## Introduction

The primary purpose of this Directory is to provide criminal justice researchers with a detailed description of the types of data that are available through the Florida Statistical Analysis Center (SAC). The data bases are readily available upon written request on diskette, 9-track tape, or in printout form.

This document describes the ascii data bases formatted and maintained by the SAC. The Florida SAC uses these data to conduct analyses of the Florida criminal justice system to aid practitioners and policy makers in their efforts to combat crime.

A description of each data base is included which presents a detailed record layout of the data, the nature of the data, and the source of the information. The data files are designed to be used for time series as well as cross-sectional analysis. No personal identifiers exist in the SAC's data bases.

## The Florida Statistical Analysis Center

The Florida Statistical Analysis Center is funded by a grant from the U.S. Department of Justice, Bureau of Justice Statistics. The Florida SAC is part of the Division of Criminal Justice Information Systems, Florida Department of Law Enforcement. The primary responsibility of the SAC is to improve the effectiveness of policy making, programs development and planning through the provision of data and interpretive analysis of data concerning crime, the criminal justice system and related issues.

The Florida SAC welcomes inquiries concerning any of its research studies, methodologies, or data bases.

LATEST UPDATE:       June 30, 1987
```

SOURCE OF DATA:    University of Florida, Bureau of Economic and Business
                   Research.

FILE DESCRIPTION:  This file contains annual demographic data which breaks down
                   each county population and the state total by sex (male,
                   female), race (white, non-white), and age (all ages, 0-14, 15-
                   24, 25-44, 45-64, 65+, 18+).  The years 1981 and 1983 contain
                   zeros for all the population variables.  These data CANNOT be
                   used for time series analysis due to changes in the
                   methodologies used to measure the number of persons in each of
                   the age/sex/race cohort yearly estimates.

| DATA ELEMENT NAME | CHARACTERS | COLUMNS | RECORD |

SOURCE OF DATA:      University of Florida, Bureau of Economic and Business
                     Research.

FILE DESCRIPTION:    This file contains annual income figures for each Florida
                     county and the state total.  The income figures reflect total
                     personal income annually in millions of dollars.  The data
                     were derived by summing the quarterly figures from the file
                     "ECOPICQ.D" which contains quarterly income figures.

FILE DESCRIPTION:  This file contains quarterly UCR reported offense data for
                   each Florida law enforcement agency and the state for the
                   seven index crimes (murder, rape, robbery, aggravated assault,
                   burglary, larceny, and auto theft) and simple assaults.  Also,
                   the total number of reported crimes and the number of crimes
                   cleared are in the data base.  Quarterly population data were
                   estimated by the Florida SAC using April 1 annual estimates
                   supplied by the University of Florida's Bureau of Economic and
                   Business Research.

FILE DESCRIPTION:  These files contain the number of persons arrested by age,
                   race and sex cohorts quarterly (Jan - March, April -June,
                   etc.) in each Florida county and the state for 45 UCR crime
                   categories.  Each record is for one quarter for one of the 45
                   crime types and includes the number of arrests in that quarter
                   involving each of the specific age, sex, and race cohorts
                   described below.

## GUIDELINES GOVERNING CREATION OF FILE NAMES

The following characters must be used when creating new ascii files to be included in the Florida SAC data directory. Continuity in file names is essential in the SAC's effort to maintain and expand an organized directory of data bases. The names of data files, SPSS procedure files, and codebook wordprocessing files must contain the following characters.

**Characters**

1-3    GENERAL TYPE/SOURCE OF DATA

        DEM = Demographic
        ECO = Economic
        UCR = Uniform Crime Reports
        CCH = Computerized Criminal History

4-5    SPECIFIC TYPE OF DATA

        OF  = Offenses Reported to Police (UCR)
        AR  = Arrests Made by Police (UCR)
        EM  = Employment/Unemployment
        PI  = Personal Income
        PO  = Population
        MG  = Migration
        HS  = Household Size
        CA  = Child Abuse
        HO  = Homicide
        EE  = Law Enforcement Employees

6    GEOGRAPHICAL LEVEL OF THE DATA

        A   = Agency
        C   = County
        S   = State
        N   = National

7    TIME FRAME OF THE DATA

        D   = Daily (includes case-based versus summary records)
        M   = Monthly
        Q   = Quarterly
        A   = Annual

8    FURTHER SPECIFICATION OF THE DATA (OPTIONAL FIELD)

        F   = University of Florida Data
        U   = UCR Population Data
        A   = Age Cohorts

# FIELDS IN THE TITLE EXTENSION

1       TYPE OF FILE

      D  = Data
      S  = SPSS Systems File
      P  = SPSS Procedure File
      W  = Wordperfect Wordprocessing File

2-3     SPECIFICITY OF FILE(S) TYPE (OPTIONAL FIELD)

      68  = Indicates there is a separate file for each county
            (1-67) and the state totals (68)
      67  = Indicates there is a separate file for each county
      MA  = Males Only
      FE  = Females Only
      WH  = Whites Only
      NL  = Non=Whites Only
      WM  = White Males Only
      NM  = Non-White Males Only
      WF  = White Females Only
      NF  = Non-White Females Only
