Preface

The 1988 Census of Local Jails, the fifth enumeration of local confinement facilities since 1970, was authorized by the Omnibus Crime Control and Safe Streets Act of 1968, as amended (42 U.S.C. 3732), to assess the needs of the Nation's jails.

BJS hopes that practitioners, policymakers, and researchers will benefit from this information. Practitioners will be able to compare the occupancy level, use of confinement space, and staff characteristics in their jurisdiction with those of neighboring jurisdictions. Policymakers can use the information on planned changes in existing confinement space as a ready source of data when reporting their current and future needs to funding authorities. Researchers can analyze differences in local jails based on facility size, age, detention authority, geographic area, and other characteristics.

This publication presents information from the 1988 jail census pertaining to jail detention authority; capacity; court orders; facility age and use of space; medical accommodations; facility programs; inmate sex, race, and conviction status; staff sex, race, and occupation; and expenditures. The reference date for the census is June 30, 1988. Annual data were reported by each facility for the fiscal year that ended at some time between July 1, 1987, and June 30, 1988.

Following this summary report, the detailed findings of individual facilities will be published in four volumes, available separately:

Census of Local Jails, 1988: Volume II. Data for Individual Jails in the Northeast

Census of Local Jails, 1988: Volume III. Data for Individual Jails in the Midwest

Census of Local Jails, 1988: Volume IV. Data for Individual Jails in the South

Census of Local Jails, 1988: Volume V. Data for Individual Jails in the West

Each of the preceding volumes and this publication will be available in machine-readable format from the National Archive of Criminal Justice Data at the University of Michigan. The complete data set is archived as the National Jail Census, 1988 (ICPSR 9256). Contact the archive at P.O. Box 1248, Ann Arbor, MI 48106; 1-800-999-0960.

Foreword

Beginning in 1970 and about every 5 years thereafter, the Bureau of Justice Statistics (BJS) or its predecessor has sponsored a complete census of the more than 3,000 local jails in the United States. To be counted in the census, a facility must be locally administered, although a private firm may operate it.

The June 30, 1988, census results presented in this publication provide comprehensive information on a critical component of the U.S. justice system. Jails incarcerate a wide variety of sentenced and unsentenced prisoners:

- individuals held pending arraignment
- persons awaiting trial, conviction, or sentencing
- probation, parole, and bail-bond violators and absconders
- juveniles awaiting transfer to juvenile authorities
- mentally ill persons held pending transfer to appropriate health facilities
- individuals held for the military, for protective custody, for contempt, and for the courts as witnesses
- convicted inmates to be released to the community upon completion of sentence;
- inmates held for transfer to State, Federal, and other local authorities.

The findings of this report were made possible by the thousands of jail administrators and practitioners who devoted substantial time and effort to completing the census questionnaire.

BJS appreciates the assistance and cooperation of jail administrators and staff, directors of State statistical analysis centers, the National Sheriffs Association, the American Jail Association, and the American Correctional Association, whose efforts helped to produce a 100% response.

Introduction

Number of jails and jail inmates

(Tables A, B, 1, 3, 5, and 6)

A total of 343,569 inmates were housed in 3,316 local jails throughout the Nation on June 30, 1988, about 144 inmates for every 100,000 U.S. residents.

The South had both the largest proportion of jails (48%) and the largest proportion of inmates (42%); the Northeast accounted for the smallest proportion of jails (7%), and the Midwest accounted for the smallest proportion of inmates (15%).

The number of jail inmates per 100,000 resident population was highest in the West (185 per 100,000) and lowest in the Midwest (85). Among individual jurisdictions it was highest in Georgia (276) and the District of Columbia (274) and lowest in North Dakota (43) and Iowa (37).

About 33% of all female inmates were housed in the West, a proportion somewhat higher than that region's overall jail representation. Approximately 39% of all female inmates were housed in the South, a proportion slightly lower than that region's overall jail representation.

About 50% of all jail inmates on June 30, 1988, were awaiting arraignment, awaiting trial, or being tried. This percentage ranged from 21% in Utah to 76% in Illinois.

