APPENDICIES

- Appendix A. Violent Felony Offense Listing.
- Appendix B. Violent Felony Offense Article Classifications as used in the data tables.
- Appendix C. Percent of "Final" Dispositions of VFO Arrests Reported to DCJS.
- Appendix D. Regional Volumes of the Violent Felony Processing Source Book.

Introduction

This Sourcebook presents data on the processing of violent felony offenses in each of the counties in New York State from 1982 through 1986. The Sourcebook is comprised of twelve regional volumes using the same regional breakdowns as the Division's Criminal Justice Profiles reports. These are listed in Appendix D.

To provide a comparative base, each volume presents statistics on New York State, New York City, Suburban New York City, the remaining "Upstate" counties, as well as the individual counties within the region. In addition, each of the volumes that contain a Metropolitan Planning Area (MPA) county will also display the statistics for all individual MPA counties outside the region. (New York City consists of Bronx, Kings, New York, Queens, and Richmond Counties; Suburban New York City consists of Nassau, Rockland, Suffolk, and Westchester Counties; the MPAs are Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester Counties.)

This is the eleventh report on violent felony offenses issued by the Division of Criminal Justice Services pursuant to Section 837-a of the Executive Law. It is the fourth prepared under the auspices of the Office of Justice Systems Analysis and its predecessor organization, the Office of Policy Analysis, Research and Statistical Services.

Data for this analysis were obtained from the Computerized Criminal History/Offender-Based Transaction Statistics data system (CCH/OBTS) maintained by DCJS. The CCH/OBTS system uses data collected from police, prosecutors, courts, and correctional agencies to track individual offenders through the criminal justice system. The "arrest event" is the unit of count utilized in this Sourcebook. An arrest event consists of all charges placed against an offender as a result of a single arrest. Offenders arrested more than one time in the specified year would be counted once for each arrest.

Readers wishing additional information regarding violent felony offense processing are invited to contact the Division of Criminal Justice Services.

How to Interpret the Tables

----- TOTAL VFO ARRESTS	The number of VFO arrests reported with an arrest date in the listed year.
DISPOSITIONS CONVICTIONS:	For convictions, the number <u>sentenced</u> in the listed year; for non-convictions, the number of dispositions reported in the listed year.
VIOLENT FELONY	Counts the number of convictions in which at least one charge was for a violent felony.
OTHER FELONY	
MISD/OTHER	
SENTENCES:	"JAIL" includes split sentences to jail and probation and time served; "OTHER" includes fine as well as conditional and unconditional discharge.
PRISON	
JAIL	
OTHER	

In the tables which follow, the above data are presented for the years 1982 through 1986 for New York State and the three general regions discussed above. Data are also presented for the specific counties in the geographic region covered by the volume. Tables show the processing of "all violent felony offenses" and for violent felony offenses categorized by the Penal Law article in which they are defined (e.g., assault violent felonies include those specific violent felony offenses found under Article 120 of the New York State Penal Law). "Other VFOs" include kidnapping, arson, and intimidating a victim or witness. A complete listing is provided in Appendix A (by arrest class) and Appendix B (by arrest article).

- The reporting of dispositions to the CCH/OBTS system is known to be incomplete, especially in the non-New York City areas. In addition, because only "final" dispositions are counted in these analyses, non-final or "interim" dispositions, such as the issuance of a warrant, are also considered "missing." Appendix C lists the percentage of final dispositions reported for each county for 1982 through 1986 Violent Felony Arrests. In general, the lower the rate of reporting, the more caution should be exercised in drawing definitive conclusions from the processing data in this Sourcebook. Reporting percentages will tend to be lower for more recent years (particularly 1986) than for earlier years. This is because relatively fewer of these recent arrests had completed their criminal justice processing at the time the data file was created in mid-1987.
- Percent change refers to yearly change only. Data are not transactional, arrests are presented by year of arrest, whereas dispositions are listed by year of disposition. Therefore, dispositions are not necessarily related to the arrests that occurred in that year.
- "NA" (not applicable) is used in the percent change column when the base figure is zero and the comparison year is not equal to zero.
