Ann Arbor, Michigan 48106

ACKNOWLEDGEMrNT OF ASSISTANCE

All manuscripts utilizing data made available through

the Consortium should acknowledge that fact as well as

identify the original collector of the data. The ICPSR

Council urges all users of the ICPSR data facilities to

follow some adaptation of this statement with the

parentheses indicating items to be filled in appropriately

or deleted by the individual user.

In order to provide funding agencies with essential

information about the use of archival resources and to

facilitate the exchange of information about ICPSR

participants' research activities, each user of the ICPSR

data facilities is expected to send two copies of each

completed manuscript or thesis abstract to the Consortium.

Please indicate in the cover letter which data were used.

TABLE OF CONTENTS

INTRODUCTION

The Uniform Crime Reports, 1979 and 1983: Offenses Known and Clearances by Arrest files include monthly data on the number of "Part I" (Crime Index) offenses reported to police agencies (excluding arson), the number of offenses cleared by arrest (or other exceptional means) and the number of law officers killed and assaulted in 1979 and 1983. The data were originally assembled by the Federal Bureau of Investigation (FBI) from state and local law enforcement agencies participating in the UCR Program. The 1979 and 1983 ICPSR files were processed from "Return A" master tapes provided by the FBI. The 1979 file contains 1420 variables for 16,177 agencies. The 1983 file contains 1420 variables for 8365 agencies. The data are not weighted.

Each agency is identified by the following summary variables: state code, city number, SMSA core-city code, population group number and a set of three associated population and place codes to distinguish data for agencies that overlap county boundaries. Annual totals for each monthly variable are available together with variables summarizing the number of months each agency has reported.

These data are similar to the ICPSR Uniform Crime Reports, 1980: Part 1: Offenses Known and Clearances by Arrest dataset (ICPSR 9028). The principal differences between the 1980, 1979, and 1983 data are as follows. The 1980 dataset includes the Number of Persons Arrested but does not include the police assault data as they are reported on Return A. The 1979 and 1983 data files excluded the Persons Arrested data but include the total Number of Law Enforcement Officers Killed or Assaulted. All files (1980, 1979, and 1983) contain information on the Number of Offenses Known and the Number of Clearances by Arrest. Individual cases in each of these files may be uniquely identified by their respective FBI "ORI Codes."

DATA COLLECTION DESCRIPTION

UCR Program contributors compile and submit their crime data by one of two means: either directly to the FBI or through their State UCR Programs. State UCR programs frequently impose mandatory reporting requirements which have been effective in increasing both the number of reporting agencies as well as the number and accuracy of each participating agency's reports.

As of 1981, there were 40 operational state-level programs. In all, over 16,000 law enforcement agencies representing a population in excess of 220 million participated in the 1979 and 1983 FBI Uniform Crime Reports.

DATA COLLECTION PROCEDURES

A count of Crime Index offenses (murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft) that became known to law enforcement agencies in 1979 and 1983 was reported monthly. Tabulated from agency records by the FBI, the figures include all reports of Index Crimes, also known as Part I offenses (excluding arson), received from victims, officers who discovered infractions, or other sources.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, the stolen property is recovered, or prosecution undertaken. Each month, law enforcement agencies also report the total number of actual offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the physical arrest of an offender. In addition, clearances by arrest of of persons under 18 years of age are distinguished from total clearances (all ages). Finally, the total number of law enforcement officers killed or assaulted is included as it appears on the Return A reporting forms.

Each report submitted to the UCR Program was examined by the FBI for arithmetical accuracy or for deviation which may have indicated errors in reporting. In an attempt to identify unusual fluctuations in an agency's crime counts, monthly reports were compared with previous submissions by the agency or with figures by similar agencies. Noted deviations or arithmetical adjustments were brought to the attention of the State Program or the submitting agency by the FBI through correspondence. Any significant increase or decrease was made the subject of a special inquiry.

Further details regarding the Uniform Crime Reporting Program may be found in the following related publications:

Federal Bureau of Investigation. Crime in the United States: Uniform Crime Reports for the United States. Washington, D.C.: U.S. Government Printing Office, annually [1982-1983].

Federal Bureau of Investigation. Uniform Crime Reporting Handbook. Washington, D.C.: U.S. Government Printing Office, 1980.

FILE STRUCTURE

Uniform Crime Reports, 1979 and 1983: Offenses Known and Clearances by Arrest files are available from the ICPSR in two formats: card-image and OSIRIS. The card-image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case. There are 1420 variables on 16,177 cases for 1979 and 1420 variables on 8365 cases for 1983.

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

....

```
[1] VAR 0014   [2] MONTHS REPORTED       [3] MD=0
    REF 0014       [4] LOC  53 WIDTH 2   [5] DK  1 COL  53
                               [6] IMP DEC=
```

[7] Months Reported
    ----

[8] The total number of monthly reports an agency submits.

[9] Actual number is coded.

   [10] [11]

   00. 0 Months
    .
    .
   12. 12 Months

....

[1] Indicates the variable and reference numbers.
     A variable number and a reference number are
     assigned to each variable in the data collection.
     In the present codebook which documents the
     archived data collection these numbers are
     identical. Should the data be subsetted or
     rearranged by an OSIRIS program (e.g., MMP to
     intersperse data from another source, or TCOT to
     produce an analysis deck), the variable numbers
     would change to reflect the order of the new data
     collection, while the reference number would remain
     unchanged to reflect the variable number in the
     codebook describing the archived data collection.

[2]   Indicates the abbreviated variable name (maximum
       of 24 characters) used in the OSIRIS system to
       identify the variable for the user. An expanded
       version of the variable name can be found in the
       variable description list.

[3]   Indicates the code values of missing data. In
       this example, code values equal to zero are missing
       data (MD=0). Alternative statements for other vari-
       ables are "MD GE 9" or "NO MISSING DATA CODES." Some
       analysis software packages (including the OSIRIS soft-
       ware package) require that certain types of data which
       the user desires to be excluded from analysis be
       designated as "MISSING DATA," e.g., inappropriate,
       unascertained, unascertainable, or ambiguous data
       categories. Although these codes are defined as
       missing data categories, this does mean that the user
       should not or cannot use them in a substantive role
       if so desired.

[4]   Indicates the starting location and width of this
       variable when the data are stored on a magnetic tape
       in the OSIRIS format. If the variable is of a
       multiple-response type, the width referenced is that
       of a single response. In this example the variable
       named "Months Reported" is 2 columns wide
       and is located in the 53rd column within the record.

[5]   Indicates the location by deck and column(s) of
       this variable when the data are stored on cards or in
       card-image format (80-column format)

[6]   A variable containing data with implied decimals
       is denoted by the message "IMP DEC= d," where d is
       the number of decimal places implied in the variable.

[7]   This is the full text (question) supplied by the
       investigator to describe the variable. The question
       text and the numbers and letters that may appear at
       the beginning reflect the original wording of the
       questionnaire item.

[8]   Indicates an additional comment or explanation
       appended to the variable description.

[9]   The phrase "Actual number is coded" appears when
       the variable is continuous.

[10]   Indicates the code values occurring in the data for
        this variable.

[11]   Indicates the textual definitions of the codes.
        Abbreviations commonly used in the code definitions
        are "DK" (Do Not Know), "NA" (Not Ascertained), and
        "INAP" (Inappropriate).

ICPSR PROCESSING INFORMATION

    The data collection was processed according to the
standard ICPSR processing procedures. The data were checked
for illegal or inconsistent code values which, when found,
were recoded to OSIRIS missing data values. No consistency
checks were performed. Statements bracketed in "[" and "]"
signs in the body of the codebook were added by the
processors for explanatory purposes.

VAR 0016   POPULATION 1   MD=0
REF 0016   LOC   49 WIDTH 8

Population 1: Total city population or population of largest
county

The population data is reported in three separate fields:
[REF 16, REF 19, and REF 22). The three population fields
are used because some cities are located in as many as three
different counties.