During the year ending June 30, 1988, the nationwide average jail population on weekends was 354,521, about 6% higher than the average daily population of 336,017. In North Dakota the weekend jail population was 338, or 21% higher than the weekday population, and in Iowa it was 1,241, or 17% higher.

Black inmates comprised 41% of the Nation's local jail population, a percentage about 3 1/2 times greater than that of blacks in the nationwide resident population (12%). In the Northeast, Midwest,

and West the percentage of black inmates was about 4 times larger than among the resident population; in the South it was about 3 times larger.

Hispanics comprised 14% of the Nation's jail population, a percentage approximately twice as large as the Hispanic representation in the resident population (7%). The proportion of Hispanic jail inmates in the West (30%) was about twice as large as their proportion of the resident population (16%). About 44% of all Hispanic inmates were held in California jails — nearly 3 times more than any other State.

Approximately 12% of all jail inmates were being held for Federal, State, or other local authorities on June 30, 1988. Detainees for other authorities ranged from

6% of all inmates in the West to 19% in the South. Louisiana, Texas, and Mississippi held the largest percentages — 37%, 33%, and 30%, respectively.

About two-thirds of the 42,000 inmates held in local jails for other authorities in 1988 were State prisoners; a fifth were Federal prisoners; and the remainder were other local inmates. Nearly all of the Federal prisoners were detained for the U.S. Marshals Service, the U.S. Immigration and Naturalization Service, or the F.B.I.

Introduction

Jail capacity and court orders

(Tables C, D, E, F, 1, 2, 4, 7, and 8)

Approximately two-thirds of the Nation's jails were small facilities with capacity for 50 inmates or fewer. Small jails were most common in Alaska where they accounted for all of the independent local detention facilities, and in Iowa, Nebraska, North Dakota, South Dakota, Oklahoma, Idaho, Montana, and Wyoming where they accounted for more than 9 of every 10 jails.

Large jails were most common in New Jersey, where 36% of the jails had capacity for 1,000 inmates or more, and in California, where 23% of the jails had capacity for 500 inmates or more.

Jails in the West were occupied at the highest level of rated capacity (117%), and jails in the Midwest were occupied at the lowest level (86%).

Facility occupancy levels were at or above rated capacity in each of the six States that collectively held a majority of

the Nations' jail inmates — Pennsylvania, New York, Florida, Georgia, Texas, and California.

New Jersey had the highest occupancy (146%), followed by Virginia (136%) and California (135%). By contrast, the lowest jail occupancy levels were in Alaska (38%), North Dakota (38%), and Wyoming (51%).

About 15% of all jails (1 in every 7) were under a State or Federal court order or consent decree on June 30, 1988, either for reasons relating to conditions of confinement or for requirements to limit the number of inmates that were housed.

Crowding was the most frequently cited specific condition for which jails were under court order, affecting 9% of all facilities, nationwide, including 41% of the jails in Louisiana, 36% in Oregon, and 27% in both New York and Arizona. By contrast, no local jails were under court order or consent decree for crowding in New Hampshire, Nebraska, North Dakota, Alaska, and Washington.

Approximately 12% of the Nation's jails were under court order or consent decree to limit the number of inmates they housed. In Oregon 38% of the facilities had court-ordered population limits; in Massachusetts, 26%; and in both New York and California, 23%. By contrast, none of the jails in New Hampshire, Wisconsin, or Washington was under orders to limit the number of inmates they housed.

Note: Jail size is based on average daily population. Rated capacity is the number of beds or inmates assigned by a rating official to institutions within a jurisdiction.

About 8% of all jail inmates in 1988 were being held because of crowding in other institutions, including 6% for State correctional authorities, and 1% each for Federal authorities and other local authorities.

Jails in the South held the largest percentage of inmates because of crowding elsewhere (14%), and jails in the West held the smallest percentage (2%).

