LES GOLDBERG
EXECUTIVE DEPUTY DIRECTOR

To the Governor and People of New York State:

I am please to transmit to you the Division for Youth's ninth Program Operations Annual Statistical Report. The report summarizes the characteristics of the 2,500 young people committed to the Division's residential services programs during calendar year 1986, providing a picture of patterns in individual and regional placements experienced by the Division throughout the year. This report employs the basic format we have found to be successful since beginning these statistical summaries in 1979; therefore, it is easily used to compare information across previous years and identify trends and changes in DFY Clientele characteristics during those years.

An important intent of this report is to provide a resource for those state and local governmental officials who are actively engaged in promoting the welfare of the young citizens of our State, as well as to function as an information base for private agencies involved in New York's juvenile justice system. For those of us in the Division, the report represents another chapter in our history, and furnishes us with archival data which will enhance the Division's planning efforts for the future. Although each year's experience is unique, this series of reports has provided a basis for understanding the role played by the Division in the State's long term commitment to its youth.

Any questions or comments which you may have concerning this report should be directed to the Bureau of Program Analysis and Information Services (518-473-4486).

Respectfully submitted,

A handwritten signature in cursive script, reading "Leonard G. Dunston".

Leonard G. Dunston

PREFACE

The New York State Division for Youth has two basic responsibilities. It provides state aid to localities for the operation of Youth Development and Special Delinquency Prevention, Detention and Voluntary Agency programs, and it directly offers residential and non-residential services for youth referred to it by the courts, Social Services and other agencies. The information contained within this volume is concerned exclusively with the description of the social, legal, and demographic characteristics of youth admitted to the Division's residential programs during calendar year 1986.

To maximize comparability across years, the format of the 1987 report follows very closely that of 1986. Although it is hoped that the report will undergo continual refinement, continuity in the presentation of yearly admission information has been identified as an important Annual Statistical Report objective.

Structure of the Report

In order to provide a comprehensive overview of the characteristics of the client population served within the Division's residential programs during the 1985 calendar year, the following strategy of presentation is employed:

A. Admissions

- The "Summary and Highlights" overview (Part A, pages iv-v) identifies particularly noteworthy characteristics of youth admitted during the 1986 calendar year.
- Section I (Table 1) describes major changes in the composition of the Division client population between calendar years 1985 and 1986.
- Section II (Tables 2-8) presents information for comparative purposes on the characteristics of three distinct types of admissions to Division residential programs in calendar year 1986: (a) youth admitted to a Division residential program for the first time; (b) youth readmitted to a residential program from aftercare while still on their initial placement with the Division; and (c) youth whose prior legal placement may have expired, but whose conduct has resulted in their subsequent placement with the Division on a new placement order.
- Section III (Tables 9-20) presents information on the characteristics of all admissions to DFV residential programs according to their region and district of referral. These tables provide a basis for examining the differences in youth populations referred from different regions and districts. The final table in this particular section (Table 20) also permits an examination of Division policy regarding placement of youth as close to their home communities as possible.

- Section IV (Tables 21-28) presents in more detail the social and demographic characteristics of all DFY admissions according to their level of placement. Since the Division's residential programs are structured according to level of security and community basedness, these tables provide a source of base line information regarding the extent to which youth populations differ among secure, non-community based, and community based programs.
- Section V (Tables 29-39) explores more intensively the social and demographic characteristics of all DFY admissions.
- Section VI (Tables 40-45) presents similar social and demographic information on all DFY admissions by responsible county. These tables should prove of greatest interest to local social service districts, county level youth bureaus, and county youth service administrators and agency personnel.

Before proceeding to an examination of the tables, a few notes are in order. First, admissions from aftercare immediately preceded by a discharge of six days or less are not counted as a distinct admission.

Secondly, Section IV presents information pertaining to youth's Level of Placement. The tables in this section refer to Levels numerically (i.e., I through VIII). These Level numbers are to be interpreted as follows: Level I, secure; Level II, limited secure; Level III, special residential; Level IV, rural, non-secure, limited access; Level V, community based limited access; Level VI, community based open programs; Level VII, foster care/independent living; and Level VIII, cooperative, voluntary and alternative agencies.