For cities located in only one county, the first three
fields [REF 16 - REF 21] contains the population of the
city, the code for the county in which it is located, and
the code of the SMSA in which it is located (if any), with
the remaining fields [REF 19 - REF 21] filled with zeros.

For cities located in more than one county, data will be
reported for the component counties by population size from
largest to smallest. The first set of fields (REF 16 - REF
21) contain information for the county with the largest
population, the second set of fields (REF 19 - REF. 21)
contain information for the county with the second largest
population, and the third field (REF 22 - REF 21) contains
information for the third largest county.

The total population of the city is always equal to the sum
of the three population variables [REF 16 , REF 19, and REF
25].

     Actual number is coded

GLOSSARY

The following is provided by the ICPSR as a general definitional reference to the content of the variables described above. The source for these definitions is the Uniform Crime Reporting Handbook (Federal Bureau of Investigation, 1980).

According to Uniform Crime Reporting procedures, these offense classifications are based solely upon police investigation rather than the determination of a court, medical examiner, coroner, jury, or other judicial body.

MURDER AND NON-NEGLIGENT MANSLAUGHTER - The willful killing of one human being by another. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killing of felons by law enforcement officers in the line of duty or by private citizens; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

NEGLIGENT MANSLAUGHTER - The killing of another person through gross negligence. This includes such things as fatal firearms accidents. Traffic fatalities are specifically excluded.

FORCIBLE RAPE - The carnal knowledge of a female forcibly and against her will. Statutory rape (without force) and other sex offenses against females are not included. Assaults or attempts to commit forcible rape are included in a separate count entitled ATTEMPTED FORCIBLE RAPE. Sex attacks on males are classified either as assaults or "other sex offenses" and are not included here.

ROBBERY - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or putting the victim in fear. Separate counts for FIREARM ROBBERY (i.e., any firearm is used as a weapon or employed as a means of force to threaten the victim or put him in fear), KNIFE OR CUTTING INSTRUMENT ROBBERY (i.e., a knife, broken bottle, razor, or other cutting instrument is employed as a weapon or as a means of force to threaten the victim or put him in fear), OTHER DANGEROUS WEAPON ROBBERY (i.e., a club, acid, used), and STRONG-ARM ROBBERY (i.e., no weapon is used, but strong-arm tactics limitied to the use of personal weapons such as hands, arms, fists, feet, teeth, etc. are employed

(CONTINUED)

etc. to deprive the victim of his property) are included.

ASSAULT - An unlawful attack by one person upon another.
The FBI's category "Aggravated Assault" is composed of four
separate types of assault variables in this dataset.
FIREARM ASSAULT includes all assaults wherein a firearm of
any type (e.g., revolver, automatic pistol, shotgun, zip
gun, rifle, etc.) is used or its use is threatened. KNIFE OR
CUTTING INSTRUMENT ASSAULT includes assaults or attempted
assaults wherein weapons such as knives, razors, hatchets,
axes, cleavers, scissors, glass, broken bottles, ice picks,
etc., are used as cutting or stabbing objects. OTHER
DANGEROUS WEAPON ASSAULT is an assault in which the use of
any object as a weapon does or could result in serious
injury. The weapons in this category would include but not
be limited to clubs, bricks, jack handles, tire irons,
bottles, or other blunt instruments used to club or beat
victims. Also included here are attacks by explosives,
acid, lye, poison, scalding water, burning, etc. HANDS,
FISTS, FEET, ETC.-- AGGRAVATED INJURY ASSAULT includes only
the attacks by use of personal weapons such as hands, fists,
feet, etc., which result in serious or aggravated injury.
Seriousness of the injury is the primary factor in
distinguishing aggravated assaults. Examples of serious
injuries are broken bones, internal injuries, wounds
requiring stitches, etc., or any injury requiring more than
usual first-aid treatment. The final category of assault in
this dataset is OTHER ASSAULTS--SIMPLE, NOT AGGRAVATED.
These include all assaults which do not involve the use of a
firearm, knife, cutting instrument, or other dangerous
weapon and in which there were no serious or aggravated
injuries to the victims.

