PENNSYLVANIA DEPARTMENT OF CORRECTIONS P. O. BOX 598 CAMP HILL, PENNSYLVANIA 17011 (717) 975-4860

To the Citizens of Pennsylvania:

Since 1980, the state's inmate population has increased at an unparalleled rate. The state's prison population on January 1, 1980 was 7,806 and on December 31, 1987 the population had soared to 16,302, a 109% increase. The annual statistical report has been produced to help you, the reader, better understand the characteristics and management of the Department of Corrections.

This report provides a statistical representation of offenders admitted to, incarcerated in, and released from the Department. We are hopeful that the tables and charts presented in the following pages will be informative, useful, and provide you with a better understanding of the challenges encountered by the Department.

The information contained within this report provides you and I with an accurate means of assessing the size and scope of the task at hand. The data also provides an opportunity to view and anticipate future needs within the entire Pennsylvania criminal justice system and, particularly, within the Department of Corrections.

illy Submitted,

Commissioner

TABLE OF CONTENTS

| SECTION | I — Receptions |
|---------|------------------------|
| SECTION | II — Inmate Population |
| SECTION | III — Releases |
| SECTION | IV — Miscellaneous |

HIGHLIGHTS

SECTION I

A decrease in court commitments during the last three years has been offset by an increase in parole violators.

From 1980 to 1987, the major contributing counties to state correctional institutions in terms of court commitments were Philadelphia (8,441 or 34%), Allegheny (2,981 or 12%), Montgomery (1,272 or 5%), Dauphin (906 or 4%) and Erie (894 or 4%). Allegheny county committed an additional 3,187 or 48% to the Regional Correctional Facilities at Greensburg and Mercer.

SECTION II

The inmate population in the Pennsylvania Department of Corrections (DOC) increased 109% from 7,806 to 16,302 since January 1, 1980, while the civilian population remained constant.

On December 31, 1987, the Pennsylvania DOC was operating at 131% of designed capacity.

Since December 31, 1980, the number of long-term inmates, those serving minimum sentences exceeding ten years, increased 125% from 1,263 to 2,845.

Although the percentage of lifers to total inmate population has remained constant at 10% since 1980, the number of lifers has doubled from 848 to 1,674.

The inmate population is getting older. On December 31, the percentage of inmates under 25 years of age decreased from 30% or 2,467 in 1980 to 18% or 2,891 in 1987.

At the close of 1987, 63% or 10,343 of inmates confined in the Department were convicted of assaultive offenses.

Female populations in the Department increased 143% from 280 on December 31, 1980 to 680 on December 31, 1987. Female court commitments increased 78% from 163 in 1980 to 290 in 1987.

SECTION III

Based on paroling actions by the Pennsylvania Board of Probation and Parole, the percentage of paroles granted decreased from 81% in 1980 to 64% in 1987.

The average time served by inmates released from the Department in 1987 was 33 months.

SECTION IV

While the inmate population doubled during the 1980's, inmate escapes declined from 91 in 1980 to 77 in 1987.

SECTION

Acabions -

This section presents the receptions to the Pennsylvania Department of Corrections from 1980-1987. Receptions include: (1) court commitments, that is, defendants convicted and sentenced to state correctional facilities by county criminal courts, (2) parole violators returned by state and local paroling authorities, and (3) county prison transfers from local correctional facilities. This section provides information about the committing county, the age, race and sex of those committed, the crimes for which the inmates were committed and the length of their sentence.

TRENDS

During the past three years, the number of court commitments declined, while the number of parole violators returned to state facilities increased. The reduction in court commitments may be attributed to two factors: (1) changing the classification of the Greensburg Facility from a regional to a state correctional institution, and (2) the periodic cap on new county receptions to the Mercer Regional Correctional Facility. As a result, there has been a reduction in the reception of inmates serving a county sentence to the Department of Corrections. (A county sentence is a period of incarceration less than two years.) The following table and bar graph summarize receptions to the Department from 1980 to 1987.

