I. INTRODUCTION

This report is about the victims of felons received in California prisons with determinate sentences. While many criminal justice agencies naturally collect information about criminals, relatively little is known about the victims of these criminals.

The Board of Prison Terms collects detailed information on offenders received in prison with determinate sentences. This data has been collected continuously since February 1, 1979. This report gives the statistics in our database for the calendar years 1984 through 1987 for 83,935 personal victims and 29,466 business victims of 70,669 felons received in state prison with determinate sentences.

Information about the victims of crime is much more difficult to obtain than information about convicted criminals. Much of the information which the Board routinely attempts to obtain on victims can only infrequently be obtained, while other items of information can nearly always be collected. For example, information about injury to victims is generally easy to obtain, while information about ethnicity is not. In some instances, all victim information or even the existence of a victim may be unknown. The sample with known ethnicity is not felt to be representative of all victims. For example, information on ethnicity of the victim is available more often when the victim is related to the offender than otherwise.

This report does not address the victims of several categories of offenders, most notably the victims of persons received in prison with indeterminate sentences only. The victims of felons with both determinate and indeterminate sentences (more than one offense conviction) are included. The victims of offenders whose disposition is not the state prison are not described.

A victim is included in this study if he or she is a victim with regard to any of the offenses with which the offender is charged. Offenders are categorized, however, by principal count of conviction for determinate offenses. Since offenders may negotiate a disposition through charge or sentence bargaining and since offenders may simultaneously be convicted of indeterminate and determinate sentences, it will sometimes appear as though offenders convicted of relatively innocuous crimes have paradoxically inflicted grave injury on a victim. The reader is therefore cautioned to hold the possibility of these hidden offenses in mind while examining certain tables.

This report is broadly divided into two areas: characteristics of personal victims and characteristics of business victims. There is also a short discussion on restitution.

With regard to personal victims, the focus is on injury. Additionally, tables describe financial loss, gender, weapon of offender, ethnicity, vulnerability and relationship. Business victims are discussed in terms of financial loss, relationship of the offender to the business victim and offender's weapon type.

II. PERSONAL VICTIMS

Personal victims are people who are victimized either as individuals or as employees of a business.

Of the 83,935 personal victims, 17.85% were victimized by an offender who was armed with or used an operable firearm. About 15.50% of all personal victims are considered to be vulnerable because of age, infirmities, defenselessness or mental disorders. About 19.20% of all victims either know or are related to the person who victimized them; with Blacks, 33.33%; Whites, 24.56%; Asians, 22.22%; and Hispanics, 31.33%. (See Table II-1-E).

Victimization tends to occur within ethnic groups*. There are large differences in the severity of injury among ethnic groups. Black victims are fatally injured in a disproportionately higher percentage of cases, 13.13%, compared to 10.84% for Hispanics, 9.26% for Asians, and 4.68% for Whites. (See Table II-2-D).

Table II-1-F shows that out of 70,669 felons entering the state prison under the Determinate Sentencing Law, 34.64% had no victims while 40.16% had one victim. The offense which garnered the most victims was burglary 1st degree (13.15%), followed by robbery (11.59%), assault (5.54%), burglary 2nd degree (3.45%), auto theft (2.93%); while rape and miscellaneous sex offenses had a combined share of 7.58%. (The Offense Key is on Pages 203 to 204).

*Statistics on victims by ethnicity were recorded for only 530 (0.57% of the population). For a population of 83,935 at 95% confidence level (95 chances in 100) with the maximum rate of occurrence of 50%, the sample size of 521 has a reliability (sampling error) of $\pm 10\%$.

INJURY

EXTENT OF INJURY BY OFFENSE

As shown in Table II-2-A, over half (57.41%) of the personal victims were not injured. Serious or fatal injury occurred in 3.21% of the cases, while other physical contact happened in 13.02% of the cases. Rape offenses are included in the "Other physical contact" category unless a physical injury occurred. (Refer to Page 206 for the definition of extent of injury).

Table II-2-B shows the extent of injury to personal victims based on the principal count of the offender. The 37 offense categories account for 97.59% of personal victims. It should be noted that an offender may have more than one victim and may not have injured every victim or may have caused more than one type of injury. In addition, offenders may be received in prison with sentences for multiple offenses including offenses with indeterminate sentences such as death or life imprisonment.

Permanent serious injury occurred most often in family abuse (19.67%), attempted murder (17.44%), vehicular injury (12.19%) and assault (10.85%). The number of minor injuries totalled 6,494 occurring in robbery (1,977), assault (988), vehicular injury (494), burglary 1st degree (343), and rape (336).