BURGLARY - The unlawful entry of a structure to commit a
felony or a theft. This offense is broken down into three
categories: FORCIBLE ENTRY, UNLAWFUL ENTRY--NO FORCE, and
ATTEMPTED FORCIBLE ENTRY. A forcible entry or unlawful entry
where no theft or felony occurs but where acts of vandalism,
malicious mischief, etc., are committed is not scored as a
burglary provided investigation clearly establishes that the
unlawful entry was for a purpose other than to commit a
felony or theft. FORCIBLE ENTRY BURGLARY includes entry by
use of tools; breaking windows; forcing windows, doors
transoms, or ventilators; cutting screens, walls, roofs;
and where known, the use of master keys, picks, unauthorized
keys, celluloid, or other devices which leave no outward
mark but are used to force a lock. Burglary by concealment
inside a building followed by an exiting of the structure is
included in this category. UNLAWFUL ENTRY--NO FORCE is
achieved by use of an unlocked door or window and involves

(CONTINUED)

no force. Law enforcement experience is the determining
factor in deciding whether force was used in gaining entry.
The element of trespass to the structure is essential and
includes thefts from open garages, open warehouses, open or
unlocked dwellings, and open or unlocked common basement
areas in apartment houses where entry is committed other
than by the tenant who has lawful access. If the area
entered was one of open access, thefts from the area would
not involve an unlawful trespass and would be scored as
larceny. ATTEMPTED FORCIBLE ENTRY counts those situations
where a forcible entry burglary is attempted, but entry is
not accomplished.

LARCENY-THEFT - The unlawful taking, carrying, leading, or
riding away of property from the possession or constructive
possession of another. It includes offenses such as
shoplifting, pocket-picking, purse-snatching, thefts from
motor vehicles, thefts of motor vehicle parts and
accessories, bicycle thefts, etc. in which no use of force,
violence or fraud occurs. This category does not include
embezzlement, "con" games, forgery, and worthless checks.
Motor vehicle theft is also excluded from this category.
Prior to 1974 larcenies involving property valued less than
$50.00 (LARCENY- THEFT LESS THAN $50) counted as a distinct
offense, however this classification was discontinued and
these data were not separately collected as part of UCR
Return A.

MOTOR VEHICLE THEFT - The theft or attempted theft of a
motor vehicle. This definition excludes the taking of a
motor vehicle for temporary use by those persons having
lawful access. AUTO THEFT includes thefts of sedans,
stationwagons, coupes, convertibles, and other similar motor
vehicles which serve the primary purpose of transporting
people from one place to another. TRUCKS AND BUSES THEFT
includes those vehicles specifically designed to transport
people on a commercial basis and to transport cargo. It is
conceivable that certain vehicles could qualify as
automobiles, but based upon their designed use, become
trucks or buses. In UCR, the self-propelled motor home is a
truck. Some states allow a stationwagon to be registered as
a truck; however, licensing is not a determining factor and
this vehicle for UCR purposes would be classified as an
auto. OTHER VEHICLES THEFT includes all other vehicles
limited by the UCR definition, such as snowmobiles,
motorcycles, motor scooters, trailbikes, mopeds, golf carts,
etc.

GRAND TOTALS - These counts are calculated by the FBI as an
accounting device by summing counts for the seven preceding

376

(CONTINUED)

major offense classifications described above.

APPENDIX

*** NOTE 420 ***

RETURN A

The Return A is a monthly reporting form of the Uniform
Crime Reporting Program used to collect data on offenses
that become known to local, county, and state law
enforcement agencies in the United States. Part I offenses
occurring in each jurisdiction are reported on the Return A.
To be certain that a crime is not counted more than once by
agencies having overlapping jurisdictions, the follow.ig
guidelines have been developed:

1. Police count crimes that occur within the city
   limits.
2. County and state law enforcement agencies count
   crimes that happen in the county outside the city
   limits.
3. A crime that occurs in one jurisdiction should not
   be counted by another city or county even though
   more than one agency participated in the investiga-
   tion or the arrest of the subject of that crime.

