INTRODUCTION

The 1986-87 Fiscal Year Statistical Summary is issued by the Los Angeles County Sheriff's Department as a means of evaluating the effectiveness of current procedures and as a reference for future development of the Department.

The following is a clarification of the terms utilized in the Summary:

Crime Rates

Crime Rates in this Summary are based on a population of 10,000 rather than 100,000 as in the State of California and Federal Bureau of Investigation reports. This makes the rates more significant in view of the population distribution in the various Station and Contract City areas. The Crime Rate is calculated as follows:

$$\frac{\text{Number of Crimes in Area "Y"}}{\text{Population in Area "Y"}} \times 10,000 = \text{Crime Rate}$$

Population

Population figures were obtained from the Los Angeles County Department of Regional Planning July 1987, Publication.

Area

The Area computations are based on figures provided by the Los Angeles County Engineering Department for January 1, 1987.

Comparisons

Factors contributing to crime are numerous and vary from place to place. Readers are cautioned against drawing conclusions from direct comparisons of crime figures between individual communities of similar populations and size. In Los Angeles County, a jurisdiction in excess of seven million population, several factors affect the rate of crime. The factors include:

- Crime reporting practices of citizens
- Multiple levels of economic status
- Population, both resident and transient
- Composition of the population in regard to age and sex
- Population density and community characteristics: commercial, educational, recreational, religious and economic
- Public attitude toward crime and law enforcement
- Number of police employees per unit of population
- Policies of the prosecuting officials and courts

In evaluating percent changes, consideration must be given to the dates during which the changes took place as well as to the actual number of crimes upon which the percentage is based.

Part I Offenses

The Part I Offenses are used by law enforcement agencies in the United States to reveal the extent and trend of criminal activity. Any significant change from the anticipated pattern of the figures alerts Law Enforcement Administrators to possible problem areas. The Part I Offenses are Criminal Homicide, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny Theft, Grand Theft Auto, and Arson. The Sheriff's Department tabulates Part I Offenses by Uniform Crime Report standards and maintains statistical files with regard to violations, locations of occurrences, arrests by age and sex of the offenders, and by disposition of cases. Only the most serious classification is tabulated from reports with multiple classifications. If a suspect is charged with Burglary and Vandalism, only the Burglary (the more serious crime) is included in the statistics. However, if several persons together commit one crime, each person is counted in "Adults Arrested"; only one crime is counted in "Case Handled." Thus, statistics maintained by each of the Stations or Bureaus may differ from those recorded in this Summary. Similarly, a single case handled may have multiple assignments with the result that cases assigned will total more than cases handled.

Percentage Comparisons

Whenever the availability of data permits, percentage changes are indicated. These percentages reflect increases or decreases in the total number of cases. It must be noted that these changes do not adequately reflect changes in manpower expended. It is in fact possible for a decrease in cases to represent an increase in man-hours expended due to a greater number of hours required for each case.

The information contained in this report gives an account of the various activities performed by the Sheriff's Reserve Forces during the 1986-87 Fiscal Year as it compares to the 1985-86 Fiscal Year.

The total number of hours worked by all Reserve components reflects an increase for this period. However, the Uniform Reserve and Mountain Rescue Units showed a decrease in total hours worked. The overall complement of Reserves decreased, but there was a slight increase in the average number of hours worked per year per Deputy.

Through the efforts of the Reserves, the monetary savings to the County Taxpayers for 1986-87 was \$11,542,235*.

*Based upon hourly rate of a Top Step Deputy Generalist, with a 50% benefit package, totalling \$29.93 per hour.

JUVENILE OPERATIONS BUREAU

Activity Summary

The Juvenile Operations Bureau is composed of two details which provide distinctly different services in their respective fields of specialization.

OPERATION SAFE STREETS

At stations with attached Operation Safe Streets personnel, all cases routinely assigned to station investigative services that involve "target" street gang members are assigned to, and investigated by, Operation Safe Streets.

The Operation Safe Streets Detail is also responsible for information gathering in all station areas experiencing street gang problems. The Detail performs additional functions which include selective gang suppression efforts, enhancing the flow of communication between our Department and other agencies, development and maintenance of the Gang Reporting, Evaluation And Tracking (G.R.E.A.T.) system and representation of the Department before various factions of government and the news media.

The Operation Safe Streets Detail is a highly mobile unit of street gang experts who can be deployed on short notice to any site within the Sheriff's Department's jurisdiction to address a problem concerning street gang activity.

DATA SYSTEMS BUREAU

Automated Timekeeping and Payroll System (ATPS): This Unit provides management/administrative functions over a comprehensive automated system performing the personnel and timekeeping functions of the Sheriff's Department and Executive Office of the Board of Supervisors.

