Preface

This report has been compiled to provide a detailed statistical profile of the adult offenders within the Kansas correctional system and to describe offender commitment and release trends for the state.

Each year since Fiscal Year 1980, the data for this report have been obtained through an on-line computerized offender information system in which information is gathered systematically during the entire period that an individual is in the custody or control of the Department of Corrections. The number of offenders for which information could be obtained varies among the items of information being reported. For this reason, each percentage reported is based on the number of individuals for whom the data were available, and not necessarily on the total number in the population being described.

The Kansas correctional facilities to which reference is made include the following: Kansas State Penitentiary (KSP), Kansas State Industrial Reformatory (KSIR), Kansas Correctional-Vocational Training Center (KCVTC), State Reception and Diagnostic Center (SRDC), Kansas Correctional Institution at Lansing (KCIL), Toronto Honor Camp (THC), El Dorado Honor Camp (EHC), Wichita Work Release Center (WWRC), Hutchinson Work Release Center (HWRC), Norton Correctional Facility (NCF), Winfield Correctional Facility (WCF), Osawatomie Correctional Facility (OCF), Forbes Correctional Facility (FCF), Topeka Correctional Facility (TCF), Ellsworth Correctional Facility (ECF), Hutchinson Correctional Work Facility (HCWF) and Stockton Correctional Facility (SCF). Inmates were also housed in FY 1989 at one contract work release facility (Fort Scott Work Release Center), at the Dillon security unit of Larned State Hospital (LSH), in contract jail placement (CJP), and at two community residential centers (Topeka CRC and Wichita CRC). Data pertaining to the small facilities of the same type often are combined for purposes of clarity in presentation.

Several new correctional facilities began operation in FY 1989:

- Ellsworth Correctional Facility (on line July, 1988);
- Hutchinson Correctional Work Facility (on line January, 1989);
- Stockton Correctional Facility (on line November, 1988);
- Topeka Community Residential Center (contracted program, on line July, 1988);
- El Dorado Community Residential Center (contracted program, on line August 1, 1988). The location of this facility was changed to Wichita in April 1989 and was renamed the Wichita CRC.

In July of 1989 both community residential centers were closed and the inmate residents assigned to other correctional facilities.

Introduction

The purpose of this statistical profile report is to summarize information regarding offender population levels, commitment trends, and characteristics of the offender population. The four major sections of the report include: a description of the pattern of growth in the offender population; a summary of admission and release activities occurring during Fiscal Year 1989; a detailed description of the characteristics of the inmate population confined on June 30, 1989; and a description of the June 30, 1989 population of offenders on supervised release. In the past several years there have been several modifications in Kansas criminal statutes which have produced significant changes in various attributes of the offender population. For this reason emphasis has been placed on comparisons of current information with that of prior years (particularly for data pertaining to type of criminal offense, sentencing patterns, and length of time served).

The detailed statistical tables and graphs of each section of the report are preceded by a summary of the highlights which identify significant trends and developments that occurred during FY 1989.

. SECTION I

Offender Population Levels and Institutional Capacity for
Fiscal Year 1989

Components of the System-wide Offender Population

- Primary components of June 30, 1989 system population of 12,137 are as follows:
 - Inmates confined in Kansas correctional facilities numbered 6,172 or 51% of the system population.
 - Offenders on supervised release -- Kansas offenders on parole/conditional release and compact parole/probation -- numbered 5,481 or 45% of the system population.
 - Offenders in other locations, such as those in out-of-state correctional facilities and those returned for court appearance, numbered 484 (4%).
- System population increased by 7% from FY 1988.

[SEE Table 1: Status and Physical Location of All Felony Offenders in the Correctional System: Comparison of June 30, 1988 and June 30, 1989 Populations -- page 5]

Inmate Population Trends

- Year-end inmate population has more than doubled in the past decade, from 2,416 in FY 1979 to 6,172 in FY 1989.
- Average yearly increase in inmate population during the past ten-year period is 376.
- The month-end inmate population fluctuated during FY 1989, with population increases in seven months and decreases in five months.
- Although there has been substantial growth in the inmate population over the past several years, the average monthly increase has fluctuated markedly.