1. RETURN A COLUMNS

The six columns on the Return A are as follows:

Column 1: CLASSIFICATION OF OFFENSES - Includes the
           following Part I criminal act offenses:

1. Criminal homicide:
   a. Murder and nonnegligent manslaughter
   b. Manslaughter by negligence
2. Forcible rape:
   a. Rape by force
   b. Attempts to commit forcible rape
3. Robbery:
   a. Firearm
   b. Knife or cutting instrument
   c. Other dangerous weapon
   d. Strong-arm - hands, fists, feet, etc.
4. Aggravated assault:
   a. Firearm
   b. Knife or cutting instrument
   c. Other dangerous weapon
   d. Hands, fists, feet, etc. - aggravated
      injury

       5. Burglary
          a. Forcible entry
          b. Unlawful entry - no force
          c. Attempted forcible entry
       6. Larceny-theft (except motor vehicle theft)
       7. Motor vehicle theft:
          a. Autos
          b. Trucks and buses
          c. Other vehicles
       8. Arson
          a. Structural
          b. Mobile
          c. Total other

Column 2:   OFFENSES REPORTED OR KNOWN TO POLICE - All
              actual and attempted offenses reported to an
              agency as occurring within its jurisdiction
              for the month. (Attempted murder is scored as
              an aggravated assault.) Also included in this
              column are any crimes committed in previous
              months but not reported until the current month.

Column 3:   UNFOUNDED - The total number of reported
              offenses that are false or baseless. The
              recovery of stolen property, the small value of
              stolen property, the refusal of the victim to
              prosecute, or the failure to make an arrest does
              not unfound a legitimate offense. Also, the
              findings of a coroner, court, jury, or prosecutor
              do not make unfounded offenses or attempts which
              law enforcement investigations establish to be
              legitimate. If after scoring an actual offense
              in one of the Part I categories new information
              is developed through investigation which shows
              that the offense in fact did not occur, it may
              be unfounded on the next monthly Return A
              submitted by the agency.

Column 4:   NUMBER OF ACTUAL OFFENSES - For each of the
              offenses, subtract the numbers in column 3 from
              those in column 2. The difference is the number
              of actual offenses which occurred in the juris-
              diction for the month in question.

Column 5:   TOTAL OFFENSES CLEARED - The total number of
              offenses cleared by arrest and by "exceptional"
              means, including the number of offenses cleared
              by the handling of juveniles, adults, or both.

Column 6:   NUMBER OF CLEARANCES INVOLVING ONLY PERSONS
              UNDER 18 YEARS OF AGE - The total number of
              offenses cleared by arrest, "exceptional" means,
              or other handling of persons under 18 years of

age. If an offense is cleared by arrest or exceptional means through the handling of both adults and persons under 18 years of age, the the CLEARANCE IS SCORED ONLY IN COLUMN 5. If a clearance involves only persons under age 18, the clearance is scored in both columns 5 and 6.

2. CLASSIFYING AND SCORING PROCEDURES

Classifying - Classifying is determining the proper crime categories in which to report offenses in UCR. The experience of law enforcement agencies in handling UCR data shows that for the most part offenses of law occur singly as opposed to many being committed simultaneously. In these single offense situations, it must be decided whether the crime is one of the Index offenses, and if so, it would be scored scored accordingly. However, if several offenses are committed at the same time by a person or a group of persons, a different approach must be used in classifying and scoring. The law enforcement matter in which many crimes are committed simultaneously is called a multiple-offense in this Program. As a general rule, a multiple-offense situation requires classifying each of the offenses occurring and determining which of them are Part I offenses. The HIERARCHY RULE then requires scoring of only that offense which is highest on the list of Part I offenses and ignoring all others in the incident. The HIERARCHY RULE applies ONLY to crime reporting and does not affect the number of charges for which the defendant may be prosecuted in the courts.

