The Honorable William Donald Schaefer
Governor, State of Maryland
State House
Annapolis, MD 21402

Dear Governor Schaefer:

Pursuant to Article 88B, Sections 9 and 10 of the
Annotated Code of Maryland, the Maryland State Police is
respectfully submitting the 1992 Uniform Crime Report,
"Crime In Maryland."

This publication represents the Eighteenth Annual
Report prepared by the Maryland Uniform Crime Reporting
Program. The data was compiled from monthly reports
forwarded to the Central Records Division, Maryland State
Police, by all law enforcement agencies throughout the
State of Maryland. Every effort has been made to verify
the accuracy and completeness of the published information.

"Crime In Maryland" will assist law enforcement
personnel and members of the executive and legislative
branches of government. It will provide valuable
information in planning crime prevention programs, assessing
crime patterns and legislation to combat criminal activity.

Sincerely,

Superintendent

LWT:mks

INTRODUCTION

The Maryland Uniform Crime Reporting (UCR) Program is one of the measures that has been taken in the establishment of an effective Criminal Justice Information System (CJIS) for the State. This particular phase of the CJIS focuses on the incidence of crime and law enforcement, by establishing a method to collect, evaluate and process uniform statistical data on crime statewide. The Maryland UCR Program provides the means to forward more valid data to the Federal Bureau of Investigation from a single agency and also to consolidate it into an annual report entitled "Crime in Maryland".

NATIONAL UNIFORM CRIME REPORTING PROGRAM

The counterpart of the Statewide UCR Program is the National UCR Program which is under the direction of the Federal Bureau of Investigation. The National Program resulted from a need for a uniform compilation of crime statistics nationwide. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police.

The IACP continues to serve in an advisory capacity to the FBI in the current operation of the Program.

Crime statistics voluntarily submitted by individual law enforcement agencies from all fifty states are presented annually in the FBI's Uniform Crime Reports Publication entitled "Crime in the United States".

MARYLAND UNIFORM CRIME REPORTING PROGRAM

The FBI has actively assisted individual states in the development of State UCR Programs compatible with the National Program. Maryland took advantage of this assistance in 1972 and was able to develop its own program by 1975.

The responsibility and authority for the collection and dissemination of UCR data was assigned to the Maryland State Police, Department of Public Safety and Correctional Services under Article 88B, Sections 9 and 10, of the Annotated Code of Maryland.

The Maryland Uniform Crime Reporting Program became operational January 1, 1975. This program consists of the uniform classification, review, compilation and analysis of crime statistics reported by all law enforcement agencies of the State pursuant to the guidelines and regulations prescribed by law.

PURPOSE AND OBJECTIVES

In keeping with the recommendation of the President's Commission on Law Enforcement and the Administration of Justice, the Maryland UCR Program was planned for eventual growth into a complete and integrated offender based Criminal Justice Information System. Under this program, each offender arrested in Maryland will be tracked through the entire criminal justice system from time of arrest, through the courts, to the correctional system where their exit (parole, expiration of sentence, etc.) will be recorded. In this manner, a complete "criminal history" on individual offenders will be available for use by the police, courts and correctional agencies in Maryland. In addition, statistical data derived from the CJIS Program will provide assistance in determining the overall efficiency of the Criminal Justice System in Maryland and will make effective management studies possible.

The fundamental objectives of the Maryland UCR Program are:

1. Inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in Maryland, its magnitude and its trends.
2. Provide law enforcement administrators with criminal statistics for administrative and operational use.
3. Determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
4. Provide base data and statistics to measure the workload and effectiveness of Maryland's Criminal Justice System.
5. Provide base data and statistics to measure the effects of prevention and deterrence programs.
6. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
7. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.
8. Provide the FBI with complete UCR data to be included in the national crime reports.

DEVELOPMENT

Effective September 1972, the first federal grant was awarded to the Department of Public Safety and Correctional Services (State Police) by the Law Enforcement Assistance Administration to provide money to initiate a Statewide Uniform Crime Reporting Program in Maryland. A committee for the implementation of this program was then established by the State Police.

