INTRODUCTION

The 1985 Nebraska Jail Population Report presents data collected by and reported to the Jail Standards Division of the Nebraska Commission on Law Enforcement and Criminal Justice. It describes prisoners held in city and county jails during calendar year 1985. All jails in Nebraska are represented in this report except for the Omaha City Jail, Douglas County Corrections, and Lancaster County Corrections.

The Nebraska Revised Statutes 83-4, 192 (1981 Cum. Supp.) calls for the establishment of a "standardized records and statistical system for criminal detention facilities." Accordingly, the Jail Standards Board established a requirement for local jails to utilize a standardized admission and release form and to submit copies to the Jail Standards Division upon processing. A copy of this form is included on the following page. This document serves as the source document for information for the statewide database used by the Nebraska Crime Commission. The three above-named facilities employ in-house automated information systems and are therefore exempt from the reporting requirement.

The information provides demographic statistics as well as jail use and prisoner flow on a statewide and local level. It must be remembered that inmates in Douglas and Lancaster counties account for approximately half of the total number of inmates in the state. Since they are not included in the report, these statistics reflect the jail population outside these metropolitan areas.

Further information or information more specific to given data or particular facilities and agencies may be available, upon request, from the Jail Standards Division.

Section I: Nebraska City and County Jails

The Jail Standards Division classifies facilities into three categories: Type I Holding Facilities (with a 24 hour limit) and Type II Holding Facilities (with a 96 hour limit) serve primarily to detain persons awaiting initial court appearances on criminal charges while Type III Detention Facilities can be used to either hold pretrial detainees or persons serving sentences. Most county jails fit this later classification as do the three County Department of Corrections (Lancaster, Douglas, Scotts Bluff). The majority of jails in Nebraska are operated by the county sheriff. Most cities and those counties (22) without facilities contract with nearby agencies for detention service. Availability of a jail is most often determined by resident population, need, and economics.

Seven cities operated jails in 1985 with two having closed (South Sioux City and Lexington). The Crete City Jail was active in 1985, but has since been closed and is not included in this total. There were two changes in county facilities. The Nuckolls County Jail reopened after renovation and the Scotts Bluff County Jail came under the jurisdiction of the newly established County Department of Corrections.

A total of 26,590 persons were held in jails outside of Lancaster and Douglas counties. Of these, 22,928 (86.2%) were held in facilities run by county sheriffs. This was 1.6% less than 1984. The 26,590 was a decrease of 8.3% over 1984.
