EXECUTIVE SUMMARY

The Florida Department of Corrections (DC) serves as the regulatory authority for the operation of county and municipal detention facilities [CH 951.23(5).(6)FS] and collects pertinent statistical data on the inmate population incarcerated in such facilities [CH 951.23(2) FS]. Although the legal authority to collect the data began on October 1, 1985, all 67 counties did not begin reporting until January 1986. The enabling legislation requires certain data as a minimum to be collected and analyzed. The Florida Department of Corrections has expanded the collection effort which is the result of compromises between user requests, programming changes at DC, and ease of collection and training of staff at the reporting detention facilities.

The data presented in this report are for the three year period from January 1, 1989 to December 31, 1991. The data collected are from the 67 county jail systems operating 108 facilities throughout the period--ending December 31, 1991. The information reveals that inmate populations in county jails have continued to increase into 1991.

- * The county jail average daily inmate population increased from 31,141 in January 1989 to 34,691 by December 1991, a 11.4% increase.
- * Authorized DC rated capacity increased by 9,142 beds or 32.0% during the period from January 1988 (28,529) to December 1991 (37,671).
- * Eighteen jails (26.9%) are cited in federal lawsuits, 14 jails (20.9%) are named in state action that have not been dismissed as of December 1991.

The purpose of this annual report is to present a summary of three years of jail data reported to the Florida Department of Corrections by the 67 Florida counties. There is no intent to offer editorial comment in regard to the causes of, nor to recommend solutions for, the jail overcrowding currently confronting the state of Florida. The data presented in this report are annual averages for the inmate classifications that are collected on a monthly basis by the Florida Department of Corrections. Readers are cautioned that the annual average daily population figure (ADP) totals for some counties differ in quantity from the ADP totals reported for the individual facilities within those counties. This difference is the direct result of averaging the total system wide inmate ADP for a county on a 12 month basis whereas the facility populations are averages computed on the basis of actual time of occupancy.

This report is separated into two parts. The first section features annual percentages for the year 1991, and descriptive jail information for each of the three years (1989-1990-1991) in which DC collected data on Florida's county jails. The second part affords the reader an opportunity to view trends in county jail inmate populations on a statewide basis. The following is a short description of the type of information that will be provided in this report:

- * A jail data summary review for the year 1991 (to include average daily populations, incarceration rate, and capacity percentages).
- * Average daily populations of inmate categories for 1989, 1990, and 1991.
- * County incarceration rates per 1,000 population.
- * Authorized DC rated capacity in comparison to the average daily populations reported for 1989, 1990, and 1991.
- * 3 year trend study, and pending litigation

The Inspector General's Office of the Florida Department of Corrections is currently responsible for publishing on a monthly basis "The County Detention Facilities Daily Inmate Population Data Report." Selected data from this monthly report is utilized in the Annual Report in order to enhance the data routinely collected and published by this office.

Any questions or comments regarding this or other reports published by the Inspector General's Office should be directed to:

JAIL DATA SUMMARY 1991

The inmate categories reported are unchanged from those in 1990. The data contained within this section are annual averages for 1991. The data for selected categories are presented in Table 1 and can be summarized as follows:

- * The average annual ADP for 1991 was 34,760. Of that number 87.4% (30,377) were adult males, 10.3% (3,584) adult females and 2.2% (785) were male juveniles. The 20 female juveniles were 0.1% of the total.
- * Pretrial detainees were 59.0% (20,528) of the annual average ADP.
- * Of the 30,377 adult males 59.3% (15,460 felons - 2,563 misdemeanor) were pretrial inmates.
- * There were 53.2% (1,908) of the adult female population held in pretrial status (1,432 felons - 476 misdemeanor).
- * The juvenile population is dominated by the 663 males in the awaiting trial/sentencing (640 felons - 23 misdemeanors). That 663 is 84.5% of the male juveniles and 82.4% of the total juvenile population (785 male - 20 female).

The incarceration rates per 1,000 population range from a low of 1.1 in Charlotte County to 6.5 in Hamilton County. See Table 2 and figure 1. The incarceration rate computation includes all inmate categories. The average rated capacity versus average ADP is shown in Table 3 and Figure 2, and can be summarized as follows:

- * Statewide capacity was 36,412 and ADP was 35,950 or 1.3 over the statewide rated capacity.
- * Facility ADP's differ from county wide ADP data because of differing means of computation.
- * The over/under capacity range was 87.5% over in Dade County Jail Women's facility, and 72.7% under capacity in the Collier County Stockade.
- * One hundred and seven facilities were operated by the 67 counties throughout 1991. Several counties operated multiple facilities: Alachua (2); Bay (2); Broward (3); Citrus (2); Collier (2); Dade (7); Duval (5); Escambia (3); Hillsborough (3); Lake (2); Lee (2); Manatee (3); Monroe (3); Orange (5); Palm Beach (3); Pasco (3); Pinellas (4); Polk (2); St. Lucie (2); and Volusia (2).

