## ABSTRACT

The Department of Correction routinely monitors population movement in the state prison system. This report, prepared by the Research Division, assesses population change and summarizes all movement of offenders in DOC custody during the calendar year of 1984. The information is presented according to the institution of admission or release and includes the following: new court commitments, paroles, returns on parole violation, discharges, escapes, deaths, transfers to other correctional facilities both within the state and outside the state, and temporary releases to hospitals and courts.

During 1984 there were 12,917 admissions of all types and 12,513 releases. Overall the state prison population increased by nine percent between 1983 and 1984. New court commitments increased in 1984 as did returns on parole violation (a 10 percent and 39 percent increase, respectively). Moreover 1984 showed increased movement of offenders between the Department of Correction and county houses of correction.

## Introduction

The population movement report is one of seven annual statistical reports regularly prepared by the Research Unit of the Massachusetts Department of Correction. Each correctional facility of the Department of Correction submits weekly admission and release reports describing in detail each offender move into or out of that facility. This annual movement report is a compilation of all admissions and releases during 1984. It presents information by type of admission and release including: new court commitments, paroles, returns on parole violation, discharges, escapes, deaths, transfers to other correctional facilities both within the state and outside of the state, and trips to hospitals and courts.

This report consists primarily of sixteen tables that describe the various types of movement. The first table summarizes changes in population from December 31, 1983 to December 31, 1984. The next two tables summarize all types of admissions and releases. The remaining fourteen tables consider specific types of moves in detail. Each table is broken down by specific admitting or releasing institution or institutional group.

Offenders can be received into an institution in any number of ways. Offenders can be committed by the courts to Walpole, Concord or Framingham. Only at the time that the offender arrives at that institution is the commitment registered. During 1984 and for several years previous to that it was often the case that, after sentencing, an offender would be placed in a house of correction (a county facility) while awaiting space in a state facility under the authority of the Department of Correction (DOC). These offenders are not counted as commitments until they actually arrive at the institution of commitment. Offenders can also arrive from another institution to begin serving a new sentence, having finished a first sentence and started a second or third sentence. These are

"from and after", "B" and "C" sentences. Generally an offender would be paroled or discharged from the initial sentence and then committed on a second sentence.

Offenders can be admitted in ways that are not directly related to beginning a new sentence. Offenders who have violated some condition of their parole can be returned as parole violators to continue serving the sentence on which they were released. Offenders can also be returned from outside releases of short duration such as trips to courts or hospitals or be returned from escape. Additionally, offenders can be transferred from other correctional authorities including houses of correction, federal prison authorities or prison authorities of other states.

Offenders can be released by the authority of the Parole Board, by receiving a good conduct discharge, by serving the maximum term of their sentence, or by obtaining a court-revised sentence. Such paroles and releases can be sent to the community, to another prison authority, or to another sentence. Offenders also can be released on a short term basis to hospitals or courts. Moreover, offenders are classified as released if they die during their incarceration or escape from confinement.

The most common type of movement is a transfer from one facility within the Department to another. Because the Department maintains facilities of different security levels, an offender initially is placed in one of the three commitment institutions (Walpole, Concord or Framingham) and then moved to lower security facilities in the process of serving his/her prison sentence. Such inter-institutional transfers are generally from a higher security setting to a lower security setting, but occasionally transfers are made from lower to higher security. Each time a movement of this type occurs, the institution of destination records an admission and the institutions of origin records a release.

When considering numbers of admissions and releases, this report does more than tabulate the number of offenders admitted from the courts and released by parole or the termination of their sentence. This report includes information on all types of admissions to and releases from each of the institutions in the Department and, as such, is a valuable statistical description of the flow of offenders through the correctional system of Massachusetts during a given year.

### Highlights of 1984 Movements

This section presents an overview of the population movements during 1984 and highlights some of the significant trends. More complete information can be found by consulting the individual tables. In reading the tables in this report, the reader should note that: (1) the top number in each cell in the body of a table represents the number of moves which are characterized by the corresponding row and column categories of that table, and (2) the bottom number in parenthesis in each cell represents the percentage of total moves in that column (column percent) corresponding to the row category. The percentages sum down the column to total 100 percent. For example, Table 2 indicates that court commitments comprise 817 admissions or 44 percent of the total admissions to Walpole during 1984. All tables in the text should be read as reporting the admissions, releases, transfers and returns to or from the institutions identified across the top of the tables. Reading the numbers and percentages in this way is consistent with the document's discussion of the movement information.

Population Changes. At the beginning of 1984 the count of inmates in custody in Massachusetts Department of Correction facilities stood at 4463; at the

end of 1984 the population was 4867.<sup>1</sup> This represents an increase of 404 individuals or nine percent during the year and an increase of 12 percent over the population at the beginning of 1983. Table 1 summarizes all movements of offenders during 1984. The number of admissions during 1984 was only slightly greater than the number of releases that year.

The median number of moves per inmate was slightly over two moves during the calendar year.<sup>2</sup> The actual number of moves ranged from one to 40 moves. More than 80 percent of the inmates in custody logged three or fewer moves during the year; nine percent of the residents logged five or more moves.

Inter-institutional transfers comprised the majority of admissions and releases, 71 percent and 74 percent, respectively. Of the population transferred between institutions, 50 percent of the residents were transferred two or more times, a median of 1.5 transfers. Only about one percent of all moves were releases to and returns from hospitals for medical purposes. With the exception of releases to and admissions from Bridgewater State Hospital, the 398 inmates making hospital moves in 1984 averaged one move to a community or DOC hospital during the year. The actual number of hospital moves ranged from a low of one to a high of 14 moves. The majority of hospital moves were transfers to the secure ward of Lemuel Shattuck Hospital.

---

<sup>1</sup>The year-end figures for 1983 and 1984 exclude: un-sentenced offenders housed at MCI-Concord or in the ATU at MCI-Framingham; inmates transferred to Bridgewater State Hospital; DOC inmates released to houses of correction before the end of the year; paroled offenders residing at DOC contract pre-release facilities; and sentenced offenders awaiting booking.

<sup>2</sup>For purposes of reporting, admissions and releases are counted as separate moves. This practice may overestimate the average number of moves per inmate because a transfer between institutions is counted as two moves. To adjust for double counting in averaging the number of moves per inmate, a release from one institution and transfer to another has been counted as a single move.

Admissions. There was a total of 12,917 admission movements of all types into the institutions during 1984. This represents an eight percent increase in admissions over the number of such movements in 1983. The number of returns on parole violations in 1984 was 560, a 39 percent increase over the previous year. There were 9,216 admissions that were transfers from other Department of Correction facilities, only a three percent increase over the previous year. New court commitments increased by 10 percent from 1983 to 1984; there were 1,965 commitments in 1983 and 2,169 in 1984. New court commitments do not include offenders sentenced to the DOC who were awaiting placement in a house of correction at the end of 1984, nor offenders re-admitted on a "from and after" sentence. The number of individuals received on a from and after sentence in 1984 decreased by more than half the amount received in 1983 (a decrease from 70 in 1983 to 33 in 1984). Returns from escape also decreased when compared to the previous years. There were 296 returns from escape in 1983 and 276 in 1984. In summary, admissions to the Department of Correction rose by eight percent in 1984. The moves contributing to the overall increase were primarily increases in new commitments, returns on parole violation, and moves from houses of correction.

Releases. There were 12,513 movements out of institutions during 1984, a six percent increase over the previous year. Much of the increase in releases can be attributed to the substantial increase in transfers to houses of correction during the year. These moves increased by 250 percent in one year from 84 releases to houses of correction in 1983 to 294 in 1984. While the number of paroles to the street increased only by about seven percent (1406 in 1983 and 1507 in 1984), discharges and sentence expirations increased by 8 and 23 percent, respectively. There were five deaths in Department of Correction facilities during the year.

One death was by homicide, and four by natural causes. The number of escapes decreased from 257 escapes in 1983 to 236 in 1984.

**Court Commitments.** There were 2,169 new court commitments during 1984. Whereas new court commitments increased by 10 percent from 1983 to 1984, the three commitment institutions did not reflect the increase equally. The number of commitments to Walpole increased from 739 commitments in 1983 to 817 in 1984, a 10 percent increase; the number of commitments to Concord increased only slightly by three percent; and the number of commitments to Framingham increased by 17 percent from 620 commitments in 1983 to 726 in 1984. The total court commitments for 1984 equal the sum of the 2,169 "new" court commitments plus the 33 "from and after" sentences of inmates already under the authority of DOC. New commitments and "from and after" commitments amounted to 2,202 total court commitments in 1984.

**Institutional Transfers.** From 1983 to 1984 there was an increase of three percent in inter-institutional transfers.<sup>3</sup> Two institutions, Walpole and Concord, accounted for almost half (49 percent) of the transfers sent out. Concord and Norfolk were the largest receivers of institutional transfers although, together, the pre-release facilities admitted over 20 percent of all transfers. With the exception of Concord, most of the transfers released from medium security institutions -- Framingham, Norfolk, NCCI and SECC -- were sent to lower security institutions (minimum and pre-release). About 64 percent of the Concord releases and 30

---

<sup>3</sup>Most of the statistics referred to in this section can be found in Tables 5 through 8. Unless otherwise stated, the discussion of the security level of institutional moves excludes releases to and admissions from Lemuel Shattuck Hospital and Bridgewater State Hospital.

percent of the releases from Southeastern Correctional Center went to other medium security institutions. Excluding the transfers to Bridgewater and Lemuel Shattuck, 49 percent, 77 percent and 47 percent of the releases from Norfolk, NCCI and SECC, respectively, went to minimum security or pre-release facilities in 1984.

