About the National Institute of Justice

The National Institute of Justice, a component of the Office of Justice Programs, is the research and development agency of the U.S. Department of Justice. NIJ was established to prevent and reduce crime and to improve the criminal justice system. Specific mandates established by Congress in the Omnibus Crime Control and Safe Streets Act of 1968, as amended, and the Anti-Drug Abuse Act of 1988 direct the National Institute of Justice to:

- *Sponsor special projects and research and development programs* that will improve and strengthen the criminal justice system and reduce or prevent crime.
- *Conduct national demonstration projects* that employ innovative or promising approaches for improving criminal justice.
- *Develop new technologies* to fight crime and improve criminal justice.
- *Evaluate the effectiveness of criminal justice programs* and identify programs that promise to be successful if continued or repeated.
- *Recommend actions* that can be taken by Federal, State, and local governments as well as private organizations to improve criminal justice.
- *Carry out research on criminal behavior.*
- *Develop new methods of crime prevention* and reduction of crime and delinquency.

The National Institute of Justice has a long history of accomplishments, including the following:

- Basic research on career criminals that led to the development of special police and prosecutor units to deal with repeat offenders.
- Research that confirmed the link between drugs and crime.
- The research and development program that resulted in the creation of police body armor that has meant the difference between life and death to hundreds of police officers.
- Pioneering scientific advances such as the research and development of DNA analysis to positively identify suspects and eliminate the innocent from suspicion.
- The evaluation of innovative justice programs to determine what works, including drug enforcement, community policing, community anti-drug initiatives, prosecution of complex drug cases, drug testing throughout the criminal justice system, and user accountability programs.
- Creation of a corrections information-sharing system that enables State and local officials to exchange more efficient and cost-effective concepts and techniques for planning, financing, and constructing new prisons and jails.
- Operation of the world's largest criminal justice information clearinghouse, a resource used by State and local officials across the Nation and by criminal justice agencies in foreign countries.

The Institute Director, who is appointed by the President and confirmed by the Senate, establishes the Institute's objectives, guided by the priorities of the Office of Justice Programs, the Department of Justice, and the needs of the criminal justice field. The Institute actively solicits the views of criminal justice professionals to identify their most critical problems. Dedicated to the priorities of Federal, State, and local criminal justice agencies, research and development at the National Institute of Justice continues to search for answers to what works and why in the Nation's war on drugs and crime.

Introduction

The National Criminal Justice Thesaurus contains listings of descriptors or terms used to index literature in the National Institute of Justice/NCJRS document database. This database is maintained by the National Criminal Justice Reference Service (NCJRS), the National Institute of Justice's international clearinghouse of criminal justice information.

The National Institute of Justice, the research and development agency of the U.S. Department of Justice, created NCJRS in 1972 to communicate information and distribute publications and materials resulting from Institute-sponsored research, development, and evaluation studies. The NCJRS document collection consists of more than 110,000 books, articles, and reports dealing with the broad spectrum of criminal justice issues. The document database contains abstracts of all the documents in the collection; it can be searched directly on DIALOG, on CD-ROM, or by calling the reference service.

In addition to providing access to the NCJRS document database, the clearinghouse offers a variety of information services, including (1) information specialists to answer questions on criminal justice issues; (2) distribution of more than 600 publications of the National Institute of Justice and other Office of Justice Programs agencies; (3) free subscriptions to the National Institute of Justice Journal and National Institute of Justice Catalog, and (4) a library and public reading room in Rockville, Maryland, and document loan capabilities to libraries in the United States. For more information on NCJRS, call 800-851-3420. From outside the United States, call 301-251-5500.

Term selection in the National Criminal Justice Thesaurus is based on the vocabulary used in the documents entering the NCJRS database, on the frequency of term usage in the literature, and on the language of the user community. The 5-digit number assigned to each term is used as a descriptor code when searching on that term.

