- . Part I (MAJOR) Crime decreased by 1.6% from 1987 to 1988
- . VIOLENT CRIMES increased by 5.2% from 1987 to 1988
- . The CLEARANCE RATE for MAJOR CRIMES increased from 16.6% in 1987 to 19.7% in 1988. The CLEARANCE RATE increased for Burglary, (10.6% - 1987 vs. 16.1% in 1988) Robbery (29.2% - 1987 vs. 31.3% in 1988) and Motor Vehicle (9.6% - 1987 vs. 15.2% in 1988) over the prior year.
- . Overall PROPERTY CRIME decreased 2.1% from 1987 to 1988. There was a significant decrease (10.7%) in the number of Burglaries.
- . Of the 1,636 ROBBERIES in 1988, a handgun was used in 451 incidents and 94 of these incidents occurred in the street. This represents a 18.3% decrease when comparing the same factor to 1987.

## AN ANALYSIS OF THE TEN YEAR 1979-1988 TREND IN PART I CRIME

- . The total number of Part I (MAJOR) CRIMES for 1988 (43,777) as compared to 1979 (51,991) represents one of the lowest reported crimes in this ten year period.
- . We note that during this ten year period 1979-1988 there was an overall decrease of 15.8% in total crime. However, there was an increase of 49.8% in VIOLENT CRIMES, specifically the crimes of ROBBERY increased (26%), ASSAULT (82.3%) and RAPE (88.3%)
- . Our analysis also indicates that there was an increase of 85% when comparing VIOLENT CRIME to PROPERTY CRIME Ratio from 1979 (.0467) to 1988 (.0863)
- . For the period of 1979-1988 PROPERTY CRIME decreased by 18.9%. There were also significant decrease in BURGLARY (35.2%) and LARCENY (23.8%) during this ten year period.

AN ANALYSIS OF THE TEN YEAR 1979-1988 TREND CRIME RATE PER 100,000 POPULATION

- . A review of TABLE II, indicates that the total number of VIOLENT CRIMES per 100,000 has increased 101.5 per 100,000 when comparing 161.4 per 100,000 in 1979 to 262.9 per 100,000 in 1988.
- . In contrast, PROPERTY CRIME has decreased 371.7 per 100,000 when comparing 3417.6 per 100,000 in 1979 to 3045.9 per 100,000 in 1988.

AN ANALYSIS OF ROBBERY 1979-1988

- . A review of TABLE V indicates an increase of 26% in the incidence of ROBBERY when comparing 1979 to 1988. This increase can be attributed to the increase in the frequency of convenience stores (216%) and residential (98%) robberies.

AN ANALYSIS OF BURGLARY 1979-1988

- . An examination of TABLE I indicates a decrease of 35.2% from 1979-1988. This is the eighth consecutive year that the incidence of BURGLARY has declined from a high of 15,687 in 1980 to 8,094 in 1988.

AN ANALYSIS OF RESIDENTIAL BURGLARY 1981-1988\*

- . An examination of the eight year trend of BURGLARY in Nassau County indicates that Residential Burglaries continue to be the prime target.
- . When comparing 1981 (70%) to 1988 (60%) the percentage of Residential to total burglaries indicates a decline of Residential burglaries to total burglaries.

PART II INCIDENTS 1979-1988

## SECTION IV

### INCIDENCE OF CRIME TYPE BY COMMUNITY

Table IX provides a record of criminal incidence by the community of occurrence. In order to compile the number of criminal incidents per community and then compare that analysis with the appropriate geographical/demographical locale it is necessary to utilize three complete sets of source documents. The communities are those as identified by the Nassau Police Department's location codes and are delineated as combined Incorporated Villages and Unincorporated statistical areas. The population data was arrived at from a LILCO estimate from Jan. 1, 1988 which in turn is based upon the April 1, 1980 census. The number of criminal incidence per community have been extrapolated from the Uniform Crime Reports of both the Independent Police Depts. and the Nassau County Police Dept.