EXTENT OF INJURY BY SEX OF VICTIM

Table II-2-C shows that there are more male victims (53.34%) than female victims (40.03%). Male victims are more seriously injured (10.39%) than female victims (6.92%). However there are more female victims sustaining physical contact (21.90%) compared to male victims (7.78%).

EXTENT OF INJURY BY ETHNICITY OF VICTIM

Table II-2-D shows that Hispanic victims have the highest injury rate (71.08%), as compared with injury rates of 63.15% for Whites, 58.58% for Blacks, 55.56% for Asians. Additionally, 13.13% of the Black victims were fatally injured, compared with 10.84% of Hispanics, 9.26% of Asians and 4.68% of Whites. The ethnicity of the victim is known more often when the offender is related to the victim. This results in an upward bias of the injury rate for victims of known ethnicity.

EXTENT OF INJURY BY ETHNICITY OF OFFENDER

Victims of Asian offenders were not injured in 70.83% of the cases, while the corresponding rates for Blacks was 57.83%; for Hispanics 57.65%; and for Whites, 57.53%. Hispanic offenders inflicted serious permanent injury or death on 5.93% of their victims; while Blacks had 5.10%, Whites, 4.88% and Asians, 2.08%. (See Table II-2-E).

EXTENT OF INJURY BY RELATIONSHIP

Table II-1-C shows that 19.20% of the victims were related or otherwise known to the offender. However, these victims are relatively more likely to sustain fatal injury (6.30% for related and 8.65% for otherwise known) than the victims who did not know the offender (2.09%). (Refer to Table II-2-F).

EXTENT OF INJURY BY VICTIM VULNERABILITY

Table II-G shows of the total 83,935 personal victims recorded during 1984 through 1987, 74.75% were not vulnerable and only 15.50% were known to be vulnerable. (Refer to Page 205 for the victim vulnerability key). Of the 62,739 victims not vulnerable, 70.63% had no injury while 19.96% had minor, serious and fatal injuries combined, and 6.82% had other physical contact. For the vulnerable victims, 22.06% had no injury, 24.89% had minor, serious and fatal injuries, 50.18% had other physical contact (which includes rape unless an injury was inflicted).

EXTENT OF INJURY BY TYPE OF WEAPON

Table II-2-H shows that minor, serious or fatal injuries occur to 51.23% of the time to personal victims in which a sharp instrument is involved; to 40.09% of victims involved with a vehicle; and to 31.84% of the victims in which a firearm is present.

LOSS

FINANCIAL LOSS

Table II-3-A shows that 24.56% of the personal victims sustained monetary losses, 27.85% did not and the remaining 47.59% were unknown. Losses less than \$500 totaled 11,065 (13.18%), while between \$1,001 to \$5,000 the losses were 4,387 (5.23%). Page 207 shows the definition of "loss" in conjunction with a felony committed.

EXTENT OF LOSS BY OFFENSE

The amount of loss to personal victims by the principal count of the offender is shown in Table II-3-B. Offenders who have more than one victim may cause losses in more than one category. Loss occurred most frequently as a result of robbery (23.06%), followed by burglary 1st degree (21.22%), miscellaneous sex offenses (8.11%), burglary 2nd degree (4.98%), auto theft (3.80%), and robbery of inhabited dwelling (2.62%).

EXTENT OF LOSS BY ETHNICITY

From Table II-3-C, the Asian victims suffer the greatest amount of financial loss (\$311,000) compared to Black (\$201,500), White (\$124,250) and Hispanic victims (\$44,750). On the other hand, the White victims are the largest total (171) compared with Hispanic (166) and Black (99) and Asians (54) victims.

From Table II-3-D, victims of White offenders totaled 29,855 (35.57%), while victims of Black offenders totaled 27,069 (32.25%), and Hispanic offenders totaled 23,057 (27.47%).

III. BUSINESS VICTIMS

The victimization of a business such as by arson or robbery may or may not involve personal victims. If the robbery involved confrontation with a bank employee, that employee would be categorized as a personal victim. If the arson involved a vacant business building, no personal victim would exist.

RELATIONSHIP TO OFFENDER

From Table III-1-A, businesses were victimized by strangers in 88.47% of the cases. Business victimized by related or known offenders happened in only 5.08% of the cases.

TYPE OF WEAPON

Businesses were victimized by offenders who were armed with or used a firearm in 3.83% of the total cases involving a single offense. No weapon of any type was used in 32.46% of the cases, as shown in Table III-1-B.

FINANCIAL LOSS

The median amount of financial losses was \$408.40 (computed based on, Table III-1-C). Of the 29,466 business victims, there was no loss to 5.93% of the victims, while the loss was unknown to 34.10%. Less than 1% have losses over \$100,000; while losses amounting to \$1,000 or less happened in 43.75% of the cases. (Refer to Page 201 for the extent of loss key).

EXTENT OF LOSS BY OFFENSE

Robbery was the most frequent offense committed: it accounted for 23.44% of the total business victims, with the most frequent amount in the range of \$500 or less. Burglary 2nd degree got 19.24%, followed by forgery (10.92%), petty theft with prior (9.12%), grand theft (7.14%), checks with insufficient funds (5.72%) and burglary 1st degree (4.87%). (See Table III-1-D).

IV. RESTITUTION

SUMMARY OF FINANCIAL LOSS

During the years 1984 through 1987, there were 70,669 persons entering prison who caused a known amount of financial loss to 83,935 victims. Of these, 1,382 (1.96%) persons were known to have paid restitution. For this report, restitution is defined as restoration by inmate of stolen items or as payment to victims for loss, damages or injury. Table IV-1-A shows the distribution of financial loss by type of victim.

SUMMARY OF RESTITUTION PAID

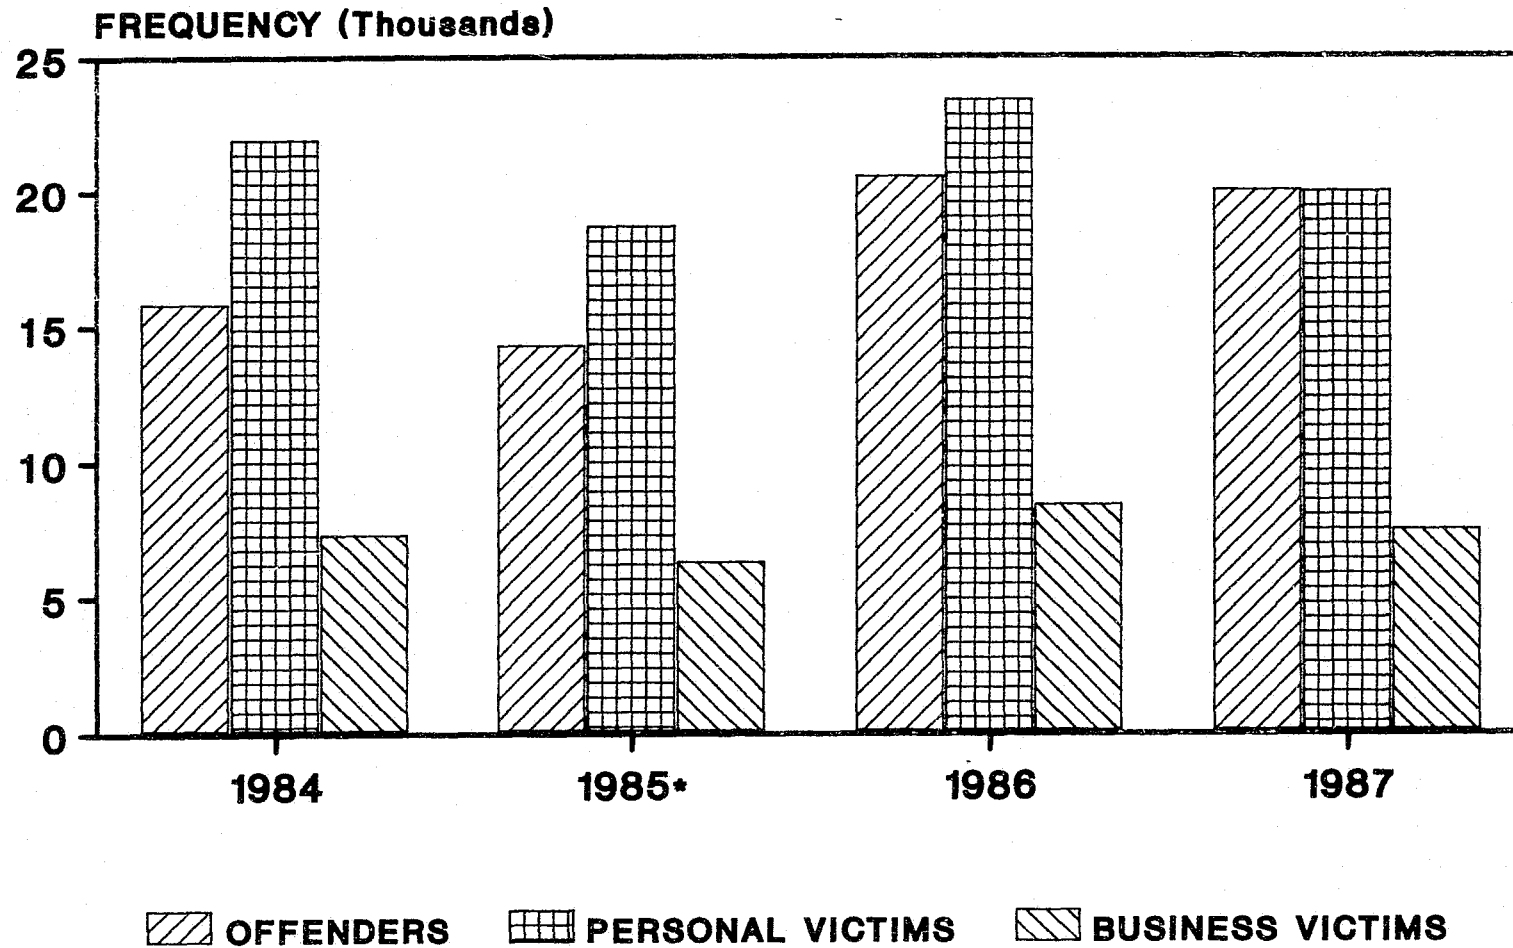

The offenders who paid restitution caused loss to 689 personal victims and 693 business victims. There were 1,036 offenders or 74.96% who made full restitution, while the remaining 346 or 25.04% made partial restitution. Personal victims were fully compensated slightly less often than business victims, as shown in Table IV-1-B.

RESTITUTION BY TYPE OF OFFENSE

Table IV-1-C lists the types of offenses in which persons making restitution were most often convicted. Those offenses were robbery 18,858 (31.59%) followed by burglary 1st degree 11,239 (18.83%), burglary 2nd degree 5,539 (9.28%), grand theft 3,433 (5.75%) and forgery 3,023 (5.06%).

On the other hand, offenses for which offenders paid restitution most frequently were felon in possession of a gun (14.58%), family abuse (10.00%), checks with insufficient funds (9.28%), discharge firearm in an inhabited dwelling (7.69%), and battery (7.14%). Other property offenses such as forgery, receiving stolen property, auto theft, burglary 1st degree, burglary 2nd degree, petty theft, with prior robbery, and grand theft ranged from 0.54% to 6.26% ratios.

