Introduction

The National Criminal Justice Thesaurus contains listings of descriptors or terms used to index literature in the National Institute of Justice/NCJRS document database. This database is maintained by the National Criminal Justice Reference Service (NCJRS), the National Institute of Justice's international clearinghouse of criminal justice information.

The National Institute of Justice, the research and development agency of the U.S. Department of Justice, created NCJRS in 1972 to communicate information and distribute publications and materials resulting from Institute-sponsored research, development, and evaluation studies. The NCJRS document collection consists of more than 110,000 books, articles, and reports dealing with the broad spectrum of criminal justice issues. The document database contains abstracts of all the documents in the collection; it can be searched directly on DIALOG, on CD-ROM, or by calling the reference service.

In addition to providing access to the NCJRS document database, the clearinghouse offers a variety of information services, including (1) information specialists to answer questions on criminal justice issues; (2) distribution of more than 600 publications of the National Institute of Justice and other Office of Justice Programs agencies; (3) free subscriptions to the National Institute of Justice Journal and National Institute of Justice Catalog, and (4) a library and public reading room in Rockville, Maryland, and document loan capabilities to libraries in the United States. For more information on NCJRS, call 800-851-3420. From outside the United States, call 301-251-5500.

Term selection in the National Criminal Justice Thesaurus is based on the vocabulary used in the documents entering the NCJRS database, on the frequency of term usage in the literature, and on the language of the user community. The 5-digit number assigned to each term is used as a descriptor code when searching on that term.

SUBSTANTIVE DESCRIPTORS AND RELATED ENTRIES

The order in which notations appear under a descriptor, when appropriate, is as follows:

SN	SCOPE NOTE
UF	USED FOR
BT	BROADER TERM
NT	NARROWER TERM
RT	RELATED TERM

A *SCOPE NOTE* (SN) may define or limit the specific use of a term in the NCJRS system. A typical *SCOPE NOTE* is included under the term "*Miranda rights*" which is found in the example under *RELATED TERM* below. It may be a

true definition, may place a positive or negative limitation on usage, or may combine definition and some limitations.

Two types of terms are listed: descriptors and synonyms or near synonyms. Descriptors are authoritative terms that are acceptable for indexing and searching. A *USE* entry follows synonyms or near synonyms of descriptors. The entry directs the user to the preferred valid descriptor for communicating with the system. Synonymous entries appear solely to provide as many points of entry to the Thesaurus as possible. The importance of the *USE* entry extends beyond synonymy. The entry can represent the relationship to a descriptor of a near synonym with general conceptual similarity. A *USE* entry provides a valid descriptor term synonymous with or approximating the concept of the term referenced. For example:

Remote terminals
USE Terminals (computer)

The *USED FOR (UF)* entry is the reverse of the *USE* entry. This entry shows the user that the descriptor includes the concept represented by the *USE* entry. For example:

01027 Terminals (computer)
UF Remote terminals

A *NARROWER TERM (NT)* entry denotes a hierarchical relationship between the main descriptor and a descriptor that belongs in the same class, but is on a lower level; that is, the narrower term is more specific. For example:

01777 Hallucinogens
00616 NT LSD (acid)
05131 NT PCP (phencyclidine hydrochloride)
01450 NT Peyote

A *BROADER (BT)* entry is also a hierarchical notation, and is the reciprocal of the *NT* notations. A *BT* entry indicates that the descriptor is in the same class, but that it is on a higher level in the hierarchy. For example:

01450 Peyote
04632 BT Controlled drugs
01777 BT Hallucinogens

The *RELATED TERM (RT)* entries perform two functions, only one of which is concerned with the scope of the main entry. A term listed as *RT* may clarify scope, that is, provide further definition of the main descriptor entry. The alternate function is to alert the user to other terms and thus provide additional points of reference. For example, to illustrate the two-sided *RT* relationship:

04183	Arrest and apprehension
04985	RT Arrest warrants
02462	Citizen arrests
05069	Crimes in progress
04816	Lawful use of force
00624	Manhunt
05208	Miranda rights
05136	Police pursuit driving
08578	Probable cause
05208	Miranda rights
	SN (Predetention rights of the accused as required by the US Supreme Court ruling)
04183	RT Arrest and apprehension
04197	Constitutional rights and civil lib/
02879	Rights of the accused

Every hierarchical and collateral entry has a reciprocal entry elsewhere in the Thesaurus.

ARRAY TERMS are very broad terms (e.g., *Equipment/*, *Facilities/* and *Programs/*) which are considered to be too general to be of much value in indexing or retrieval. Such terms have been appended with a slash (/); and whenever possible a more specific term should be used in lieu of this term. The following standard *SCOPE NOTE* is used in conjunction with all array terms; "Use of a more specific term is recommended; consult the term listed below." The listing of RT references following each array term refers the reader to all terms at the next lower level of specificity (but not the the still lower levels of specificity).

HOW TO USE THE THESAURUS

Alphabetization

Terms are alphabetized on a letter-by-letter basis. All spaces, hyphens, and other signs which may appear within the term are ignored, except the left parenthesis "(", which precedes "a." The example below demonstrates this exception.

