Probation and Parole 1987

During 1987 the number of adults on probation or on parole from prison increased to record high levels. State and Federal agencies reported that 2,242,053 offenders were on probation and 362,192 offenders were on parole--an estimated 1.45% of all adults in the United States.

The total number of adults in the Nation under some form of correctional supervision, including those in local jails or State and Federal prisons, reached a new high of over 3.4 million--an increase of 6.8% since 1986 and 40% since 1983. An estimated 1 out of every 53 adults in the United States were under some form of correctional supervision on a given day in 1987.

Probation

The probation population in 1987 showed a 6% gain over the previous year's count (table 1). The increases for the States as a whole exceeded the increase in the Federal system by 1.5 percentage points. The increase in the probation population occurred in every region, with the Midwest and West reporting the highest gains (8.7% and 8.6%) and the South the lowest (3.8%).

Six States reported increases in their probation populations of over 12%: Missouri (21.4%), Washington (17.6%), Delaware (16.3%), New Hampshire (15.8%), Minnesota (14%), and Indiana (12.1%). Eight States showed decreases ranging from 0.1% in Texas to 11.5% in Colorado.

As a ratio per 100,000 adult residents, the probation population in the South was the highest--1,441 offenders per 100,000 adult residents. This ratio surpassed that for the West by 354 persons, the Northeast by 346, and the Midwest by 340.

Of individual States, Georgia had the highest rate of persons on probation--2,463 per 100,000 adult residents of the State. Texas, Maryland, and Massachusetts also had more than 2,000 persons on probation for every 100,000 adult residents.

At the end of 1987 Texas reported the largest number of persons on probation, nearly 290,000. Federal probationers accounted for 2.7% of the national caseload.

During 1987 there were nearly 1.4 million admissions to probation supervision. Of the reporting jurisdictions, Florida reported the largest number of entries, almost 174,000. Entries to Federal probation were 1.7% of the Nation's admissions.

Parole

The parole population grew 11% over the previous year (table 2). In both 1986 and 1987 the parole population was the fastest growing of the four components of corrections.

Seven States reported increases above 20% of their 1986 parole populations: Louisiana (73.9%), Nebraska (51%), North Carolina (39.9%), Washington (36.3%), California (24.6%), Missouri (21.6%), and Idaho (20.7%). Among the regions of the country, the parole populations in the West showed the largest percentage increase over the year, gaining almost 22%. States in the Northeast had the slowest growing parole population, with a regional increase of 3.1%.

Thirteen States in 1987 reported a declining parole population. The average decrease for these States was 10.3%. Connecticut, Florida, Vermont, and West Virginia each reduced its parole population more than 13% during 1987.

November 1988

This is the seventh annual Bureau of Justice Statistics bulletin presenting statistics from the Uniform Parole Reports (UPR) and the National Probation Reports (NPR). In conjunction with counts of jail and prison populations, the data presented here indicate the relative use of different types of correctional sanctions in the United States.

BJS gratefully acknowledges the generous cooperation of probation and parole agencies participating in these surveys.

Joseph M. Bessette
Acting Director

The Northeast, the region with the smallest increase in the number of persons on parole, had the highest ratio of parolees to residents: 238 per 100,000 adults. Of the States, Texas had the highest ratio, 570 per 100,000. Pennsylvania reported the second highest ratio, 423 per 100,000 adults.

At the end of 1987 Texas maintained the largest parole population of any reporting jurisdiction, more than 67,000. The Federal parole population accounted for 5.1% of all parolees in the United States.

California's total of 51,123 admissions to parole supervision during the year was the largest of any State. Federal parole entries were 4.2% of admissions nationwide.

Adults under correctional supervision

Of the more than 3.4 million adults under the care or custody of a correctional agency on a given day in 1987, 3 out of 4 offenders were living in the community:

Supervised in the community	75.2%
Probation	64.7
Parole	10.5
Incarcerated	24.8%
Jail	8.5
Prison	16.3
Total under correctional supervision	100%

The probation and parole populations not only exceeded the number of persons in correctional facilities, but from 1983 to 1987 they increased at a higher rate (table 3).^a The community-based population grew by more than 40% during the 5-year period; by comparison, the number of jail and prison inmates had increased about 33% over the same period.

Types of release from prison

More than 80% of those released from prison receive supervision in the community. Prisoners enter parole supervision either by a discretionary parole board decision or by fulfilling the conditions for a mandatory release.

In most jurisdictions the parole board has discretionary authority to release prisoners to conditional supervision in the community based on statutory or administrative determinations of eligibility. Usually prisoners must serve some fraction of the minimum or maximum sentence before becoming eligible for parole.

In other jurisdictions, primarily those with determinate sentencing statutes, inmates are conditionally released from prison when they have served their original sentence minus time off for good behavior or program participation; this type of release is referred to as supervised mandatory release. In both discretionary parole release and supervised mandatory release, conditions of the release are supervised by a parole officer, and rule violations or new crimes may result in a return to prison for the balance of the unexpired sentence.

By contrast, unconditional prison releases are those prison releases in which the offender's obligation to serve a sentence has been fully satisfied.

^aA small fraction of the increase may result from reports of local probation agencies that formerly did not report.

^aThe State estimated exits.

^bThe State estimated all of its data.

Expiration of term, for example, refers to a release from prison after full service of a sentence or after reductions for earned credits. No further conditional supervision in the community is required.

The percent of supervised mandatory releases from prison increased about fivefold during the past decade, from about 6% of all releases in 1977 to over 31% in 1987 (table 4). By contrast, prisoners released by a parole board decision declined from nearly 72% of all releases in 1977 to 41% in 1987.

Probation notes

Because many States update their population counts, the January 1, 1987, numbers may differ from those previously published for December 31, 1986.

Alabama--The 1987 beginning and yearend counts reflect the addition of Birmingham and Huntsville Municipal Probation Departments.

Arkansas--The State estimated all its data.

Indiana--The data are for calendar year 1986.

Minnesota--The State revised the yearend 1986 count to include 3,674 cases under supervision by the Alternative Sentencing or Case Manager Programs. Data on exits were estimated.

Missouri--The 1987 beginning and yearend counts reflect the addition of cases from the St. Louis office.

Nevada--The State estimated all data.

New Jersey--The State counted 1,188 transfers from other States as entries.

New Mexico--The State counted neither absconders nor persons supervised out-of-State.

Utah--The State excluded from its yearend count cases under interstate compact (an agreement for transferring persons under supervision to another State.)

Virginia--The probation data are from the fiscal year ending June 30, 1986. Virginia did not include absconders in its yearend count.

Washington--The State included absconders, a category excluded from their count before 1987.

Parole notes

Because many States update their population counts, the January 1, 1987, numbers may differ from those previously reported for December 31, 1986.

Alabama--Data include 47 local parolees unreported in 1986. The State estimated entries and exits.

Alaska--The State excluded data describing 150 persons on mandatory parole.

California--The State reported releases to parole from both the Department of Corrections (DOC) and the California Youth Authority. Exits include 6,225 absconders (DOC).

Colorado--The State placed absconders in an inactive caseload but included them in the yearend population counts. Colorado estimated exits.

Connecticut--Data include interstate compact cases under supervision within the State.

1987	270,506	100	40.6	31.2	4.4	5.7	16.2	1.0	.9

Note: The data are from the National Prisoner Statistics reporting program. The total releases from State prison are those for

which the method of release was reported. Deaths, unspecified releases, transfers, and escapes were not included. Altogether, 305,098

persons were released or removed from State prisons in 1987.

Maine--The State abolished parole in 1976. There remain 41 pre-1976 parolees under supervision and 35 in prison who will become eligible for parole.

Massachusetts--The State estimated data for entries and exits.

Mississippi--Yearend population counts omit absconders.

Missouri--The State estimated the 1987 parole data.

Montana--Montana estimated data from available manual records.

Nebraska--Data include only parolees under supervision within the State.

Nevada--The State estimated all data.

New Mexico--The 1987 yearend count omits 184 absconders and 198 parolees supervised out-of-State.

New York--Although the State supervises parolees from county facilities, it excluded 301 such cases from the count.

North Carolina--Absconders and transfers to other jurisdictions remain in the active caseload.

North Dakota--The State counted absconders in the yearend population.

Oklahoma--The State does not consider discharged absconders; persons discharged to custody, detainer, or warrant; or transfers to other jurisdictions to be exits. They are carried as administrative caseload.

Pennsylvania--Local authorities supervised 25,615 parolees. Persons returning to prison with new charges pending or parole revocation pending were not counted as exits.

Rhode Island--Parole data for 1987 include 17 persons being held on detention warrants, 1 person serving a Federal sentence, 6 persons being supervised by the U.S. Immigration Service, and 3 participants in the Federal Witness Protection Program.

South Dakota--The reporting period was for the fiscal year ending June 30, 1987. The State kept absconders in its yearend parole counts.

Texas--The reporting period was for the fiscal year ending August 31, 1987.

Virginia--The State reported 837 transfers as entries and an unspecified number of transfers as exits.

Washington--The State estimated the number of entries and exits. It placed absconders in an inactive caseload and omitted them from the population count.

West Virginia--West Virginia in 1987 began to report cases being supervised out-of-State.

Bureau of Justice Statistics Bulletins are prepared principally by BJS staff. This bulletin was written by Thomas Hester of BJS, and edited by Frank D. Balog. Marilyn Marbrook, publications unit chief, administered production, assisted by Jeanne Harris, Christina Cunningham, and Yvonne Shields. Lisa McNelis and Art Ciampa of the U.S. Bureau of the Census carried out the collection and processing of the data under the supervision of Betty Ford and Diana Cull.

One free phone call can give you access to a growing data base on drugs & crime

The new Data Center & Clearinghouse for Drugs & Crime is managed by the Bureau of Justice Statistics. To serve you, the center will —

- Respond to your requests for drugs and crime data.
- Let you know about new drugs and crime data reports.
- Send you reports on drugs and crime.
- Conduct special bibliographic searches for you on specific drugs and crime topics.
- Refer you to data on epidemiology, prevention, and treatment of substance abuse at the National Clearinghouse for Alcohol and Drug Information of the Alcohol, Drug Abuse, and Mental Health Administration.
- Publish special reports on subjects such as assets forfeiture and seizure, economic costs of drug-related crime, drugs and violence, drug laws of the 50 States, drug abuse and corrections, and innovative law enforcement reactions to drugs and crime.
- Prepare a comprehensive, concise report that will bring together a rich array of data to trace and quantify the full flow of illicit drugs from cultivation to consequences.