The committee made studies of the federal program, as well as several other State UCR Programs, which were operational at that time. Forms, tally books and the Maryland UCR Manual were developed, printed and distributed to all contributing agencies. Questionnaires concerning each law enforcement agencies record keeping system were distributed to determine their capability to fully participate in the State Program.

In September 1974, an additional grant was awarded to the Department of Public Safety and Correctional Services (State Police) by Law Enforcement Assistance Administration for the purpose of hiring Field Records Representatives to serve as liaison officers between the State Program and the contributing law enforcement agencies. Also, additional clerical support for the State Program was provided in the grant.

During the developmental phase, several workshops were held in various parts of the State to present the UCR Program in detail to participating agencies. Since that time, supplemental workshops have been held as needed.

During 1975, the first year of operation, the UCR staff concentrated its efforts in assisting requesting law enforcement agencies in devising or improving their record keeping system. The UCR staff continued to keep the agencies trained in UCR and to provide assistance where needed. Agencies contributing to the UCR Program have increased from 102 agencies in 1975 to 130 in 1992.

The UCR Section collects crime information from these 130 agencies and publishes quarterly releases reflecting crime trends. In addition, this is the seventeenth annual report produced by the UCR staff containing an in-depth analysis of all information collected in the UCR Program. It also includes the annual Maryland Battered Spouse Report.

REPORTING PROCEDURES

Under the Maryland UCR Program, law enforcement agencies are required to submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agencies record of complaints, investigations and arrests.

Crime data and information is submitted by state, county and municipal law enforcement agencies monthly on the number of offenses known to them in the following crime categories:

- (1) Criminal Homicide
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking or Entering
- (6) Larceny
- (7) Motor Vehicle Theft
- (8) Arson*

The count of offenses is taken from the record of complaints received by law enforcement agencies from victims, witnesses, other sources or discovered by them during their own operation. Complaints determined by subsequent investigation to be unfounded are eliminated from count. The resulting number of "actual offenses known to law enforcement agencies" in these crime categories are reported without regard for whether anyone is arrested, stolen property is recovered, local prosecutive policy or any other consideration.

Reported offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities and state. County agencies report those crimes which occur in the counties outside the cities.

A supplemental report is also submitted each month showing the value of stolen and recovered property, the type of property and the type of offense within a crime category in which it was taken. This report also shows the number of stolen vehicles recovered locally and by other jurisdictions. In addition, each agency reports the number of persons arrested by them or other agencies for crimes which have occurred within their jurisdiction. The arrest report also shows the age, sex and race of those arrested and the disposition of juveniles by the arresting agency. When applicable, supplemental reports are submitted regarding the persons, weapons and circumstances, etc., involved in homicides, spousal or officer assaults and "carjackings".

In addition, police employee data is collected on an annual basis.

*Monthly arson reports are submitted for law enforcement agencies by the State Fire Marshal's Office and designated county agencies.

VERIFICATION PROCESS

A major concern in the collection of crime statistics for law enforcement agencies throughout the state is the uniformity and accuracy of data received. Program aides such as guides and instructional classes do not necessarily guarantee the accuracy of the reports submitted by the contributors, therefore, additional controls are necessary.

Each report received by the UCR section is recorded, examined and verified for mathematical accuracy and possibly more important for reasonableness. The verification process includes numerous checks to ensure the validity of information. The elimination of duplicate reporting by individual contributors receives particular attention. Minor errors are corrected by telephone contact with the contributors. Substantial variations and errors are adjusted through personal contacts. The personal contacts are invaluable to the accuracy and quality of reporting. Field Records Representatives are engaged in a constant educational effort and as such, provide a vital link between the UCR Program and the contributor.

POPULATION DATA

The computation of crime rates as they appear in this report by municipality, county and state are based on the latest available population estimates for the year as provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

LIMITATIONS OF A UNIFORM CRIME REPORTING PROGRAM

Information currently collected by the Maryland Program is generally the same as that gathered by the National System and the methods of classifying and scoring offenses and arrests are the same. This readily enables comparisons with other states and with the nation, as a whole. However, there are limitations to the information collected which should be clearly understood before any conclusions are drawn from the UCR data presented in this report.

