The Uniform Crime Report Unit of the State Police is pleased to present the fourteenth edition of "Crime in New Hampshire." This statistical analysis represents criminal activity trends based upon the voluntary submission of data from participating law enforcement agencies within the state.

For the year of 1990, the percentage of serious crimes reported rose slightly by 2.4% over 1989. This was due in part by the increases in larceny, up 4.1%, rape, which rose 8.6%, and robbery, up 12.9%. Three other major crimes, murder, arson and aggravated assault, went down by 41.6%, 24.7% and 16.7% respectively. Overall, the past year realized a minimal reduction in both Part I and Part II arrests reported of 1.2%. In particular, drug arrests fell by 23.6% over 1989, while drunk driving apprehensions dropped 10.4%.

With the financial support of the federal government, the coming three years will mark a major change in the UCR Program. The existing program will be replaced by the new, highly detailed incident based reporting system. In anticipation of this new and comprehensive UCR system, we wish to extend our sincere appreciation to the F.B.I. and all the police agencies who serve as the foundation for this criminal information resource.

Very truly yours,

Colonel Lynn M. Presby
Director

NOTIFICATION

The publication of "Crime in New Hampshire" has served the communities of the state for many years. From the beginning, this report has been a statistical reference that measure the "trends" of Part I and Part II crimes as defined by the Federal Bureau of Investigation. The Uniform Crime Report Unit of the Division of State Police has continually informed both the law enforcement community and the general public that this periodical can only represent data under these terms.

There are several important reasons why this document can only serve as a criminal activity indicator. First, the submission of necessary data is done on a voluntary basis by the police agencies in the state and the number of reporting agencies often vary from year to year. Secondly, inconsistencies arise in how data is interpreted by submitting agencies which can conflict with the federal definitions. Also, unfounded crimes are deleted from the year they are reported, not in the year of occurrence.

Readers are cautioned to keep these factors in mind when reviewing the data and are advised that if year to year comparisons are made crime rate percentages may vary.

GLOSSARY OF TERMS

Adult - In New Hampshire an adult is a person 18 years of age or above.

Cleared by Arrest or Exceptional Means - For UCR purposes, an offense is "cleared by arrest" or solved for crime reporting purposes when at least one person is (1) arrested, (2) charged with the commission of the offense, and (3) turned over to the court for prosecution. In certain situations, when the police have exhausted all leads and done everything possible to clear a case, the offense can be "exceptionally" cleared. The following conditions have to be met before an offense can be cleared exceptionally: (1) The investigation has definitely established the identity of the offender; (2) There is enough information to support an arrest, charge, and turning over to the court for prosecution; (3) The exact location of the offender is known so that he could be taken into custody; and (4) There is some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender.

Index Offenses - The sum total of eight major offenses used to measure the extent, fluctuation, and distribution of crime in a given geographical area. The eight offenses are: (1) Murder, (2) Forcible Rape, (3) Robbery, (4) Aggravated Assault, (5) Burglary, (6) Larceny-Theft, (7) Motor Vehicle Theft, (8) Arson. Each of these offenses is referred to as an "Index Offense."

Juvenile - In New Hampshire, a person 17 years of age or under.

Property Crime - Consists of the Index Offenses of Burglary, Larceny, Motor Vehicle Theft, and Arson.

Violent Crime - Consists of the Index Offenses of Murder, Forcible Rape, Robbery, and Aggravated Assault.

CALCULATION OF RATES

Offense and Arrest Rates

To compute offense rates per 1,000 population, divide your community's population by 1,000 and then divide the number of offenses by the resulting figure.

Example:

- a. Population for your jurisdiction, 31,600.
- b. Number of known burglaries for your jurisdiction for a year, 341.

Divide 31,600 by 1,000 = 31.6.

Divide 341 by 31.6 = 10.79.

The burglary rate is 10.79 per 1,000 inhabitants.

The number 31.6 can now be divided into any offense class total to obtain a crime rate for that offense.

The same procedure can be used to obtain arrest rates per 1,000 population.

Clearance Rate

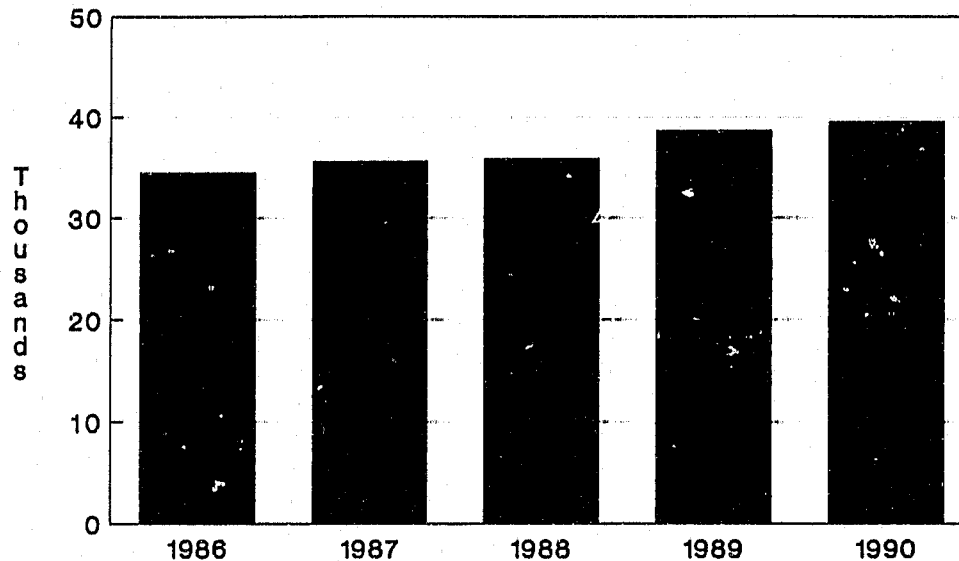

The percentage of crimes cleared by arrest is obtained by dividing the number of offenses cleared by the number of actual offenses known. This answer is then multiplied by 100.

Example:

55 Burglaries cleared
341 Burglaries known $.16 \times 100 = 16\%$

Your percentage of clearance for burglary is 16%.

DOMESTIC ASSAULT

In 1979, the General Court mandated the Director of State Police to present an annual report to them concerning the nature and extent of domestic violence in our State. It was decided to collect this data in conjunction with the UCR program by adding a relationship category to the information collected in assaults. The following chart indicates the relationship of the offender to the victim along with the type of weapon used in aggravated assaults and the number of simple assaults for 1990:
