- . Of the 1,675 robberies in 1986, a handgun was used in 533 incidents and 183 of these incidents occurred in the street. This represents an increase of 34.6% when comparing the same factor to 1985.

AN ANALYSIS OF THE TEN YEAR (1977-1986) TREND IN PART I CRIME

- . The total number of Part I crimes for 1986 (43,776) as compared to 1977 (54,696) represents the lowest reported crimes in this ten year period.
- . We note that during this ten year period 1977-1986 there was an overall decrease of 20% in total crime. However, there was an increase of 61.5% in VIOLENT CRIMES, the specific crimes of Robbery increased (39.6%), Assault (100.7%), and Murder (63.3%).

AN ANALYSIS OF THE TEN YEAR (1977-1986) TREND CRIME RATE PER 100,000 POPULATION

AN ANALYSIS OF ROBBERY 1979-1986*

PART II INCIDENTS 1977-1986

SECTION IV

INCIDENCE OF CRIME TYPE BY COMMUNITY

Table IX provides a record of criminal incidence by the community of occurrence. In order to compile the number of criminal incidents per community and then compare that analysis with the appropriate geographical/demographical locale it is necessary to utilize three complete sets of source documents. The communities are those as identified by the Nassau Police Department's location codes and are delineated as combined Incorporated Villages and Unincorporated statistical areas. The population data was arrived at from a LILCO estimate from Jan.1, 1986 which in turn is based upon the April 1, 1980 census. The number of criminal incidence per community have been extrapolated from the Uniform Crime Reports of both the Independent Police Depts. and the Nassau County Police Dept.

Inconsistencies evident in the comparison of the above source documents do not obscure the essential validity for their use. In some cases communities or areas may exist for the N.C. Police Dept. crime reporting procedures but do not have separate data for census purposes. When this occurred several reports were analyzed and combined to obtain a "best fit" and these communities were then marked with footnotes.

We note in this analysis that in approaching the community by community analysis there are several factors that tend to detract from absolute reliability of such comparison. Two of these factors are: difference in definition or interpretation of what criminal incident occurred as recorded by different Police Depts. and differences in community boundaries as defined by the Nassau County Police Department and the U.S. census Bureau.

TOTAL CRIMINAL INCIDENTS

While there are some areas that have offense levels that are much higher than the County norm, generally, crime in Nassau County remains a dispersed phenomenon. Indicative of this is the fact that the communities with the highest concentrations of population consistently have the highest number of reported (see TABLE XA) crimes. The increase in the number of criminal incidents in Nassau County for 1986 is also reflected in increases in the reported incidents in the majority of the ten communities with the greatest number of crimes.

NASSAU COUNTY
CRIMINAL JUSTICE COORDINATING COUNCIL
AN ANALYSIS OF
FELONY CASE PROCESSING
IN
NASSAU COUNTY
1982-1986

PREFACE

METHODOLOGY OF REPORT PREPARATION

The Criminal Justice Coordinating Council has prepared an analysis of Felony Case Processing comprising the years 1982 thru 1986. In preparing this study, CJCC has utilized the District Attorney's Management Information System known as D.A.I.S. This computer system is programmed to follow the progress of criminal cases from their entry into the system and during their flow within the judicial system. This information system, CJCC believes, provides an accurate and detailed account of criminal case data in Nassau County.

What has emerged as a result of this coordinated effort is an ability to observe and analyze the processing of cases in Nassau County.

SECTION I

OVERVIEW OF FELONY CASE PROCESSING FLOW

Upon an arrest, the arrestee is brought to District Court Arraignment Part, where there is a reading of an accusatory instrument, together with a setting of bail. The defendant is then given the opportunity to retain a lawyer. If the defendant cannot afford one, a lawyer will be appointed by the Court.

The case then proceeds to the District Attorney's Screening Unit to determine the scope of prosecution. The case is placed on the Felony Screening calendar for conference. If a misdemeanor plea is agreed upon, the case is then disposed of in District Court. The defendant may request as a matter of right a felony examination (which is waived in the majority of cases). In the event defendant exercises the right to a felony examination, a hearing is held before a District Court Judge to determine if there is a reasonable cause to believe that a felony was committed by the defendant, and whether the case should be held for the action of the Grand Jury. In any case, the defendant may request a pre-indictment conference in County Court where the matter may be disposed of through a plea of guilty to a Superior Court Information. If no plea is agreed upon the case will then be presented to the Grand Jury. If the Grand Jury hands up an indictment the defendant will be arraigned in County Court, and the case will then proceed to trial, unless the defendant pleads guilty to the highest count of the indictment.

As indicated, Nassau County has a significantly higher conviction rate and correspondingly lower dismissal and acquittal rate than the Statewide average. It should be noted that with the exception of category C, below, DCJS data is utilized in this table in the interest of comparability.

SECTION II

DISTRICT COURT ACTIVITY PERTAINING TO DISPOSITION OF FELONIES

In the development of a Criminal Justice Management Information System, of which this report may be considered a part, the key elements are: 1) the number of reported criminal incidents, 2) the number of arrests resulting from those incidents, 3) the number of cases prosecuted as a result of arrests and 4) the number and type of convictions and sentences resulting from the cases that are prosecuted. A shortcoming of the previous case processing reports was that the number of dispositions appeared to be far lower than the number of felony cases filed. This was due to the fact that the cases which were filed as felonies and disposed of as misdemeanors in District Court were not included. Thus, in the interest of presenting a more definitive picture of the actual workings of the prosecutorial and court components of the system, we are including a description of the felony cases that were disposed of in District Court as non-felonies.

SECTION III

ANALYSIS OF HIGH CHARGE AT ARREST VS
CHARGE AT CONVICTION

Some of the factors that impact on the analysis of pleas of guilty are: 1) the possible over-charging of a defendant; 2) the reactivation of cases from long-outstanding indictment warrants when a defendant is finally apprehended; 3) the legal problems in proving certain cases; and 4) the reduction of charges in exchange for a defendant's guilty plea, consistent with normal District Attorney's office policies.

Table XIII shows a comparison between the initial highest charge at arrest and the charge at point of conviction whether by guilty verdict after trial or by plea of guilty.

Charge reductions shown in the guilty verdict after trial columns, in Table XIII on page 100, are not the result of plea negotiations, but rather are a result of the trial process.