The main goal of the UCR Program is to furnish police administrators with a measure of their activities and operational problems as indicated by the number of reported offenses, arrests, clearances, etc.

A first step in the control of crime is to ascertain the true dimensions of the problem. However, present statistics as gathered by the UCR Program measure neither the real incidence of crime or the full amount of economic loss to victims. Information regarding number of offenses, clearances, value and type of property stolen and recovered property are collected only for the eight Part I offenses. For Part II offenses the only information submitted is the number of arrests for these crimes. Consequently, there is no record of the actual number of these offenses occurring, or is there a calculation made for property loss.

The Crime Index does not explicitly take into account the varying degrees of seriousness of its seven components (excluding arson). Each crime receives the same weight as it is added to the index, consequently, an auto theft is counted the same as a murder and an aggravated assault is weighed equally with an attempted breaking or entering. Any review of crime must consider the volume, rate and trend of each offense that comprises the index and the relationship between these seven crimes*.

The Maryland and National Uniform Crime Reporting Programs are designed to measure offenses committed and persons arrested. Difficulties can arise if this distinction is not kept clearly in mind. Crimes relate to events, arrests relate to persons. Unlike traffic violations where there is usually one event, violation and offender, a single criminal act can involve several crimes, offenders and victims. Relating specific crimes to a criminal or offense to evaluate characteristics of those arrested, is generally beyond the scope of the present Uniform Crime Reporting System.

Juvenile crime and arrest statistics, because of their nature, are another area of misunderstanding. Many juvenile offenders are handled informally, as a consequence, inaccurate or incomplete recording of the event or action may result. Procedures for handling juveniles vary between departments more so than the handling of adult offenders. Furthermore, the degree of juvenile involvement in cleared offenses is probably seriously misunderstood because the juvenile clearance indicator is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported.

The preceding comments should not be viewed as an indictment of the Uniform Crime Reporting Program which, admittedly, is designed for the operational requirements of law enforcement agencies. While current methods of gathering and reporting crime and arrest data provide a less than complete picture of criminality in our society, there is at present no other information system in general use that will more adequately perform this task.

*Arson is not used at this time in computing the Crime Index.

CLASSIFICATION OF OFFENSES

Uniformity in reporting is based upon the proper classification of offenses.

The adoption of the Federal System of UCR included the utilization of the offense classifications of that system. Law enforcement agencies of this State have made accurate application of those classifications in the reports submitted to the Maryland UCR System.

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in UCR are divided into two groupings designated as Part I and Part II offenses. Offense and arrest information is reported for the Part I offenses whereas only arrest information is reported for Part II offenses.

The Part I Offenses are as follows:

1. **CRIMINAL HOMICIDE**

The willful (nonnegligent) killing of one person by another.

2. **RAPE**

Sexual intercourse with a female forcibly and against her will and attempts to commit same.

3. **ROBBERY**

The taking or attempting to take anything of value from the care, custody or control of a person(s) by use of a weapon, physical force, threat or placing the victim in fear.

4. **AGGRAVATED ASSAULT**

Unlawful assault with a weapon or other means having the potential to cause death or severe injury or without a weapon which results in serious injury and attempts to commit same.

5. **BURGLARY**

The unlawful entry or attempted entry of a structure to commit a felony or theft.

6. **LARCENY**

The taking or attempting to take anything of value from the care, custody or control of a person(s) without their consent or knowledge.

7. **MOTOR VEHICLE THEFT**

The theft or attempted theft of a motor vehicle.

8. **ARSON**

Any willful and/or malicious burning or attempt to burn a house, building, fence, vehicle, boat, aircraft, personal property, goods, lumber, timber, trees, crops, field, etc.

THE PART II OFFENSES ARE AS FOLLOWS:

9. **OTHER ASSAULTS-SIMPLE**

Assaults or attempts which do not involve the use of a potentially harmful weapon and/or in which the victim does not sustain a serious injury.

10. **FORGERY AND COUNTERFEITING**

In this class are placed all offenses dealing with the making, altering, uttering or possessing, with intent to defraud, anything false in the semblance of that which is true.

11. **FRAUD**

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, etc.

12. **EMBEZZLEMENT**

Misappropriation or misapplication of money or property entrusted to ones care, custody, or control.

13. **STOLEN PROPERTY - BUYING, RECEIVING, POSSESSING**

Included in this class are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

14. VANDALISM

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law as well as any attempts to commit any of the above.

15. WEAPONS - CARRYING, POSSESSING, ETC.

This class deals with weapon offenses, regulatory in nature, such as: manufacture, sale or possession of deadly weapons, carrying deadly weapons (concealed or openly); using, manufacturing, etc., of silencers; furnishing deadly weapons to minors and Aliens possessing deadly weapons and all attempts to commit any of the above.

16. PROSTITUTION AND COMMERCIALIZED VICE

Included in this class are the sex offenses of a commercialized nature, such as; prostitution, keeping bawdy house, disorderly house, or house of ill fame. Pandering, procuring, transporting, or detaining women for immoral purposes, and all attempts to commit any of the above.

17. SEX OFFENSES

(Except forcible rape, prostitution and commercialized vice.) Include offenses against chastity, common decency, morals, and the like such as; adultery, fornication, incest, indecent exposure, indecent liberties, etc. Intercourse with an insane, epileptic, or venereal diseased person. Sodomy, buggery or crime against nature. Statutory rape (no force) and seduction as well as any attempts to commit any of the above.

18. DRUG ABUSE LAWS

Included in this class are all arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing and making of narcotic drugs.

Drug abuse law arrests are requested on the basis of the drug involved.

- a) Opium or cocaine and their derivatives
- b) Marijuana
- c) Synthetic narcotics--Manufactured narcotics which can cause true drug addiction (demerol, methadone).
- d) Dangerous nonnarcotic drugs (barbiturates, benzedrine).

19. GAMBLING

All charges which relate to promoting, permitting, or engaging in gambling are included in this category. To provide a more refined collection of a gambling arrests, the following breakdown of gambling arrests should be furnished:

- a) Bookmaking (horse and sport book).
- b) Numbers and lottery.
- c) All other.

20. OFFENSES AGAINST THE FAMILY AND CHILDREN

Included here all charges of nonsupport and neglect or abuse of family and children, such as; desertion, abandonment non-support of wife or child, nonpayment of alimony, neglect or abuse of a child and all attempts to commit any of the above.

21. DRIVING UNDER THE INFLUENCE

This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. LIQUOR LAWS

With the exception of "drunkenness" (Offense #23) and "driving under the influence" (Offense #21) liquor law violations (state or local) are placed in this class. Includes: Manufacturing, sale, transporting, furnishing, possessing, etc., intoxicating liquor. Maintaining unlawful drinking places. Furnishing liquor to minor or intemperate person. Using a vehicle for illegal transportation of liquor, drinking on a public conveyance, and all attempts to commit any of the above.

23. DRUNKENNESS

Not a criminal offense in Maryland.

24. DISORDERLY CONDUCT

In this class are placed all charges of committing a breach of the public peace, safety or order, etc., such as: disturbing the peace and disorderly conduct, etc. Disturbing meetings, religious services, hearings, etc. Disorderly conduct on buses, trains, planes, public conveyances, etc. Unlawful assembly, inciting to riot, riot, rout, etc. Profanity, obscene language, blasphemy, etc. All attempts to commit any of the above.

25. VAGRANCY

Includes vagrancy, begging and loitering.

26. ALL OTHER OFFENSES

All violations of state or local laws not otherwise classified.

27. SUSPICION

Limited to suspicion arrests when the persons arrested are released by the police. While "suspicion" is not an offense, it is the grounds for many arrests in those jurisdictions where the law permits. After examination by law enforcement officers, the prisoner is either formally charged or released. Those formally charged are entered in one of the Part I or II offense classes. This class is limited to "suspicion" arrests where persons arrested are released by the police.

28. CURFEW AND LOITERING LAWS - JUVENILES

All arrests made for violation of local curfew or loitering ordinances.

29. RUN-AWAY - JUVENILES

Limited to juveniles taken into custody who have runaway.

CRIME FACTORS

Statistics compiled under the Uniform Crime Reporting Program from data submitted by the law enforcement agencies of Maryland projects a statewide view of crime. Awareness of the presence of certain crime factors which may influence the resulting volume and type of statistics presented is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present to some degree in every community, and their presence affects in varying degrees the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern, and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime in a Free Society" (1967 - Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. In so far as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which affect the type and volume of crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with particular reference to age, sex and race.

Economic status of the population.

Relative stability of the population including number and ratio of seasonal visitors/residents, commuters and other transients.

Climate and seasonal weather conditions.

Educational, recreational, and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

CRIME INDEX

The tabulations presented in the tables, graphs and charts in this publication indicate the volume and distribution of crime in Maryland on the basis of a Crime Index. The crime figures are broken down by agency, county, regional and state totals.

The total number of criminal acts that occur is unknown, but those that are reported to law enforcement provide the first means of a count. Not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the following crimes were selected to comprise the Crime Index as they are significant either by nature or frequency of occurrence:

1. Murder and Nonnegligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Breaking or Entering
6. Larceny-Theft
7. Motor Vehicle Theft
8. Arson*

CALCULATION OF RATES AND TRENDS

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, it is sometimes necessary to convert the data into rates, percentages or trends. The following guidelines are presented to demonstrate the methods involved in making these calculations and conversions.

CRIME RATES

One of the most meaningful crime statistics is the Crime Rate. This rate is the number of offenses per 100,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in your city or county. To compute rates, divide your city's population by 100,000 and divide the number of offenses in each class by that answer. The answer is the number of offenses in each class per 100,000 and is your Crime Rate for that offense.

An example of this calculation is:

a) Population for your jurisdiction 75,000

*Arson statistics are not included in the Crime Index

b) Number of burglaries for your jurisdiction for a year 215

Divide: 75,000 by 100,000 = .75

Divide: 215 by .75 = 286.7

the burglary rate is: 286.7 per 100,00 inhabitants

The number of .75 can now be divided into your totals in any offense class to produce a Crime Rate for that offense.

This same computation may be used to obtain arrest rates per 100,000 inhabitants.

CLEARANCE RATES

The percentage of crimes cleared by arrest is obtained by dividing the number of offenses cleared by the number of actual offenses. This answer is then multiplied by 100. An example of this calculation is:

a) Number of clearances in robbery 38

b) Number of actual robberies 72

Divide: 38 by 72 = .528

Multiply: .528 x 100 = 52.8

The clearance rate for robbery is: 52.8%.

PERCENTAGE OF CHANGE

The method most commonly used to compare crime statistics for the current year with any prior year is the Percent of Change. This percent is calculated by subtracting the prior year's data from the current year's data and dividing the resulting figure by the prior year's data. The answer is then multiplied by 100. An example of this calculation is:

a) Current year's murders 399

b) Prior year's murders 350

Subtract: 350 from 399 = 49

Divide: 49 by 350 = .140

Multiply: .14 x 100 = 14.0

the Percent of Change for murder is a 14.0% increase.

CRIME INDEX OFFENSES

The crime counts set forth in this publication are actual offenses established by police investigation. When police receive a complaint of a crime and the follow-up investigation discloses no crime occurred, it is "unfounded".

In 1992, police investigations that were "unfounded" represented 3 percent of the complaints concerning index offenses, ranging from 1 percent in the aggravated assault category to 14 percent in the rape category as compared to 1991, when there was 1 percent "unfounded" in the aggravated assault category and 16 percent in the rape category.

A total of 305,454 actual Index Offenses were reported to law enforcement agencies in Maryland during the calendar year 1992. This represents an increase of 1.2 percent when compared to the 1991 data which was comprised of a total 301,761 Crime Index Offenses.

