Abstract

This report is the first of two reports on recidivism rates of offenders released from Department of Correction facilities during 1986. Some highlights from this report are:

- The recidivism rate in 1986 was 27%. This is the same as the rate for 1985 (27%).
- The number of releases increased from 1,979 in 1985 to 2,767 in 1986, an increase of 40%.
- The recidivism rate varied by security level of the institution from which the offender was released: 51% for maximum, 32% for medium, 37% for minimum, 18% for minimum/pre-release, 17% for state pre-release and 23% for contract pre-release.
- From 1985 to 1986 the recidivism rate for releases from maximum or medium security institutions increased from 32% to 34%, and the recidivism rate for releases from lower security facilities stayed the same (20%).
- The recidivism rate for males was 28% an increase from the 1985 figure of 26%, and the rate for females was 22% a decrease from last year's figure of 30%.
- Among males, the recidivism rate was 30% for those serving a Walpole sentence (compared to 27% for 1985), 33% for those serving a Concord sentence (compared to 27% for 1985), and 9% for those committed to other jurisdictions (e.g. county).
- Recidivists were returned for a variety of reasons: 16% for technical parole violations, 60% for a parole violation involving a new arrest, and 24% for re-incarceration on a new offense.
- Offenders released by parole had a higher recidivism rate (33%) than those who were discharged (15%).
- For males, those committed for property offenses had the highest recidivism rate (40%); for females, those committed for sex offenses had the highest recidivism rate (60%).
- The recidivism rate for those released with no prior adult incarcerations was lower (20%) than for those with a history of one (30%) or more than one (34%) prior adult incarcerations.
- The recidivism rate for offenders with no furloughs prior to release was 31% and the recidivism rate for individuals with one or more furloughs prior to release was 16%.

I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts correctional facilities during 1986 with corresponding recidivism rates. This report presents statistics for maximum security facilities (MCI-Cedar Junction and Lemuel Shattuck), medium security facilities (MCI-Concord, MCI-Norfolk, MCI-Framingham/Hodder, SECC and NCCI), minimum security facilities (Bay State C.C., Medfield and N.C.C.), and three facilities which combine minimum and pre-release populations (MCI-Plymouth, MCI-Warwick and MCI-Longwood). For purposes of this report, institutions with a pre-release component are collapsed into the "other" category. Statistics for two facilities which combine minimum and pre-release (MCI-Shirley and MCI-Lancaster), state pre-release facilities (Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC), one drug rehab program (Meridian House), and seven contract pre-release facilities (Brooke House, Coolidge House, Coolidge II, THP, McGrath House, Charlotte House and Hillside PRC) are presented in another report (Number). In order to be consistent with past recidivism reports, MCI-Plymouth, MCI-Warwick, and MCI-Longwood are reported as minimum, and MCI-Shirley and MCI-Lancaster are reported as pre-release.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1986; and (2) the rates of recidivism cross-tabulated with each of the categories of the statistical data for these offenders.

There are two main sections in this report. Section One discusses selected variables in relation to recidivism rates. Where appropriate, comparisons are made between 1985 and 1986 rates. Section Two consists solely of statistical tables. In reading the tables, the reader should note the following: (1) the release population is divided according to the institution of release; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); (4) R represents the number of offenders who are recidivists; and (5) RR (Recidivism Rate) represents the percentage of offenders in that category who have recidivated. For example, upon referring to the first table on pages 22 and 23, the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 2,767 offenders released during 1986, 1,767 (64%) were released on parole and 1,000 (36%) were released on a discharge; and (4) those offenders released from Norfolk who were released on parole had a recidivism rate of 37% while those offenders released from Norfolk on a discharge had a recidivism rate of 23%.

The material was derived from the DOC computerized inmate data base. Additional court record information was collected at the Office of the Commissioner of Probation's Research and Planning Department.