<u>Fiscal Year</u>	<u>Average Monthly Increase</u>
1978-1980	8.5
1981	27.8
1982	28.5
1983	31.8
1984	53.6
1985	42.1
1986	37.8
1987	55.3
1988	29.9
1989	13.3

[SEE Figure 1: Kansas Inmate Population: Fiscal Years 1978-1979 -- page 6; and Figure 2: End-of-month Inmate Population: Fiscal Years 1988-1989 -- page 7]

Current Inmate Population

- On June 30, 1989 the total inmate population was 6,172, an increase of 159 (2.6%) from June 30, 1988.
- The number of inmates in facilities operated by the Department of Corrections was 5,668, a decrease of 202 (3.4%) from FY 1988. With the opening of the two community residential centers at Topeka and El Dorado (later Wichita), the population in contracted facilities was 504, up 361 from 143 in FY 1988.
- The FY 1989 average daily population was 6,048, an increase of 194 (3.3%) from FY 1988.
- Update on inmate population levels:

	<u>Number of Inmates</u>		
	<u>KDOC Facilities</u>	<u>Contract Placements</u>	<u>Total</u>
July 31, 1989	5,750	322	6,072
August 31, 1989	5,675	156	5,831
September 30, 1989	5,561	169	5,730

- Total inmate population has decreased by 442 in the period June 30, 1989 through September 30, 1989. Much of the decrease is due to the implementation of the Senate Bill 49 provision that increased the amount of good time earned by most inmates. This provision was effective August 1, 1989, and was retroactive, thus applicable to all eligible

inmates in the existing population as well as to new entries to the system. As a result, 165 inmates received "early" conditional releases on August 1, 1989. Also, the parole eligibility dates for most of the remaining inmates were moved forward -- hence a large increase in the number of paroles in August, 1989.

- The decrease in the number of contract placements is due to the closing of the two community residential centers on July 31, 1989.

[SEE Table 2: Number of Inmates Confined (Census) and Average Daily Population, FY 1988 and FY 1989 -- page 8]

Capacity of Correctional Facilities

- The operating capacity for all existing KDOC facilities will be 5,485 as of January 1, 1990.
 - The operating capacity total excludes 515 beds categorized as temporary or special use (such as segregation and infirmary beds).
 - On January 1, 1990, the combined 2,207-bed operating capacity of Kansas State Penitentiary and Kansas State Industrial Reformatory will represent 40.2 percent of the total.
- The January 1, 1990 capacity for placement of inmates at non-DOC facilities will be 172. This total includes placements at Larned State Hospital and contract jail facilities.

[SEE Table 3: Operating Capacity of Correctional Facilities, Effective January 1, 1990 -- page 9]

Admissions and Releases During Fiscal Year 1989

Information pertaining to admissions and releases of offenders during FY 1989 is summarized in this section. The basic data are presented in Table 4, the format of which is explained in the footnotes accompanying the table. Detailed information on court-related admissions to the system is presented by felony class of offense and county of commitment. Also included as part of this section is information on two topics which are central to the discussion of admissions and releases -- rate of parole and offender recidivism.

Summary of Admission and Release Activities

- Both admissions and releases in FY 1989 were the highest observed in the past decade.
- Total number of admissions during FY 1989 was 3,523, up 523 (17.4%) from FY 1988. This represents an increase of 31.7% in the past two years.
 - As in previous years, court commitments accounted for most of the FY 1989 admissions (76%).
- Total number of releases during FY 1989 was 3,408, up sharply (744 or 27.9%) from FY 1988. This was due primarily to an increase of 661 in the number of paroles, which in turn reflects the following law and policy changes.
 - Accelerated parole eligibility and advancement of parole hearing dates resulting from the liberalized good time provisions of Kansas House Bill 3079 which became law in May, 1988.
 - Increase in the rate of decisions to parole by the Kansas Parole Board.
- Since FY 1980, admissions have consistently and substantially outnumbered releases, producing the observed increases in inmate population.
- In recent years admissions for technical violations of parole and conditional release have increased substantially and have accounted for larger proportions of total admissions. Conversely, admissions via violations for new sentences have decreased somewhat and have accounted for smaller proportions of total admissions.