County Wide Warrant System (CWS): This system, which is currently under development and scheduled for activation January 18, 1988, will replace the Los Angeles City's Automated Want Warrant System (AWWS). It will provide for a central repository of warrant information and coordination of out-of-county warrant information. CWS will interface with the other criminal justice systems via the Pro-Active Information (PIX) and through direct interfaces with the Municipal Court Information System (MCI) and the Expanded Traffic System (ETRS) of the Municipal Courts and the Adult Case Tracking System (ACTS) of the Superior Court. CWS will also interface through the California Law Enforcement Telecommunications System (CLETS) with the Department of Justice Wanted Persons System (WPS). It is further anticipated that Assembly Bill AB-2989 will provide sufficient funds to allow a no cost participation by all Los Angeles County police agencies.

Statistical summary information will be available for the 1988-89 fiscal year.

Justice Data Interface Controller (JDIC): This System is a regional law enforcement data communications system and message switcher consisting of centrally located computers and video display terminals and printers at all Sheriff's Stations and Police Departments throughout Los Angeles County. It also allows communication with any criminal justice facility in the continental United States that is connected to the National Law Enforcement Telecommunications Systems (NLETS). Through its connections with a variety of computer data files, it also allows police agencies the ability to inquire, enter and update a great number of law enforcement files. These files include local data files, Department of Justice files in Sacramento, and national files maintained by the FBI in Washington, D.C.

The current JDIC system is being enhanced to assume additional communication traffic and improve system response. This enhancement is anticipated to be completed January, 1988.

TECHNICAL SERVICES DIVISION

DATA SYSTEMS BUREAU

Justice Data System: This System is an on-line and batch computer system which serves as the information centerpiece to the Criminal Justice Community within Los Angeles County. It is comprised of: the Automated Justice Information System (AJIS), which provides custody information on all inmates who have been arrested and booked by any agency participating in the consolidated booking system; Even Index (EI), which provides summary information related to any crime, arrest, or incident report written by either the Los Angeles Sheriff's Department or the Los Angeles Police Department; and Personal History Index (PHI), which provides local criminal history, applicant, and licensing information to authorized criminal justice agencies.

The Justice Data System is utilized, not only by the Los Angeles County Sheriff's Department, but numerous other criminal justice agencies throughout the County including; Municipal and Superior Courts, District and City Attorneys, Public Defender, Probation Department, County Marshal, Coroner's, State Department of Corrections, West Los Angeles Office of Federal Bureau of Investigations, and all other local law enforcement agencies.

Systems Development: The primary function of the Systems Development Section is to act as a facilitator between Departmental computer users and computer associated vendors. The responsibilities of this section includes: analysis and recommendations regarding initial Departmental computer need, evaluation of computer hardware and software, recommendations regarding purchase of computer hardware, software and related peripherals, development of requests for quote (RFQ) and requests for bid (RFB), act as liaison between Departmental end-users, DPD and private vendors during all stages of automated systems development, coordinate Departmental budget for repair and maintenance of micro-computers and related peripherals, and coordinate through Department of Data Processing the contracting of private sector vendors for computer programming services.

HOMICIDE BUREAU

The Homicide Bureau is a specialized bureau employing unique investigative and evidence-handling expertise in such cases as homicides, accidental, narcotic overdose, suicide, and other sudden and unexplained deaths; inmate deaths, missing and unidentified adults, including missing juveniles where they have been missing over 30 days, and gunshot injuries involving Department personnel.

The Homicide Bureau also provides investigative expertise to independent cities, when requested, in homicides, other death investigations, and in officer involved shooting incidents.

MAJOR INVESTIGATIONS

The cases included in this category involve an immediate response by two or more homicide investigators, intensive investigation over a period of days or weeks, and the preparation of extensive written reports. The majority of the Homicide Bureau's investigative effort is expended in this area.

HOMICIDE BUREAU (CONTINUED)

MISSING PERSONS

These investigations vary considerably depending upon the circumstances. An adult missing with no evidence of foul play normally involves several hours of investigation, follow-up reports, and oftentimes a personal contact with relatives. A missing juvenile with foul play suspected can require a massive response of available personnel and days of investigation.

Adult	1,349	1,521	+ 13
Juvenile	267	392	+ 47
Total Missing Persons	1,616	1,913	+ 18

OTHER ASSIGNMENTS

These cases do not require a response by Homicide investigators. A brief investigation is conducted by phone to ensure no suspicious circumstances are involved and a liaison maintained with the Coroner's Office pending the results of the post-mortem examination.