Approximately 31% of all jail inmates in Louisiana, 27% in Texas, and 22% in Mississippi were held because of crowding in other facilities. By contrast, none of the inmates in Alaska's independent local jails and less than 1% of the inmates in jails in Nebraska, the District of Columbia, Maryland, California, and Nevada were being held due to crowding elsewhere.

In the Northeast, Midwest, and South, large jails held relatively more inmates because of crowding in State correctional facilities than small jails, whereas in the West there was little difference according to jail size.

Introduction

Inmate deaths

(Tables G and 10)

A total of 667 inmates died while under the jurisdiction of local jail authorities during the annual period ending June 30, 1988, a rate of 20 deaths per 10,000 inmates, based on average daily population.

Suicide was the leading cause of death among jail inmates (43%), followed by natural causes (41%). Acquired immune deficiency syndrome (AIDS) accounted for about 10%; "other causes," 5%; and homicide, 1%.

Among States with at least 10 jail inmate deaths during the annual period ending June 30, 1988, Wisconsin, and Alabama had the highest percentages resulting from suicide — 75% and 69%, respec-

tively; New York, and New Jersey had the highest percentages resulting from acquired immune deficiency syndrome (AIDS) — 49% and 41%, respectively.

Confinement unit use

(Tables H, I, and 12)

There were approximately 156,200 confinement units with approximately 17.4 million square feet of occupied space in local jails at midyear 1988. About 85% of the units were designated for general confinement housing. Approximately 1% were designated specifically for public inebriates or substance abusers.

The nationwide average was 50.9 square feet of occupied housing space per inmate. Total housing space per inmate ranged from 40.3 square feet in New Jersey to 163.8 square feet in North Dakota.

Introduction

Planned changes in jails

(Tables J and 14)

Operators of nearly 3 in every 10 jails (29%) anticipated making some form of physical plant change between June 30, 1988, and June 30, 1991. About 17% of local jails planned to construct or acquire a new jail; 7% expected to close a jail; and 14% planned to renovate some or all of their existing space.

Jails in the Northeast were expected to have the largest proportion of new build-ings or acquisitions (33%), the largest number of facility closings (13%), and the largest proportion of renovations (24%) during the 3-year period.

Jails in the Midwest were expected to have the smallest proportion of new build-ings or acquisitions (12%) and the small-est proportion of facility closings (6%). Jails in the Midwest and South anticipated the smallest proportion of facility renova-tions (13%).

Nationwide, the changes planned in facili-ty utilization between June 30, 1988, and June 30, 1991, were expected to result in a 33% net gain in local jail capacity — an average growth of 750 beds per week. The projected expansions ranged from a 24% increase in the Midwest to a 40% in-crease in the South.

Expenditures

(Tables K, L, and 20)

Local jail expenditures totaled \$4.5 billion, nationwide, between July 1, 1987, and June 30, 1988. Slightly more than \$3.5 billion were spent on salaries, wages, contributions to employee benefits, and other operating expenses, while nearly \$1 billion were used for capital projects such as construction, major repairs, im-provements, and equipment.

Capital outlays in 1988 ranged from 19% of total spending in the South to 25% of the total in the Northeast. Excluding capi-tal expenditures, it cost an average of \$10,639, nationwide, to keep one inmate in jail for 1 year. (The average cost per inmate was determined by dividing the sum of gross salaries, wages, and other current operating expenditures by the average daily population). The annual operating expenditure per jail inmate was

highest in the Northeast (\$17,710), led by an average of \$22,698 per inmate in New York; it was lowest in the South (\$8,418), where Mississippi's per-inmate outlay of \$5,341 was the smallest annual sum.

Local jails holding inmates for State, Fed-eral, or other local authorities charged per diem fees ranging from \$47.56 for in-mates held for other local authorities in the Northeast to \$16.86 for State inmates held in local jails in the South.

Table K. Average daily fee charged by jails to hold inmates for other authorities, by type of authority, June 30, 1988

South	28.04	16.86	17.50
West	37.62	33.41	33.94

Note: Variation in average fees may reflect the dif-ferent locations of jails. The higher Federal amounts, for example, may result from fees charged by large urban jails.