SUBSTANTIVE DESCRIPTORS AND RELATED ENTRIES

The order in which notations appear under a descriptor, when appropriate, is as follows:

SN	SCOPE NOTE
UF	USED FOR
BT	BROADER TERM
NT	NARROWER TERM
RT	RELATED TERM

A *SCOPE NOTE* (SN) may define or limit the specific use of a term in the NCJRS system. A typical *SCOPE NOTE* is included under the term "*Miranda rights*" which is found in the example under *RELATED TERM* below. It may be a true definition, may place a positive or negative limitation on usage, or may combine definition and some limitations.

Two types of terms are listed: descriptors and synonyms or near synonyms. Descriptors are authoritative terms that are acceptable for indexing and searching. A *USE* entry follows synonyms or near synonyms of descriptors. The entry directs the user to the preferred valid descriptor for communicating with the system. Synonymous entries appear solely to provide as many points of entry to the Thesaurus as possible. The importance of the *USE* entry extends beyond synonymy. The entry can represent the relationship to a descriptor of a near synonym with general conceptual similarity. A *USE* entry provides a valid descriptor term synonymous with or approximating the concept of the term referenced. For example:

Remote terminals
USE Terminals (computer)

The *USED FOR (UF)* entry is the reverse of the *USE* entry. This entry shows the user that the descriptor includes the concept represented by the *USE* entry. For example:

01027 Terminals (computer)
UF Remote terminals

A *NARROWER TERM (NT)* entry denotes a hierarchical relationship between the main descriptor and a descriptor that belongs in the same class, but is on a lower level; that is, the narrower term is more specific. For example:

01777 Hallucinogens
00616 NT LSD (acid)
05131 NT PCP (phencyclidine hydrochloride)
01450 NT Peyote

A *BROADER (BT)* entry is also a hierarchical notation, and is the reciprocal of the NT notations. A BT entry indicates that the descriptor is in the same class, but that it is on a higher level in the hierarchy. For example:

01450 Peyote
04632 BT Controlled drugs
01777 BT Hallucinogens

The *RELATED TERM (RT)* entries perform two functions, only one of which is concerned with the scope of the main entry. A term listed as RT may clarify scope, that is, provide further definition of the main descriptor entry. The alternate function is to alert the user to other terms and thus provide additional points of reference. For example, to illustrate the two-sided RT relationship:

04183 Arrest and apprehension
04985 RT Arrest warrants
02462 Citizen arrests
05069 Crimes in progress
04816 Lawful use of force
00624 Manhunt
05208 Miranda rights
05136 Police pursuit driving
08578 Probable cause

05208 Miranda rights
SN (Predetention rights of the accused as required
by the US Supreme Court ruling)

04183 RT Arrest and apprehension
04197 Constitutional rights and civil lib/
02879 Rights of the accused

Every hierarchical and collateral entry has a reciprocal entry elsewhere in the Thesaurus.

ARRAY TERMS are very broad terms (e.g., *Equipment/, Facilities/ and Programs/*) which are considered to be too general to be of much value in indexing or retrieval. Such terms have been appended with a slash (/); and whenever possible a more specific term should be used in lieu of this term. The following standard *SCOPE NOTE* is used in conjunction with all array terms; "Use of a more specific term is recommended; consult the term listed below." The listing of RT references following each array term refers the reader to all terms at the next lower level of specificity (but not the the still lower levels of specificity).

HOW TO USE THE THESAURUS

Alphabetization

Terms are alphabetized on a letter-by-letter basis. All spaces, hyphens, and other signs which may appear within the term are ignored, except the left parenthesis "(", which precedes "a." The example below demonstrates this exception.

UF Hypnosis (questioning under)
Hypnosis of victim or witness
Hypnosis in investigation

Selecting the Most Specific Descriptor

To avoid retrieving irrelevant documents and to assure full retrieval of target information, you should always select the most specific thesaurus descriptor of the concept for which you are searching. Because documents are indexed to the narrowest applicable term within a hierarchy, a search on a broader term only will not retrieve the documents indexed to the narrower terms.

Search Examples

Suppose you wish to find documents about "*juvenile delinquents*" in the NCJRS database. The Thesaurus can help pinpoint the appropriate term or terms for your search. You might begin by checking the rather general term *Delinquents*, in which case you would find the following entry:

Delinquents (juvenile)
USE Juvenile delinquents

This citation indicates that the term *Juvenile delinquents* is the preferred descriptor for indexing and retrieval. Turning to the preferred term, you will find the following list of cross-references.