PERSONAL VICTIMS

VICTIM VULNERABILITY KEY

A victim is considered vulnerable because of age, physical or mental disability or defenselessness. The following definitions were used to describe victim vulnerability.

AGE	16 years or younger; 60 years or older.
PHYSICAL DISABILITY	Deaf; blind; confined to bed or a wheelchair; paraplegic, quadriplegic; walks with aid of cane; crutches or walker; similar problems which would make the victim open to attack.
MENTAL DISABILITY	Mentally retarded; brain damaged; senile; mentally ill or some mental problems which leaves the victim susceptible to manipulation.
DEFENSELESSNESS	Asleep; unconscious; intoxicated; drugged; injured; ill; in shock from injury, disaster or other trauma; person living in an area which is extremely isolated from the general population.

EXTENT OF INJURY KEY

NONE	There was no injury or physical contact.
MINOR	The victim was momentarily unconscious or required simple emergency treatment for cuts, bruises, etc.
SERIOUS, NOT PERMANENT	The victim is unconscious for an extended period of time; required extensive emergency room treatment, or had to be hospitalized, but suffered only temporary physical and/or mental damage.
SERIOUS, PERMANENT	The victim suffered significant scarring, loss of/or impairment of physical function or limb, recurrent pain; continuing disability or mental trauma.
OTHER PHYSICAL CONTACT	There was other physical contact between victim and offender/accomplice. This would include any "touching of victim"; slapping, fondling, pulling hair; bodily forcing victim to ground, pushing; tying up of the victim, choke, hold, etc.
UNKNOWN	The extent of injury is unknown.

EXTENT OF LOSS

Extent of loss resulting from crimes committed ultimately are reduced to financial losses, unless categorized as personal injury.

The extent of loss includes the theft of any possession (i. e., car, furniture, money, jewelry, etc.) or damages to any of the victims' possessions. The extent of loss is not reduced by reimbursements from insurance or restitution by the inmate. Medical expenses, loss of wages, court costs, attorney fees or other such costs are not computed into the total financial loss.