TABLE 2

RECEPTIONS TO THE DEPARTMENT OF CORRECTIONS, 1980 TO 1987

| | COURT COM | MITMENTS | PAROLE V | IOLATORS | | Total Admissions | |
|------|------------------------|--------------------------|----------|----------|----------------------------|---------------------|--|

| 1980 | 2,206 | 877 | 762 | 44 | 75 | 3,964 | |
| 1981 | 2,674 | 877 | 1,121 | 50 | 45 | 4,767 | |
| 1982 | 3,032 | 873 | 1,180 | 44 | 38 | 5,167 | |
| 1983 | 3,219 | 903 | 1,343 | 54 | 40 | 5,559 | |
| 1984 | 3,316 | 1,112 | 1,361 | 53 | 32 | 5,874 | |
| 1985 | 3,168 | 1,138 | 1,582 | 69 | 26 | 5,983 | |
| 1986 | 3,455 | 690 | 1,748 | 56 | 16 | 5,965 | |
| 1987 | 3,660 | 185 | 2,093 | 15 | 21 | 5,974 | |

NOTE: On May 1, 1986, The State Regional Correctional Facility at Greensburg was changed to a State Correctional Institution, leaving Mercer as the only Regional Correctional Facility within the Department.

RECEPTIONS BY TYPE 1980 TO 1987

TABLE 3

COURT COMMITMENTS

Since 1980, 24,730 county court commitments were received in state correctional institutions and an additional 6,655 were received in regional correctional facilities. The following table lists all 67 counties and the number of commitments from each for 1980-1987.

MAJOR CONTRIBUTING COUNTIES

Since 1980, 70.5% of all court commitments to state correctional institutions were received from ten counties. Four of these ten counties are located in the densely populated southeastern corner of Pennsylvania. The two major contributing counties were Philadelphia at 34.1% and Allegheny at 12.0%.

TABLE 6

TABLE 7

COMMITMENTS BY COUNTY TO DEPARTMENT OF CORRECTIONS, 1980 - 1987

Excludes state regional correctional facilities.

In addition to committing 12.0% of all court commitments to state correctional institutions, Allegheny County also committed 47.9% of all inmates received in the regional correctional facilities since 1980. The following is a table and pie chart depicting all court commitments to regional facilities for the period 1980-1987.

TABLE 8

TEN HIGHEST COUNTIES COMMITTING INMATES TO STATE REGIONAL CORRECTIONAL FACILITIES, 1980 TO 1987

| Rank | County | 1980 to 1987 Total | Percent of State Total |

| | State total | 6,655 | 100.0 |

Note: Only counties located within Common Human Services Regions 5 and 6 commit short-term commitments to Greensburg and Mercer.

TABLE 9

COMMITMENTS BY COUNTY TO REGIONAL FACILITIES, 1980 - 1987

AGE, RACE AND SEX

The Pennsylvania Department of Corrections is now receiving older individuals. It appears this trend will continue due to the advent of the sentencing guidelines and mandatory sentencing. During the period 1980-1987, the median age of court commitments to the Department increased from 25.8 to 28.6. Similarly, the average age increased from 28.1 in 1980 to 30.1 in 1987. The percent of receptions who were under 25 years of age decreased from 46.4% in 1980 to 32.4% in 1987, while the percent of receptions 40 years of age and over increased from 10% to 14.3%.

COURT COMMITMENTS BY MAXIMUM SENTENCE 1987

LIFERS

Since 1980, the Pennsylvania Department of Corrections received 944 inmates who were sentenced to life without parole. This group represents approximately 10% of the inmate population. A profile of these lifers shows that the majority were: from Philadelphia County (52.5%), between the ages of 20 and 24 (27.0%), non-white (60.4%), and male (94.9%).

SECTION

Innate Dynation

A major concern of correctional administrators is the rapid growth of the inmate population in the Pennsylvania Department of Corrections, during the 1980's. From January 1, 1980 to December 31, 1987, the inmate population increased 108.8% from 7,806 to 16,302 respectively. This section addresses various aspects of the inmate population, such as, incarceration rates, population trends, population versus capacity, sentence status and length, and demographic profiles.

