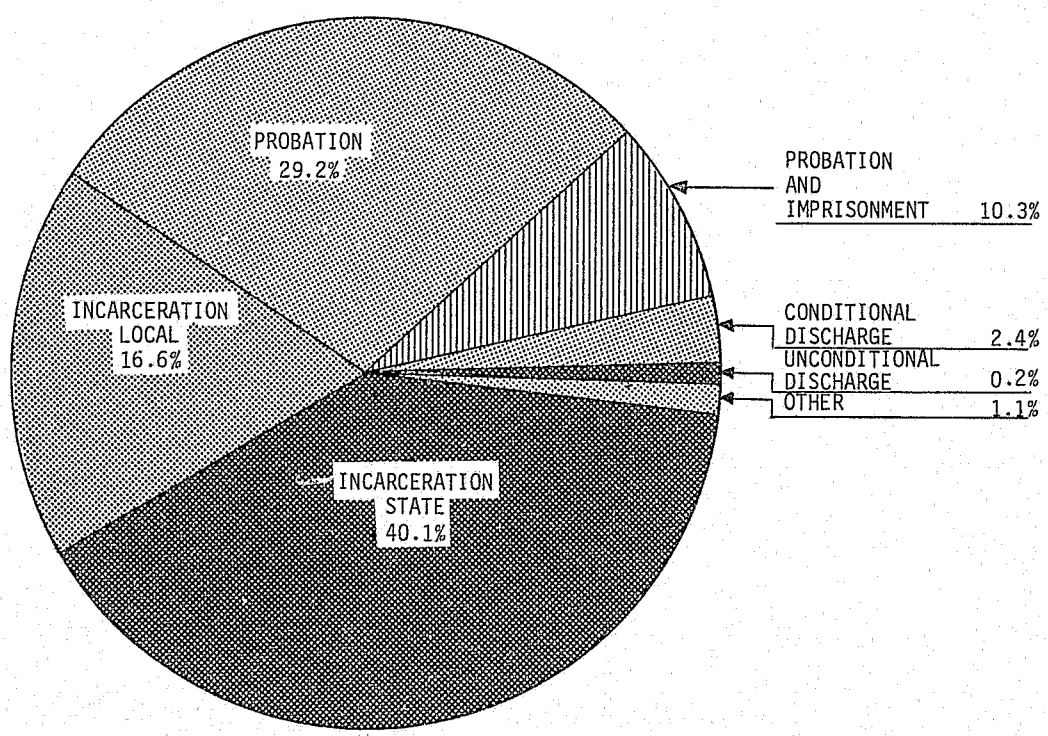
SENTENCES FOR CONVICTIONS OF FELONY DEFENDANT-INDICTMENTS
NEW YORK STATE
1983 - 1982

1983



1982



SENTENCES FOR SELECTED FELONY OFFENSES

There were 20,550 convictions for the offenses of murder, rape, robbery, assault, burglary, and larceny[1] in New York State during 1983, a 18.5% increase from the 17,342 convictions for these offenses in 1982.

Conviction Charge

The only offenses that experienced a decrease in convictions between 1982 and 1983 were: murder, down 16.4%; attempted third degree burglary, down 8.2%; and first degree larceny, down 7.1%.

Convictions for burglary increased the most dramatically; convictions were up 105.5% for first degree burglary and 56.4% for second degree burglary. Convictions for third degree robbery rose 53.3% with convictions for attempted third degree robbery increasing 40.2%. Attempted first degree larceny was up 50.0%; both second degree larceny and attempted second degree larceny increased by approximately 43.0%. Attempted first degree assault increased by 42.5%.

Type of Sentence

The distribution of sentences across the sentencing options -- unconditional discharge, conditional discharge, probation/imprisonment, probation, local prison (jail), and State prison -- is very similar to that in 1982. The most frequent sentence for felony convictions involved some form of imprisonment; 52.5% of the convictions resulted in State prison sentences, 12.4% in local prison (jail) sentences, and 11.2% in probation/imprisonment sentences.

Length of Sentence

The median time for maximum length of sentence was five to seven years. Sentences with a maximum of three years, 18.7%, were the sentences imposed most frequently. Of the 467 life sentences, 119 were for convictions that did not involve Class A conviction charges.

---

[1]Motor vehicle thefts are included in the larceny category on the following table.

PROCESSING TRENDS FOR FELONY OFFENSES AND FELONY DRUG OFFENSES

Data shown for these offenses were obtained from several sources. Offense and arrest statistics were compiled from monthly Uniform Crime Reports submitted to the Division of Criminal Justice Services by police agencies in New York State. The felony drug arrest data were obtained from fingerprint cards submitted to the Division in accordance with Section 160.20 of the Criminal Procedure Law. Data on indictment through sentence were provided on individual reports by District Attorneys and Special Prosecutors in New York State; the unit of count is defendant/indictment.

It should be noted that data for each level of processing reflects the number of charges at the various processing points during 1983. As a result, indictment through sentencing data may also reflect pre-1983 arrests. Similarly, conviction and sentencing data may also reflect pre-1983 arrests and indictments.

Felony Offenses

Felony arrests rose during 1981 and 1982, but stabilized during 1983. Similarly, felony indictments have risen steadily since 1980, but stabilized during 1983. Only felony convictions and sentences to State prisons have continued to increase during 1983.

Felony Drug Offenses

Felony drug offenses rose during 1979 at each of the selected processing points - arrest, indictment, disposition, conviction and sentence. For the most part, felony drug offenses have been rising steadily at each processing point since 1979.

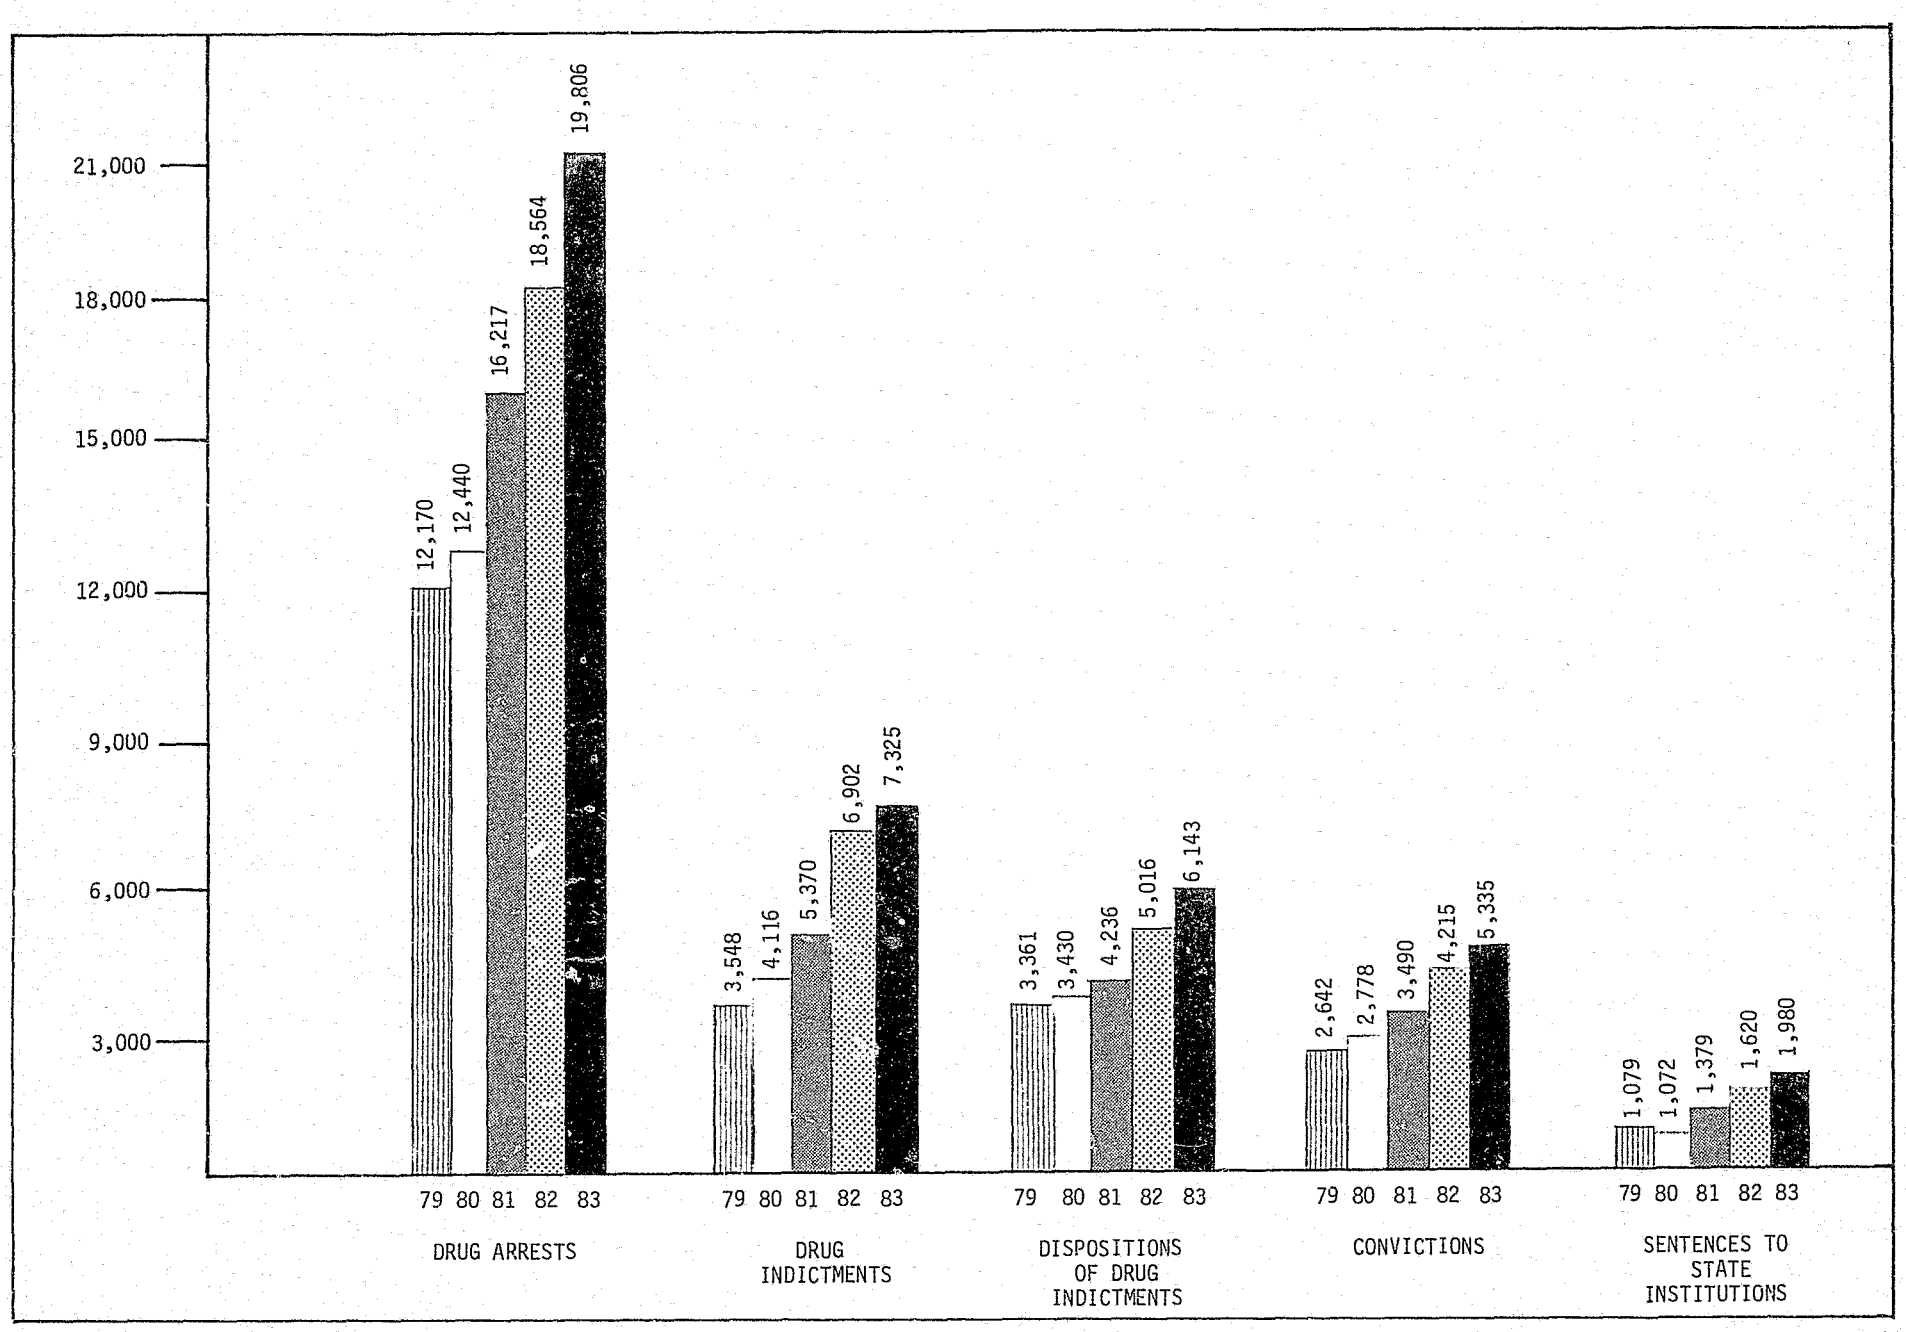
DRUG FELONY CHARGES AT SELECTED PROCESSING POINTS IN THE CRIMINAL JUSTICE SYSTEM