New facilities that opened were:

<u>County</u>	<u>Opened</u>	<u>Capacity</u>
Monroe/Marathon	January	59
Pasco/Land 'O Lake	March	359
Duval/Pre-trial Dtn.	April	2,189
Wakulla	May	129
Orange/Whitcomb	June	182
Taylor	August	188
Flagler	September	134

Facilities closed or decreased cap were:

<u>County</u>	<u>Closed</u>	<u>No. of Beds</u>	<u>Decrease in Cap</u>
Lake/Annex	March	41	
Pasco/East	April	74	
Duval/Main & Annex	April	656	
Duval/Fairfield	April	172	
Wakulla (Old Jail)	May	18	
Duval/Montgomery	June		222
Taylor (Old Jail)	August	48	
Flagler	September	38	

Counties that added beds to existing facilities were:

<u>County</u>	<u>Added</u>	<u>No. of Beds</u>	<u>New Capacity</u>
Lake/Main	February	192	(421)
Broward/North	February	260	(1,281)
Manatee/Work Release	May	24	(152)
Alachua/Main	May	50	(528)
Charlotte	June	72	(186)
Hillsborough/Central	June	160	(1,714)
Broward/North	July	288	(1,569)
Polk/Annex	September	96	(696)
Indian River	September	146	(423)
Palm Beach/Annex	September	18	(122)
St. Lucie/Cor.Facility	October	120	(664)

The net total number of beds brought on line for the year 1991 was 3,397

DESCRIPTIVE DATA

JAIL DATA SUMMARY 1989 - 1991

During the three year period covered by this report the annual average daily population of adult males increased by 5.1% (28,908 to 30,377), while the adult female population increased 5.9% (3,385 to 3,584). The juvenile male population increased 6.2% (739 to 785), and the juvenile female population reflected an increase of 11.1 percent (18 to 20) in the three year period. See Table 4.

Adult Male Felons

Of the four adult male felony categories tracked, those sentenced to 364 days or less showed the highest rate of increase (33.8%) during the 89-91 time frame. A 3.4% decrease was reported for the felony awaiting trial category which comprises about 75% of the total adult male felony population. During the three year period under observation the ratio of pretrial detainees decreased from 78% of the total male felony population in 1989 to 74% by 1991. The pretrial category of male felons dominates the current jail population in absolute numbers. In 1989 male adult felons represented 62.1% of the total jail population while in 1991 the ratio was 60.4% .

Adult Male Misdemeanants

The total adult male misdemeanor category increased by 12.9% (4,379 to 5,353) over the past three years. The sentenced misdemeanor category represented the single largest increase at 22.4 percent. Of the the male misdemeanor population in 1989, 47.2% were sentenced. By 1991, that ratio increased to 51.2% .

The awaiting trial misdemeanor category in 1989 was 50.7%, and that population dropped at the rate of 47.9% in 1991. The ratio of adult male misdemeanants to the total adult male population was 16.4% in 1989 and 17.6 in 1991.

Adult Male - "Other" Category

Probation violators represented the largest number of the adult male population in the "other" category. This category increased by 7.5% during the 1989 - 1991 period. Adult males held for other jurisdictions increased by 166 or 19.5 percent during the three year period. Such an increase is caused by the number of federal inmates contracted for between the jails and the Federal Marshal's Service. The "other" category represented 3,637 or 12.26 of the 1989 adult male population. By 1991 that number had increased to 4,027 (13.3%) of the daily average.

The adult male average daily population figures for the 1989-1991 period can be summarized as follows:

- * In 1989, 71.0% (20,532) were adult male felons. 16.4% (4,739) were misdemeanants, and 12.6% were included in the "other" category.
- * By 1991, 69.1% (20,997) were adult male felons, 17.6% (5,353) were adult male misdemeanants and 13.3% (4,027) comprised the "other" category.
- * The adult felony male awaiting trial category in 1989 represented 55.3% of the total adult male population. In 1991 that ratio had decreased to 50.9 percent.

Adult Female Felons

Of the four adult female felony categories those sentenced to 364 days or less reflected the highest rate of increase (39.7%) during 1989-91. During this same time period those sentenced to 365 days or more increased by 14.6%, those awaiting trial decreased by 10.7%, and females

awaiting sentencing decreased by 8.3 percent. Similar to the adult males, adult female felons who are awaiting trial represent the largest segment of the adult female felon average daily population. In 1989 the ratio of adult female felons awaiting trial was 73.1% (1,545) and in 1991 the ratio was 66.6% (1,432). The total adult female felony average daily population increased from 2,114 to 2,149 (1.7%) during the three year period.