INCARCERATION RATE

The ratio of inmates per 100,000 civilian population has nearly doubled from 69.5 on December 31, 1980 to 136.6 on December 31, 1987. The subsequent table and bar graph present a comparison of the civilian population to the inmate population for 1980 to 1987.

TABLE 20

COMPARISON OF CIVILIAN AND INMATE POPULATIONS 1980 TO 1987

| | CIVILIAN POPULATION | INMATE POPULATION* | RATE PER 100,000 |
|------|---------------------|--------------------|---------------------|
| 1980 | 11,863,895 | 8,243 | 69.5 |
| 1981 | 11,879,200 | 9,420 | 79.3 |
| 1982 | 11,882,500 | 10,572 | 89.0 |
| 1983 | 11,894,500 | 11,798 | 99.2 |
| 1984 | 11,891,300 | 13,126 | 110.4 |
| 1985 | 11,863,700 | 14,260 | 120.7 |
| 1986 | 11,889,000 | 15,227 | 128.1 |
| 1987 | 11,936,000 | 16,302 | 136.6 |

December 31.

Note: The inmate population on January 1, 1980 was 7,806; the increase since this date was 8,496 or 108.8%.

TABLE 21

COMPARISON OF CIVILIAN AND INMATE POPULATIONS, 1980 - 1987

A comparison of the crime rates and the incarceration rates shows very little correlation between the two. While the civilian population has remained constant from 1980-1987, the incarceration rate has increased from 69.5 to 136.6. However, the crime rate has decreased from 3,745.7 to 3,152.5.

TABLE 22

COMPARISON OF CRIME RATES AND INCARCERATION RATES IN PENNSYLVANIA, 1970 TO 1987

| | CIVILIAN POPULATION | INMATE POPULATION (DEC. 31) | INCARCERATION RATE | TOTAL INDEX CRIMES | REPORTED CRIME RATE |

TABLE 23

COMPARISON OF CRIME RATES AND INCARCERATION RATES, 1970 - 1987

NOTE: Both rates are 100,000 per civilian population.

Crime rates may be calculated using slightly different civilian populations.

The following table lists those ten counties with the highest incarceration rates for 1987 in comparison to 1980. At the close of 1987, the four counties with the highest incarceration rates were Philadelphia (385.1), Dauphin (253.9), Erie (198.8), and Allegheny (170.4).

TABLE 24

INCARCERATION RATES

| Co | unty | 1980 | 1987* |
|----|----------------|-------|-------|
| 1 | Philadelphia | 165.3 | 385.1 |
| 2 | Dauphin | 153.2 | 253.9 |
| 3 | Erie | 86.9 | 198.8 |
| 4 | Allegheny | 78.1 | 170.4 |
| 5 | Northumberland | 70.7 | 153.9 |
| 6 | Lycoming | 78.5 | 147.9 |

| 9 | York | 57.5 | 111.1 |
| 10 | Berks | 57.3 | 107.2 |

Ranking does not include 7th and 8th class counties.

Table 25

RATES OF INCARCERATION
FOR THE TOP TEN COUNTIES

EXPRESSED AS A PERCENT OF COUNTY POP.

^{*}NOTE: Since 1987 estimated civilian populations by county were not yet available, 1986 county populations were used to calculate 1987 incarceration rates per 100,000 in Table 24.

POPULATION TRENDS

Since January 1, 1980, populations in the Department increased 108.8% from 7,806 to 16,302. During this 96 months period, the average monthly increase was 85.5 inmates. The opening of three new facilities at Cresson, Frackville and Retreat during 1987 reduced inmate populations in several of the larger institutions.

^{*} February 29

POPULATION VERSUS CAPACITY

Beginning in mid 1981, the Pennsylvania Department of Corrections has been housing more inmates than its facilities were designed to accommodate based upon a one-person, one-cell concept. The opening of three new facilities during 1987 reduced the percent of capacity from 137.8% to 131.0% on December 31, 1980 and 1987 respectively.