Scoring - Scoring is counting the number of offenses after they have been classified. The two general rules for scoring Part I crimes are directly related to the two types of crimes involved, crimes against persons and crimes against property.
   For incidents of criminal homicide, forcible rape, and aggravated assault (all crimes against persons) one offense is scored for each victim.
   Aggravated assault is a troublesome crime to score. If a number of persons are involved in a dispute or disturbance and law enforcement investigation cannot establish the aggressors from the victims, the number of offenses equals the number of persons assaulted.
   For crimes against property (robbery, burglary, larceny-theft, motor vehicle theft, and arson) count one offense for each distinct operation or attempt.
   In larceny-theft situations, whether a single article or several articles are stolen from one

place on the same occasion, only one distinct
operation has occurred and one offense is scored.
The number of offenses reported would be "one"
even if several items belonging to different people
were stolen at the same time from one place.

However, to score thefts of motor vehicles, count
one offense for each vehicle stolen and one offense
for each attempt to steal a motor vehicle. The theft
of a vehicle should be scored as such even though
recovery occurs very soon after the theft.

*** NOTE 420 ***

CLEARANCES

1. Clearances by Arrest - An offense is "cleared by
   arrest" or solved for crime reporting purposes when at
   least one person is:
   1. arrested;
   2. charged with the commission of the offense; and
   3. turned over to the court for prosecution (whether
   following arrest, court summons, or police notice).
   Although no physical arrest is made, a clearance by
   arrest can be claimed when the offender is a person
   under 18 years of age and is cited to appear in juvenile
   court or before other juvenile authorities.
       Several crimes may be cleared by the arrest of one
   person, or the arrest of many persons may clear only one
   crime. Further, if several persons are involved in the
   commission of a crime and only one is arrested and
   charged, the crime is listed on the Return A as cleared
   by arrest. When the other persons involved in the crime
   are arrested at a later date, no record will be made of
   a clearance by arrest since the offense was already
   cleared following the arrest of the first person.

2. Exceptional Clearances - In certain situations, law
   enforcement is not able to follow the three outlined
   steps under "clearance by arrest" to clear
   offenses known to them. Many times all leads have
   been exhausted and everything possible has been done in
   order to clear a case. If the following questions can
   all be answered "yes", the offense can then be cleared
   "exceptionally" for crime reporting purposes:
   1. Has the investigation definitely established the
      identity of the offender?
   2. Is there enough information to support an
      arrest charge, and turning over to the court for
      prosecution?
   3. Is the exact location of the offender known so
      that he could be taken into custody now?
   4. Is there some reason outside law enforcement
      control that precludes arresting, charging, and
      prosecuting the offender?
       It is recognized that departmental policy in various
   law enforcement agencies permits the discontinuance of
   investigation and the administrative closing of cases in
   which all investigation has been completed. The
   administrative closing of a case or the "clearing" of it
   by departmental policy does not permit exceptionally

clearing an offense unless all four questions mentioned
above can be answered "yes." THE RECOVERY OF PROPERTY
DOES NOT CLEAR A CASE FOR UCR PURPOSES. Clearances in
accordance with UCR procedures should have no affect on
whether an agency has internal policies as to "closing"
a case or discontinuing active investigation of a case.

*** NOTE 420 ***

ADJUSTMENT OF PREVIOUS RETURNS

In tabulating crime count, an agency may find that
offense totals for past months require adjustment due to
developments in the investigation or other handling of the
matter. It may be necessary to adjust totals reported to
UCR for the past month or prior months. Needed adjustments
can be made on the current month's report and do not affect
the reliability of the figures in that such adjustments tend
to equalize each other from month to month over a period of
time.

Investigation in the current month may show that actual
offenses recorded on a previous report are either:

1. unfounded;

2. require reclassification; or

3. need to be subtracted from previous totals. To
execute the above adjustments, entries are made in the
appropriate columns on the return for the current month.