Thirdly, the percentages which appear in subsequent tables refer to the proportions based on known responses. Hence, they are computed on the total number of cases (for a given table) less the number of unknown values for each variable. To enhance readability, the row percentage totals (100.0%) have been eliminated in most tables.

Every effort has been made to minimize the amount of missing data for each variable included in the report. A comparison of the current levels of unknown information with those of 1982 illustrates the extent to which that goal has been achieved. As a result of this effort, however, there are two distinct sources of variation in measures of yearly change. The first is the actual change experienced between time periods. The second results from a reduction in the effects of systematic bias in the reporting of information. Although this does not render yearly comparisons meaningless, the latter influence should be considered in interpreting levels of change.

B. Service Terminations

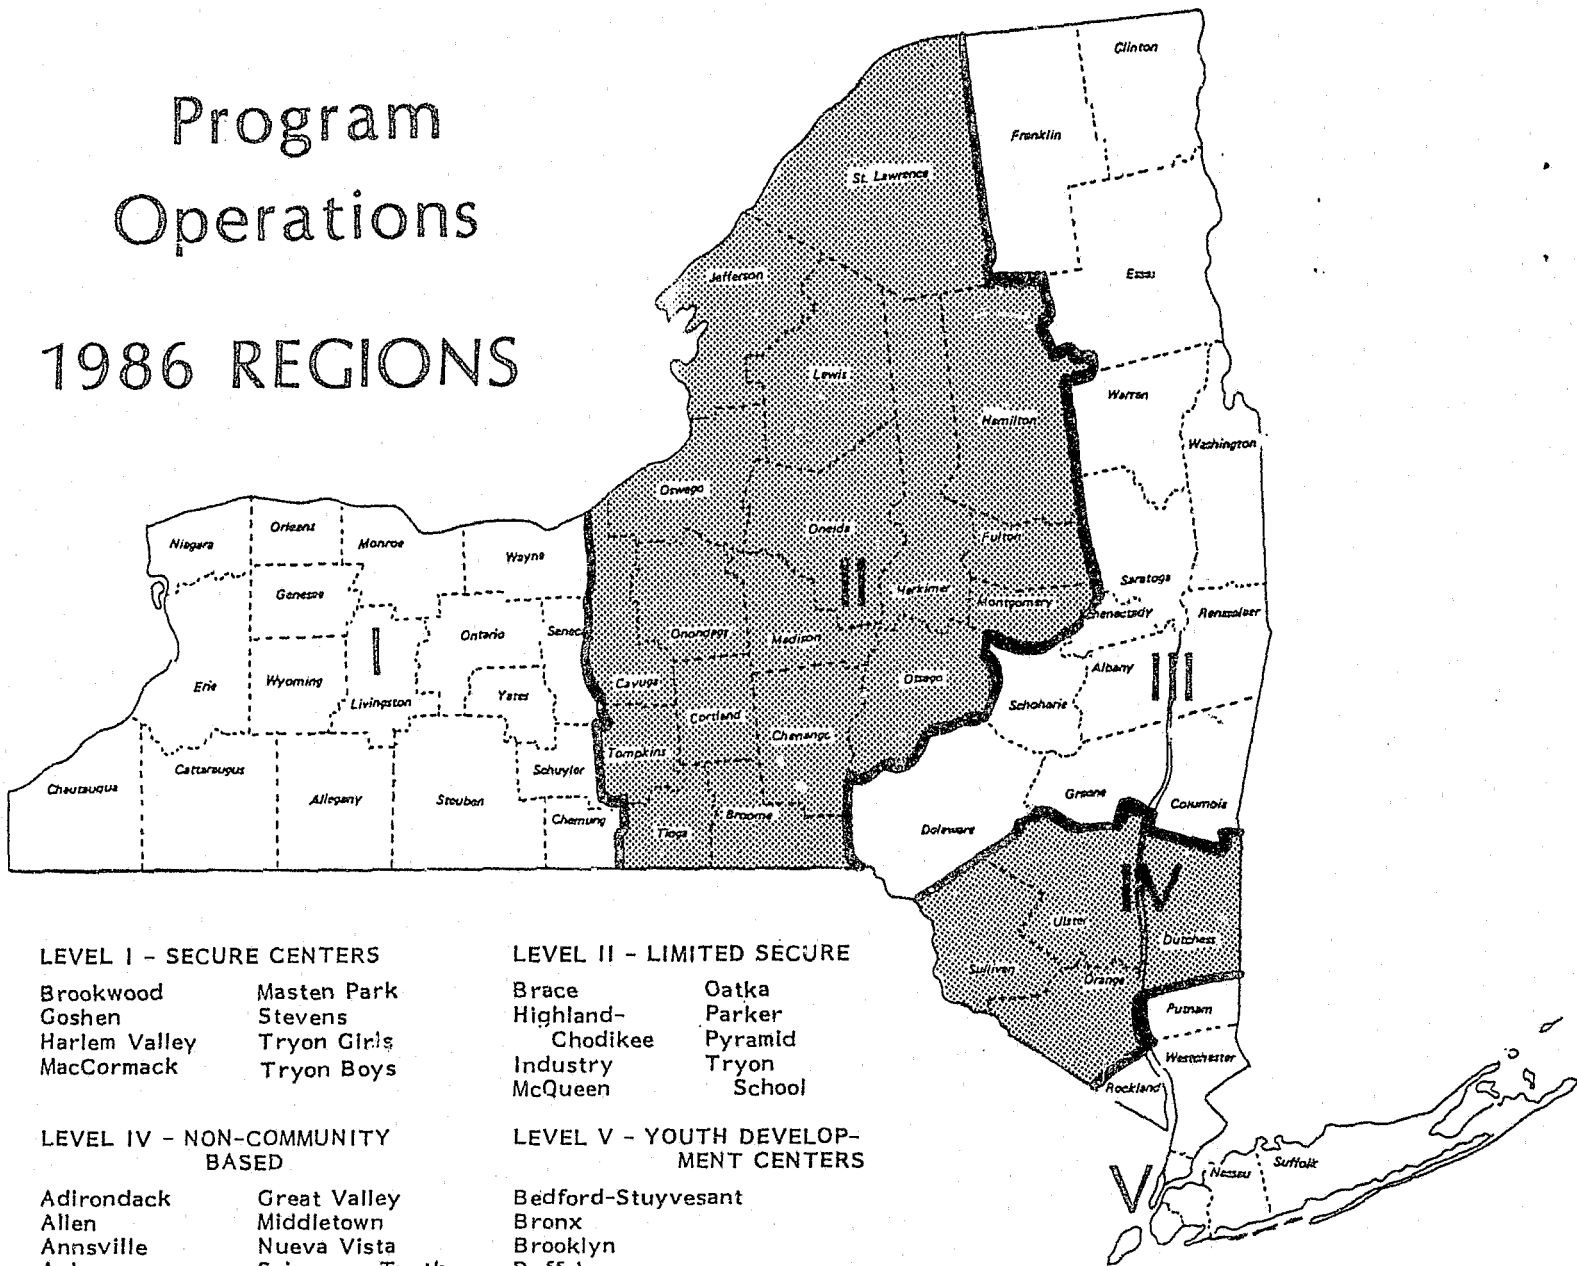

- The "Summary and Highlights" section (Part B, pages vi-vii) identifies information on client length of stay for youth whose stays with the Division terminated during calendar year 1986.
- Section VII (Tables 46-49) provides a comprehensive description of the total residential length of stay for youth served by the

Division. The present report summarizes this LOS information for stays terminating in 1986 either through release to aftercare or discharge directly from facility. Two main types of information are presented; (1) average LOS for clients with various background and legal characteristics, and (2) numbers and percentages of service terminations falling within a range of seven six-month intervals.

It is important to note that LOS as reported here is not facility or level specific, but is defined as the total residential length of stay. This means that the length of time that a client remains in each facility during a particular term of placement is essentially added together to produce an overall LOS.

It is also important to note that the counts that appear in the tables refer to service terminations and not to individuals. Thus, a client whose service was terminated twice in 1986 would be assigned two length of stay figures.