Return Admissions for Violation of Parole or Conditional Release

<u>Fiscal Year</u>	<u>Technical Violations</u>		<u>New Sentence Violations</u>	
	<u>No.</u>	<u>% of Total Admissions</u>	<u>No.</u>	<u>% of Total Admissions</u>
1980	160	9	148	9
1981	215	10	228	11
1982	185	8	218	10
1983	202	8	240	10
1984	242	10	249	10
1985	254	11	158	7
1986	334	14	162	7
1987	393	15	197	7
1988	564	19	204	7
1989	715	20	238	7

[SEE Table 4: Admissions and Releases During FY 1989 -- page 14; and

Table 5: Yearly Admissions and Releases: FY 1980 - FY 1989 -- page 16]

Admissions by Court Actions

- The distribution of the 2,539 FY 1989 court admissions by felony class is very similar to that of the past several years:

<u>Felony Class</u>	<u>%</u>
A	0.8
B	6.7
C	24.3
D	29.7
E	38.5
Total	100.0

- The distribution of the FY 1989 court admissions by county of commitment indicates that as in prior years, the four most populous counties (Johnson, Sedgwick, Shawnee, and Wyandotte) collectively account for well over half the total (58%).
- In FY 1989 there were 86 admissions of offenders under age eighteen at the time of offense, up 12 (16%) from FY 1988.

[SEE Table 6: Admissions by Court Actions, by Felony Class of the Most Serious Offense: FY 1981 - FY 1989 -- page 18; and

Figure 3: Number of Admissions by Court Actions: FY 1989 and Level of Change from FY 1988, by County -- page 19; and

Table 7: Number of Admissions of Offenders Under Age Eighteen at the Time of Offense, by Felony Class of Offense and Type of Offense: FY 1980 - FY 1989 -- page 20]

Rate of Parole

Rate of parole reflects Kansas Parole Board decisions only and not actual parole exits from correctional facilities. The length of the period of time between the decision to parole and the actual release varies among cases.

- The rate of parole for FY 1989 was 53% -- up substantially from recent years (FY 88, 45%; FY 87, 43%; FY 86, 51%).
- The estimated rate of parole for the early 1980's is 80%. The lower rates of parole experienced in recent years have contributed significantly to the high rate of inmate population growth.

[SEE Table 8: Kansas Parole Board Decisions by Type of Decision (FY 1985 - FY 1989 -- page 21)]

Offender Recidivism

The rate of offender recidivism has been operationally defined by the Department as the rate of return to Kansas prisons by offenders released via parole or conditional release. In deriving the data on this measure each offender is tracked individually for the specified length of the follow-up period. Separate rates are calculated for those returning with new sentences and those returning because of technical violations of the conditions of release. Table 9 contains a summary of the return rates for each yearly cohort of releases (Fiscal Years 1983 - 1988).

- "Combined failure rate" (combined returns via new sentence, technical violation, and new commitment after discharge) for the release cohorts was as follows:

Follow-up Period (years after release)	Range of Return Rates
One	16% - 23%
Two	31% - 37%
Three	37% - 46%
Four	41% - 46%
Five	43% - 47%

- In general there appears to be the same trend in these data as noted in the admissions and releases section of this report:

- Considerably higher rate of technical violation returns for the later years (FY 1986 - FY 1988) as compared to the earlier years (FY 1983 - 84).
- Somewhat lower rate of new sentence returns for the later years.

[SEE Table 9: Return Rate of Offenders Released Via Parole or Conditional Release During FY 1983 - FY 1988: By Type of Readmission and Length of Follow-up Period -- page 22]

*An "Initial" entry/exit represents the first entry by an offender during the period and/or his latest exit, with each individual counted only once as an entry and/or once as an exit. The "Subsequent" column includes the counting of offenders who were in confinement at the beginning of the period, but who were subsequently released and re-admitted, thus remaining in confinement at the end of the period. This column also includes the counting of the additional release-admission transactions for offenders already counted in the "Initial" column. The "total" column contains the sum of the "Initial" and "Subsequent" entries/exits.

**Within the "Subsequent" category, certain types of transactions involving temporary exit from a correctional facility have been excluded: Release to court/return from court (602 transactions) and escape/return from escape (49 transactions).