01637 Juvenile delinquents
UF Delinquents (juvenile)
03990 BT Juveniles
02409 NT Emotionally disturbed delinquents
05119 Female juvenile delinquents
09416 Handicapped delinquents
05425 Male juvenile delinquents
09322 Mentally retarded delinquents
09323 Middle class juvenile delinquents
05261 RT Alternative schools
01308 Auto theft
03822 Confrontation tactics
05049 Crime in schools
04698 Drug related crimes
05095 Juvenile court waiver
09505 Juvenile offenders
08442 Juveniles in adult facilities
04103 Juvenile status offenders
05245 Parent education
05241 School delinquency programs
08311 Ungovernable juveniles
03001 Youthful offenders

Skipping over the term designated *UF* (i.e., nonpreferred synonym of *Juvenile delinquents*) and the *BT* (indicating that *Juvenile delinquents* is part of the more comprehensive hierarchy of *Juveniles*), you will come to the *NT* references. *Emotionally disturbed delinquents*, *Female juvenile delinquents* and *Handicapped delinquents*, etc., are all valid search terms which you may prefer to use if they are more accurate expressions of the concept for which you are searching. As mentioned above, a search on the term *Juvenile delinquents* alone will not retrieve documents indexed under *Emotionally disturbed delinquents* or under the other *NTs*. If any of the narrow terms are relevant to your search, they should definitely be included in your search strategy. You should also note the *RT* references, which provide new directions for your search by adding related terms.

Focusing Your Search

If the first term you locate is followed by a slash, it is an *ARRAY TERM*. Though *ARRAY TERMS* can be used for searching, they are often too broad to be useful for indexing or retrieval. The following entry is typical of *ARRAY TERMS*.

01391	Property crimes/ (Use of a more specific term is recommended, consult the terms listed below)
08679	RT Agricultural crimes
04914	Antitrust offenses
02495	Arson
10067	Archeological preservation laws
00110	Burglary
02443	Counterfeiting
04384	Crime costs
04941	Crimes against businesses
01405	Dealing in stolen goods
01726	Extortion
03629	Forgery
01768	Hijacking
00469	Hit and run
04651	Industrial espionage
03850	Loan sharking
04600	Offenses/
02586	Piracy
05362	Property crime statistics
04255	Property identification
03640	Theft offenses
04757	Vandalism
01355	White collar crimes
08600	Zoo crimes

Scan the *RT* terms listed under the array term and select those related to your interest as new points from which to search. Do not make a final choice until you have determined whether there are still narrower terms that would be better choices. In this particular example, if you selected the *RT Crime costs* as a new starting point, you would find that *Crime costs* has two narrower terms, *Business crime costs* and *Stolen vehicle costs*, either of which may be a more specific expression of the concept you are trying to locate.

Searching on Cross-Cultural Terms

To facilitate access to the numerous international documents in the database, the Thesaurus contains a number of cross-cultural terms. These include expressions peculiar to a foreign country which have no direct equivalent in the US system or for which such an equivalent cannot be readily identified. For the most part, these idioms are entered as nonpreferred synonyms of their nearest American equivalent. For instance, the French concept "*Sursis avec mise a l'epreuve*" would have the following reference to the preferred American term:

Sursis avec mise a l'epreuve
USE Probation

In addition, numerous international organizations are included in the organizational file of the Thesaurus.

Combining Several Descriptors

To attain an even greater level of specificity, the technique of combining or "coordinating" more than descriptor in a search is useful. Though the Thesaurus contains no specific term to express the concept of "*police attitudes toward abuse of authority*," the combination of the existing descriptors *Abuse of authority* and *Police attitudes* will yield only those documents which hold relevant information on both descriptors. In coordinating, descriptors from all three files of the Thesaurus (substantive, geographic, and organizational) may be combined. For instance the geographic code or descriptor for *France* may be combined with *Preventive detention* to obtain information on preventive detention in France.

STATISTICS

This edition of the National Criminal Justice Thesaurus exhibits the following statistics:
