Residents in Wisconsin
Juvenile Correctional Institutions
on June 30, 1984
With Five-Year Trends for 1980-1984

Four hundred and seventy-one juveniles, 312 boys at Ethan Allen School and 122 boys and 37 girls at Lincoln Hills School, were in residence on June 30, 1984. These two facilities provide residential care and treatment in a secure custodial setting for children committed by Wisconsin's juvenile courts to the supervision of the Department of Health and Social Services' Division of Corrections under provision of the Children's Code which was revised in November, 1978. The basic philosophy reflected in this Code is that a child who has been adjudicated delinquent should receive whatever treatment deemed necessary in a setting that is the least restrictive possible considering both the needs of the child and of society. A child cannot be sent to Ethan Allen or Lincoln Hills School unless the juvenile court determines that he or she is guilty of an offense which would have resulted in a sentence of at least six months if committed by an adult and then only if it is determined that he or she is in need of treatment in a secure custodial setting because they pose a potential danger either to themselves or to society.

The June 30, 1984 resident population of 471 juveniles was slightly less (3.7 percent) than the 489 residents reported on June 30, 1983. Descriptive information; i.e., data relating to major delinquent act, race and ethnicity, etc. about juveniles in residence on June 30, 1984, can be found in Tables 1-11 while selected trend data for the years 1980-1984 appears in Appendix Tables A and B. A visual portrayal of the resident population by sex and county of commitment can be found in Maps A and B.

Four hundred and thirty-four boys, 312 (71.9 percent) at Ethan Allen and 122 (28.1 percent) at Lincoln Hills Schools were in residence on June 30, 1984. The line drawn across the state on Map A indicates the areas from which these facilities receive male juveniles. Boys committed from the 53 counties north of the line are, in most instances, sent to Lincoln Hills School near Irma in Lincoln County. Those from south of the line are sent, with some exceptions, to Ethan Allen in Waukesha County near the community of Wales. It should be noted that juvenile boys, after reception, may also be transferred between these two

facilities as circumstances dictate. Milwaukee, Racine, Kenosha, Dane, and Waukesha counties with 221, 23, 22, 20, and 15 commitments respectively accounted for just under seven-tenths (69.4 percent) of all boys in residence on June 30, 1984. Twenty-five out of the state's 72 counties had no representation in the resident population. (See Map A and Table 3.) Somewhat over three-fourths (78.6 percent) of the boys at Ethan Allen and just under nine-tenths (88.6 percent) of those at Lincoln Hills had entered the institution as new commitments. Boys returned to the institutions following revocation of some type of aftercare supervision made up about one-fifth (19.5 percent) of the population at Ethan Allen and less than one-tenth (8.2 percent) at Lincoln Hills. Eight boys, 6 at Ethan Allen and 2 at Lincoln Hills, were in residence awaiting the outcome of aftercare revocation hearings. Slightly under one-half (49.1 percent) of the boys in residence were from White or White-Hispanic family backgrounds while just over two-fifths (43.3 percent) were Black. The majority, 172 out of the 188 boys reported as being from Black backgrounds, were housed at Ethan Allen while 21 out of 26 Native Americans were in residence at Lincoln Hills. The average (mean) age for all boys was 16.2 years with Ethan Allen residents (16.3 years) being slightly older than those at Lincoln Hills (16.0 years). Armed robbery (21.5 percent), battery (15.4 percent), and theft (12.5 percent) were most often reported as the major delinquent acts committed by Ethan Allen residents just prior to admission; unarmed burglary (28.0 percent), auto theft (18.0 percent), and theft (11.5 percent) for residents at Lincoln Hills.

Children sent to Ethan Allen and Lincoln Hills Schools for treatment quite often have a wide variety of needs and problems that may or may not be associated with delinquent behavior. The treatment programs in these facilities, therefore, are designed to (1) assess the child's abilities, needs, and problems and (2) develop a treatment plan that will provide the child with the opportunity and the assistance necessary to enable him to work on overcoming or coping with them. Table 5 indicates that a minority (14.5 percent) of the boys in residence on June 30 were without any problems relating to assaultive behavior, sexual behavior, or drug and/or alcohol usage. Assaultiveness of some type was reported to be a problem for just under two-thirds (63.3 percent) of the boys in residence on June 30, 1984. Alcohol and/or drug usage was found to be a problem area for slightly more than one-fourth (27.7 percent) of the residents while less than one-tenth (8.0 percent) were found to have difficulties in dealing with sexual behaviors.

Map B*
Females Resident
In Juvenile Correctional Institutions
By County Of Commitment
June 30, 1984

* N = 35. Excludes 2 juvenile females who are not Wisconsin cases.

Lincoln Hills School, the only coeducational facility as well as the only facility for juvenile girls operated by the Division of Corrections, provides residential care and treatment for girls on a statewide basis. The number of girls in residence on June 30 has remained constant at 37 since the end of June, 1983.

Twenty-nine out of the 37 girls (78.4 percent) in residence on June 30, 1984, were classified as new commitments, six (16.2 percent) as returns following revocation of aftercare supervision, and two were being supervised for jurisdictions other than Wisconsin. Three-fourths (75.7 percent) of the girls were sent to Lincoln Hills from counties located in the southern and southeastern sections of the state. Two counties, Milwaukee with 10 commitments and Racine with 8, accounted for just under one-half (48.6 percent) of the resident population. (See MAP B and Table 3.) Girls from White racial backgrounds made up slightly less than one-half (48.7 percent) of the population while just over one-third (35.1 percent) were from Black family backgrounds. Five girls, including one from a Hispanic cultural background were reported to be Native Americans. The average (mean) age for girls in residence on June 30, 1984, was found to be 16.1 years.

Battery (29.7 percent), unarmed burglary (16.2 percent), and theft (16.2 percent) were the major delinquent acts most commonly committed just prior to admission by girls in residence on June 30, 1984. Assaultive behavior alone or in combination with drug and/or alcohol problems or sexual problems, was reported to present difficulties for almost three-fifths (59.5 percent) of the residents. Drug and/or alcohol usage, either alone or in combination with assaultive and/or sexual behavior difficulties, was reported as being a problem area for somewhat less than one-half (45.9 percent) of the residents. Problems relating to sexual behavior, alone or in combination with other problem areas, were reported for less than one-fifth (16.2 percent) of those in residence on June 30, 1984.