TABLE 28

INMATE POPULATION VERSUS CAPACITY ON DECEMBER 31, 1980 TO 1987

TABLE 29
INMATE POPULATION VERSUS CAPACITY ON DECEMBER 31, 1980 TO 1987
Thousands

The following table is a comparison of the inmate population versus designed capacity for all state correctional institutions. At the close of 1987, the following four correctional facilities were operating at over 150% of their designed capacity: Greensburg at 164.5%, Rockview at 153.7%, Huntingdon at 152.4%, and Muncy at 150.3%.

INMATES SERVING LIFE

In Pennsylvania, a life sentence is without parole. However, the governor can commute a lifer's sentence. Since 1980, only a few lifers' sentences were commuted. The majority of long-term inmates are serving a life sentence for the commission of first or second degree murder. At the close of 1987, 71.2% or 1,192 lifers were serving time for first degree murder, and 24.6% or 411 for second degree murder. The number of inmates serving a life without parole sentence on December 31 increased 97.4% from 848 in 1980 to 1,674 in 1987. At the close of 1987, lifers represented 10.3% of the total inmate population, 53.2% were committed by Philadelphia County, and four state correctional institutions housed more than 200 lifers. These institutions were Graterford (456), Huntingdon (378), Dallas (289), and Pittsburgh (277).

TABLE 36
TEN HIGHEST COUNTIES WITH INMATES SERVING LIFE ON DECEMBER 31, 1987

The lifer population in the Department is getting older. The median age of lifers increased from 31.5 on December 31, 1980 to 34.8 years on December 31, 1987. On these two dates, their average age increased from 33.6 to 36.3 years. The percentage of lifers under 30 years of age on December 31 decreased from 43.2% to 27.6% at the close of 1980 and 1987 respectively. The number of lifers 50 years of age and over has nearly doubled since 1980.

CAPITAL CASES

Since the enactment of the new death sentence statute in September 1978, the number of capital cases in the Pennsylvania Department of Corrections has grown to 81 on December 31, 1987. Seven of these 81 have yet to be formerly sentenced by a judge but received death verdicts by the jury. The typical capital inmate was committed from Philadelphia County, was between 25 to 29 years of age, was non-white, and was male.

MAJOR OFFENSE

Based on definitions of crimes reported in the Federal Uniform Crime Report (UCR) program, 79.7% of the inmates in the Department on December 31, 1987, were sentenced for crime index offenses, generally referred to as Part I Offenses. The remaining 20.3% were sentenced for Part II or unknown offenses. 9,474 or 58.1% of these inmates were serving a sentence for violent crimes: murder (3,069), manslaughter (377), forcible rape (1,456), robbery (3,534), and aggravated assault (1,038). Based on definitions established by the Department of Corrections, at the close of 1987, 63.4% of the inmate population were serving time for assaultive crimes.

DEMOGRAPHIC PROFILE

Table 42 presents demographic profiles of inmates in the Pennsylvania Department of Corrections for December 31, 1980 and 1987. On December 31, 1987, the typical inmate was between the ages of 25 to 29 (24.8%), was black (56.6%), was male (95.8%), was single (61.7%), was born in Pennsylvania (79.2%), and was Protestant (49.3%). The number of female inmates at the close of 1980 and 1987 grew 142.9% from 280 to 680 respectively.

SECHON

TYPES OF RELEASES

This section addresses those inmates discharged from the Department of Corrections from 1980 through 1987. Discharges include: (1) unconditional discharges, (2) conditional discharges, and (3) miscellaneous discharges. The majority of inmates discharged from the Department were paroled under the supervision of state and local paroling authorities for the remainder of their maximum sentence. Inmates whose maximum sentence was two years and over are supervised by the Pennsylvania Board of Probation and Parole (PBPP), a separate agency reporting directly to the Governor. Inmates supervised by the PBPP must serve their minimum sentence before becoming eligible for parole.

UNCONDITIONAL DISCHARGES

Unconditional discharges refer to: (1) inmates who served their maximum sentence (maxed out) or (2) inmates released by court order before serving their minimum sentence. Included in this latter group are inmates whose conviction and/or sentence was vacated by the Court. Generally, these individuals are given a new trial. From 1980 to 1987, only 10.6% of all discharges were unconditional. Those who "maxed out" generally represent either short-term inmates who were discharged for the first time or parole violators who were returned to resume their original sentence.