NEW YORK STATE

1979 - 1983



LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

During 1983, one law enforcement officer was slain in the line of duty in New York State. This was a sharp decline from the six officers killed in 1982 and the seven officers killed in 1981.

There were 5,724 officers assaulted while performing law enforcement functions, an increase of 5.1% from the 5,444 officers assaulted in 1982. In 1983, 87.6% of the assaults resulted in personal injury to the officer.

Weapons

Physical force, as in prior years, was the most common method of assault; 75.3% of the officers were assaulted in this manner. 'Other dangerous weapons' were the next most frequently used weapons in assaults (11.1%) followed by handguns at 7.4%, knives at 5.5% and lastly, other firearms at 0.7%; these percentages are similar to those reported in 1982.

Activity

As in previous years assaults occurred most frequently when officers were attempting arrests, accounting for 30.8% of the assaults. The next highest number of assaults took place during disturbance calls, accounting for 17.7% of the assaults. The fewest number of assaults, 1.3%, occured during ambushes.

The number of assaults that occurred during robberies and civil disorders decreased in 1983 by 42.2% and by 52.3%, respectively. All other activities experienced an increase in assaults with the exception of burglaries which remained constant. Assaults that occurred during the handling of prisoners showed the largest increase, 43.8%, followed by 'all other' and investigating activities which increased by 36.6% and 33.2%, respectively.

Assignments

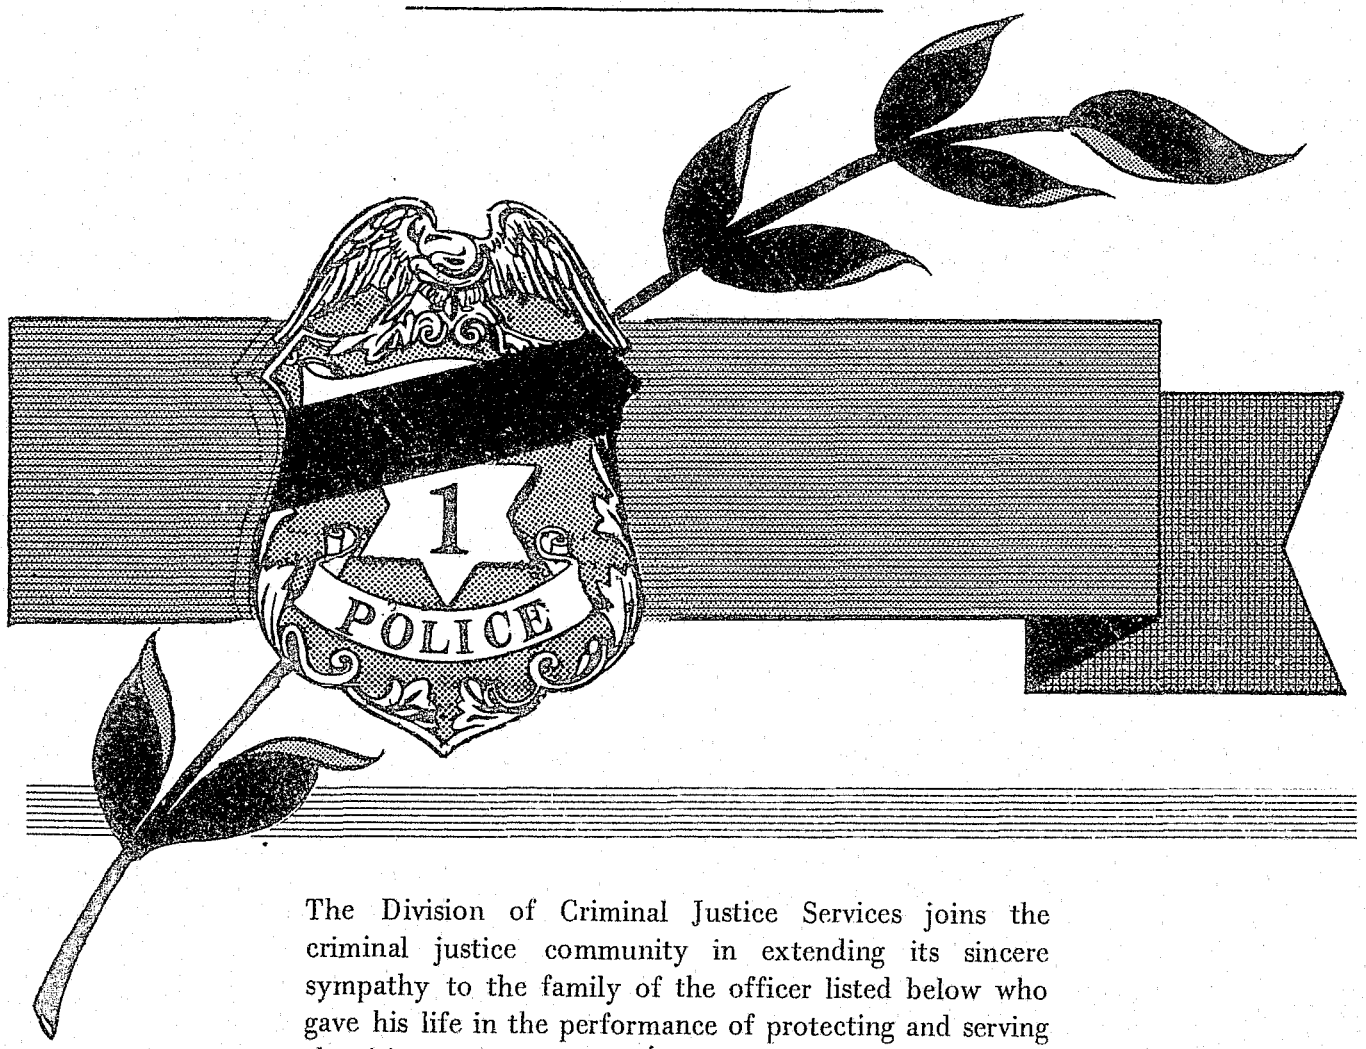
Officers assigned to two-man vehicles experienced the most assaults, 46.8%. The number of assaults increased 14.7% over 1982. In contrast, only 11.1% of the assaults were experienced by officers assigned to one-man vehicles. The 634 cases represent a 7.0% drop from the previous year. Assaults on detectives and officers on special assignments also decreased 20.2%.

Time

The likelihood that a law enforcement officer would be assaulted was greatest between 10:00 PM and 12:00 PM, the hours when 904 of the assaults took place. An assault was least likely to occur between 6:00 AM and 8:00 AM, the hours when only 142 of the assaults took place.

Forty-nine percent (48.7%) of all assaults occurred between 4:00 PM and midnight, the hours when police are usually their busiest. The hours of 8:00 AM to 4:00 PM recorded the lowest number of assaults, 23.2%.

In Memoriam

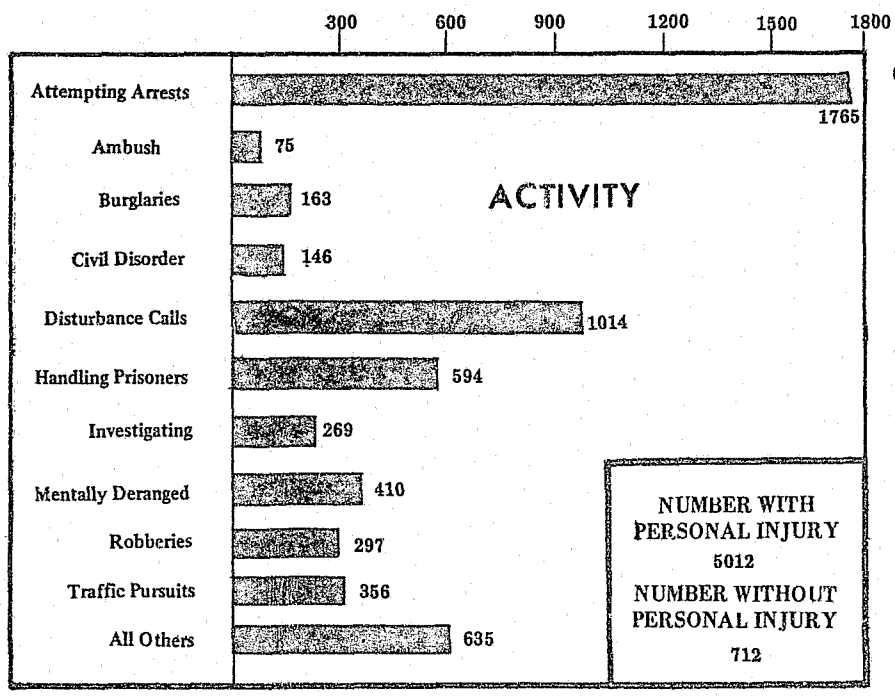


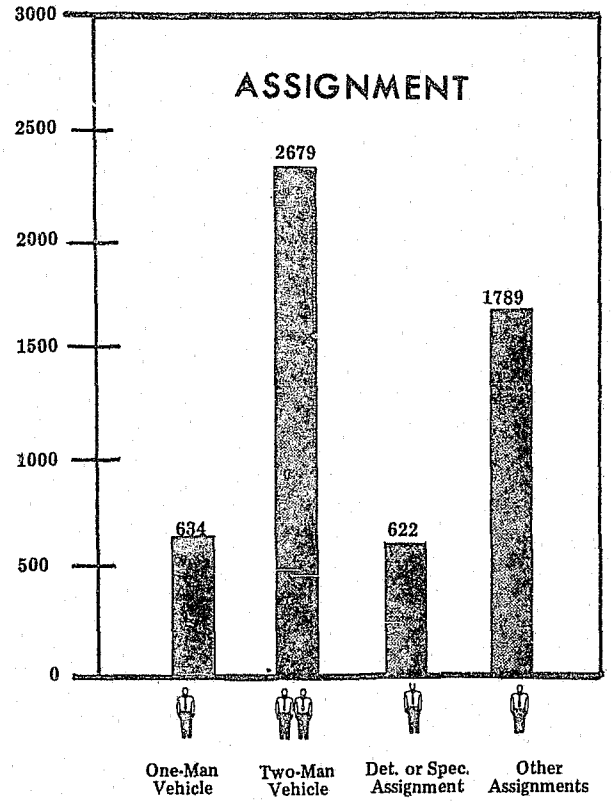
The Division of Criminal Justice Services joins the criminal justice community in extending its sincere sympathy to the family of the officer listed below who gave his life in the performance of protecting and serving the citizens of New York State during 1983:

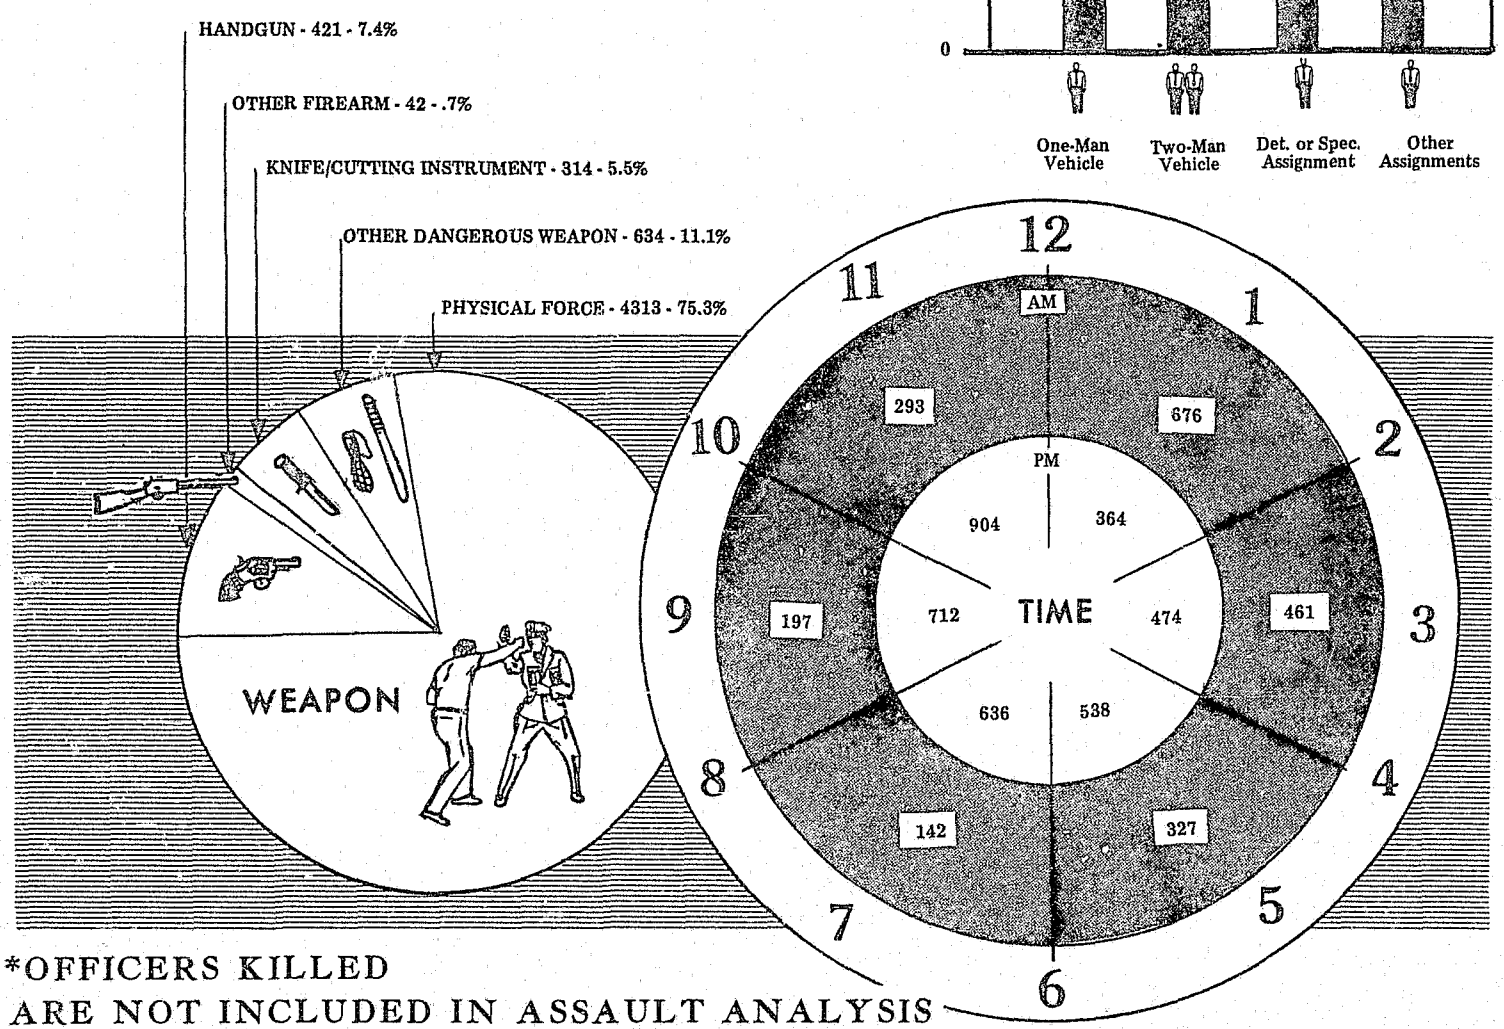
Joseph McCormack .....New York City Police Department
Slain with a 12-gauge shotgun while responding to a request for assistance from fellow officers

1983 LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED NEW YORK STATE

OFFICERS KILLED - 1
OFFICERS ASSAULTED - 5724







*OFFICERS KILLED ARE NOT INCLUDED IN ASSAULT ANALYSIS

LAW ENFORCEMENT AGENCIES

Employees

A total of 67,069 persons were employed by law enforcement agencies in New York State in 1983[1]. This figure includes both uniformed and civilian personnel and those working full and part-time as well. the 1983 figure represents an increase of 1.9% over the figure reported in 1982.

The largest department was the New York City Police Department with 29,289 employees. The next largest departments, in order of size, were the New York State Police with 4,168, Nassau County Police with 3,825, N.Y.C. Transit Authority with 3,512 and the Suffolk County Police with 3,173 employees.

Statewide, 83.1% of the employees were uniformed personnel. The number of uniformed personnel increased 1.5% between 1982 and 1983. Ninety-six percent (95.8%) of the uniformed personnel were employed full time. Females accounted for 4.8% of the uniformed personnel; the number of females employed rose 20.8% over the number employed in 1982.

Municipal police agencies employed 85.5% of the uniformed personnel in New York State; special or multiple jurisdiction agencies (parks, railroads, university campuses, etc.) employed 9.0%, and sheriffs employed the remaining 5.5%.

Expenditures

The State's law enforcement agencies submitted estimates of operating expenditures for FY 1983 that amounted to $2,121,678,751, an increase of 8.2% over FY 1982 operating expenditures. The FY 1983 expenditures were distributed across law enforcement jurisdictions as follows:

Agency	Expenditures	Percent
Sheriffs[2]	82,447,741	3.9
New York City P.D.	861,548,032	40.6
State Troops	135,692,900	6.4
Municipalities	735,738,515	34.7
Authorities & Special Agencies	306,251,563	14.4
TOTAL	2,121,678,751	100.0

---

[1]Law enforcement agencies submit agency population estimates on an annual basis; these population estimates reflect all law enforcement employees -- excluding employees assigned to jail duties -- on the agencies' payrolls as of October 31, 1983.

[2]Does not include jail operating expenditures for FY 1983.

OFFICE OF COURT ADMINISTRATION
UNIFIED COURT SYSTEM

All data in this segment are from the Caseload Activity Reporting System of the Unified Court System. Courts report data to the Office of Court Administration pursuant to the Rules of the Chief Administrator of the Courts 22 NYCRR 115.

There were 2,394,422 filings in the trial courts of the Unified Court System during 1983. Forty-nine percent (1,175,508) were filed in Criminal Courts, 31% (730,622) in Civil Courts, 15% (366,644) in Family Courts, and 5% (121,648) in Surrogates' Courts. Dispositions in the trial courts during 1983 totaled 2,452,772. Forty-five percent (1,110,869) of these dispositions occurred in Criminal Courts, 32% (769,147) in Civil Courts, 15% (376,392) in Family Courts, and 8% (196,364) in Surrogates' Courts. These figures exclude Town and Village Courts where an estimated additional two million cases were filed and disposed in 1983; these data were not available.

The tables on the following pages present caseload activity statistics by type of court.

The Court of Appeals

The Court of Appeals is the highest court in New York State. In 1983, the 684 appeals decided were comprised of 555 civil cases and 129 criminal cases (Table OCA I). In 399 of the dispositions for cases involving civil appeals the basis of jurisdiction was a reversal, modification or dissent in the Appellate Divisions. Some 114 of the civil appeals were heard by permission of either the Court of Appeals or the Appellate Divisions.

The dispositions for the 555 civil appeals included 373 affirmed, 123 reversed, 42 modified, and 17 dismissed judgements or orders. The dispositions for the 129 criminal appeals included 84 affirmed, 35 reversed, 6 modified and 4 dismissed judgements or orders.

Appellate Divisions of the Supreme Court

The Supreme Court Appellate Divisions, located in each of the four judicial departments, provide the first level of appeal from the superior trial courts. In 1983, the Appellate Divisions decided 26,052 motions, heard 5,446 oral arguments and processed 9,986 dispositions for judgments or orders appealed (Table OCA II).

The Appellate Divisions admitted 3,719 men and 1,757 women to the bar in 1983, and handled 161 attorney disciplinary proceedings.

Appellate Terms of the Supreme Court

The Appellate Terms of the Supreme Court, located in the First and Second Judicial Departments, handle civil and criminal appeals from local courts along with certain criminal appeals from county courts. The Appellate Terms received 2,613 appeals and disposed of 1,699 in 1983 (Table OCA III). The First and Second Departments together rendered 1,116 decisions, filed 918 per curiam opinions and wrote 164 memoranda (not filed). A total of 4,860 motions were heard or submitted.

Criminal Cases in Supreme and County Courts[2]

Statewide, 47,340 criminal cases were filed in the Supreme and County Courts during 1983[1] (Table OCA IV). This level of new filings was almost identical with the 1982 level of 47,364. Fifty-nine percent (28,046) of 1983 filings occurred in New York City where the level of filings dropped 1% from the previous year. New York County had the greatest volume with 10,230 filings. The county grouping commonly referred to as the "Bix Six"--Suffolk, Nassau, Westchester, Erie, Monroe, and Onondaga--had 10,871 filings, 23% of the statewide total.

Statewide, 52,049 cases reached disposition (guilty plea, trial verdict, dismissal, or other) in 1983. This total represents a 21% increase from 1982, when 43,101 cases were disposed. Sixty percent of the dispositions were in New York City; the 31,209 dispositions reflected a 30% increase over the 23,930 dispositions in 1982.

In all the Judicial Districts, more dispositions occurred in 1983 than in the previous year. Outside of New York City, the greatest increases were in the 8th and 9th Judicial Districts.

Criminal Cases in Trial Courts of Limited Jurisdiction[2]

The Criminal Court of the City of New York handled 240,596 intakes and 231,899 dispositions in 1983. City and District Courts outside of New York City processed 257,280 intakes in criminal matters and 202,811 dispositions (Table OCA V).

---

1 "Cases" are a count of "defendant-indictments," i.e., each defendant on each indictment counts as one case.

2 Felony indictments and superior court information are processed in the Criminal Terms of Supreme Court in New York City and in the County Courts outside of New York City. In several counties outside of New York City, a portion of the felony caseload is processed in the Supreme Court as well. The courts of limited jurisdiction--Criminal Court of the City of New York, District Courts of Nassau and Suffolk, and City, Town, and Village Courts outside of New York City--have original jurisdiction over felonies and complete jurisdiction over misdemeanors, violations, and infractions.

PROBATION

The New York State Division of Probation collects data from local probation departments each month and compiles this data on probation service delivery annually. The probation services include: intake for family court, investigations conducted for family and criminal courts, pre-disposition supervision and probation supervision.

HIGHLIGHTS OF 1983
BASED ON
REPORTS OF WORKLOAD IN PROBATION DEPARTMENTS

Intake Services

Cases opened for intake services decreased 6% from 151,698 in 1982 to 142,401 in 1983. The 40,123 cases opened in New York City represented 28 percent of the statewide total.

Investigations

Probation departments conducted 88,692 regular investigations (pre-sentence, pre-plea, JD and PINS), and 54,292 other investigations. This 142,984 total is a 9% increase from the 131,557 investigations conducted in 1982.

Pre-Disposition Supervision

There were 15,155 cases received for supervision prior to court disposition. This was a 1% decrease from the 15,341 received in 1982.

Probation Supervision

The Division of Probation continues its revised method of calculating probation supervision cases received. In order to eliminate duplicate counting of intrastate transfer cases, transferred-in cases are included and transferred-out cases are deducted from the cases received count.

During 1983, there were 44,062 probation supervision cases received. This was a 12% increase over 1982, when 39,247 cases were received.

CORRECTIONAL SERVICES

The New York State Department of Correctional Services has made available for inclusion in the 1983 Annual Crime and Justice Report data concerning admissions to department custody, inmates under custody, and releases from department custody. These data complement other data contained in this report and should provide a better understanding of the criminal justice process.

Under Custody Population (Exhibit 1 and 2)

The number of inmates under custody declined from 12,525 at the end of calendar year 1971 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine-year period. Contributing to this decline was the Baxtrom decision which led to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions, coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional programs for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1971. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963. This rise in the under custody population has continued every year through 1983, when the under custody population rose to 30,903 (including 414 detained parolees), an increase of 148.3 percent over a twelve-year period.