UF Hypnosis (questioning under)
Hypnosis of victim or witness
Hypnosis in investigation

Selecting the Most Specific Descriptor

To avoid retrieving irrelevant documents and to assure full retrieval of target information, you should always select the most specific thesaurus descriptor of the concept for which you are searching. Because documents are indexed to the

narrowest applicable term within a hierarchy, a search on a broader term only will not retrieve the documents indexed to the narrower terms.

Search Examples

Suppose you wish to find documents about "*juvenile delinquents*" in the NCJRS database. The Thesaurus can help pinpoint the appropriate term or terms for your search. You might begin by checking the rather general term *Delinquents*, in which case you would find the following entry:

Delinquents (juvenile)
USE Juvenile delinquents

This citation indicates that the term *Juvenile delinquents* is the preferred descriptor for indexing and retrieval. Turning to the preferred term, you will find the following list of cross-references.

01637	Juvenile delinquents
	UF Delinquents (juvenile)
03990	BT Juveniles
02409	NT Emotionally disturbed delinquents
05119	Female juvenile delinquents
09416	Handicapped delinquents
05425	Male juvenile delinquents
09322	Mentally retarded delinquents
09323	Middle class juvenile delinquents
05261	RT Alternative schools
01308	Auto theft
03822	Confrontation tactics
05049	Crime in schools
04698	Drug related crimes
05095	Juvenile court waiver
09505	Juvenile offenders
08442	Juveniles in adult facilities
04103	Juvenile status offenders
05245	Parent education
05241	School delinquency programs
08311	Ungovernable juveniles
03001	Youthful offenders

Skipping over the term designated *UF* (i.e., nonpreferred synonym of *Juvenile delinquents*) and the *BT* (indicating that *Juvenile delinquents* is part of the more comprehensive hierarchy of *Juveniles*), you will come to the *NT* references. *Emotionally disturbed delinquents*, *Female juvenile delinquents* and *Handicapped delinquents*, etc., are all valid search terms which you may prefer to use if they are more accurate expressions of the concept for which you are searching. As mentioned above, a search on the term *Juvenile delinquents* alone will not retrieve documents indexed under *Emotionally disturbed delinquents* or under the

other NTs. If any of the narrow terms are relevant to your search, they should definitely be included in your search strategy. You should also note the RT references, which provide new directions for your search by adding related terms.

Focusing Your Search

If the first term you locate is followed by a slash, it is an *ARRAY TERM*. Though *ARRAY TERMS* can be used for searching, they are often too broad to be useful for indexing or retrieval. The following entry is typical of *ARRAY TERMS*.

01391	Property crimes/ (Use of a more specific term is recommended, consult the terms listed below)
08679	RT Agricultural crimes
04914	Antitrust offenses
02495	Arson
10067	Archeological preservation laws
00110	Burglary
02443	Counterfeiting
04384	Crime costs
04941	Crimes against businesses
01405	Dealing in stolen goods
01726	Extortion
03629	Forgery
01768	Hijacking
00469	Hit and run
04651	Industrial espionage
03850	Loan sharking
04600	Offenses/
02586	Piracy
05362	Property crime statistics
04255	Property identification
03640	Theft offenses
04757	Vandalism
01355	White collar crimes
08600	Zoo crimes

Scan the *RT* terms listed under the array term and select those related to your interest as new points from which to search. Do not make a final choice until you have determined whether there are still narrower terms that would be better choices. In this particular example, if you selected the *RT Crime costs* as a new starting point, you would find that *Crime costs* has two narrower terms, *Business crime costs* and *Stolen vehicle costs*, either of which may be a more specific expression of the concept you are trying to locate.

Searching on Cross-Cultural Terms

To facilitate access to the numerous international documents in the database, the Thesaurus contains a number of cross-cultural terms. These include expressions peculiar to a foreign country which have no direct equivalent in the US system or for which such an equivalent cannot be readily identified. For the most part, these idioms are entered as nonpreferred synonyms of their nearest American equivalent. For instance, the French concept "*Sursis avec mise a l'epreuve*" would have the following reference to the preferred American term:

Sursis avec mise a l'epreuve
USE Probation

In addition, numerous international organizations are included in the organizational file of the Thesaurus.

Combining Several Descriptors

To attain an even greater level of specificity, the technique of combining or "coordinating" more than descriptor in a search is useful. Though the Thesaurus contains no specific term to express the concept of "*police attitudes toward abuse of authority*," the combination of the existing descriptors *Abuse of authority* and *Police attitudes* will yield only those documents which hold relevant information on both descriptors. In coordinating, descriptors from all three files of the Thesaurus (substantive, geographic, and organizational) may be combined. For instance the geographic code or descriptor for *France* may be combined with *Preventive detention* to obtain information on preventive detention in France.

STATISTICS

This edition of the National Criminal Justice Thesaurus exhibits the following statistics:

Substantive File	
Postable descriptors	3,802
Nonpostable descriptors	1,671