CONDITIONAL DISCHARGES

Most inmates released from prison are paroled to the supervision of a paroling authority for the remainder of their maximum sentence. From 1980 to 1987, 71.2% of first releases were paroled to state (54.2%) and county (17.0%) paroling authorities. An additional 14.5% were parole violators who were reparoled from the sentence they violated. Since 1980, the influx of recommitted parole violators increased state reparoles by 238.4% from 297 in 1980 to 1,005 in 1987.

MISCELLANEOUS DISCHARGES

Miscellaneous discharges, including inmate deaths, accounted for 3.7% of all discharges since 1980.

^{*} Includes parole violators who were not officially recommitted by the PBPP to the Department of Corrections but were detained and reinstated on parole as follows: 1980-14, 1981-52, 1982-80, 1983-76, 1984-116, 1985-120, 1986-162, and 1987-218.

The following table details paroling actions by the PBPP from 1980 to 1987. Although the number of paroles granted increased from 2,684 to 3,021 during this period, the percent of paroles granted decreased from 80.8% to 64.5%.

TABLE 47

PAROLING ACTIONS BY THE PA BOARD OF PROBATION AND PAROLE, 1980 - 1987

PERCENT OF PAROLES GRANTED

SENTENCE TYPES

The following table presents data on the average time served by inmates discharged from the Pennsylvania Department of Corrections. Two major groups are depicted: (1) those inmates with a maximum sentence under two years (county sentence) and (2) those inmates with a maximum sentence of two years and over (state sentence).

COUNTY SENTENCE

Since 1980, inmates paroled to the supervision of local paroling authorities served an average of 8.7 months. The reclassification of Greensburg from a Regional Correctional Facility to a State Correctional Institution resulted in the decline of imates paroled from serving county sentences during 1986 and 1987.

STATE SENTENCE

Since 1980, inmates paroled to the supervision of the PBPP served an average of 34.0 months. This group represented two-thirds of all discharges. During this period, only 32 commuted lifers (16 during 1980), were paroled and they collectively served an average of 19.1 years.

TABLE 48

AVERAGE MONTHS SERVED BY INMATES DISCHARGED FROM DEPARTMENT OF CORRECTIONS
1980 TO 1987

| | | m Sentences r Two Years | | m Sentences ears and Over | All Sentences | | |
|------------------|-------------------|----------------------------|-------------------|------------------------------|--------------------|--------------------------|--|
| Year Released | Number Paroled | Average Months Served | Number Paroled | Average Months Served | Total Releases* | Average Months Served | |

COMPLEMENT CONTROL

On December 31, 1987, the Pennsylvania Department of Corrections employed 4,972 individuals. 58% or 2,886 employees were correctional officers, amounting to 5.6 inmates per correctional officer. Administrative and clerical personnel held 638 or 12.8% of the filled positions. At the close of 1987, there were 332 vacant positions.

^{*}Will not become operational until 1988.

ESCAPES

While populations in the Department increased substantially during the 1980's, the number of escapes decreased. Excluding community service centers and group homes, the rate of escapes per 1,000 inmates decreased from 7.1 in 1980 to 1.7 in 1987. There were only three escapes from inside the fence in 1987. From 1980 to 1987, 51.4% of the escapes were from community based facilities. The reduction in escapes may be attributed to an increase in security by the Department since 1983.

Note: Others include escapes that occurred outside the wall/fence while on work detail, work and/or educational release and furlough.

TABLE 53

The number of assaults that occur within an institution have been used as a barometer of the safety of that institution. All Department of Correction assaults have been standardized and are defined as the assaults that "require medical attention." The information is completed by the medical staff of each institution and reported to the Central Office on the monthly morbidity report.

TABLE 54

INMATE ASSAULTS BY MONTH FOR 1987

Total Assaults for inmate-inmate, inmate-custody staff and inmate-treatment staff for all institutions

The table below lists the number of misconducts reported to institutional hearing examiners in 1987. Misconduct reports may include more than one charge for violation of an institutional rule and/or regulation.