Note: Detail may not add to total because of rounding.
*The average operating expenditure per inmate was determined by dividing the amount spent on salaries,

wages, supplies, utilities, transportation, contractual services, and other current items paid during the fiscal year by the average daily population.

Jail employees

(Tables M, N, 15, 16, 17, and 18)

A total of 99,631 people were working in local jails on June 30, 1988, including 6,398 (6%) as part-time employees and 3,771 (4%) as nonpayroll employees.

Nonpayroll staff may be contract workers, Federal grantees, college interns, or employees paid by other local or State agencies.

Whites made up an estimated 69% of all paid staff; blacks, 23%; Hispanics of any race, 7%; and American Indians, Alaska

Natives, Asians, and Pacific Islanders, 1%. The Midwest and West had the highest percentage of white employees — 78% in both regions; the Northeast had the largest proportion of blacks (30%), and the West had the highest percentages of Hispanics (12%) and members of other races (2%).

There was an average of 3.4 inmates per jail employee in 1988. This ratio, obtained by dividing the average daily inmate population by the number of staff (excluding community volunteers), ranged from 2.4 inmates per employee in the Northeast to 4.4 inmates per employee in the West.

Correctional officers outnumbered the sum of all other types of jail employees by nearly 4 to 1, nationwide. They accounted for 68% of all staff in the West, 71% in the Midwest, 76% in the South, and 77% in the Northeast.

The ratio of inmates to correctional officers was 4.6 to 1, nationwide. It varied from 3.1 inmates per correctional officer in the Northeast to 6.6 inmates per correctional officer in the West. Among individual jurisdictions the ratio was lowest in Alaska (1.1) and Iowa (1.9) and highest in Tennessee (7.2) and California (9.2).

Introduction

Inmate programs

(Tables O, 21, and 22)

A total of 1,787 jails had work release programs on June 30, 1988, involving 19,700 inmates, or approximately 6% of the jail population. About 68% of the jails in the Midwest maintained work release activities, compared to 62% in the Northeast, 55% in the West, and 44% in the South.

A total of 2,405 facilities operated weekend sentence programs that involved approximately 4% of the jail population in 1988. Approximately 78% of the jails in the Midwest maintained weekend sentence programs, compared to 73% in the South, 67% in the Northeast, and 64% in the West.

A total of 503 facilities sponsored community service projects or other activities in which offenders, who would have otherwise been incarcerated, did not stay overnight in the jail. About 19% of all jails

in the West sponsored such alternative programs, compared to 17% in the South, 12% in the Northeast, and 10% in the Midwest.

Juveniles

(Tables P, Q, and R)

Twenty-nine percent of the Nation's local jails were authorized to detain juveniles during 1988, including 45% of the facilities

In the Midwest, 25% in the West, 23% in the South, and 13% in the Northeast.

Among the 954 jails with the authority to detain juveniles, 96% had sight or sound separation from adult inmates. Within regions the South had the largest percent-

age with some separation (97%), and the West had the smallest percentage (93%).

About 95% of the 1,676 juvenile detainees in local jails at midyear 1988 were in facilities with confinement units providing sight or sound separation from adults. All of the jailed juveniles in the Northeast, 98% in the South, 93% in the Midwest, and 85% in the West were in such facilities.

The 914 jails that provided separation of juveniles from adults in 1988 were rated to hold approximately 5,400 juveniles.

Approximately 60% of the juveniles held in jails with separation from adults on June 30, 1988, were awaiting adjudication, 22% were being held for juvenile authorities, 15% were serving a sentence, 2% were awaiting a sentence, and 1% were conditional release violators.

Methodology

The 1988 Census of Local Jails was the fifth enumeration of local confinement facilities since 1970. Prior censuses were conducted in 1970, 1972, 1978, and 1983. As in previous censuses, the U.S. Bureau of the Census conducted the mail canvass for BJS.

The 1988 census included all locally administered jails that held inmates beyond arraignment (usually more than 48 hours) and that were staffed by municipal or county employees. Eight jails that were privately operated under contract for local governments were also included.

Excluded from the census were physically separate drunk tanks, lockups, and other holding facilities that did not hold persons after they had been formally charged, as well as all Federal and State facilities, including the combined jail-prison systems in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont. Five locally operated jails in Alaska were included.

The facility universe was derived from the National Justice Agency List, maintained by the Bureau of the Census for BJS. The 1988 census form was mailed to 3,448 facilities during the week of August 1, 1988. Forty-four jails were added to the initial mailing, and 176 were deleted, leaving a final count of 3,316 facilities. Extensive followup by the Bureau of the Census staff and State statistical analysis center directors resulted in a 100% response.

A number of items were incompletely reported. Where the number of inmates convicted and awaiting sentence was not available, estimates were accepted. In some cases data for inmates convicted and awaiting sentence may have been reported as awaiting arraignment/trial or being tried. The race of Hispanic inmates and Hispanic staff was incompletely reported. Respondents estimated approximately 20% of the data on time spent in jail prior to discharge.

The census results are not subject to sampling error. Other types of errors, such as respondent misinterpretation and mistakes in processing and data presentation, were kept to a minimum through repeated manual and computer edit checks.

¹Rated capacity is set by State or local correctional authorities.

²Based on estimates of the resident population of States, July 1, 1988, U.S. Bureau of the Census Press Release CB89-47.

³Figures differ from preliminary numbers reported in the BJS Bulletin, Census of Local Jails 1988 due to revised numbers for the District of Columbia.

⁴The number of inmates per 100,000 population could not be calculated because most jail inmates in Alaska were housed in combined jail/prison facilities operated by the State.

Note: Detail adds to more than total number of jails under court order for specific conditions because some jails were under judicial mandate for more than one reason.

¹Food service, disciplinary policies, grievance procedures, fire hazards, the totality of conditions, and other reasons.

Note: For the Nation as a whole, time spent information was available for 70 percent of the persons who left jail custody during the 7 days preceding the 1988 census. Releases included arrested persons who left jail on bail pending trial; persons found guilty; persons who had completed their sentences; and persons who were transferred to other institutions. Approximately 20 percent of the data were estimated. Detail may not add to total because of rounding.

Note: The number of inmates in confinement units may be reported for a date different from June 30, 1988. Calculation of average square footage per inmate in occupied space assumes minimum density per unit, based on the most efficient distribution of inmates within units. Specific confinement use categories exclude data from New Orleans Parish, Louisiana.

¹Includes work release, weekend sentence, driving while intoxicated, and other special use units.

²Calculation of average square feet per inmate excludes New Orleans Parish, Louisiana.

* Can not be determined.

¹Figures include expenditures such as purchase of food, supplies, and contractual services.

²Figures include expenditures such as purchase or leasing of land.

³Operating expenditures per inmate were determined by dividing the amount spent on salaries, wages, supplies, utilities, transportation, contractual services, and other current items paid for during the fiscal year by the average daily inmate population.

Section VII — INMATE POPULATION

A. Inmate population at this facility on June 30, 1988
 NOTE: If the count for June 30, 1988 is not available, please provide today's count. Please mark estimates with an asterisk (*).

	TOTAL (1)	Adults		Juveniles (See definition of Juvenile)	
		Males (2)	Females (3)	Males (4)	Females (5)
1. Total inmates in facility on June 30, 1988 (Should equal sum of 2a through 2h)					
2. What was the number of inmates in the facility on June 30, 1988 in each of the following categories?					
a. Awaiting arraignment/trial or being tried at this time ¹					
b. Other unconvicted, if any					
c. Convicted and awaiting sentence ²					
d. Sentenced and awaiting transportation to State or Federal prison					
e. Serving sentence (whether appealing or not) ²					
f. Technical probation or parole violators only, with no new charges ³					
g. Juveniles housed for juvenile authorities (i.e., runaways, awaiting transfer to juvenile facility, etc.)					
h. Other convicted, if any — Specify ⁴					