Table 8

Kansas Parole Board Decisions by Type
of Decision (FY 1985 - FY 1989)*

Fiscal Year	Type of KPB Decision**							
	Parole		Pass		Continue		Total	
-----	No.	%	No.	%	No.	%	No.	%
-----	---	-	---	-	---	-	---	-
1985	1137	49	985	42	203	9	2325	100
1986	1382	51	1056	39	280	10	2718	100
1987	1327	43	1449	47	296	10	3072	100
1988	1765	45	1541	39	639	16	3945	100
1989	2381	53	1593	36	483	11	4457	100

*Source of information: Kansas Department of Corrections computer program "KPB TBL" (KPB decisions that occurred during the period specified). The number of paroles and passes reflect all such KPB decisions during the period (from version 1 of "KPB TBL" - "All KPB Decisions"). The number of continuances is the number of offenders whose latest KPB decision of the period was "continued" (from version 2 of "KPB TBL" - "Most Recent KPB Decision").

The tabled information reflects KPB decisions only and not actual parole exits from correctional facilities. The data include all decisions (whether by regular hearing, special minute, etc.) that were entered into the KDOC computer by KPB staff.

**Explanation of the types of KPB decisions rendered: "Parole" - parole granted; "Pass" - paroled denied, a date is set for offender to be heard again; "Continue" - decision pending, a final decision will be made after further deliberation.

*See footnotes next page.

Table 9 (cont.)

Footnotes

*The release population includes all offenders released via parole or conditional release during the fiscal year specified (excluding releases to detainers). The follow-up period is applied individually for each inmate (release date plus the specified number of years in the follow-up period).

Explanation of row headings:

Successes = no readmission to KDOC facilities during follow-up;

New Sentence Violation = readmission to KDOC for a new felony offense;

Technical Violation = readmission to KDOC for technical violation of parole/CR;

New Commitment (After Discharge) = new admission to KDOC (after discharge from sentence obligation, but before the end of the follow-up period).

Abscond Status (End of Period) = offender was on abscond status as of the end of the follow-up period.

**Information not yet available (end date of follow-up period has not yet passed).

***In some instances it is possible for the number of "successes" during the year to be greater than that of a preceding year. Such instances arise in cases where offenders are on abscond status for a long period of time (counted in "Abscond Status" group), but later are reinstated on parole in good standing and then discharged. When such reinstatements occur, the affected offenders move from the absconder group to the success group for the latest year.

NOTE: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

. SECTION III

Profile of the Inmate Population: June 30, 1989

This section provides a description of selected characteristics of the inmate population confined within Kansas correctional facilities on June 30, 1989, the last day of FY 1989. The focus of this profile information is on the demographic attributes and social backgrounds of the offenders, the nature of the offenses for which incarcerated, the sentences imposed, and the criminal histories of the offenders. The inmate population was composed of 5,872 males and 300 females, for a total of 6,172.

Characteristics of the Inmate Population

- The list below summarizes some of the basic characteristics of the inmate population on June 30, 1989. Each of the following characteristics was observed in a majority of the inmates upon admission to the correctional system (or, as in the case of "length of current confinement," the status as of June 30, 1989):
 - Sex - Male
 - Racial/ethnic Group - White (40% non-white)
 - Age - 30 or under (average age - 29.2)
 - Religion - Protestant
 - Formal Education - Less than high school or G.E.D. (53%)
 - Formal Vocational Training - None
 - Employment Status - Not employed full-time
 - Longest Period of Employment - One year or less
 - Type of Admission - New court commitment
 - Type of Offense (most serious) - Person crime

- Length of Sentence (minimum) - Four years or less
 - Duration of Current Confinement (through 6-30-89) - Two years or less
 - Prior Felony Convictions - One or more
 - Prior Felony Incarcerations - None
- The Kansas State Penitentiary and the Kansas Industrial Reformatory together house about half (51.1%) of the total population.
 - There is considerable difference among the correctional facilities with regard to the demographic and criminal history characteristics of the inmate population housed. To a great extent this reflects the assignment of housing according to the security needs of the inmates, as well as their needs for particular correctional programs and services.
 - The more secure facilities such as KSP and KSIR house proportionately more inmates with serious offenses and longer terms to be served.
 - Among offenders by felony class, the group of inmates with Class D felonies have the highest proportion with at least one prior felony conviction (55% vs. 45% to 50% in the other felony class groups). The proportion with at least one prior felony incarceration ranges from 27% for Class C to 36% for Class B.
 - The distribution of the population by inmate security classification was as follows on June 30, 1989:

Maximum	17%	
Medium	29%	
Minimum	43%	
-Regular Minimum		25%
-Community Custody		18%
*Special Management	7%	
Unclassified	4%	
	100%	

* Special management includes those inmates assigned to segregation and protective custody. They are housed in the most secure parts of the institutions.

[SEE Figure 4: Inmate Population, by Location: June 30, 1989 -- page 31; and

Table 10: Summary of Inmate Characteristics: June 30, 1989 Population -- page 32; and

Table 11: Inmate Characteristics: Comparison of the June 30, 1988 and June 30, 1989 Populations -- page 34; and

Table 12: Number of Previous Felony Convictions and Incarcerations by Felony Class of the Most Serious Offense: June 30, 1989 Population -- page 36]

Inmate Employment Status and Program Assignments

- On June 30, 1989, 4,843 or 78% of all inmates had full-time work, academic or vocational assignments -- an increase from 70% on June 30, 1988.
- Of the 1,329 inmates without full-time assignments:
 - 790 were not available for employment because they were in some type of segregation, treatment, orientation, or evaluation.
 - 539 were not employed either because no assignments were available (376), or because they were unwilling or temporarily unable to work (163).
- The most common institutional assignments were of the following types: institutional support, maintenance, utility work detail, Kansas Correctional Industries, vocational or academic education, and evaluation status. Additionally, a large number of inmates housed at the smaller facilities were assigned to non-institutional work programs.

[SEE Table 13: General Employment and Program Status of Offenders in the Inmate Population as of June 30, 1989 -- page 37]

Comparison of Female and Male Inmate Populations

- As of June 30, 1989, the inmate population was 95% male and 5% female.
 - The women in the inmate population numbered 300, up 24 (9%) from 276 the previous year.
- The growth in average daily population (ADP) has been different for male and female inmates. Since FY 1980 the growth in ADP has been 213% for women compared to 159% for men.
- As in the past several years, differences have been noted between the female and male inmates on almost all the characteristics compared. Proportionately speaking, in comparison to the male population the female population:
 - contained more blacks
 - had a higher level of formal education upon admission
 - had been committed for less severe offenses
 - had shorter average duration of current confinement

- had less extensive criminal histories
 - fewer had prior felony convictions
 - fewer had prior felony incarcerations
- had slightly greater prevalence of serious problems with drugs
- had less serious problems with alcohol

[SEE Figure 5: Growth in Average Daily Population: Male and Female Inmates, FY 1980 - FY 1989 -- page 40; and

Table 14: Comparison of the Characteristics of Male and Female Inmates: June 30, 1989 Population -- page 41]

Characteristics of the New Admissions Population

Although the yearly turnover rate is relatively high among the offenders in the inmate population, at any point in time there is a large proportion of the group that has been counted in the yearly population for a number of years. For the past several years the characteristics of newly admitted offenders have been examined in order to better assess any trends toward change in the composition of the inmate population. Included as new admissions are new court commitments, aggravated juvenile delinquency commitments, and probation violators. Many offenders in this group are also members of the end-of-year inmate population since they were still on hand as of June 30, 1989. Note that the new admissions were not necessarily first-time offenders -- some had been incarcerated previously in other states or had served Kansas sentences from which they had been discharged.

- Compared to the June 30, 1988 inmate population, the FY 1989 new admissions population contained proportionately:
 - more offenders in the younger age groups
 - more whites
 - more women

- more offenders with less serious offenses
- fewer offenders with prior felony convictions
- fewer offenders with prior felony incarcerations
- To some extent the differences noted are due to the type of offense and sentence length. The offenders with more serious offenses, extensive criminal histories, and longer sentences tend to accumulate in the inmate population. Thus, the population on hand contains proportionately more offenders with these and related characteristics than does the population of new incoming offenders.