Adult Female Misdemeanants

The total adult female misdemeanor category increased by 20.6% (724 to 873) over the past three years. Sentenced misdemeanants increased by 23.8%, awaiting trial by 19.6%, and awaiting sentencing reflected a decrease of 36.7%. The ratio of female misdemeanants to the entire adult female jail population was 21.5% in 1989 and 24.3% in 1991.

Adult Female - "Other" Category

When comparing similar categories with the male inmate ADP, probation violators also represented the largest group of adult females in the "other" category. From 1989 to 1991, there was an increase of 4.5% (314 to 328) in this category. The "other" category of adult females increased 2.2 in the 1989 - 1991 time period.

The following summary of the adult female jail population during the period 1989 to 1991 is made:

- * The total number of adult female felons increased by 1.7% (2,114 to 2,149).
- * Distribution of the ADP in 1989 was 62.5% (2,114) felons, 21.5% (724) misdemeanants and 16.0% (547) "others".
- * In 1991 the distribution of the female ADP was 60.0% (2,149) felons, 24.4% (873) misdemeanants and 15.6% "other".
- * The felony awaiting trial category dominates the adult female ADP categories standing at 46.6% (1,541) in 1989 and falling to 39.9% (1,432) of the total of the female categories tracked in 1991.

JUVENILES

The juvenile population in Florida's county jails is dominantly male. Of the 757 total ADP in 1989, 97.6% (739) were males and in 1991 the ratio was 97.5% (785) of the total of 805 juveniles. Unlike the adult population categories, juvenile "pretrial" and "awaiting sentencing" are combined. But very much like the adult population most are unsentenced and were 91.8% (650 males and 15 females) of the ADP in 1989 and 84.5% (663 males and 17 females) in 1991.

COUNTY ADP AND INCARCERATION RATES

From 1989 to 1991, ADP's increased in all counties, except for the following: Bay, Aaloun, Clay, Collier, Columbia, Dixie, Gulf, Hamilton, Hardee, Hendry, Holmes, Indian River, Jackson, Lafayette, Liberty, Madison, Palm Beach, Pinellas, Putnam, Sarasota, St. Johns, Sumter, Taylor, Union, Volusia, and Walton. See Table 5. The range was a -33.3% in Gulf to 112.5% in Wakulla. Incarceration rate changes for 1989-90 varied from a 35.6% decrease in Hamilton County to a 112.5% increase in Wakulla County. See Table 6. The high increase in Wakulla County's inmate population and incarceration rate is the result of holding a large proportion of the inmate population for the U. S. Marshal and contracting of bedspace.

LEGAL STATUS OF COUNTY JAILS

County jails in Florida are subject to civil action in the various federal district courts and state circuit courts. Table 7 depicts the status of those counties that have a record of court action ending 1991, most of which are under court order, settlement, or consent decrees. The suits contain no record of dismissal and, therefore, include active cases. Five counties had state suits dismissed during 1991.

An analysis reveals that of the 67 counties 18 (26.9%) are under federal action (active or inactive), 14 (20.1%) are under state action and 6 (8.9%) have both federal and state action pending. Federal actions are inmate initiated class action suits arising generally out of conditions of confinement. State action is initiated by DC most often from citations of overcrowding, fire safety violations, staffing problems, and totality of conditions. The corrective action most often required is a significant renovation of existing facilities, temporary additions and/or construction of new jails.

TRENDS

TRENDS SUMMARY

The county jail inmate data collected demonstrates the jail population will continue to increase into the future. No one single element of the criminal justice process is responsible for nor can any one single function reverse the trends of the past three years.

This report identifies the symptoms and not the cause of the over-population in the jail system of Florida.

The longitudinal data identified in this section provides basic information on inmate population and capacity trends. The data cited are annual averages. The following discussion is based on Table 8 and Figures 3 through 10.

The facility daily average of all inmates increased by 7.5% during the period 1989 - 1991. The capacity of all facilities increased by 18.7%. The population was 2,779 inmates (9.1%) over capacity in 1989. The ratio of inmates over capacity was 3.6% (1,201) in 1990, and dropped to 1.3% (462) below capacity in 1991. A greater rate in capacity increase and lesser rate in ADP resulted in the lower percentage beyond capacity in 1991. In 1989, 29 of 67 counties operated 49 of 107 facilities with inmate population beyond their DC rated capacity. In 1990, 16 counties operated 31 of 110 facilities beyond capacity and 1991, 27 of 108 facilities were above their rated capacity in 11 of the 67 counties.

The population trends for total ADP, adult male, adult female and juveniles for the 1989 - 1991, reporting period as shown in Figures 3, 4, 5, and 6 graphically demonstrate a relatively stable and constant

increase in all categories. There is a seasonal drop from November to December of each year in the inmate ADP which recovers in January and moves back to a "normal" rate of increase.

The annual average ADP has increased by 2.5% a year from 1989-91, while the capacity rate has increased at a significantly higher ratio of 6.2% which has and will continue to contribute to alleviate the overcrowding numbers in the jail population in Florida.