B. Inmate population at this facility, BY RACE, on June 30, 1988
 Please mark estimates with an asterisk (*).

	TOTAL	Males	Females	Males	Females
	(1)	(2)	(3)	(4)	(5)
Total Inmate population on June 30, 1988 (Sum of lines a through e, below)					
a. White, not of Hispanic origin					
b. Black, not of Hispanic origin					
c. Hispanic origin ⁴ (Sum of lines c(1) and c(2))					
(1) White, Hispanic origin					
(2) Black, Hispanic origin					
d. American Indian/Alaskan Native					
e. Asian or Pacific Islander					

¹ Include bail jumpers and escapees, whether convicted or unconvicted, returned with new charges for which they have not been convicted. Any inmate with more than one current offense should be considered as unconvicted only if unconvicted for all offenses.
² Include convicted bail jumpers and escapees returned without new charges.
³ Exclude those who have been charged with another crime while on probation or parole and report them under 2a above if they have not been convicted of it; new charge; under 2c above, if they are convicted of and awaiting sentence on the new charge; or under 2e above, if they are convicted of and serving sentence on the new charge.
⁴ Persons of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, excluding persons from Brazil, Jamaica, and Haiti.

C. Inmates being held for other authorities on June 30, 1988

	TOTAL (1)	Held as a direct result of overcrowding in other institutions (2)	Held for other reasons	
			Early transfer or release anticipated upon completion of arrangements such as paperwork or transportation (3)	Trustees, security reasons, or special programs (4)
1. Of the total number of inmates reported in item A1 above, how many were being held for Federal, State, and other local authorities on June 30, 1988?				
a. Total				
b. Federal authorities				
c. State authorities				
d. Local (County, city, or other local authorities)				

2. Of the inmates being held for Federal authorities in C1b above, how many were for —

Total Federal (a)	U.S. Marshals Service (b)	U.S. Immigration and Naturalization Service (c)	Federal Bureau of Prisons (d)	Other — Specify (e)

3. Is a per diem fee normally paid by other authorities to hold inmates in your facility?
 No — Inmates not held here for other authorities — Skip to item D.
 No — Inmates may be held here for other authorities, but no fee is charged for this service — Skip to item D.
 Yes — If yes, what was the per diem fee paid by Federal, State, or other local authorities? If more than one fee was charged, please indicate each fee. →

a. <input type="checkbox"/> Federal authorities \$ _____ per day
b. <input type="checkbox"/> State authorities \$ _____ per day
c. <input type="checkbox"/> Local authorities \$ _____ per day

D. Population movement and average daily population
 Include only inmates who have been admitted and housed in your facility.

	TOTAL (a)	Adults		Juveniles	
		Males (b)	Females (c)	Males (d)	Females (e)
1. TOTAL ADMISSIONS — How many persons were admitted between July 1, 1987 and June 30, 1988? ¹ (Sum of 1a & 1b below)					
a. New admissions to this jail facility					
b. Transfers in from other facilities in this jail system					
2. TOTAL RELEASES — How many persons were discharged or transferred between July 1, 1987 and June 30, 1988? ² (Sum of 2a & 2b below)					
a. Released out of this jail facility					
b. Transferred to other facilities in this jail system					

¹ Include all persons officially booked into your facility by formal legal document and authority of the courts or some other official agency. Include escapee returns and transfers from long term treatment in medical or mental health facilities. Exclude returns for temporary releases who were not officially discharged (e.g., work release, weekend sentences, medical appointments, or court appearances).
² Include all persons officially discharged from your facility through completion of time served, bail, escape, long term transfer to a mental or medical health facility, death, etc. Do not include as a discharge temporary releases who have not been officially discharged (e.g., work release, medical appointments, or court appearances).

	TOTAL (a)	Adults Males (b) Females (c)		Juvéniles Males (d) Females (e)	
3. What was the average daily population for your facility for the year ending June 30, 1988?					
4. Was your average daily population on weekends larger than during the week?				Weekend average daily population	
1 <input type="checkbox"/> No - Skip to section VIII.				2 <input type="checkbox"/> Yes - Give the typical weekend average daily population.	

Section VIII - CONFINEMENT SPACE

A. Figures previously reported - IMPORTANT - For use in completing this section, please refer to the figures you previously reported. (See enclosure.)

PLEASE READ ALL THE INSTRUCTIONS BEFORE COMPLETING THE TABLE BELOW

Column (1) - Identification of housing area (e.g., C Block, West Wing, etc.) - All areas where inmates spend the night, whether rated or not, include cells, rooms, dormitories, bull pens, holding cells, drunk tanks, infirmaries, segregation units; also include other areas not normally used for confinement such as day rooms, corridors, offices, etc., if they are being used to house inmates.

Column (2) - Rated capacity of ONE confinement unit - For each type of confinement unit (e.g., cell, room, dormitory), please enter the official capacity that is set by State or local correctional authorities. If the confinement unit is not included in the total rated capacity of this facility, enter the number of beds and mark the not rated box.

Column (3) - Number of confinement units - For each type of housing area listed in column (1), please enter the number of units. (The figures entered in this column multiplied by the figures in column (2), rated capacity, should equal the total rated capacity for each type of housing area.)

Column (4) - Average floor space of ONE confinement unit - For each type of confinement unit, please enter the number of square feet of floor space based on the interior measures. The floor space of larger confinement units, such as dormitories, should be based on the interior measure of the unit excluding areas devoted to bathing, program space, recreation space, office space, etc. For cell blocks report the average size of one cell (e.g., 6 x 9 = 54 sq. ft.).

Column (5) - Average number of hours per day confined to unit - For each type of housing area, please enter the average number of hours per day that inmates are not allowed to leave their confinement units.

**Column (6) - Confinement unit use - For each type of housing area, please enter one of the following numerical codes:
1 - General housing unit
2 - Protective custody unit
3 - Administrative segregation unit
4 - Disciplinary action unit
5 - Sick or injured inmates unit
6 - Public inebriates/substance abuse unit
7 - Mentally ill unit
8 - Work release
9 - Weekend sentence
10, 11, etc. - Other confinement unit uses (Define meanings in "Comments" section below.)**

In the case of units with more than one use, enter the purpose for which it was most recently used.

Column (7) - Types of inmates held - For each type of housing area please mark (X) the type of inmates that can be held.

Column (8) - Number of inmates TODAY - For each type of housing area, please enter the number of inmates held today. Inmates should be counted only once - where they spent the previous night, or where a bed is reserved for them in the case of temporary absences. Do not include inmates who are on escape or AWOL.

Item (9) - Total number of inmates today - Please add the entries in column (8) and enter here. This figure should be equal to the number in the official count given in section VII, part A. If not, please explain in the "Comments" section below.

B. Current information - Report all areas used to house inmates.

Identification of housing area (1)	Rated capacity of ONE confinement unit (2)		Number of confinement units (3)	Census use only	Average floor space of ONE confinement unit of each size (e.g., 6 x 9 = 54 sq. ft.) One free phone call can give you access to a growing data base on drugs & crime

The new Data Center & Clearinghouse for Drugs & Crime is managed by the Bureau of Justice Statistics. To serve you, the center will —

- Respond to your requests for drugs and crime data.
- Let you know about new drugs and crime data reports.
- Send you reports on drugs and crime.
- Conduct special bibliographic searches for you on specific drugs and crime topics.
- Refer you to data on epidemiology, prevention, and treatment of substance abuse at the National Clearinghouse for Alcohol and Drug Information of the Alcohol, Drug Abuse, and Mental Health Administration.
- Publish special reports on subjects such as assets forfeiture and seizure, economic costs of drug-related crime, drugs and violence, drug laws of the 50 States, drug abuse and corrections, and innovative law enforcement reactions to drugs and crime.
- Prepare a comprehensive, concise report that will bring together a rich array of data to trace and quantify the full flow of illicit drugs from cultivation to consequences.