Inconsistencies evident in the comparison of the above source documents do not obscure the essential validity for their use. In some cases communities or areas may exist for the N.C. Police Dept. crime reporting procedures but do not have separate data for census purposes. When this occurred several reports were analyzed and combined to obtain a "best fit" and these communities were then marked with footnotes.

We note in this analysis that in approaching the community by community analysis there are several factors that tend to detract from absolute reliability of such comparison. Two of these factors are: difference in definition or interpretation of what criminal incident occurred as recorded by different Police Depts. and differences in community boundaries as defined by the Nassau County Police Department and the U.S. Census Bureau.

### TOTAL CRIMINAL INCIDENTS

While there are some areas that have offense levels that are much higher than the County norm, generally, crime in Nassau County remains a dispersed phenomenon. Indicative of this is the fact that the communities with the highest concentrations of population consistently have the highest number of reported (see TABLE XA) crimes. The increase in the number of criminal incidents in Nassau County for 1988 is also reflected in increases in the reported incidents in the majority of the ten communities with the greatest number of crimes.

## PREFACE

### METHODOLOGY OF REPORT PREPARATION

The Criminal Justice Coordinating Council has prepared an analysis of Felony Case Processing comprising the years 1984 thru 1988. In preparing this study, CJCC has utilized the District Attorney's Management Information System known as D.A.I.S.. This computer system is programmed to follow the progress of criminal cases from their entry into the system and during their flow within the judicial system. This information system, CJCC believes, provides an accurate and detailed account of criminal case data in Nassau County.

What has emerged as a result of this coordinated effort is an ability to observe and analyze the processing of cases in Nassau County.