Among the lower security institutions, four facilities house both minimum security and pre-release offenders: MCI-Plymouth, MCI-Warwick, MCI-Lancaster, and MCI-Shirley. For the sake of consistency with previous movement reports, MCI-Plymouth and MCI-Warwick have been classified as minimum security institutions and MCI-Shirley and MCI-Lancaster have been classified as pre-release facilities. Bay State Correctional Center and Northeastern Correctional Center are strictly minimum security facilities. Almost three-fourths (73 percent) of the releases from Bay State and 67 percent of the releases from NCC went to pre-release facilities. According to Table 3 releases from pre-release facilities were predominately moves to the street (38 percent) or transfers to other institutions (48 percent). More than half of the transfers from pre-release facilities (59 percent) in 1984 were moves to higher security walled institutions; most of these moves were returns to MCI-Concord (see Table 5).

**Hospital Transfers.** Offenders needing hospital care can be treated at various community hospitals or Lemuel Shattuck Hospital, a hospital at which the Department of Correction maintains a secure ward for offenders in custody. During 1984 there were 430 transfers to Lemuel Shattuck Hospital from Department of Correction facilities (Table 5) and 430 returns from Lemuel Shattuck to state correctional institutions excluding transfers to Bridgewater State Hospital (Table 6).

There were 103 releases to community hospitals (Table 9) according to admission and release reports. Together Framingham Union, Massachusetts General and New England Medical Center received approximately 40 percent of the releases to community hospitals. Of the returns to correctional institutions from outside hospitals, more than a third came from Framingham Union and New England Medical Center (Table 10).

**Transfers to Houses of Correction.** Four types of movements between county houses of correction and state facilities are presented in Tables 11 through 14 of this report. The first type of move involves a state or county inmate transferred from a Department of Correction facility to a county house of correction to serve or finish a sentence. There were 294 such transfers in 1984. The Dedham House of Correction received the largest number of transfers (166) during 1984. The second type of move is the return of a Department of Correction inmate from a county facility. There were 54 such returns in 1984. About a third of the returns (32 percent) went back to MCI-Concord and 20 percent to pre-release facilities. The third type of move is a new admission of a county inmate to a Department of Correction facility. There were 307 such transfers in 1984, a large increase over the 15 county admissions in 1983. The vast majority of these admissions came from the Dedham House of Correction (see Table 13). The fourth type of move is the release of a Department of Correction inmate to a county facility on a "from and after" sentence. There were 30 such releases in 1984 which showed little change from 1983. Most of the releases went to the Suffolk County facility at The Deer Island or Billerica House of Correction (19 moves altogether).

The record increase in admissions of county offenders to state facilities in 1984 was the direct result of a court order placed on Norfolk County to reduce

overcrowding at the Norfolk House of Correction in Dedham. A court ordered population cap at the Dedham House of Correction required Norfolk County to find alternative correctional placement for all sentenced offenders above the population ceiling. MCI-Concord received a large number of these county offenders for classification to lower security facilities.

Movements to Other States. There were 91 transfers from Department of Correction facilities to prisons in other states. This included 67 Department of Correction inmates and 24 interstate transfers under the jurisdiction of other states. Of these offenders over a fourth (28 percent) were released from MCI-Norfolk and a fourth from NCCI (25 percent). Approximately 70 percent of these offenders were transferred to other New England states. There were 88 admissions from other states during 1984. Inmates admitted from out-of-state prisons included the return of 62 Department of Correction offenders and transfer of 26 offenders under the jurisdiction of other states. Over three-fourths of the offenders were sent from other New England states (77 percent) and admitted most often to MCI-Concord, MCI-Norfolk, NCCI and MCI-Framingham.

Glossary

1. NCCI is the North Central Correctional Institution, sometimes referred to as Gardner.
2. SECC is the Southeastern Correctional Center.
3. NCC is the Northeastern Correctional Center.
4. Forestry consists of two minimum security forestry camps at Plymouth and Warwick.
5. Drug Rehab/Drug Rehabilitation programs are pre-release centers for offenders with drug related problems. Drug Rehab includes the following programs: Spectrum House, Meridian House, Boston VA Hospital.
6. Lemuel Shattuck Hospital provides a secure ward for offenders requiring treatment.
7. Bridgewater State Hospital includes the hospital for the criminally insane and sexually dangerous persons (SDP Treatment Center).
8. MHHI (Massachusetts Halfway Houses, Incorporated) is a private non-profit corporation that provides facilities to DOC on a contract basis. MHHI includes the following facilities: 577 House, Coolidge I, Temporary Housing Project (THP), Coolidge II, and Brooke House.
9. The Medfield Prison Project is a minimum security facility located on the grounds of the Medfield State Hospital.
10. MCI refers to Massachusetts Correctional Institution.
11. Mass. Dy. Ctr. is an abbreviation for the Massachusetts Dialysis Center.
12. Lawrence CAC refers to the Correctional Alternatives Center at Lawrence, an Essex County facility.
13. Unsentenced offenders at MCI-Framingham are held in the Awaiting Trial Unit (ATU).