[SEE Table 15: Characteristics of the New Admissions Population: Comparison of FY 1983 - FY 1989 -- page 43]

Criminal Offenses and Sentence Structures

- Collectively, six specific crimes were identified as the most serious offenses of nearly half (46.4%) the inmate population:

<u>Offense</u>	<u>Class</u>	<u>No.</u>	<u>%</u>
Burglary	D	854	14.2
Aggravated Robbery	B	603	10.0
Theft	D/E	506	8.4
Murder I	A	304	5.1
Indecent Liberties/Child	C	269	4.5
Robbery	C	249	4.2
Subtotal		2,785	46.4

- Offenders whose most serious offense was a drug crime numbered 648. This represents 10.8% of the population and reflects an increase of 171 or 35.8% from the corresponding figure for FY 1988 (477).
- Distribution of the inmate population by the minimum term of the controlling offense shows little change from the previous two years:

<u>Minimum (Years)</u>	<u>% of Population</u>
1	14.9
2	12.9
3	18.9
4	7.4
5	12.6
6-14	16.5
15 or more	16.8
	100.0

- Nearly half (46.7%) of the population was serving minimum terms of three years or less.

[SEE Table 16: Distribution of the Inmate Population by Felony Class and Criminal Offense: Comparison of Fiscal Years 1983 - 1989 -- page 45; and

Table 17: Structure of Controlling Sentences: June 30, 1989 Inmate Population (Comparison with Previous Years) -- page 51]

Average Length of Stay

- Average length of stay for FY 1989 parolees (all cases):

<u>Felony Class</u>	<u>Average Stay in Months</u>
A	206.9
B	63.7
C	32.5
D	19.3
E	11.9
All Classes	28.3

- Average length of stay of parolees has increased by 3.4 months or 14% from last year and by about 75% since FY 1983:

<u>Fiscal Year</u>	<u>Average Stay in Months (All Felony Classes Combined)</u>
1983	16.2
1984	18.2
1985	19.3
1986	21.0
1987	22.9
1988	24.9
1989	28.3

- For the FY 1989 admissions population, the overall projected average time to serve to earliest possible release, all felony classes combined, is 17.4 months. This represents a 28% decrease from the average of 22.3 months previously projected for FY 1988 admissions. Had the 1989 Legislature not amended statutory provisions for earning good time, the projected average for the FY 1989 admissions would have been 21.1 months -- on the average nearly four more months per offender.

