## Zoom VDI Plug-In Installation Instructions for MacOS

If logged into VDI, please *disconnect* your existing session before proceeding with the installation.

- 1. Download the latest **ZoomVDI\_5.13.1.universal.pkg** from <u>https://www.ojp.gov/byod</u>
- 2. Navigate to downloads and click file to launch installation
- 3. Select Continue at Welcome

	Welcome to the ZoomVDI Installer	
<ul> <li>Introduction</li> <li>Destination Select</li> <li>Installation Type</li> <li>Installation</li> <li>Summary</li> </ul>	The Zoom VDI Plugin for the Mac provides outstanding audio and video quality for Zoom Meetings and Zoom Phone when paired with the VDI Zoom Meeting Client. This package will install the Zoom VDI application into your applications directory. A Zoom VDI Uninstaller application is also provided to cleanly remove the Zoom VDI application if needed. Visit blog.zoom.us and follow @zoom By clicking "Continue", you agree to our <u>Terms of Service</u> and Privacy Statement

5. Select **Close** at successful installation

## Verification

Please note that these verification steps only apply if you have a Zoom account and can host a meeting. If you only participate in Zoom as an attendee and not as a host, you are not able to perform the verification steps.

- 1. Launch VDI desktop
- 2. Start the Zoom application
- 3. Confirm through Settings > Statistics > VDI that the VDI Plugin Status is "Connected"

Congratulations! You will now have an optimal Zoom meeting experience!