ADMISSIONS TO AND RELEASES FROM DOCS FACILITIES

CALENDAR YEAR: 1983

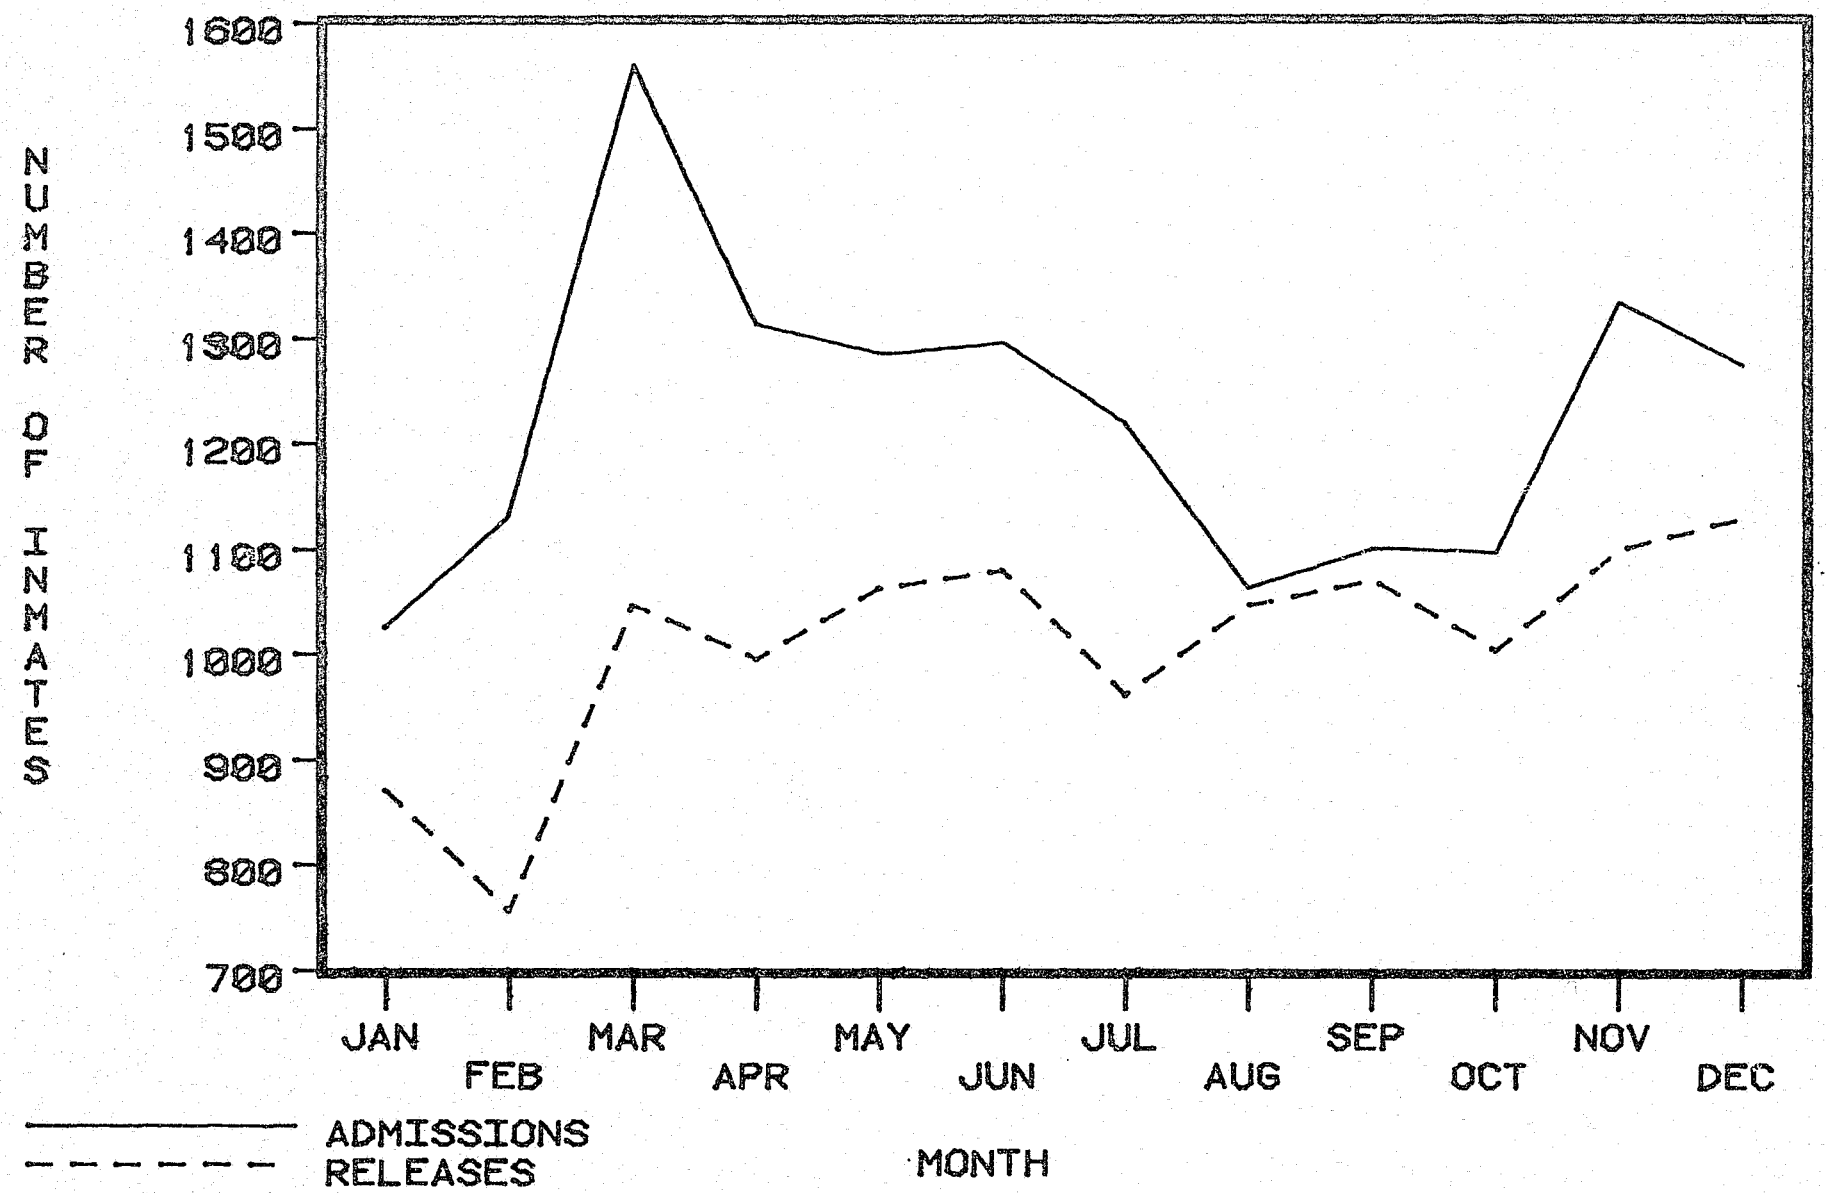

EXHIBIT 2

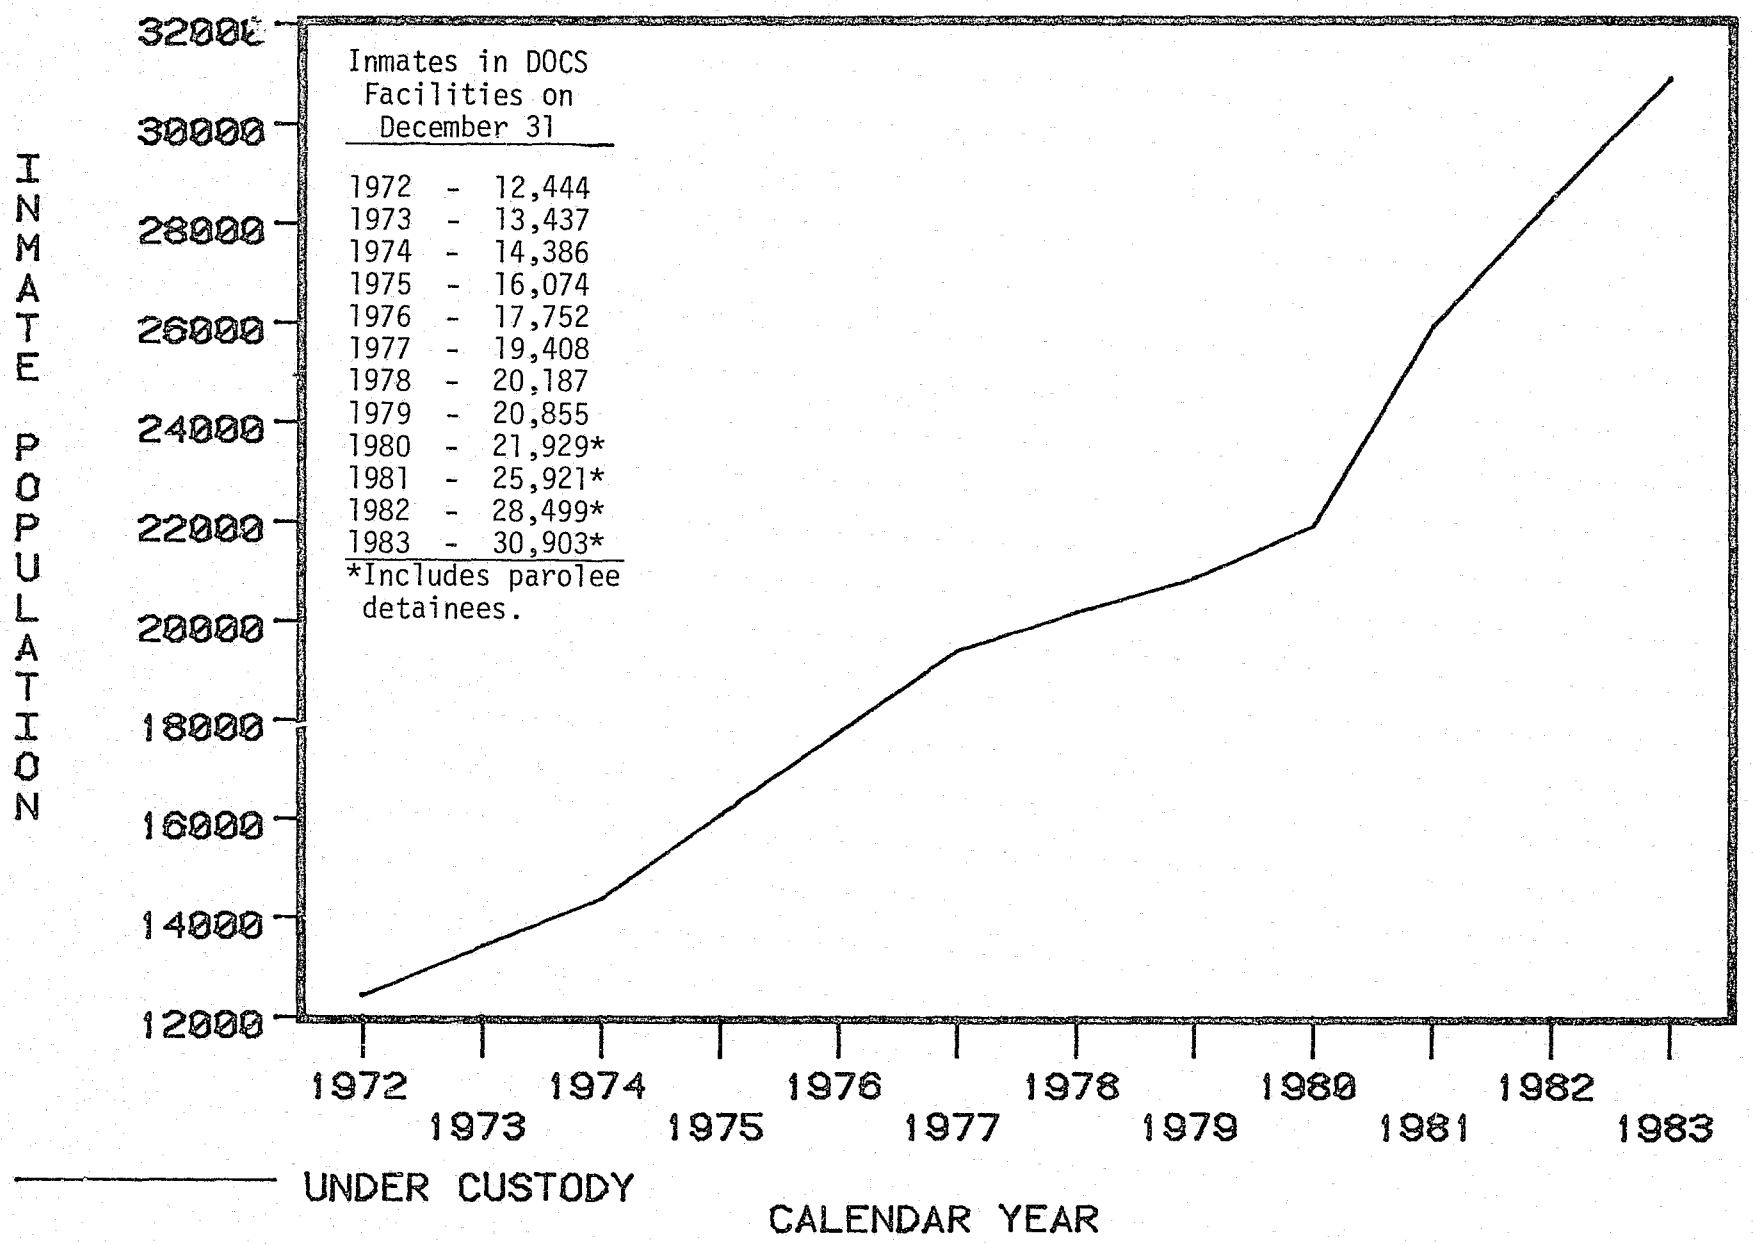
INMATES UNDER CUSTODY AT CALENDAR YEAR END

1972 - 1983



Admissions to Department Custody (Exhibit 3)

Admissions registered a steady rise from an annual total of 7,242 in 1971 to 10,272 in 1977. The number of admissions fell to 8,837 in 1978 but resumed an upward trend in 1979 reaching an all time high of 14,855 in 1983. The high number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of felony cases pending before the Supreme Court which resulted in a temporary acceleration of the already high and rising rate of court commitments. Similar efforts in 1981 and 1983 have contributed to a continued rise in commitments which reached an all time high of 12,537 in 1983. Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined to 4,250 in 1970. From this 1970 low, commitments have risen to the high of 12,537 in 1983, an increase of 195.0 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests, indictments and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 and subsequent years have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward increased court commitments has continued through 1983 reflecting the impact of the violent felony offender legislation which became effective in September 1978.

Releases from Department Custody (Exhibit 3)

Releases from DOCS custody remained relatively stable during the five-year period, 1971-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and 1980 resumed an upward trend, including all time high volumes of parole and conditional releases. A decline in 1981 releases reflects both sentencing changes under the Violent Felony Offender Law as well as change in the manner in which the minimum period of incarceration was determined for a considerable portion of the inmate population. Releases resumed their upward trend in 1982 and 1983 with successive all time highs of 10,283 and 12,309 respectively.

*Preliminary Data

Reason for Commitment (Exhibit 4)

Of the 12,537 offenders committed during 1983 to custody of the Department of Correctional Services, 42.5% (5,333) were sentenced as second or persistent felony offenders. A small portion of the commitments, 2.2% or 277 were sentenced as Youthful Offenders.

The majority (63.6% or 7,970) of the 1983 commitments had been convicted of crimes designated in the penal law as Violent Felony Offenses (VFO). Of these VFO commitments, 36.4% (2,902) had been sentenced as second felony offenders. Commitments for robbery led the VFO group followed by crimes of burglary, homicide, dangerous weapons, sex crimes, and assault.

Among commitments for other felonies, 56.7% (2,431) had been sentenced as second felony offenders. Of these 4,290 other felonies, there were 476 commitments for offenses involving violence or coercion. The largest single category in this group was robbery 3rd, which accounted for 311 commitments of whom 59.8% (186) were second felony offenders.

The remaining 3,814 other felony offenders had been committed for various property, drug and other crimes. Drug felonies was the largest category in this group with 1,625 commitments (13.0% of all commitments). The proportion of second felony offenders among drug commitments was 40.2% (653) while the proportion among property offenders (burglary 3rd, grand larceny, forgery and other) was 70.4% (1,541).

NEW YORK STATE COMMISSION OF CORRECTION

The State Commission of Correction (SCOC) has oversight responsibility for all correctional facilities within New York State. The Commission makes recommendations to the Governor, and through the Governor to the Legislature, concerning strategies for improving corrections. The Commission identifies issues that affect corrections and problems that have systemic implications and pose a threat to the safety and well-being of prisoners and staff. Included in the Commission's responsibility is the promulgation of minimum standards to serve as guidelines for correctional management, the development of policy level decisions to encourage compliance of those rules and regulations, and the offering of technical assistance.

The Commission has adopted three goals towards which its policy development and evaluative activities are directed:

1) To ensure the humane treatment of all persons confined within correctional facilities;

2) To improve the operations and programs of each correctional facility and the overall correctional system; and

3) To improve the functioning of the SCOC in the carrying out of its mandate.

The Commission of Correction is legislatively mandated to investigate, review, amend and enforce standards for safe, sanitary and orderly settings in all correctional facilities in the State of New York (State, Counties, Villages, Towns, New York City and other Cities), for both staff and inmates. To assist in this effort, the Commission offers technical assistance to facilities and agency administrators through the provision of basic and in-service training for correctional personnel. The Commission approves, and when appropriate, assists in the development of proposed new construction and serves as a central repository for information on the correctional system in New York State.

CORRECTIONAL FACILITY POPULATIONS ACROSS NEW YORK STATE

New York State's county and state correctional facilities experienced a substantial increase of prisoners in 1983. Overcrowding in correctional facilities is detrimental to the operation of both institutional programs and services, and it puts an extra burden on correctional officers.

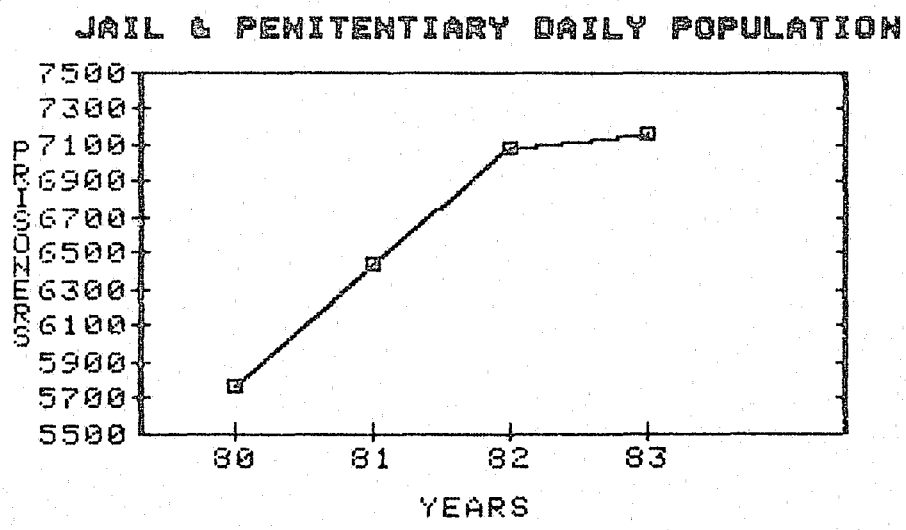
County correctional facilities, for all practical purposes, are the jails and penitentiaries operated by the 57 counties outside of New York City and are referred to as local correctional facilities. New York City maintains a centralized corrections department referred to as the New York City Department of Corrections (NYC/DOC). State correctional facilities are operated by the New York State Department of Correctional Services (DOCS).

1983 Major Activities

- County correctional facilities' prisoner populations increased 24% from 5772 prisoners in November 1980 to 7158 prisoners in November 1983.
- County correctional facilities' prisoner populations, however, decreased 2% in 1983 from 7286 prisoners in April to 7158 prisoners in November.
- County correctional facilities' annual admissions increased an absolute 10% between 1977 and 1983 from 98,681 to 108,886.
- New York City Department of Corrections (NYC/DOC) prisoner population decreased in 1983 from over 10,000 prisoners in January to approximately 9,000 prisoners in December.
- County jails and penitentiaries reported 313 unusual incidents, an increase from the 278 reported in 1982.
- Police departments reported 127 unusual incidents.
- County inmates contacted the Commission with 513 complaint letters and 198 grievance letters.
- Department of Correctional Services (DOCS) prisoner population increased in 1983 from 28,300 in January to nearly 31,000 prisoners in December.
- Department of Correctional Services (DOCS) facilities operated at as high as 18% above their housing capacity in 1983.