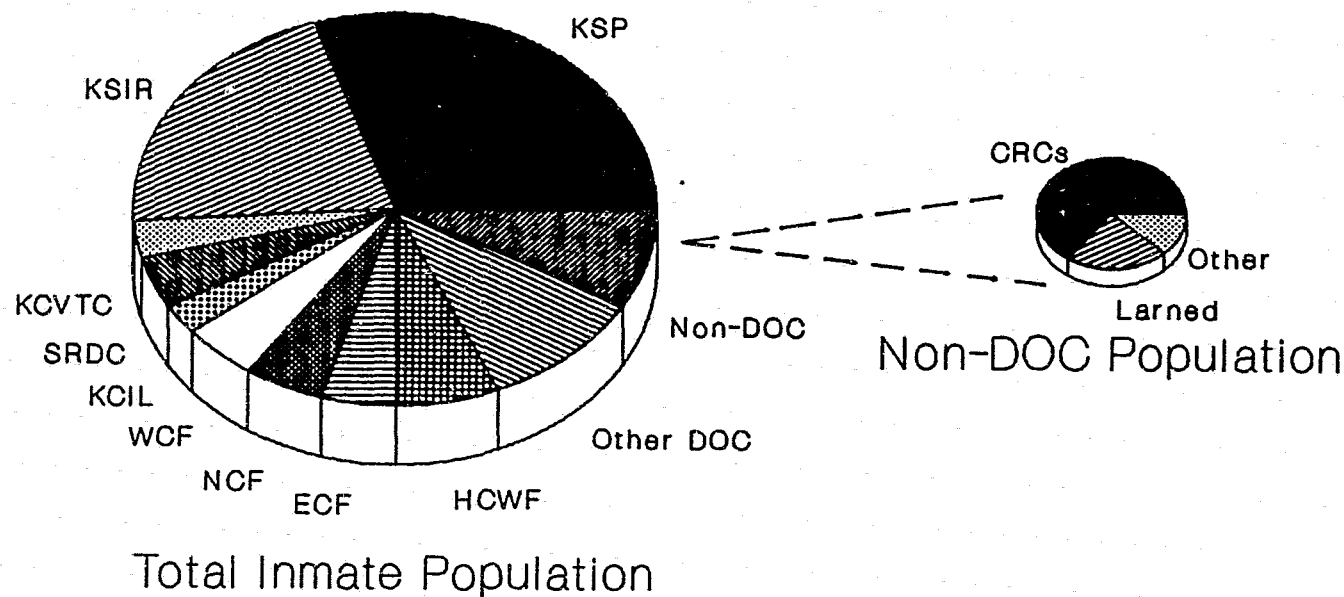

[SEE Table 18: Average Length of Stay in Correctional Facilities, by Felony Class of Offense and Sentence Minimum: Offenders Paroled During Fiscal Years 1983 - 1989 -- page 53; and

Table 19: Projected Average Length of Time to Serve to Earliest Possible Release Date: FY 1989 Admissions Population -- page 55]

*The population includes, in addition to inmates actually housed in correctional facilities on June 30, 1989, all offenders in the following physical locations: state hospital, contract jail placement, contract work release, out for medical care, and out on furlough. Excluded from the population are offenders out for court appearances, inmates serving Kansas sentences while housed in out-of-state facilities under compact agreement, inmates serving in absentia (inmates housed in other jurisdictions while serving Kansas sentences concurrently with sentences of other jurisdictions), escapees, offenders confined in local detention facilities, and all offenders on parole or probation status.

**All characteristics reflect status on June 30, 1989 (or time calculated from that date) except "Education Level" which is as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

*Source of information: 7-3-89 runs of "PGM-WRKASM" (computerized record of work assignments). This information is not yet available for some of the newer facilities.

**More detailed information regarding program assignments at these facilities is presented in Part 2 of this table.

***In addition to the full-time assignments tabled, many inmates participate in other programs on a part-time basis. Such part-time programs include certain courses in academic and vocational education as well as services available in the alcohol, drug, and adjustment counseling areas.

*All characteristics reflect status on June 30 of the specified year (or time calculated from that date) except "Education Level," "Level of Alcohol Usage," and "Level of Drug Usage" which are as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

**Period from most recent admission to June 30 of the specified year.

NOTE: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

*The offense described is the overall most serious offense of all active sentences for the inmate. The designation "A/C/S" (Attempt/Conspire/Solicitation) in the offense description denotes attempted crimes or in some cases to conspire to commit, or to aid, abet, advise, counsel, procure, or hire others to commit the crime.

**For the total number of inmates serving for this offense, add the corresponding unclassified offenses listed in the "Breakdown of Unknown Category."

***The offense of rape was changed from Class C to Class B on 7-1-1978; hence, there are inmates serving under each of the two classifications.

****On May 17, 1984, the felony class of several offenses (including theft, theft of services, habitual giving of worthless checks, and forgery) was changed from D to E.

Number of Inmates (on which % is based)	2950	3347	3957	4454	4884	5552	5921	6026

*The controlling sentence is the range, in years, determined by the longest minimum and the longest maximum term to be served. The controlling minimum is the indicator for the parole eligibility date. The controlling maximum is used to project the conditional release date (the date of the maximum term less the statutorily earned good time) which indicates completion of the sentence obligation.

NOTE: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

*Excluded from the parolee population are those with sentence structures which involved consecutive sentencing and those paroled from in absentia status. The length of stay is the period of time from the date of admission to the date of release (thus excluding any jail credit or other credits applied to the sentence). The felony class of offense is the most serious offense associated with the offender's most recent admission and the minimum sentence is the minimum term associated with this same offense. Source of information: PGM-AVSTAS run 7-3-89.

**The number of parolees in the group is too small for the average stay to be representative. For purposes of calculating the overall average (all classes combined) an average length of stay of 15 years (180 months) was used for Class A cases in these instances.

***In these cases the average length of stay for each felony class was estimated from a frequency distribution consisting of the number of offenders falling within each category of range of months served.

Table 19 (cont.)