SUMMARY AND HIGHLIGHTS

A. Admissions

1. A total of 2,487 youth were admitted to DFY in 1986; 1,982 (79.7%) new admissions, 281 (11.3%) readmissions from aftercare and 224 (9.0%) new admissions with prior service (see Table 1).
2. The 1986 admission rate revealed no change in the number of youth admitted to the Division. Admissions for 1986 were virtually identical to the number of youth admitted during 1985. This is a significant change from the 7.4% increase experienced between 1984 and 1985.
3. The age distribution for youth admitted during 1986 remained nearly constant in comparison with youth admitted during the preceding year; the mean age for youth at admission during 1986 was 15.5 years, and for 1985, 15.6 years.
4. The increase in readmissions from aftercare reported in 1985 reversed itself during 1986. Admissions to DFY from aftercare comprised 11.3% of all DFY admissions. Admissions with prior service also decreased from 1985 levels, constituting 9.0% of all DFY admissions.
5. Youth adjudicated as Juvenile Offender, Restrictive Juvenile Delinquent or Juvenile Delinquent comprised 80.5% of all 1986 admissions, an increase of 2.7% from 1985. Looking solely at Juvenile Delinquents, however, there was a 4.1% increase in this type of admission from 1985 to 1986. Compared to 1985, the number of youth admitted for Class A felonies increased 16.7%, while those admitted for Class B felonies increased 11.4%, and those admitted for Class C felonies decreased 6.1%.
6. Of the 2,487 youth newly admitted to the Division, Blacks accounted for 47.8%, Whites 35.6% and Hispanics 16.0%. The pattern of Blacks constituting the majority of readmissions from aftercare continued in 1986; Blacks constituted the majority of readmissions from aftercare in 1986 (50.2%), followed by Whites (30.2%) (see Table 2).
7. The decrease in admissions to secure facilities leveled off during 1986; in 1985 and 1986, admissions to secure facilities accounted for 12.2% of the total admissions to DFY residential care (see Table 1).
8. A comparison of admissions by region of referral shows an increase in Regions I, III, and IV, while Region II and Region V decreased. Region I showed the largest increase in placements (8.3%), followed by Region IV (5.6%) and Region III (2.4%), while admissions from Region II decreased (7.2%), and Region V (7.5).
9. The marked difference in Region V and non-Region V youth admitted to secure programs continued in 1986. The proportion of Region V youth placed in Level I was 18.2%, while youth admitted to secure programs

in 1986 from the remaining four regions accounted for only 4.6% of their total admissions. Region V accounted for 83.5% of all admissions to secure facilities during 1986 (see Table 15).

10. The proportion of all youth placed in the region of referral fell from 53% in 1985 to 50% in 1986, a reversal of the trend of slowly increasing "same region" placements first noted during 1985 (see Table 20).
11. Placement in the same region as referral is largely dependent on the types of programs and facilities available in each region. Overall, Juvenile Offenders were placed in the region of referral 28.9% of the time. Restrictive JDs were similarly placed in 25.0% of the cases, while 45.0% of the JDs were placed in the region of referral.
12. There was a pronounced association between region of referral and offense. Region V, while accounting for 57% of all admissions, accounted for 85% of homicides (n=34), 98% of controlled substance offenses (n=46), 92% of robberies (n=311), and 82% of dangerous weapons charges, (n=44). (see Table 18).
13. The strong association of ethnicity and region of referral continued for 1986. While only 19% of White admissions were referred from Region V, 72% of Blacks and 90% of Hispanics were referred from these same counties (see Table 11).
14. The relationship between ethnicity and level of placement reported in past years continued in 1986. In the Division's secure programs, for example, approximately 59% were Black, 24% were Hispanic and 16% were White. Among those admitted to community based facilities, 46% were White, 46% were Black and 9% Hispanic (see Table 21).
15. An examination of ethnic differences in the type of charge (an important determinant of initial placement) revealed that 18% of White (JO, RJJ or JD) admissions involved the commission of a Class A, B or C felony. The comparison figure for Black youth was 30% and 31% for Hispanics (see Table 35).
16. The tendency to find differential distributions of offense among ethnic groups is consistent with preceding years. Whites, while comprising 29% of all JOs, Restrictive JDs and JDs, accounted for 44% of arson charges, 41% of criminal mischief charges, 43% of burglary charges and 43% of sex offenses. Blacks (51%) were charged with 64% of all controlled substance charges and 71% of all robberies. Hispanics, while accounting for 19% of all JOs, RJJs and JDs, were disproportionately represented in charges of homicide (30%), robbery (24%), possession of firearms/dangerous weapons (24%) and controlled substance charges (30%).
17. Among the 2,004 newly admitted Juvenile Offenders, Restrictive Juvenile Delinquents and Juvenile Delinquents, the top five offenses were: larceny (23%), robbery (17%), burglary (17%), other theft (13%), and assault (9%) (see Table 8).

