A REVIEW OF UNIFORM CRIME REPORTS

HAWAII CRIMINAL JUSTICE DATA CENTER

MAY 1985

FOREWORD

Crime is one of the foremost items of concern to all citizens of Hawaii. As all persons are affected by crime and by the fear of crime, a need exists for timely, accurate and reliable reporting on the number and nature of crime.

The State of Hawaii, Uniform Crime Reporting Program, was established, following national guidelines, in response to this need. Under the auspices of the Department of the Attorney General, the Hawaii Criminal Justice Data Center currently compiles and analyzes Uniform Crime Reports (UCR). The data obtained through the UCR Program serve as a set of uniformly defined criminal statistics that makes possible yearly, inter-agency and national comparisons.

Crime in Hawaii, 1984, A Review of Uniform Crime Reports, is a summary of statistics on crime in the State and Counties of Hawaii. This publication serves as a tool for administrative and operational decisions, however it also serves to inform the public on the extent of criminal activity in Hawaii. The summary shows that reported Crime Index offenses have decreased significantly in the past year. However, there was one (1) category that registered an increase: forcible rape.

The Data Center wishes to express its appreciation to Joseph Cravalho, Chief of Police, Maui Police Department; Calvin Fujita, Chief of Police, Kauai Police Department; Douglas G. Gibb, Chief of Police, Honolulu Police Department; Guy Paul, Chief of Police, Hawaii Police Department; and to their respective research staffs for providing the accurate and necessary data reported herein; and to the Federal Bureau of Investigation (FBI) which provided assistance and guidance in the collection of the Uniform Crime Reports. Their assistance is gratefully acknowledged.

INTRODUCTION

Background

The Uniform Crime Reports (UCR), are a long-standing source of information about law enforcement and crime. The UCR arose from a recognized need for a nationwide system of uniform crime statistics. The Federal Bureau of Investigation (FBI) was designated to serve as the national clearinghouse for data collected under the UCR Program.

The FBI receives information either directly from a local law enforcement agency or from a state-level UCR Program. Local agencies submitting data directly to the FBI receive support and guidance from the national program. State-level programs also receive support and act as intermediaries between the FBI and local agencies. State-level programs were developed to transfer the data collection responsibility from the FBI to a state agency. This helps to stream-line operations at the national level.

Operational Criteria

The purpose of the state-level UCR Program is:

to establish, at the state-level, the responsibility to collect and report uniform crime data in accordance with standards developed jointly by the FBI and the International Association of Chiefs of Police (IACP).

The conditions under which a State program is developed and by which it must operate are set by the FBI and is designed to ensure consistency and comparability of data collected by State programs. The conditions are as follows:

(1) The State program must conform to the national Uniform Crime Reports standards, definitions, and information required. This, of course, does not prohibit the State from collecting other statistical data beyond the national collection.

(2) The State agency must have a proven, effective, mandatory, statewide program and have instituted acceptable quality control procedures.

(3) Coverage within the State by a State agency must at least be equal to that attained by Uniform Crime Reports.

(4) The State agency must have adequate field staff assigned to assist local units in record practices and crime reporting procedures.

(5) The State agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tape.

(6) The State must have the proven capability (tested over a period of time) to supply all statistical data required to the FBI in time to meet national Uniform Crime Reports publication deadlines.

(7) The FBI will continue its internal procedures of verifying and reviewing individual agency reports for both completeness and quality.

(8) The FBI will continue to have direct contact with individual reporting units within the State where necessary in connection with crime reporting matters, but will coordinate such contacts with the State agency.

(9) Upon request, the FBI will continue its training programs within the State with respect to police records and crime reporting procedures. For mutual benefit these will be coordinated with the State agency.

(10) Should circumstances develop whereby the State agency cannot provide the data required by the national program, the FBI will reinstitute a direct collection of Uniform Crime Reports from police units within the State.

Information Requirements

The Uniform Crime Reports Program has been traditionally oriented toward law enforcement statistics. The basic data elements required by the FBI, when supplemented by additional state oriented items, permit a variety of interesting statistical analyses.

Three categories of statistical reporting are utilized:

- 1 Reported Offenses
- 2 Arrest Patterns
- 3 Offense Characteristics

Reported Offenses

All offenses reported by UCR Programs are offenses known to the police. Unreported crimes are difficult to measure and so are not taken into account. Because not all crimes come to the attention of the police, the IACP chose to obtain data on seven offenses. The selection was based on the seriousness of the crime in terms of nature and/or volume, frequency of occurrence and likelihood of being reported. The seven offenses are collectively known as the Crime Index and serve as a gauge to measure the fluctuations in volume and rate of crime. The crimes include the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault; and the property crimes of burglary, larceny-theft, and motor vehicle theft. In 1979, arson was added as the eighth Crime Index offense.

The eight Crime Index offenses together with manslaughter by negligence, make up a group of crimes known as Part I offenses. Part II offenses are all other offenses not included in Part I. Information on Part I offenses include the number of crimes committed, the number cleared by arrest or by exceptional means, and the number of persons arrested. Only arrest data are reported for Part II offenses.

Because there are differences in criminal codes throughout the nation, the UCR Program uses a standard set of definitions for each offense. Law enforcement agencies submit data in accordance with these definitions without regard for local statutes. This standardization allows the aggregation of state statistics into a national total.

Arrest Patterns

Statistical reports derived from arrest information are presented with other UCR exhibits because they are primarily of interest to law enforcement agencies.

Offense Characteristics

UCR provides for the collection of information describing criminal events in detail. Law enforcement and planning agencies need this type of data because of their relationship to crime prevention. Such data can be used to analyze crimes of violence according to weapon used, day of the week, victim relationship, victim age, offender age, and the police officer as a victim. Monetary losses resulting from crime against property can also be displayed.

Recent Developments

In 1982, the U.S. Department of Justice, in conjunction with the FBI, awarded a contract to Abt Associates, Inc., to study the national program. The study is a three-phase effort: Phase I, a study of the original and current systems; Phase II, submission of recommendations for change of the existing system; and Phase III, implementation of the approved changes.

Phase I was completed in the fall of 1984 with the Law Enforcement Agency Survey. The survey was designed to obtain the views of law enforcement officials. Earlier, the views of the IACP, National Sheriff's Association (NSA), state UCR Programs, FBI UCR staff, and other interested parties were obtained. In December 1983, an interim report was issued.

Phase II began with the completion of the survey and is currently in progress.

Up-to-date information on the UCR Program review is available at the Data Center.

Hawaii UCR Program

In an effort to provide a complete picture of crime in the State of Hawaii, the Hawaii Criminal Justice Data Center presently had the responsibility of serving as the clearinghouse for Uniform Crime Reporting (UCR) data.

Uniform Crime reports on violent and property crimes in Hawaii are compiled and analyzed by the Data Center.

As crime and fear of crime are recognized by citizens of the State as a problem of highest concern, timely and accurate information is necessary to assist administrators and other public officials in assessing the problem.

The Data Center is able to provide information related to crime at the State and County levels with sufficient timeliness to alert all criminal justice agencies and the public long before national crime data are released.

Significant changes have been made to the UCRs for the State of Hawaii. Prior to the Data Center's involvement in the UCR Program, the four counties independently submitted reported offense and arrest statistics to the FBI on an optional basis.

UCRs maintained at the Data Center differ from data collected at the National level in that the unique racial breakdown for Hawaii is recognized and compiled. The FBI uses only four racial categories: White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. The Hawaii program has broken out the categories to include: Chinese, Japanese, Filipino, Samoan, Korean, Hawaiian/Part Hawaiian, and Others.

Another significant change to the UCR Program was the breakdown of racial characteristics of murder victims to conform with the arrest categories.

These changes, along with the functions of clearinghouse and data resource center have added much to the analyses of crime for Hawaii-specific problems.

CRIME IN HAWAII 1984, General Notes

Crime in Hawaii 1984, generally follows the format established for the 1983 report.

Race

In the narrative portion of this report, references to race have not been included. However, race breakdowns are still presented in many of the tables. Care should be taken when interpreting the data in these tables. The coding of race sometimes requires the coder to make a subjective judgement as to the race of an offender.

Arson

Although the property crime of arson is an Index offense, arson data is not included in the Crime Index totals in this publication. This allows comparisons to be made with previous years annual reports without having to adjust for arson. Arson is included in the "modified" Crime Index.

Trend Tables

The five year trend graphs present the percentage change for the years 1981 to 1984 compared against the base year, 1980.

Population and Other Estimates

The 1984 resident population figures used in this report are based on the Bureau of the Census (BOC), 1984 provisional state total estimate update of the 1982 BOC city and county estimates. This data was supplied by the FBI and will be used in their report. Female population is estimated as 49 percent of the resident population.

De facto population figures were taken from the State Department of Planning and Economic Development's (DPED) State of Hawaii Data Book 1984. The number of households, motor vehicles and bicycles were also obtained from the Data Book (Tables 45, 516, and 532 respectively.)

Population data broken down by race and age in Tables 10 and 11 were taken from the Data Book and is based on the BOC's 1980 census of population.

Limitations

The current program does not collect data on incidents or victim characteristics nor does it differentiate between military, visitor, or resident, victims or offenders. This data would be pertinent to any analysis of crime in Hawaii. A data system as an automated incident-based reporting system with direct data entry by agencies, would lend itself to this type of analysis. Such a system may better satisfy Hawaii's need for crime information and still meet FBI requirements.

HAWAII CRIME SUMMARY

CRIME INDEX OFFENSES

The number of Crime Index offenses reported in 1984, excluding arson, was 56,913. This is a 4.2 percent decrease from the 1983 total of 59,432. The only category that showed an increase was rape, up 4.7 percent from 1983. The largest drop was in the number of murders, a decrease of 40.4 percent.

LARGEST CATEGORY OF INDEX CRIMES

Larceny-theft remains the largest category of Crime Index offenses (67.3 percent). A total of 38,292 larceny-thefts were reported to the police in 1984, a 1.6 percent decrease from 1983.

VIOLENT CRIMES

Violent crimes totaled 2,408 in 1984, a 6.6 percent decrease over the 1983 total of 2,579. Murder, robbery, and aggravated assault decreased, while forcible rape increased. Reported murders decreased by 40.4 percent and aggravated assault by 3.8 percent. Robbery decreased by 9.6 percent, while forcible rape increased by 4.7 percent.

PROPERTY CRIMES

Crime involving property and committed without the use of force totaled 54,505, a decrease of 4.1 percent over 1983. Of the property crimes, larceny-theft accounted for 70.3 percent with burglary and motor vehicle theft accounting for 23.1 percent and 6.7 percent respectively.

Seventy-one percent of all burglaries reported were residential. More than half, or 54.7 percent, of all reported burglaries were committed during the day.

MODIFIED CRIME INDEX TOTAL

Modifying the above Crime Index total, 56,913, to include the property crime of arson results in a decrease of 4.2 percent over 1983. Modifying the property crime number results in a decrease of 4.1 percent. (Arson itself increased by 4.7 percent over 1983.)

VALUE OF PROPERTY STOLEN

The total value of property stolen in Hawaii in 1984 was \$38,904,545, down 2.4 percent from the 1983 figure of \$39,846,000. The police departments were successful in recovering 28.2 percent of the loss, or \$10,971,326, a decrease from the 29.2 percent recovery rate in 1983.

ARRESTS REPORTED FOR CRIME INDEX

There were 10,000 arrests made for Crime Index offenses in 1984, accounting for 23.2 percent of all arrests.

TOTAL ARRESTS REPORTED

A total of 43,134 arrests for all non-traffic offenses was reported in 1984. Juvenile arrests accounted for 26.6 percent of all arrestees. In comparison, 26.4 percent of the arrestees in 1983 were juveniles.

NARCOTIC DRUG ARRESTS

A total of 3,967 arrests for drug violations was reported in 1984 as compared with 4,205 in 1983. The majority of arrests (75.7 percent) were for possession of marijuana. Of the drug arrests, 20.3 percent involved juveniles.

GAMBLING ARRESTS

There were 887 arrests made on gambling charges in 1984. Of those arrestees, 10.7 percent were juveniles. In comparison, 6.7 percent of those arrested for gambling in 1983 were juveniles.

CRIME INDEX OFFENSES

Reported Crime Index offenses decreased by 4.2 percent from 59,432 reported in 1983 to 56,913 in 1984. The 1984 Crime Index total is the lowest reported since 56,039 was reported in 1976.

Violent crimes decreased by 6.6 percent from 2,579 reported in 1983 to 2,408 reported in 1984. Murder, robbery, and aggravated assault decreased, while forcible rape increased.

Property crimes decreased by 4.1 percent. The decrease is attributable to the declines in burglaries and in larceny-thefts. Property crime decreased in all counties, except for the number of motor vehicle thefts which increased in Maui, Kauai, and Hawaii Counties.

The rate per 100,000 population for Crime Index offenses in 1984 is 5,477.7. This rate is the lowest since 1973 and is a decrease of 5.7 percent over the 1983 rate of 5,808.4 per 100,000. Maui County had the highest rate, 6,874.1 per 100,000, and Hawaii County had the lowest rate, 4,502.2 per 100,000.

The national rate for 1983 was 5,158.6 per 100,000 and for Western States, 6,357.5 per 100,000. (The Western States are Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming, Alaska, California, Oregon, Washington, and Hawaii.)

Modified Crime Index Offenses Total

When arson was included with the other Crime Index offenses, the 1984 Crime Index total decreased by 4.2 percent although the number of arsons had increased. Including arson changes the total very little because arson accounts for only 0.9 percent of all Crime Index offenses.

¹ Index totals does not include arson.

Adjusted Crime Rate

The rates per 100,000 presented in this publication are based on resident population figures. This allows comparisons to be made with previous reports and with data from other states and the nation.

Since Hawaii has a large visitor population on any given day, the crime rate has been adjusted to account for that group. The table below presents both the unadjusted crime rate (based on resident population), and the adjusted crime rate (based on de facto population), excluding arson.

CRIME RATES: UNADJUSTED AND ADJUSTED STATE OF HAWAII, 1984

	Unadjusted	Adjusted
Population base as of July 1, 1984	1,039,000 ^a	1,141,000 ^b
Murder	3.3	3.0
Forcible rape	30.3	27.6
Robbery	115.7	105.3
Aggravated assault	82.5	75.1
Burglary	1,211.5	1,103.2
Larceny-theft	3,685.5	3,356.0
Motor vehicle theft	348.9	317.7
TOTAL	5,477.7	4,988.0

^aFBI estimates based on information from the Bureau of the Census.

^bState of Hawaii, Department of Planning and Economic Development, for 1984.

MURDER AND NONNEGLIGENT MANSLAUGHTER

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1983	57	5.6
1984	34	3.3
Percent Change	- 40.4	-41.1

The number of homicides known to law enforcement agencies in Hawaii decreased by 40.4 percent from 57 in 1983 to 34 in 1984. The average for the five-year period 1979 to 1983 is 57.0 homicides per year.

Twenty-five of the homicides occurred in the City and County of Honolulu. Kauai County, which reported 3 homicides in 1983, reported only 1 in 1984. Maui County reported 5 homicides while Hawaii County reported 3.

The graph below shows the percent change in the number of homicides for years 1981 through 1984 compared against the base year, 1980. All levels since 1980 were lower than the level in the base year. The lowest level was reached in 1982.

Risk

The overall risk of being murdered is very low, approximately 3 in 100,000. However, certain characteristics may increase that risk.

Sixty-five percent of the victims were males, and 50.0 percent of all victims were in the age group 25 to 39.

In 1983, the rate for both the nation and Western States was 8 per 100,000.

In 1983, 40.1 percent of the victims nationwide were in the 25 to 39 year age group, and the greatest monthly proportion of homicides was reported in December. In Hawaii in 1983, July was the month with the greatest proportion of murders reported (23.5).

The table below shows percentages of murders by month. Please note that the percentages may not add up to 100, due to rounding. This pertains to all tables of this type.

Month	MURDERS BY MONTH (Percent of annual total)		
	Hawaii 1984	Hawaii 1983	U.S. 1983
January	11.8	7.0	8.4
February	2.9	8.8	7.6
March	8.8	7.0	8.4
April	5.9	8.8	8.0
May	11.8	8.8	8.3
June	5.9	15.8	7.6
July	23.5	5.3	8.9
August	2.9	1.7	8.9
September	8.8	15.8	8.7
October	2.9	10.5	8.4
November	8.8	7.0	7.8
December	5.9	3.5	9.0

The percentage of victims killed by a firearm was 29.4 percent. The majority of the victims (52.9 percent), knew their assailants. The assailant was a relative in 17.6 percent and an acquaintance in 35.3 percent of these cases.

Arrests

Please note that arrest figures presented here may include arrests for offenses committed in previous years. This also applies to all other arrest data presented in this report.

Sixty-two arrests were made for murder in 1984 as compared to 51 in 1983. This is an increase of 21.6 percent.

In 1984, only two juveniles were arrested for murder. The age group with the greatest number of arrests (14) was the 30 to 34 year group. Most of the arrestees were male; only two were female.

FORCIBLE RAPE

Definition

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1983	301	29.4
1984	315	30.3
Percent Change	4.7	3.1

The number of rapes reported to law enforcement agencies increased by 4.7 percent from 301 reported in 1983 to 315 reported in 1984.

Kauai County reported the fewest rapes. However, the 15 reported in 1984 were 5 times the number reported in 1983, a return to the 1982 level. Rapes increased in the City and County of Honolulu by 2.4 percent. Hawaii County, however, showed a 14.8 percent decrease, and Maui County reported the same level as in 1983. (The percentages for Kauai and Hawaii Counties are large primarily because the actual numbers are relatively small. These figures should be reviewed with care.)

The graph that follows shows the percent change in the number of reported offenses for years 1981 through 1984 compared to 1980 (the base year). The relatively flat curve from 1981 to 1982 indicates that there was little change in the number of reported rapes for the year 1981 to 1982. Over the five-year period 1980 to 1984, reported rapes decreased 5.7 percent.

Risk

Since under the UCR definition of rape, only women can be victims, reported rapes per 100,000 females is a better indicator of risk. In 1984, the rate was 61.9 rapes per 100,000 females. This is a 2.5 percent increase from the previous year's rate of 60.4 per 100,000 females. In 1983, the national rate per 100,000 females was approximately 66 while, for the Western States, it was 86.

Of the 315 rapes reported, 253 or 80.3 percent were actual rapes and 62 or 19.7 percent were attempted.

In 1984, rapes were most frequently reported in June and September. In 1983, rapes were most frequently reported in August. The table below shows the percentage of reports by month for Hawaii in 1983 and 1984, and for the nation in 1983.