*Figures based on 3,242 admissions during FY 1989 (first admissions during the period per computer program PGM-ELNAS run 7-3-89. For purposes of this table, time to be served was calculated according to the new good time provisions which were effective August 1, 1989 per Kansas Senate Bill 49. The maximum allowable earned good time has been applied in all cases. Thus, projected time to serve is the period from the sentence begins date to earliest possible release date.

**Represents the number of offenders remaining in the specified group after the estimated number of probationers is removed from the group. For each felony class, the probationers (total of 533 for all classes) are identified separately and assigned an average time to serve of three months (.25 years).

***Represents cases involving the application of consecutive sentencing. In such cases the sentence minimum used is twice the current lowest possible minimum for the felony class.

• • • • • SECTION IV • • • • •

Kansas Parolee Population, June 30, 1989

This section provides a brief description of the population of offenders in the correctional system who were on parole or supervised conditional release as of June 30, 1989. Also included is a summary of various parole-related activities occurring during FY 1989.

In years prior to FY 1987 the parole services caseload information that was described in this report was limited to clients in good standing. For the past three years there has been more detailed information available regarding the various categories of clients comprising the caseload. The parole officer caseload consists of Kansas offenders paroled to Kansas locations, as well as out-of-state parolees and probationers received by Kansas for supervision under interstate compact. There are no Kansas probationers included in the caseload since the supervision of this group has been a function of the district courts since June 1, 1979.

Composition of Parole Caseload

- As of June 30, 1989 there was a total of 3,680 offenders under supervision of 70 Kansas parole officers.
 - The total Kansas caseload has increased by 576 (19%) from FY 1988 and by 949 (35%) from FY 1987.
 - By the end of FY 1989, 11 new parole officer positions had been added to the 59 existing positions. However, the average caseload per parole officer remained at 53 - the same as it was at the end of FY 1988.
 - The group of 1,423 Kansas offenders under supervision out-of-state (including those with KDOC warrants), plus another group of 396 absconders, brings the total number of offenders managed by Kansas Parole Services to 5,499 -- up 910 (20%) from FY 1988 and up 1,473 (37%) from FY 1987.

[SEE Table 20: Composition of Offender Caseload Managed by Kansas Parole Officers: End-of-year Status, FY 1987 - FY 1989 -- page 60]

Characteristics of Kansas Parolees

- The basic profile information on the population of offenders on parole and conditional release in Kansas suggests relatively little change in the past several years.
 - One exception is a shift in the composition of the population with regard to felony class of offense.

Noteworthy is the substantial increase in the number and proportion of offenders in felony classes A, B and C (the more serious offenses). The FY 1989 population contained 873 offenders in these classes collectively - some 52% more than the 573 in FY 1988 and 88% more than the 465 in FY 1987. However, felony class D and E offenders still comprise two-thirds of the population.

- There are substantial differences between the composition of the parole population and that of the inmate population:
 - Collectively, Class A and B offenders account for about 30% of the inmate population, but less than 10% of the parole population.
 - Class D and E offenders account for only about 44% of the inmate population, compared to 67% of the parole population.

[SEE Table 21: Characteristics of Kansas Parolees: Comparison of June 30, 1988 and June 30, 1989 Populations -- page 61; and

Figure 6: Inmate vs. Parole Population, by Felony Class of Most Serious Offense -- page 63]

- As in previous years, the paroles and conditional releases occurring in FY 1989 were concentrated in a few counties/states:
 - Three counties (Sedgwick, Shawnee, and Wyandotte) collectively account for 65% of the total number of in-state paroles and conditional releases.
 - Three states (Missouri, Oklahoma, and Texas) collectively account for 56% of the total number of out-of-state paroles and conditional releases.
- Within the June 30, 1989 parole population there was a total of 933 out-of-state offenders being supervised in Kansas (245 parole cases and 680 probation cases) -- very little change from FY 1988.
- As of June 30, 1989, there was a total of 1,229 Kansas cases being supervised out-of-state (excluding 195 with KDOC warrants), up 325 (36%) from June 30, 1988.
- As in previous years, the amount of compact case activity (compacts received and sent) was especially great in three states: Missouri, Oklahoma, and Texas.

[SEE Table 22: Kansas Offenders Paroled and Conditionally Released During FY 1989, by County or State to Which Released -- page 64; and