II. Methods

During 1986, a total of 2,767 offenders (2,156 males and 611 females) were released from DOC facilities listed above after having been incarcerated in the DOC for at least 30 days. Any offender who was incarcerated for less than 30 days or who was not released to the street (i.e., released to a new sentence at a State, Federal or county facility, or released to and held on a warrant) was excluded from the study. In the case of inmates transferred from houses of correction to Longwood T.C., the time spent in county facilities was counted towards the 30 days. An analysis of the cases excluded from the sample appears in the appendix. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail during the follow-up period for 30 days or more. This includes parole violators as well as those offenders sentenced for new crimes.

There were four individuals released from Lemuel Shattuck hospital and two released from Medfield Prison Project. In order to protect the identification of these individuals, in the statistical tables in Section Two of this report the Shattuck releases are combined with the facility where they were prior to their last move (two to Concord, one to Framingham, and one to Cedar Junction), and the 2 Medfield releases are included in the "other" institution category (which combines all pre-release facilities).

III. Section One: 1986 Recidivism Rates

Type of Return

Table 1 presents the distribution of types of return for recidivists. Recidivists were returned for a variety of reasons: 16% for a technical parole violation, 60% for a parole violation involving a new arrest, and 24% for re-incarceration to a county house of correction or a Department of Correction facility on a new offense.

The proportions within these categories are very different for male and female offenders. For males, 18% were technical parole violators, 69% were parole violators with a new arrest, and 13% were re-committed for a new offense.

For females, 9% were technical parole violators, 17% were parole violators with a new arrest, and 75% were re-incarcerated for a new offense.

Time Until Return

Table 2 presents time until return by sex of the recidivist. Of the 737 recidivists in 1986, 54% recidivated within 6 months of their release, 25% between 6 and 9 months, and 21% between 9 months and 1 year.

Females tended to recidivate in a shorter time from their release than males. For example, 27% of the females returned within 3 months, while 23% of the males returned within the same amount of time; 27% of the females returned between 3 and 6 months versus 31% of the males; 27% of the females returned between 6 and 9 months compared to 24% of the males; and 19% of the females returned between 9 months and 1 year versus 21% of the males.

Institution Released From

Table 3 shows the recidivism rate by institution and security level of the institution from which the inmate was released. Releases from maximum security had the highest recidivism rate (51%). Releases from medium security had a lower recidivism rate of 32%. The recidivism rate was the lowest for releases from lower security facilities: minimum (37%), minimum/pre-release (18%), state pre-release (17%), and contract pre-release (23%).

When compared to last year's figures, one finds that the recidivism rate increased from 36% to 51% for releases from maximum security, stayed the same for releases from medium security (32%), while releases from the lower security facilities varied from last year: minimum (28% vs. 37%), minimum/pre-release (19% vs. 18%), state pre-release (19% vs. 17%) and contract pre-release (21% vs. 23%). Overall, the lower security facilities saw the same recidivism rate as last year (20% in 1985 vs. 20% in 1986).

Furlough Program Participation

Table 4 shows that of those released in 1986, 797 offenders (29%) had participated in the furlough program at least once prior to their release, 752 of which were males. The remaining 71% of those released in 1986 (N = 1,970) had not participated in the furlough program. The recidivism rate was substantially lower for those who had participated in at least one furlough prior to release than it was for those who had not participated (16% vs. 31%).

The recidivism rate also varied by security level of the releasing institution. Offenders released from a maximum or medium security institution who had never been on a furlough, had the highest recidivism rate (35%), while offenders who were released from a lower security facility (minimum or pre-release) and who had been on at least one furlough had the lowest recidivism rate (13%).

Similar trends are apparent when the data are grouped by sex. The recidivism rate was higher for males and females who had not participated in the furlough program, 34% for males and 23% for females. Once again, the recidivism rate decreased as the security level of the releasing institution decreased. For males, the rate was lower if the offender was released from lower security and had participated in the furlough program. The recidivism rate was 41% for males released from maximum or medium security institutions with no prior furlough participation, while for males released from lower security facilities with prior furlough participation the recidivism rate dropped to 14%. Generally, the same pattern held true for females, although the numbers of females who had been on a furlough were very low.

Sub-Total	1326	449	34%	1441	288	20%	2767	737	27%	

Type of Release

Table 5 shows recidivism rates by type of release and security level of releasing institution. Overall, the recidivism rate was higher for those released on parole (33%) than for those who were discharged (15%). For parolees, those who were first releases (had not been paroled on their present sentence) had a lower recidivism rate (24%) than those who were parole violators (57%). For offenders discharged from their sentence, the recidivism rate was slightly lower for those who were first releases (13%) than for those who were parole violators (24%).

When the data were compared by security level of the releasing institution, the recidivism rate was 31% for first releases paroled from maximum or medium security institutions and 19% for those paroled from lower security institutions who were first releases. For those paroled from higher security who were parole violators, the recidivism rate was 56%, compared to 58% for those paroled from lower security who were parole violators.

The recidivism rate for offenders discharged by expiration of sentence or good conduct discharge was 20% for first releases from higher security and 7% for first releases from lower security. For those who were discharged; but were parole violators, the recidivism rate was 29% for those released from higher security and 8% for those released from lower security.

Table 6 shows recidivism rates by type of release for males and females. The overall recidivism rates are the same as the overall recidivism rates for Table 5, i.e., offenders released by parole have a higher recidivism rate than those released on expiration of sentence or good conduct discharge, and parole violators have a higher or similar recidivism rate to first releases.

Males follow this pattern much more closely than females. Males released by parole had a recidivism rate of

35% and males released by discharge had a recidivism rate of 12%. For both types of release, the recidivism rates were lower for first releases than for parole violators. For females, those released by parole had a higher recidivism rate than those released by discharge 23% vs. 22%.

Offender Characteristics

Table 7 shows recidivism rates for male and female offenders by their race, age at release, present offense and prior adult incarcerations. There is an overall pattern found when the data are broken down by sex, that females have a lower rate of recidivism (22%) than males (28%).

The section of the table on recidivism by race and sex shows that overall, Hispanics and whites the lowest recidivism rate (25%), followed by 31% for blacks. For males, hispanics had the lowest recidivism rate and for females, whites had the lowest recidivism rate.

The section on age at release and sex of offender shows that younger offenders generally have a higher rate of recidivism. For males, the rate is lowest in the forty year and older age group (12%) and highest in the 21 year and younger age group (36%) and the 22-29 year age group (33%). For females, the recidivism rate is lowest in the forty year and older age category (15%) and highest in the 21 and younger year age category (35%).

In terms of present offense, the recidivism rate was highest in the property offense category (34%), followed by person offenses (31%), drug offenses (22%), sex offenses (21%), and "other" offenses (15%). Males committed for property offenses had the highest rate of recidivism (40%) and those committed for "other" offenses had the lowest rate (9%). Excluding the sex offense category, where the number of cases is too small to make any comparisons, the highest rate of recidivism for females was in the "other" offense category (24%) which includes offenses such as

Prostitution, O.U.I., Disturbing the Peace, Trespassing, and Contempt of Court, and the lowest was in the person offense category (15%).

The final section of Table 7 on recidivism by prior adult incarcerations and sex of offender reveals a higher recidivism rate for those with a history of one or more prior adult incarcerations than for those with no prior adult incarcerations. Overall, the recidivism rate was 20% for offenders with no prior adult incarcerations versus a 30% recidivism rate for those with one prior adult incarceration and a 34% recidivism rate for those with two or more prior adult incarcerations. This pattern holds true for males and females. For males, those with no prior adult incarcerations had a 21% recidivism rate, while those with one prior adult incarceration or those with more than one prior adult incarceration had higher rates (31% and 35%, respectively). Females with no prior incarcerations had a 18% rate, those with one prior had a 27% rate, and those with more than one prior had a 29% rate of recidivism.

Drug Programs

Meridian House

V. Glossary (continued)

IRH

Institutional Revocation Hearing

PV

Parole Violation

HOC

House of Correction

DOC

Department of Correction

OFFENSE

Manslaughter

Includes vehicular homicide

Assault - Intent to Murder

Includes assault with intent to murder, attempted murder, and accessory to murder

Armed Assault

Includes assault with intent to rob - being armed, armed assaults in dwelling houses, assault and battery with dangerous weapon, and assault by means of a dangerous weapon

Unarmed Assault

Includes assaults with intent to rob - not being armed, assault, and assault and battery

Other Person

Includes confining or putting in fear a person for the purpose of stealing, mayhem, extortion, and conspiracy

V. Glossary (continued)

OFFENSE (continued)

Rape of Minor	Includes rape of female under sixteen, and rape of child
Assault w/Intent to Rape of Minor	Includes assault on female under sixteen with intent to commit rape, and indecent assault and battery on child under 14
Unnatural Acts	Includes unnatural and lascivious acts, and sodomy and buggery
Vehicle Theft	Includes theft of a motor vehicle, and use without authority
Prostitution	Includes common night walker, deriving support from prostitute, and prostitution
Weapons Offenses	Includes weapons offenses, and weapons violation
Vehicle Offenses	Includes motor vehicle offenses, and leaving the scene
Contempt of Court	Includes contempt of court, and violation of a court order/violating a restraining order
Other	Includes nonsupport, unlawful possession of alcohol, trespassing, and other.

V. Glossary (continued)

OFFENSE (continued)

Class A

Includes possession, sale, manufacturing, distribution, dispensing of a Class A controlled substance (Heroin, Morphine) or intent to do any of the above

Class B

Same as for Class A, but for Class B controlled substance (Amphetamines, Barbituates, Cocaine)

Class D

Same as for Class A, but for Class D controlled substance (Marijuana)

Controlled Substance - No Class

Includes possession of narcotic drugs other than heroin with or without intent to sell

VI. Technical Notes

This study draws its cases from a cohort of offenders released to the community from the Department of Correction during 1986 by parole, good conduct discharge, or expiration of sentence. Data are collected on each case which may result in a case being dropped from the study. There were 260 cases dropped from the release cohort for purposes of the recidivism study. There were five reasons why cases were dropped: 1) the release file was in error, i.e., person was not released or re-release was not a parole, expiration, or discharge; 2) offender not released to community but released to a farm and after sentence or warrant; 3) offender served less than 30 days in custody prior to release; 4) offender died within 1 year of release; and 5) offender deported.

It should be noted that this was the first year that cases were dropped due to being deported. It should also be noted that in calculating time served, the day the person started serving their sentence and the day of release were both credited toward time served. For all releases serving their first period of incarceration in a DOC facility, time served starts on the day committed to the DOC and does not credit any time served in a jail, house of correction, or other correctional facility prior to commitment.

Table 8 gives a breakdown of the cases dropped from the study by the reason for the drop: 68% were cases where time served was less than 30 days; 25% were because the release was not to the community; 3% were due to data errors in the release file; 2% were due to death of the releasee; and 1% were because the releasee was deported.

Due to the large proportion of females that were dropped from the study because their time served was less than 30 days, an analysis was done to determine what effect the inclusion of these cases might have had on recidivism rates.

Follow-up information was collected on the 157 females by a check of the computerized inmate data base. Thirty-three of the cases were found to be recidivists. Table 9 which follows, shows that if these cases had been included in the study, the overall recidivism rate would decrease from 27% to 26% and there would be no change in the recidivism rate for females.

Table 8

**Recidivism Rates for Males and Females
Including Cases Where Time Served is
Less Than 30 Days**

Sex	Time Served								
	30 Days or More			Less Than 30 Days			Total		
	N	R	RR	N	R	RR	N	R	RR
Male	2156	602	28%	0	0	NA	2156	602	28%
Female	611	135	22%	157	33	21%	768	168	22%
Total	2767	737	27%	157	33	21%	2924	770	26%

Table 9

Reason for Drop by Committing Institution,
1986 Releases

Reason for Drop	Walpole	Concord	Framingham	Total
Release File Error (Not released or Wrong Type)	4	2	3	9
Not Released to Community (F+A, Warrant)	25	26	13	64
Served Less Than 30 Days	5	16	157	178
Died Within 1 Year of Release	3	2	1	6
Deported	3	0	0	3
Total	40	46	174	260