Prisoner populations at the 56 county correctional facilities[2] outside of New York City were measured seven times from November 1980 through November 1983. During this period of time, the aggregate prisoner population of these counties increased an absolute 21% from 5772 prisoners in November 1980, to 7158 prisoners in November 1983.

CHART I



[2]Fulton County did not operate a correctional facility in 1983. All prisoners were boarded-out to Montgomery County.

There were 108,886 admissions to local correctional facilities during 1983. The following table provides a comparison of reported total admissions for the past six years.

TABLE I

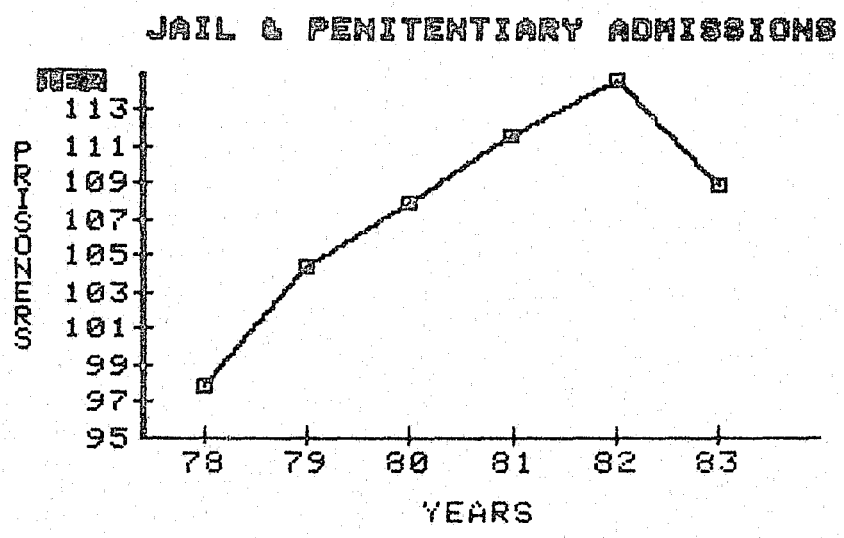
COUNTY JAILS AND PENITENTIARIES TOTAL REPORTED ANNUAL ADMISSIONS

1978 - 1982

Year	Total Admissions	Absolute Percent Change
1978	97,779	-
1979	104,339	+7%
1980	107,843	+10%
1981	111,558	+14%
1982	114,576	+17%
1983	108,886	+11%

From 1978 to 1983, total reported annual admissions to jails and penitentiaries rose an absolute 11%.

CHART II



This increase in prisoner populations has had an adverse effect on the spatial and operational logistics of county correctional facilities. Extensive use of substitute jails to house prisoners another county jail cannot accommodate, and conversion of some program/services space for housing space, are examples of logistical problems created by the increase populations.

The Commission of Correction receives unusual incidents on a daily basis from local correctional facilities as required by the Commission's Minimum Standards for Local Correctional Facilities, Part 7022, Unusual Incidents. The Commission also receives inmate complaints and grievances on a daily basis as required by Correction Law, Article 3, Section 45 (4).

There were 440 unusual incidents reported by county jails and lockups in 1983. Unusual incidents reported over the past six years have been: 542 in 1977; 591 in 1978; 428 in 1979; 454 in 1980; 402 in 1981; and 398 in 1982.

Written and telephone complaints are received by the Commission from inmates concerning numerous correctional issues. There were 513 letters received from county facility inmates in 1983 from which 842 complaints were identified. The Commission also receives grievances from inmates who are not satisfied with a resolution received at the facility level. In 1983, there were 198 grievance letters/forms received from county correctional facilities from which 205 grievance issues were identified. Complaints and grievances are received directly from inmates. However, each facility's internal complaint procedure and internal grievance procedure generally affects the number of issues resolved at the facility level. These procedures do vary among county facilities.

The following table lists in rank order by unusual incident category the number of incidents reported by county facilities for 1983. The five most frequently reported unusual incidents include: Attempted Suicide (110), Use of Force (33), Assault, Incarcerant/Incarcerant (23), Assault, Incarcerant/Personnel (23), and Escape/Abscondence (21).

TABLE III

RANK ORDER OF UNUSUAL INCIDENTS
COUNTY FACILITIES

January 1, 1983 - December 31, 1983

Use of Force	1
Escape/Abscondence	1
Attempted Escape	1
TOTAL	127

The following table lists in rank order the ten most frequently referenced complaint issues identified from the 513 letters received in 1983. The five complaint issues most frequently concerned: Medical Treatment (68), Discipline (55), Law Library/Legal Access/Notary (54), Threats/Harassment by Staff (52), and Food Services/Mess Hall (49).

TABLE V

RANK ORDER BY CATEGORY OF
COUNTY COMPLAINTS RECEIVED
1983

Complaint Categories	Complaints Identified
Medical Treatment	68
Discipline	55
Law Library/Legal Access/Notary	54
Threats/Harass. by Staff	52
Food Services/Mess Hall	49
Recreation/Leisure Activities	36
Personal Hygiene/Grooming	29
Visiting	28
Personnel/Inmate Assault	25
General Correspondence	25

A total of 198 grievance letters/forms were received from local correctional facilities in 1983. Several of the grievance letters contained more than one grievance issue. The total number of grievance issues identified was 205.

It should be noted that 198 grievance letters does not necessarily represent 198 individual incarcerants. Many individuals submitted more than one grievance. The most noteworthy was a county inmate who submitted 43 out of 69 grievances in one county. These same 43 grievances represent 21.7% of the total number of grievances received in 1983.

Of the 205 identified, Table VI displays in rank order by issue, the ten most often referenced grievance issues in 1983. The five most frequently grieved issues concerned: Medical Treatment (32), Discipline (20), Threats/Harassment by Staff (18), Food Services/Mess Hall (17), and General Correspondence (14).

Phone Home Program	12
Personal Property Claims/Confiscation	9
Grievance Mechanism	9
Visiting	8

Correction Law also requires the Commission to respond to grievances, complaints, and unusual incidents originating from state correctional facilities. In 1983, the population in these facilities rose from 28,300 in January to 31,000 in December. Despite additional inmate space being brought on-line during the year, the Department of Correctional Services faced continual overcrowding which rose as high as 18% above capacity.

During the year, the Commission received a total of 1,040 grievances from inmates in state facilities. These grievances had already been considered by various reviewing bodies within the DOCS hierarchy, including: the Inmate Grievance Resolution Committee; the Facility Superintendent; and, the Central Office Review Committee. If dissatisfied with the decision of these committees, the inmate may refer the matter to the Commission.

The five most often reported grievances were as follows: 256 were related to medical issues; 68 involved the Package Room; 57 were concerning disciplinary procedures; 49 specified general correspondence; and, 48 regarded personal and state property claims.

As in the case of local correctional facilities, the Commission also responds to complaints and unusual incidents from state facilities.

In 1983, the Commission reviewed 1,666 non-medical complaints from state inmates and 3,386 unusual incidents.

CONCLUSION

The Commission will continue to oversee the operation of all correctional facilities in New York to insure the safe and humane custody of inmates as well as the safety and security of correctional staff. As the incarcerated population grows, the need for these efforts increases as well.

Many of the spatial and operational problems which were identified in 1982 continue to exist this year. Space for housing, services and programs is needed to accommodate both current population levels as well as anticipated growth. Without significant changes in both public attitude and criminal justice policies, sustained population growth will continue.

DIVISION FOR YOUTH

During 1983 2,395 individuals were admitted to residential facilities operated by the New York State Division for Youth. Of these 1938 were first admissions having had no prior contact with Division programs; 243 were readmissions from aftercare; and 214 had experienced previous placements with the Division (Table VI).

For those youths adjudicated Juvenile Delinquents, Restrictive Juvenile Delinquents or Juvenile Offenders, the offenses of burglary, robbery, larceny and other thefts accounted for 72.5% of the admissions. Assaults and homicides were responsible for an additional 11.1% of the admissions for this group (Table I).

Among the 2,395 admissions, 13.9% were placed in secure facilities and an additional 13.9% in limited secure facilities. The largest category among admissions was cooperative/voluntary which accounted for 27.9% of the admissions (Table II).

Juvenile Delinquent adjudications accounted for 64.0% of the admissions and Juvenile Offender adjudications an additional 12.8%. Persons In Need of Supervision were responsible for 15.0% of the 1983 admissions (Table III).

Males made up 82.4% of the admissions and females the remaining 17.6% (Table IV). Table V which lists admissions by ethnicity, shows Blacks accounting for 46.9% of the admissions, closely followed by Whites at 37.9%.

DIVISION OF PAROLE 1981-1983

Parole Board Activity

During the 1981-82 and 1982-83 fiscal years, the Parole Board conducted approximately 29,000 interviews and/or hearings in State correctional facilities to determine parole eligibility dates for certain inmates, the release readiness of eligible inmates to parole supervision and the re-release of parole violators, as well as other types of administrative hearings.

The number of release interviews conducted by the Parole Board increased from 12,481 in 1981-1982 to 15,067 in 1982-1983. In 1982-1983, each Board member conducted an average of 1,507 release interviews; the average for the preceding year was 1,040. The most notable shift was in the increased number of reappearance interviews for those inmates who were denied parole at their initial appearance and reappeared before the Board for a release decision. During the 1981-1982 period, 3,095 such inmates appeared before the Board for interviews, whereas in 1982-1983 there were 4,623 reappearances, a 49% increase.

The Parole Board granted release to 12,301 inmates during the last two fiscal years with a substantial increase in 1982-83. Release decisions were granted to 5,865 initial applicants during the two year period (inmates who became eligible for parole release after serving their minimum sentence from April 1, 1981 through March 31, 1983). Reappearance interviews resulted in 4,940 release decisions for inmates who were previously eligible for parole release, but were denied release and became eligible again. Re-release interviews for violators resulted in 1,452 inmates released to the community. Other release interviews resulted in 44 inmates being granted parole. The decisions rendered at the various release interviews are summarized in Table 1 below.

Table 1: Comparison Of Outcomes For Release Interviews

Type of Interview	Initial		Reappearance		Violator Re-Release		Other		Total	
	1981-1982	1982-1983	1981-1982	1982-1983	1981-1982	1982-1983	1981-1982	1982-1983	1981-1982	1982-1983
Released	2,762 33%	3,103 33%	1,848 60%	3,092 67%	647 67%	805 73%	35 47%	9 100%	5,292 43%	7,009 46%
Postponed	355 4%	496 5%	204 7%	267 6%	85 9%	130 12%	7 9%	- -	651 5%	893 6%
Denied	5,232 63%	5,739 62%	1,043 33%	1,264 27%	230 24%	162 15%	33 44%	- -	6,538 52%	7,165 48%
Total Interviews	8,349	9,338	3,095	4,623	962	1,097	75	9	12,481	15,067

There was a statistically significant difference between inmates granted release and those denied release at their initial appearance before the Board. Those denied release committed offenses which involved more weapon usage and a higher probability that an injury occurred than those released. Additionally, those denied release had more extensive prior criminal histories than those released. Thus, as demonstrated in Table 2, the Parole Board continues to fulfill its goal of protecting the community by adequately screening those offenders more suitable for parole from those with more severe offenses and prior records.

Table 2: Profile Of Initial Applicants Released Or Denied By the Parole Board

	1981-1982		1982-1983

Institutional Parole Services

The workload of the institutional parole staff within correctional facilities is determined by the number of incoming inmates. Institutional parole officers prepare inmates for parole release and assist the Parole Board in conducting interviews. During the last fiscal year, the institutional parole officers conducted 83,158 inmate interviews at state correctional facilities related to Parole Board appearances and pre-release counseling, a six percent increase from 1981-1982. Table 3 below displays some of the major activities of the institutional parole staff.

Table 3: Re-Entry Services' Activities During Fiscal Years 1981-1982 And 1982-1983

Activity	1981-1982	1982-1983
Parole Orientation Classes For Inmate Groups	1,297	1,119
Inmate Interviews For Parole Board Interviews	42,669	46,237
Service Interviews	23,554	23,970
Pre-Release Inmate Interviews	10,383	11,645
Inmate Group Counseling Sessions	191	187
Total	78,094	83,158

The enhancement of the role of the institutional parole officer has been a major goal of the Community Preparation Program. The institutional parole staff plays a significant part by identifying the inmates' foreseen needs and problems and including this information in the summary reports prepared for the Parole Board. By discussing factors that will be important upon an inmate's release, and recommending community program referrals, the institutional staff becomes a vital link from the institutional to the community phase.

Finally, the institutional parole officers continue to participate on the correctional temporary release committees in deciding which inmates are to be granted temporary work release, furlough and other leaves of absence for good cause. The institutional staff was also involved in committees that gave support and advice to drug and alcohol programs in several correctional facilities.

Community Supervision of Parolees

During 1982-83, there were 26,182 individuals under community parole supervision; 25,900 were under supervision in 1981-82. Approximately 9% were supervised out of state, pursuant to the Interstate Parole Compact. The number of offenders released to parole supervision has increased from 8,625 in 1981-82 to 10,629 persons in 1982-83. This represents a 23% increase in the number of inmates released from the 1981-82 fiscal year to the 1982-83 year.

Table 4: Parolee Movement And Census For Years 1981-1982 And 1982-1983

Movement/Census	1981-1982	1982-1983
April 1 Active Parolees	15,365	15,553
State Inmates Released By Board A/	5,177	6,581
State Inmates Released by CR	2,570	2,632
Local Inmates Released by Board	546	814
Cooperative Parolee Agreement from Other States	332	450
Juvenile Offenders Released B/	---	152
Total Inmates Released to Parole Supervision C/	8,625	10,629
Total Caseload Removals (Discharges and Returns) D/	8,437	8,627
Dynamic Population for Year E/	23,990	26,182
March 31 Active Parolees	15,553	17,555
Delinquent Parolees F/	3,893	3,876
Total End of Year Caseload (March 31)	19,446	21,431

A/ These individuals were actually released from state prison during the given fiscal year. The total number of releasees should not be confused with the number of inmates granted release by the Parole Board during the same year (cf., page 34). Release interviews are done two months in advance, so that the number of actual releases is usually less than the number of inmates granted release by the end of a year. Moreover, inmates granted release in March, which is the close of the fiscal year, would be counted as releasees in the new fiscal year.

B/ Juvenile offenders released during 1981-1982 were counted within their respective release type either Board or conditional release.

C/ This includes cases released to supervision both within state and out-of-state.

D/ Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

E/ Dynamic population is the cumulative number of parolees under supervision during all or any part of the year.

F/ Delinquents are those parolees carried by parole officers who are either in the stages of the violation process or are absconders. Not all delinquents in the violation process will have their parole revoked.

Outcome of Parole Supervision

The primary goals of the Division of Parole are to assist offenders released from correctional institutions to adjust to community life, and to provide community protection by preventing these individuals from re-engaging in criminal behaviors.

Parole Officers carry out these goals by supervising parolees in the community, coordinating the delivery of available social services, and helping to motivate and guide the parolees towards a more positive lifestyle. However, one must realize that not all persons will abide by their conditions of release. The Division must, therefore, fulfill the goal of community protection by returning a violator to prison.

A violation of parole occurs when an individual under supervision violates the conditions of parole in an important respect. These conditions are agreed to in writing by an inmate upon release from prison to community parole supervision. They stipulate, for example, that if the releasee absconds from supervision or re-engages in criminal activity, his/her parole is subject to revocation. The individual may consequently be returned to prison following a series of due process hearings.

In the 1982-83 period, 9% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, or illegal use of drugs). During the previous fiscal year, a higher percentage (12%) were returned.

Table 5: Outcome of Parole Supervision

Outcome Measure	1981-1982 A/	1982-1983 B/
Rate of Parolees Returned to Prison with New Court Conviction During Year	2% (N=467)	2% (N=453)
Rate of Parolees Returned to Prison for Violating Conditions of Parole During Year	10% (N=2,413)	8% (N=1,979)
Total Rate of Prison-Returns During Year	12% (N=2,880)	9% (N=2,432)

A/ Rates computed on basis of dynamic population of 23,990 parolees during April 1, 1981 through March 31, 1982.

B/ Rates computed on basis of dynamic population of 26,182 parolees during April 1, 1982 through March 31, 1983.

Parole Supervision Success Rate

In view of the data in Table 5, the parole success rate can be measured in several different ways.

- In terms of total number of parolees not returned to prison, the 1982-83 success rate was 91%, and 88% in 1981-82. This result is an indication of the Division's overall performance in deterring parolee crime and reincarceration.

- From the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. Absconding from supervision is less serious than committing a violent offense. More importantly, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the success rate was actually 98% for both fiscal years.

- Using the most rigorous definition of success, those parolees in an active reporting status, the success rate for 1981-82 was 70%; in 1982-83 it was 74%. This measure excludes parolees in either an incarcerative or absconder status. It is important to note that not all of these incarcerated or absconder parolees will have their parole revoked or ever enter the violation process.

CRIME VICTIMS BOARD

Claims Analysis

The Crime Victims Board (CVB), established August 1, 1966, compensates eligible victims who have: suffered a serious financial hardship, been physically injured, reported the crime promptly to the police, and been adjudged as being an innocent victim.

The CVB is designated as the "payer of last resort". Compensation that the CVB is able to provide includes awards for: unlimited unreimbursed medical expenses; unreimbursed loss of earnings up to a maximum of $250.00 per week; unreimbursed loss of support up to an aggregate amount of $20,000; unreimbursed funeral expenses up to a maximum of $1,500; and lastly, up to $3,000 for vocational rehabilitation. Many financial losses incurred by crime victims involve the repair or replacement of essential personal property damaged or stolen during the course of the crime. These losses, at present, are not able to be covered by the CVB, although current legislation has been introduced for just such purposes.

For fiscal year 1983-84 the CVB received 9,001 claims and expended $8,807,474 exclusively for crime victims.

All New York State law enforcement agencies and officials who have direct contact with crime victims have claims forms and information brochures on hand to give out relating to the availability of compensation from the CVB. As public awareness of the CVB is heightened, it is anticipated that there will be similar increases in claimants during the next fiscal year.

Under 1979 legislation, the Board's statutory mandate was extended to "actively speak for the rights and interests of crime victims" in the criminal justice system. This legislation added ten new powers and duties to the Board's existing statute. The Board was charged with coordinating the planning programs serving victims of crime on a statewide basis, advocating the rights and interests of crime victims before other units of government, conducting research on the problems affecting crime victims, and advising the Governor and the Legislature on laws and procedures affecting crime victims in New York State.

During 1979 the Board commenced operations of a Senior Citizens Unit. This unit is responsible for handling all claims filed by victims or their dependents who are 60 years or older and to follow up on these cases, including contact with victims or relatives, hospitals, doctors, employers, etc. The unit rendered special assistance to the elderly by assisting them in the preparation of required documentation for processing claims. The unit has significantly reduced the amount of claims that were disallowed for lack of documentation and has demonstrated that the elderly require this special assistance.

WORKLOAD SUMMARIES

Fiscal Year	Claims Received	Payments to Victims	Awards*
1967	196	55,665	43