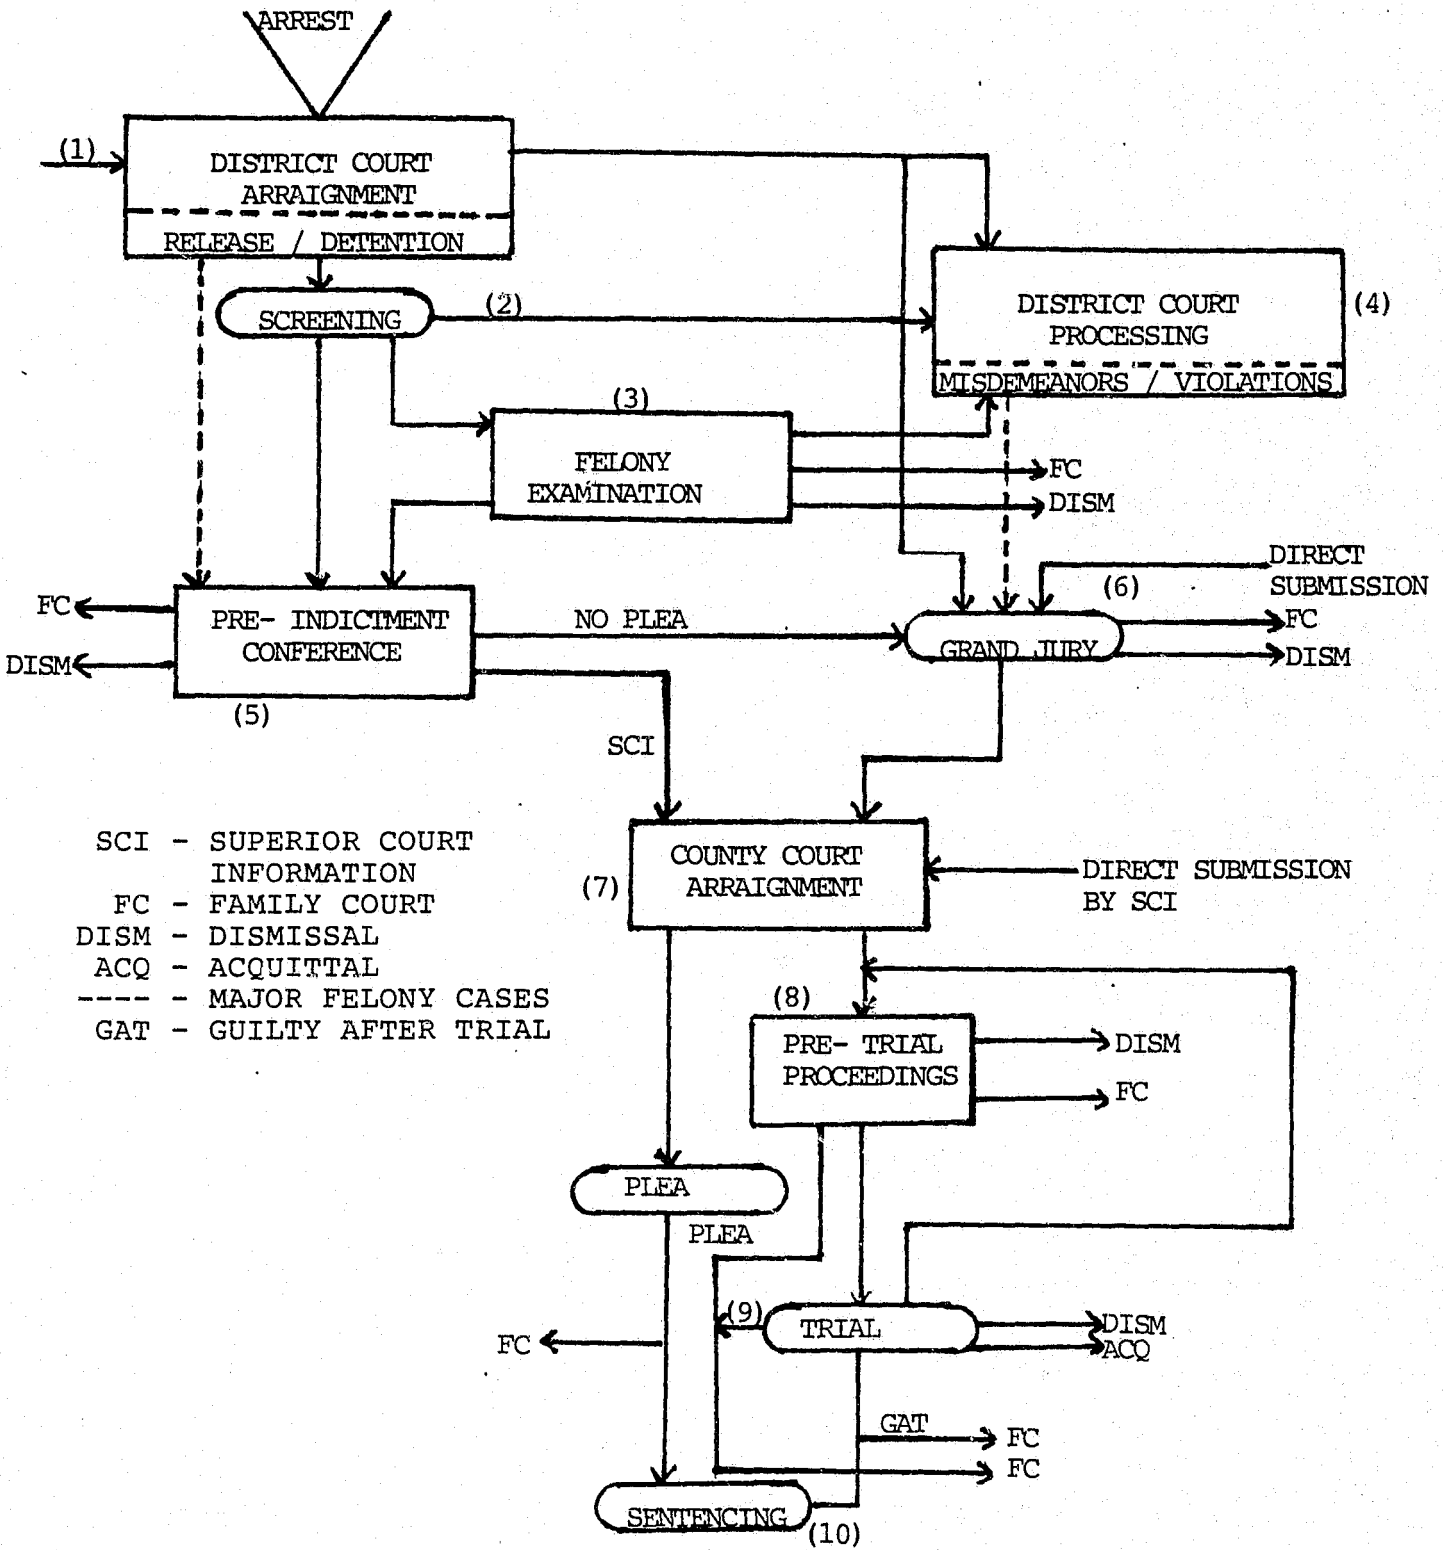

## SECTION I

### OVERVIEW OF FELONY CASE PROCESSING FLOW

Upon an arrest, the arrestee is brought to District Court Arraignment Part, where there is a reading of an accusatory instrument, together with a setting of bail. The defendant is then given the opportunity to retain a lawyer. If the defendant cannot afford one, a lawyer will be appointed by the Court.

The case then proceeds to the District Attorney's Screening Unit to determine the scope of prosecution. The case is placed on the Felony Screening calendar for conference. If a misdemeanor plea is agreed upon, the case is then disposed of in District Court. The defendant may request as a matter of right a felony examination (which is waived in the majority of cases). In the event defendant exercises the right to a felony examination, a hearing is held before a District Court Judge to determine if there is a reasonable cause to believe that a felony was committed by the defendant and whether the case should be held for the action of the Grand Jury. In any case, the defendant may request a pre-indictment conference in County Court where the matter may be disposed of through a plea of guilty to a Superior Court Information. If no plea is agreed upon the case will then be presented to the Grand Jury. If the Grand Jury hands up an indictment, the defendant will be arraigned in County Court and the case will then proceed to trial, unless the defendant pleads guilty to the highest count of the indictment.

## SECTION II

### DISTRICT COURT ACTIVITY PERTAINING TO DISPOSITION OF FELONIES

In the development of a Criminal Justice Management Information System, of which this report may be considered a part, the key elements are: 1) the number of reported criminal incidents, 2) the number of arrests resulting from those incidents, 3) the number of cases prosecuted as a result of arrests and 4) the number and type of convictions and sentences resulting from the cases that are prosecuted. A shortcoming of the previous case processing reports was that the number of dispositions appeared to be far lower than the number of felony cases filed. This was due to the fact that the cases which were filed as felonies and disposed of as misdemeanors in District Court were not included. Thus, in the interest of presenting a more definitive picture of the actual workings of the prosecutorial and court components of the system, we are including a description of the felony cases that were disposed of in District Court as non-felonies.

### SECTION III

#### ANALYSIS OF HIGH CHARGE AT ARREST VS CHARGE AT CONVICTION

Some of the factors that impact on the analysis of pleas of guilty are: 1) the possible over-charging of a defendant; 2) the reactivation of cases from long-outstanding indictment warrants when a defendant is finally apprehended; 3) the legal problems in proving certain cases; and 4) the reduction of charges in exchange for a defendant's guilty plea, consistent with normal District Attorney's office policies.

Table XIII shows a comparison between the initial highest charge at arrest and the charge at point of conviction whether by guilty verdict after trial or by plea of guilty.

Charge reductions shown in the guilty verdict after trial columns, in Table XIII on page and , are not the result of plea negotiations, but rather are a result of the trial process.