18. Females (representing 10% of the JO, RJD and JD admissions), accounted for 19% of admissions involving an assault charge, 19% of the arson charges and roughly 16% of larceny charges (see Table 32).

B. Service Terminations

1. Average length of stay (LOS) for youth whose stays were terminated in 1986 was 13 months, with 81% staying 18 months or less. These figures are based on a total of 2,366 service terminations.
2. An examination of admission type (Table 46) shows the majority of youth to be new admissions with an average LOS of 13.7 months. Admissions with prior service and readmissions from aftercare had average stays of 11.6 and 10.9 months, respectively.
3. Table 46 also shows a general trend toward shorter average lengths of stay for older youth. The youngest group, the 10 to 12 year olds, had the longest average LOS of 21.3 months. LOS gradually decreases to 5.5 months for the 18 and over age group.
4. On average, males had longer lengths of stay than females (13.2 and 11.6 months, respectively). However, these figures reflect a greater representation of males than females in more serious (JO and RJD) adjudication categories (see Table 31).
5. Breakdowns of LOS by ethnicity show variations in LOS for Whites (12 months), Blacks (13.5 months), and Hispanics (13.7 months). However, these differences in LOS appear to be a function of ethnic group differences in type of charge, and should be interpreted together with offense data (see Table 35).
6. Regional differences in average LOS (Table 47) also were observed. Youth placed from Region IV had the shortest average LOS at 9.8 months. Youth from Region I stayed, on average, approximately 11 months, while youth placed from Regions II and III had approximately equal average lengths of stay at 12.8 and 13.0 months, respectively. Youth from Region V had the longest average LOS at 13.9 months, as would be expected on the basis of its large numbers of serious offenders.
7. Length of stay varied with adjudication from a high of 34.7 months for Restrictive Juvenile Delinquents to a low of 2.0 months for youth in the "Other Adjudication" category. Juvenile Offenders stayed an average of 15.7 months, Juvenile Delinquents, 13.1 months, and PINS, 11.7 months. While the length of stay for JOs appears to be unexpectedly short, this may be accounted for by several factors. First, since these figures are based on stays rather than individuals, very short lengths of stay may represent second stays for an individual (for example, in cases of parole violators). Secondly, due to the recent nature of JO legislation, the increasing number of JO placements and the relatively long sentences typically awarded, youth with comparatively brief lengths of stay tend to be

overrepresented in a service termination group. Due to these factors, the LOS identified here does not represent the length of time JOs admitted during a given time period will remain in program. A better estimate of JO LOS was found to be 25 months (see Population Growth in DFY Level I Programs, September 16, 1982).

8. Differences in average LOS with legal status of placement are shown in Table 48. The majority of placements fell in the category "Court to DFY," which had an average LOS of 13.4 months; representing the longest average LOS for youth whose service was terminated during 1986 were placements in the "Court to DSS" category. Relatively short average lengths of stays occurred for youth in the categories "Condition of Probation" (8.1 months), and 358-A voluntary placements (9.9 months).
9. Table 49 shows longer average stays to be associated with more serious crimes. For example, the average LOS for homicide was 37.5 months, as compared with an overall average stay of 14 months for the 1,777 JOs, RJDs and JDs terminating service in 1986. The majority of offenses fell in the categories of assault, burglary, larceny, robbery and other theft. LOS associated with these categories ranged from 15.2 months for the charges of robbery and assault, to 12.6 months for other theft. Shortest average stays (11.1 months) were noted in the category "kidnapping."
10. More serious charge types, like offense types, were associated with somewhat longer average stays. For example, average LOS for felonies was 15 months, while average LOS for misdemeanors was 12.8 months. Class A felonies showed a markedly longer average LOS of 38.9 months. As would be expected, the less serious category "Class B Misdemeanor", had a shorter average LOS (12.3 months).