RAPES BY MONTH (Percent of annual total)

Month	Hawaii 1984	Hawaii 1983	U.S. 1983
January	6.0	8.0	7.3
February	5.7	7.3	6.9
March	5.7	9.3	7.6
April	6.0	8.6	7.9
May	9.2	7.0	8.5
June	14.0	5.6	8.8
July	8.3	8.3	9.9
August	8.3	12.0	10.4
September	13.0	8.0	9.1
October	8.6	10.0	8.7
November	7.0	6.6	7.7
December	8.3	9.3	7.1

Arrests

The number of arrests for rape increased by 30.9 percent from 110 in 1983 to 144 in 1984. This is partly due to the increase in the number of rapes reported.

Of the 144 arrested in 1984, 91.0 percent were adults, of which 1 was a woman. Of all age categories, 25.0 percent were in the age group 25 to 29 and 11.1 percent were in the age group 35 to 39.

ROBBERY

Definition

Robbery is the taking of, or attempt to take, anything of value from the care, custody, or control of a person or persons by force, by threat of force or violence, or by putting the victim in fear.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1983	1,330	130.0
1984	1,202	115.7
Percent Change	-9.6	-11.0

The number of reported robberies decreased 9.6 percent from 1,330 reported in 1983 to 1,202 reported in 1984. The 1984 figure is the lowest since 1,146 robberies were reported in 1977.

All counties with the exception of Maui County reported decreases. In Maui, robberies increased by 1 from 47 to 48. Robberies decreased in Honolulu by 10.1 percent, in Hawaii County by 6.7 percent and in Kauai County by 10.0 percent.

The graph below shows the percent change in the number of reported offenses for the years 1981 through 1984 compared to 1980 (the base year). The curve shows that robbery has decreased since 1980 and that the lowest level was reached in 1984.

Risk

The overall robbery rate per 100,000 population decreased 11.0 percent from 130.0 per 100,000 in 1983 to 115.7 per 100,000 in 1984. The national rate in 1983 was 214 per 100,000, and for Western States, the rate was 241 per 100,000.

All types of robberies in Hawaii decreased in 1984 with the exception of bank robberies, which increased by 32.4 percent, and residential robberies, which increased by 6.2 percent. Convenience store hold-ups declined 39.7 percent in 1984. Highway robberies declined 5.6 percent. (Highway robberies are those occurring outside of structures, such as on streets or in alleys. The chance of being robbed in this manner is approximately 1 in 2,500.) Commercial house and service station robberies declined by 9.8 percent and 40 percent, respectively.

The greatest proportion of robberies was committed in February in 1984 as compared to January in 1983. Nationally, in 1983, the greatest proportion of robberies was committed in January.

ROBBERIES BY MONTH (Percent of annual total)

Month	Hawaii 1984	Hawaii 1983	U.S. 1983
January	9.4	9.4	9.5
February	10.6	9.0	8.1
March	8.2	8.7	8.3
April	9.2	8.0	7.6
May	9.2	9.2	7.4
June	8.0	6.8	7.4
July	6.2	8.2	7.9
August	8.0	8.4	8.6
September	7.0	8.2	8.4
October	8.1	8.6	8.8
November	8.7	8.8	8.8
December	7.5	6.6	9.2

(Note: Most robberies did not involve the use of a weapon.)

Arrests

There were approximately 9.0 percent fewer arrests for robbery in 1984 than in 1983.

Of the 535 arrests in 1984, males accounted for 88.8 percent. Juveniles accounted for 30.8 percent of all arrests. The age group 18 to 19 accounted for 17.6 percent, and the age group 25 to 29 contained 14.4 percent.

Value

The estimated dollar loss decreased by 25.9 percent. In 1984, \$883,234 was taken. The average loss in 1984 was \$735 per robbery compared to \$896 in 1983.

Convenience stores and commercial houses reported the greatest increases in dollar losses in 1983, but those values were the only ones to decrease in 1984.

AGGRAVATED ASSAULT

Definition

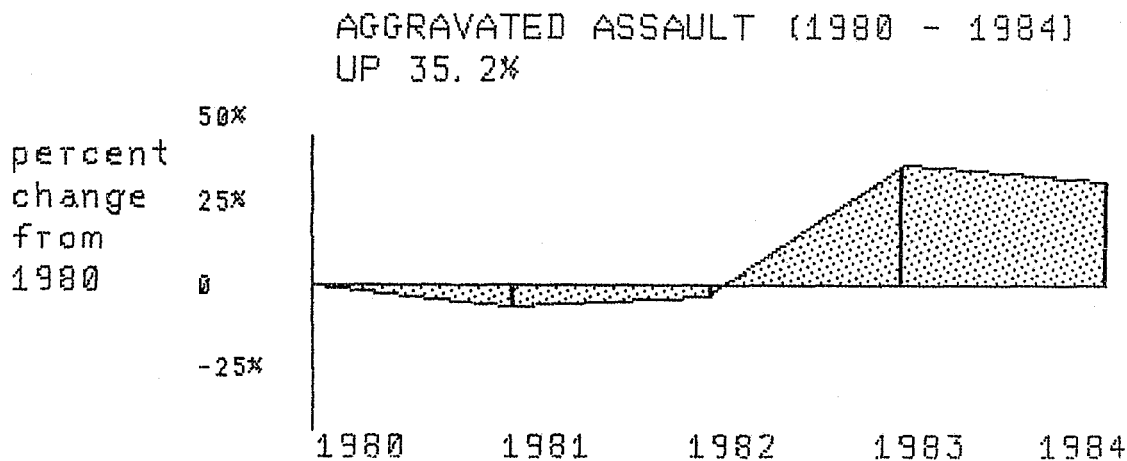

Aggravated assault is the unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since injury need not result when a gun, knife, or other weapon is used. However, there would be serious personal injury if the crime were successfully completed.

Trend

Year	Number of Offenses	Rate Per 100,000 Population
1983	891	87.1
1984	857	82.5
Percent Change	-3.8	-5.3

Aggravated assault offenses known to law enforcement agencies decreased 3.8 percent from 891 assaults in 1983 to 857 assaults in 1984. Aggravated assaults decreased by 7.7 percent in Honolulu and by 3.8 percent in Maui County. Kauai County experienced a 5.1 percent increase. Aggravated assaults in Hawaii County increased by 15.7 percent.

Since 1980 and until 1983, the number of aggravated assaults remained relatively constant as indicated by the fairly level curve in the graph below. The graph shows the percent change for years 1981 to 1984 compared to 1980.

Risk

The aggravated assault rate in 1984 was 82.5 per 100,000 population, a decrease of 5.3 percent over 1983.

In 1984, firearms were used in 26.5 percent of aggravated assaults. Knives or other cutting instruments were used 27.3 percent of the time. However, 36.2 percent of the victims were assaulted with a weapon other than a firearm or knife.

The greatest proportions of aggravated assaults in 1984 were reported in May and July. In 1983, the greatest proportions were reported in March for Hawaii and in July and August for the nation. Nationally, the incidence of aggravated assaults in 1983 peaked in the summer months. No such pattern existed for Hawaii in either 1983 or 1984.

AGGRAVATED ASSAULTS BY MONTH (Percent of annual total)

Month	Hawaii 1984	Hawaii 1983	U.S. 1983
January	7.2	8.5	7.7
February	9.3	7.4	7.1
March	7.6	10.1	7.9
April	9.0	9.1	8.1
May	10.7	7.7	8.9
June	7.0	9.7	8.9
July	10.5	8.3	9.8
August	9.6	9.4	9.7
September	6.7	8.1	8.9
October	8.1	5.5	8.5
November	6.3	7.7	7.4
December	8.1	8.4	7.3

Arrests

Arrests for aggravated assaults increased by 7.3 percent from 425 in 1983 to 456 in 1984. There were three fewer juvenile arrests in 1984 than in 1983. Adults accounted for 9 out of 10 arrests. The age group 25 to 29 accounted for 21.7 percent, or approximately 1 out of 5 arrests. One out of 10 arrestees was a female.

BURGLARY

Definition

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trend

Year	Number of Offenses	Rate Per 100,000 Population
1983	13,636	1,332.7
1984	12,588	1,211.5
Percent Change	-7.7	-9.1

Reported burglaries decreased 7.7 percent from 13,636 reported in 1983 to 12,588 in 1984. The 1984 figure is the lowest since 12,755 burglaries were reported in 1973.

All counties reported decreases. Burglary was down by 7.2 percent in Honolulu, 1.6 percent for Hawaii County, and 15.1 percent for Maui County. The decrease was 4.7 percent for Kauai County.

The graph below shows the percent change in burglary offenses for each year compared to 1980. Over the period 1980 to 1984, burglaries decreased by 29.3 percent.

Risk

The burglary rate per 100,000 population decreased by 9.1 percent from 1,332.7 to 1,211.5. A rate this low has not been recorded since 1972. The burglary rate was highest in Maui County, where the rate was 1,944.6 per 100,000 population. Hawaii County had the lowest rate, 1,114.8 per 100,000.

Nationally in 1983, the rate was approximately 1,334 per 100,000 but for Western States it was 1,677 per 100,000. This is the first year since 1975 that Hawaii's burglary rate has fallen below the national rate.

Of all burglaries, 71.1 percent were residential. Using an estimate of 313,790 households in 1984, the chance of a household being burglarized is 3 in 100.

Most residential burglaries occur during the day while most non-residential burglaries occur at night.

No force was involved in 18.6 percent of burglaries. Better security may have prevented about 20 percent of all burglaries. Attempts accounted for 8.3 percent of burglaries.

In 1983, the greatest proportion of burglaries occurred in January in Hawaii and in the nation. In 1984, the greatest proportion of burglaries occurred in March. Burglaries were more frequent during the first half of the year.

BURGLARIES BY MONTH (Percent of annual total)

Month	Hawaii 1984	Hawaii 1983	U.S. 1983
January	8.7	9.4	9.1
February	8.9	8.7	7.8
March	9.8	8.8	8.5
April	9.5	9.3	7.9
May	8.3	8.5	8.1
June	8.1	8.2	7.8
July	7.9	8.6	8.5
August	8.3	7.9	9.0
September	7.5	7.6	8.4
October	7.2	7.9	8.5
November	7.3	7.4	8.3
December	8.5	7.7	8.1

Arrests

Arrests for burglary decreased by 9.1 percent in 1984. The ratio of females to males arrested for burglary decreased from 11.7 per 100 in 1983 to 9.6 per 100 in 1984. However, the majority of arrestees (91.2 percent) were male.

In 1984, burglary was the Crime Index offense for which more juveniles than adults were arrested. Of all arrestees, 52.7 percent were juveniles. This is a slight increase from the 52.5 percent reported in 1983.

Value

The dollar loss due to burglaries decreased slightly (4.4 percent). The average value per offense in 1984 was \$764. In 1983, the average was \$737.

LARCENY-THEFT

Definition

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

Trend

Year	Number of Offenses	Rate Per 100,000 Population
1983	38,920	3803.8
1984	38,292	3685.5
Percent Change	-1.6	-3.1

Reported larceny-thefts decreased by 1.6 percent from 38,920 reported in 1983 to 38,292 reported in 1984. This is the lowest number of reported larceny-thefts since 1977 and the third decrease in the past 11 years. The other decreases occurred during the periods 1980 to 1981 and 1982 to 1983.

All counties reported decreases in larceny-theft. The largest decrease occurred in Kauai County (9.8 percent). Larceny-theft decreased by 6.8 percent in Hawaii County, by 6.4 percent in Maui County, and by less than 1 percent in Honolulu.

Pocket-picking, thefts from motor vehicles, and thefts from coin machines were the only categories that showed increases. Pocket-picking increased by 27.7 percent, thefts from motor vehicles rose by 7.4 percent, and thefts from coin machines increased by 93.8 percent.

The following graph shows the percentage change in the total number of larceny-thefts for each year since 1980. During the 5-year period 1980 to 1984, the largest number of offenses was reported in 1980 and the least in 1984. Larceny-thefts decreased by 15.8 percent from 1980 to 1984. With the exceptions of pocket-picking and of theft from coin machines the 1984 levels for all types of larceny-thefts are also below their 1980 levels. (See trend graphs for individual types of thefts.)

LARCENY-THEFT (1980 - 1984)
DOWN 15.8%

Risk

The larceny-theft rate per 100,000 population decreased by 3.1 percent in 1984. This rate is the lowest since 1976. Maui County had the highest rate of all the counties, a rate of 4,414.3 per 100,000 population. Hawaii County had the lowest rate, 3,015.5 per 100,000.

In 1983, the national rate was 2,866 per 100,000 and the Western States' rate was 3,576 per 100,000. Hawaii's 1983 rate, 3,803.8 per 100,000, exceeded both the national and Western States' rates, 32.7 percent and 6.4 percent, respectively.

Using 1983 registration data, the chances of having a bicycle stolen are about 3 in 100. Based on 1984 registration data, the chances of having something stolen from a passenger automobile are about 1 in 100.

The greatest proportion of larceny-thefts was reported in August in 1984 as compared to March in 1983 in Hawaii and August in 1983 nationally.

**LARCENY-THEFT BY MONTH
(Percent of annual total)**

Month	Hawaii 1984	Hawaii 1983	U.S. 1983

September	7.3	7.2	8.4
October	7.8	8.0	8.6
November	7.9	7.3	8.0
December	7.9	8.1	7.7

Arrests

Arrests for larceny-thefts decreased by 15.9 percent from 7,922 arrests in 1983 to 6,659 arrests in 1984.

Most of the arrestees, 69.4 percent, were males. However, the ratio of females to males decreased from 51.8 per 100 in 1983 to 44.1 per 100 in 1984.

The proportion of arrestees that were adults decreased from 62 percent in 1983 to 59.2 percent in 1984. The percentage of individuals 20 years of age or younger in 1984 was 53.1.

Value

The dollar loss due to larceny-theft increased by 9.5 percent in 1984. Since the number of larceny-theft offenses decreased, the average value per offense increased. In 1984, the average value was \$428 while in 1983 it was \$384.

MOTOR VEHICLE THEFT

Definition

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Trend

Year	Number of Offenses	Rate Per 100,000 Population
1983	4,297	420.0
1984	3,625	348.9
Percent Change	-15.6	-16.9

The number of reported motor vehicle thefts (MVTs) decreased by 15.6 percent since 1983.

Motor vehicle thefts decreased by 19.6 percent in Honolulu. Every other county reported increases. MVTs were up 41.7 percent in Hawaii County, 13.4 percent in Kauai County, and 1.4 percent in Maui County.

The graph below shows that over the 5-year period 1980 to 1984, the number of MVTs decreased by 38.6 percent from its peak in 1980.

The pie chart that follows the graph shows automobile theft to be the most common type of motor vehicle theft.

Risk

Reported motor vehicle thefts per 100,000 population decreased by 16.9 percent in 1984. Honolulu reported the highest rate per 100,000 population, 382.2, while Kauai County reported the lowest, 173.8.

In 1983, the national rate per 100,000 was 429 and for Western States, it was 488. Hawaii's 1983 rate of 420.0 was lower than both the national and the Western States' rates.

The chance of having an automobile stolen in Hawaii in 1984 is about 6 in 1000 cars. This figure is based on 1984 registrations of passenger cars. In 1984, more MVTs were reported in June than in any other month, as compared to March in 1983.

MOTOR VEHICLE THEFTS BY MONTH (Percent of annual total)

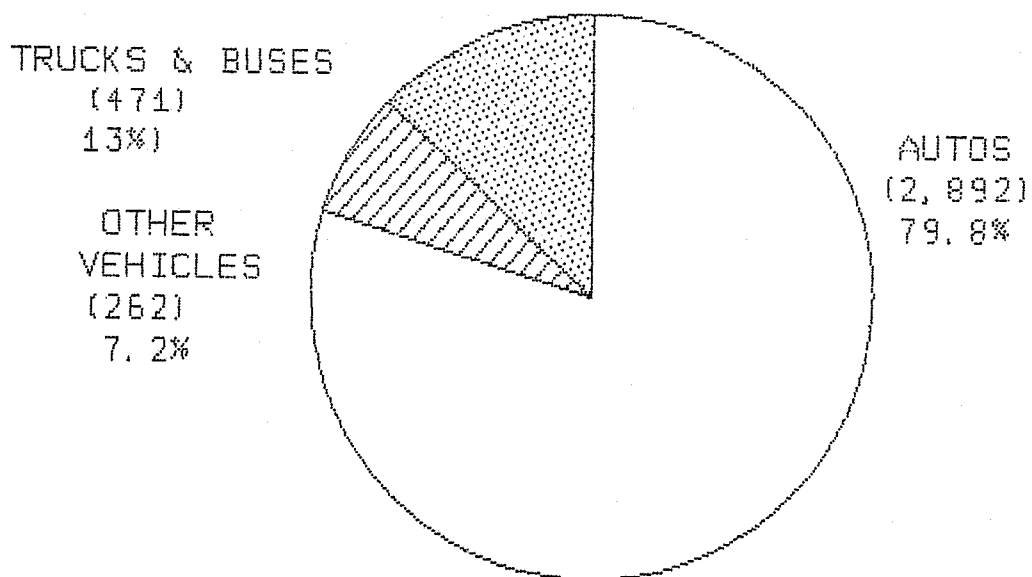

Month	Hawaii 1984	Hawaii 1983	U.S. 1983
January	9.1	7.5	8.3
February	7.9	10.4	7.5
March	9.7	12.0	8.4
April	9.9	8.0	8.0
May	9.3	7.9	8.1
June	10.0	7.6	8.0
July	9.0	9.1	8.5
August	7.5	9.3	9.1
September	6.9	6.9	8.5
October	7.2	6.8	8.7
November	7.1	7.1	8.4
December	6.2	7.3	8.5

Arrests

In 1984, 677 arrests were made for motor vehicle thefts, a decrease of 13.2 percent from the 780 arrests made in 1983. Most of the arrestees, 89.2 percent, were male. However, the number of male arrestees decreased by 15.3 percent while the number of women arrested increased by 9.0 percent.

Juveniles comprised 43.9 percent of the arrestees. However, the number of juveniles arrested decreased 11.3 percent from 1983. In general, people ages 20 or younger accounted for 71.2 percent of all arrests. In 1983, that group accounted for 68.7 percent.

1984

ARSON

Definition

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1983	488	47.7
1984	511	49.2
Percent Change	4.7	3.1

Reported arson offenses increased by 4.7 percent from 488 reported in 1983 to 511 reported in 1984. The number of arsons increased in Honolulu and in Kauai County but decreased in Maui and Hawaii Counties.

Risk

The arson rate per 100,000 population increased by 3.1 percent from 47.7 in 1983 to 49.2 in 1984. The national arson rate was 49 per 100,000 in 1983; however, since agencies reporting arson data cover only some parts of the country, it is difficult to estimate the total U.S. arson experience.

In Hawaii in 1984, the greatest proportion of arson occurred in March, as it did in 1983.

Arrests

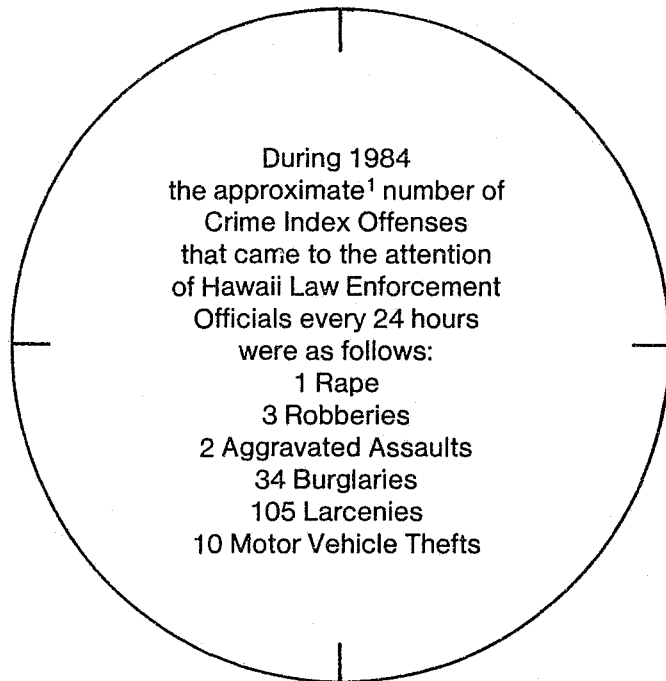

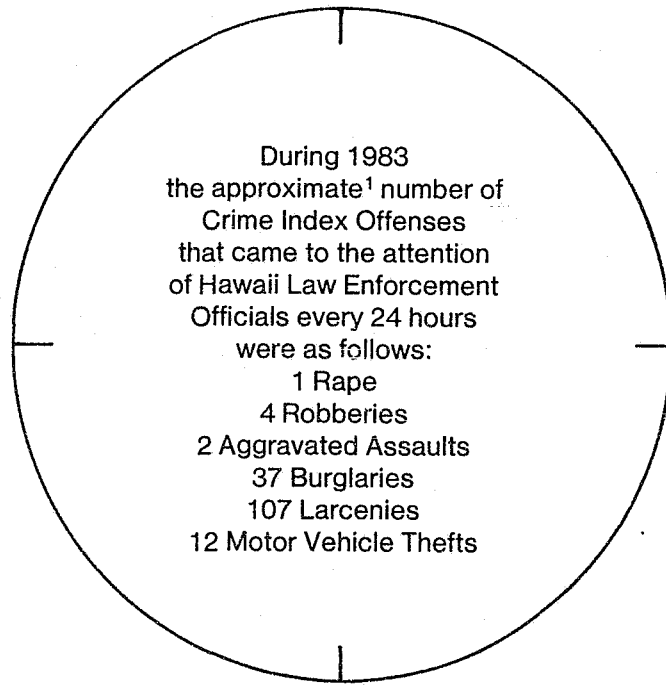

Arrests for arson increased by 6.7 percent from 45 arrests in 1983 to 48 arrests in 1984. Of the arrestees, 47.9 percent were juveniles. However, the increase in arrests for 1984 is due to the increase in adult arrests.

Most of the arrestees, 93.8 percent, were male.

Includes District of Columbia.
Rates are per 100,000 resident population.

CLEARANCES

Crime Index offenses are cleared by either arrest or exceptional means. An offense is cleared by arrest if at least one person is arrested, charged and turned over to the court for prosecution. It should be noted that the number of offenses and not the number of persons arrested is used to count clearances. Several offenses may be cleared by the arrest of one person, or the arrest of several people may clear only one crime.

Offenses cleared by exceptional means include cases where the offender dies, the victim refuses to cooperate in the prosecution, or when extradition is denied. A complete list is given in the UNIFORM CRIME REPORTING HANDBOOK.

CLEARANCES*, 1984 (Arson not included)

Category	Number of Offenses	Number of Clearances	Percentage*
OFFENSES:			
Murder	34	25	73.5
Rape	315	153	48.6
Robbery	1,202	338	28.1
Aggravated Assault	857	524	61.1
Burglary	12,588	1,349	10.7
Larceny-theft	38,292	6,777	17.7
Motor Vehicle Theft	3,625	531	14.6
COUNTIES:			
Honolulu	44,560	6,817	15.3
Hawaii	4,697	1,310	27.9
Maui	5,511	1,026	18.6
Kauai	2,145	544	25.4
TOTAL	56,913	9,697	17.0

*Note: In this table, Percentage is the number of clearances per 100 offenses. However, clearances may also occur for offenses reported in previous time periods.

OFFENSE STATISTICS

The following section presents statistics on Crime Index offenses reported to the Police Departments in the State of Hawaii. Highlighted in this section are murder, rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft.

Tables 1 through 4 present the Hawaii Crime Index total, while the remaining tables in this section focus on the value of property stolen and recovered. Please note that although arson is a Crime Index offense, it is not included in this section.

ARREST STATISTICS

Persons Arrested

The number of persons arrested for all violations except traffic in the reporting jurisdictions is compiled from monthly returns submitted by the contributing agencies. The age, sex and race of these persons are recorded, and data are collected on juveniles and adults to compute arrest trends and volume.

The Age, Sex, and Race of Persons Arrested form is used to collect data on the number of arrestees and not on the number of persons charged. The same person may be arrested several times during a month for similar or different violations within a jurisdiction; each arrest is counted. A person may be arrested on several charges at one time; however, only one arrest would be scored.

Race of persons arrested is presented using the State of Hawaii reporting format. National categories are White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. For the State of Hawaii, the Asian and Pacific Islander category is divided into the following groups: Chinese, Japanese, Filipino, Hawaiian/Part Hawaiian, Korean, Samoan, and Other.

The following tables present data on persons arrested in the State of Hawaii, 1984, by age, sex and race.

Table 10
Population and Arrests as a Percentage of Ethnic Stock
State of Hawaii, 1984

	Population ¹			Arrests

Juvenile Arrests

This section presents data on juvenile arrests. Juvenile arrests include cases where a young person is summoned, cited, or notified to appear before the juvenile court, situations which would result in arrest if the offender were an adult. (Juveniles may also be arrested for running away or for curfew and loitering law violations.)

Police Disposition of Juveniles

Unlike arrested adults who are usually held for prosecution or are released for future handling in court, juveniles, depending on the seriousness of the offense and their prior record, may be warned and released to parents or guardians. Juveniles may also be referred to the probation agency, to juvenile court, to welfare agencies, to other enforcement agencies, or to adult court.

The table below presents police dispositions of juveniles by county and type. (In cases where total dispositions exceeded total arrests, dispositions were reported for juveniles arrested in previous periods.)

POLICE DISPOSITION OF JUVENILES (Not Including Neglect or Traffic Cases)

	Honolulu	Hawaii	Maui	Kauai	Total
Juveniles arrested	7,271	1,055	978	938	10,242
Handled within Dept. and released	2,926	76	70	419	3,491
Referred to Juv. Court or Probation Dept.	4,302	979	862	471	6,614
Referred to Welfare Agency	43	0	18	48	109
Referred to other Police Agency	0	0	28	0	28
Referred to Criminal or Adult Court	0	0	0	0	0
Total dispositions	7,271	1,055	978	938	10,242

UNIFORM CRIME REPORTING DEFINITIONS

Part II Offenses

1. Other Assaults

All assaults other than aggravated are included in this category.

2. Forgery and Counterfeiting

Included in this classification are all offenses dealing with or attempting to deal with the making, altering, or possessing, with intent to defraud, anything false in the semblance of that which is true.

3. Fraud

Fraudulent conversion and obtaining money or property by false pretenses; includes bad checks, confidence games, etc., except forgeries and counterfeiting.

4. Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

5. Stolen Property: Buying, Receiving, Possessing

Included in this category are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

6. Vandalism

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without the consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering, with filth, or any other such means as may be specified by local law.

This offense covers a wide range of malicious behavior directed at property such as: cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, tipping over gravestones, defacing library books, etc.

All arrests including attempts are scored as vandalism.

7. Weapons: Carrying, Possessing, Etc.

This class deals with weapon offenses, regulatory in nature, such as: manufacture, sale, or possession of deadly weapons; carrying deadly weapons, concealed or openly; using, manufacturing, etc., silencers; furnishing deadly weapons to minors; aliens possessing deadly weapons.

All attempts to commit any of the above.

8. Prostitution and Commercialized Vice

Include in this class the sex offenses of a commercialized nature, such as: prostitution; keeping bawdy house, disorderly house, or house of ill fame; pandering, procuring, transporting, or detaining women for immoral purposes, etc.

All attempts to commit any of the above.

9. Sex Offenses

(Except forcible rape and prostitution and commercialized vice.)

Included are offenses against chastity, common decency, morals, etc.; adultery and fornication; buggery; incest; indecent exposure; indecent liberties; intercourse with an insane, epileptic, or venereally diseased person; seduction; sodomy or crimes against nature; statutory rape (no force).

All attempts to commit any of the above.

10. Narcotic Drug Laws

Narcotic drug law arrests are made on the basis of the narcotics used. The following are subdivisions of narcotic drug law arrests:

Included are all arrests for violations of State and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

(1) opium or cocaine and their derivatives (morphine, heroin, codeine)

(2) marijuana

(3) synthetic narcotics - manufactured narcotics which can cause true drug addiction (demerol, methadones)

(4) dangerous nonnarcotic drugs (barbiturates, benzedrine)

11. Gambling

All charges which relate to promoting, permitting, or engaging in gambling are included in this category.

To provide a more refined collection of gambling arrests, the following breakdown of gambling arrests are furnished:

- (1) bookmaking (horse and sport book)
- (2) numbers and lottery
- (3) all other

12. Offenses Against the Family and Children

Included here are all charges of non-support and neglect or abuse of family and children:

- (1) desertion, abandonment, or non-support of wife or child
 - (2) neglect or abuse of child (if injury is serious, score as aggravated assault)
 - (3) nonpayment of alimony
- All attempts to commit any of the above.

13. Driving Under the Influence

This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics. Included are: operating a motor vehicle while intoxicated; operating an engine, train, streetcar, boat, etc., while intoxicated.

14. Liquor Laws

With the exception of "drunkenness", liquor law violations, State or local, are placed in this class. Included are: manufacture, sale, transporting, furnishing, possessing, etc., intoxicating liquor; maintaining unlawful drinking places; advertising and soliciting orders for intoxicating liquor; bootlegging; operating still; furnishing liquor to a minor or intemperate person; using a vehicle for illegal transportation of liquor; drinking on a train or public conveyance.

All attempts to commit any of the above.

15. Drunkenness

Included in this class are all offenses of drunkenness or intoxication, with the exception of "Driving Under the Influence" (Offense No. 13).

- (1) drunkenness
- (2) drunk and disorderly
- (3) common or habitual drunkard
- (4) intoxication

This class is omitted in Hawaii. There are no arrests made under this section. Chapter 737-1 of the Hawaii Revised Statute was repealed under Act 9, Session Laws of Hawaii, Effective January 1, 1973.

16. Disorderly Conduct

All charges of committing a breach of the peace are placed in this class. Included are: affray; unlawful assembly; disturbing the peace; disturbing meetings; disorderly conduct in State institutions, at court, at fairs, on trains, or public conveyances, etc.; prize fights; blasphemy, profanity, and obscene language; desecrating flag; refusing to assist an officer.

All attempts to commit any of the above.

17. Vagrancy

Persons prosecuted on the charge of being a "suspicious character or person, etc." are included in this class. Included are: vagrancy; begging; loitering (persons 18 and over) vagabondage.

18. All Other Offenses

Included in this class are all other State or local offenses not included elsewhere such as:

- admitting minors to improper places
- abduction and compelling to marry
- bigamy and polygamy
- blackmail and extortion
- bribery
- combination in restraint of trade; trusts, monopolies
- contempt of court
- criminal anarchism
- criminal syndicalism
- discrimination; unfair competition
- kidnapping

defined by your local statute. Arrests made by other jurisdictions of runaways from your jurisdiction are also counted. Not included are protective custody actions with respect to runaways taken for other jurisdictions.

19. Suspicion

While "suspicion" is not an offense, it is the ground for many arrests in those jurisdictions where the law permits.

After examination by the police, the prisoner is either formally charged or released. Those formally charged are entered in one of the Part I or II Offense Classes. This class is limited to "suspicion" arrests where persons arrested are released by the police.

20. Curfew and Loitering Laws

(Juveniles)

All arrests made for violation of local curfew or loitering ordinances.

21. Runaway (Juveniles)

For purposes of the Uniform Crime Reporting Program, reported in this category are apprehensions for protective custody, as