An analysis of Index Offenses by month in 1992 shows that August had the highest frequency of occurrence and February had the lowest. In 1991, August also had the highest frequency of occurrence and February the lowest.

The Crime Index Offenses represent the most common problem to law enforcement. They are serious crimes by their nature, volume, or frequency of occurrence. They are categorized as Violent Crime, which includes Murder, Forcible Rape, Robbery and Aggravated Assault, or as Property Crimes which includes Breaking or Entering, Larceny and Motor Vehicle Theft.

VIOLENT CRIME

Violent Crimes involve the element of personal confrontation between the perpetrator and the victim. Because of their very nature Violent Crimes are considered more serious than Property Crimes. These offenses accounted for 16 percent of the total Crime Index for 1992. In 1991, Violent Crimes accounted for 15 percent of the total Crime Index.

Analyzing the Violent Crimes by month reveals December had the greatest frequency of occurrence, while March had the lowest. In 1991, October had the highest frequency of occurrence and February had the lowest.

PROPERTY CRIMES

The number of Property Crimes reported during 1992, was more than 5 times greater than the number of Violent Crimes reported. As a group, Property Crimes made up 84 percent of the total Crime Index in 1992 compared to 85 percent in 1991.

A monthly analysis showed August had the highest frequency of occurrence and February the lowest. In 1991, August again had the highest frequency of occurrence but February the lowest.

RATES

Crime Rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the section entitled "Crime Factors".

In 1992, the Crime Rate for Maryland was 6,223.6 victims for every 100,000 population. This represents a .2 percent increase in the Crime Rate when compared to the 1991 rate of 6,209.1.

The 1992 Crime Rate for the Violent Crime group was 999.2 victims per 100,000 inhabitants, a 5 percent increase compared with the 1991 rate of 955.2. The Property Crime group had a rate of 5,224.4 victims, a .6 percent decrease when compared to the 1991 rate of 5,253.8.

CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances where some element beyond police control precludes formal charges against the offender, such as the victim's refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

Maryland Law Enforcement Agencies cleared 22 percent of all Index Offenses reported to them in 1992 and 1991.

The Violent Crimes recorded a 44 percent clearance rate in 1992, as compared to 1991, with a 45 percent clearance rate. The Property Crime group experienced an 18 percent clearance rate in 1992 and 1991.

Considered individually the 1992 Violent Crime clearance rate was determined to be 67 percent of the Murders, 62 percent of the Rapes, 21 percent of the Robberies and 61 percent of the Aggravated Assaults. The Property Crime clearance rates were 17 percent for Breaking or Entering, 19 percent for Larceny and 15 percent for Motor Vehicle Theft.

The relatively high clearance rate for Violent Crimes as compared to Non-Violent Property Crimes is in part attributable to the volume difference between the two. Property Crime volume is much greater than that of Violent Crime and police investigation of Violent Crime is usually more intense. While the element of direct contact between the victim and perpetrator, as well as witness identification also contributes to this higher rate of solution for Violent Crime, stealth is involved to a greater degree in the Property Crimes.

JUVENILE CLEARANCES

A juvenile clearance is the clearance of an offense in which all of the offenders involved were under the age of 18. If even one of the offenders was over 17 years of age, the clearance of that offense is not considered a juvenile clearance.

In 1992, such juvenile clearances represented 18 percent of all clearances, the same as in 1991.

Juvenile clearances in the Violent Crime category represented 14 percent of the total cleared in 1992 with 7 percent of all clearance in Homicide cases, 11 percent of those in Rape cases, 12 percent in Robbery cases and 15 percent in aggravated assault cases. Juvenile clearances were 13 percent of all clearances in the Violent Crime category in 1991.

In the Property Crime category, clearances involving Juvenile offenders represented 20 percent of the total cases cleared in 1992, with 16 percent of all clearances in Burglary cases, 19 percent of those in Larceny cases and 34 percent in Motor Vehicle Theft cases. Juvenile clearances were 21 percent of all clearances in the Property Crime category in 1991.

STOLEN PROPERTY VALUE

The total value of Property Stolen during 1992 was \$346,898,609 which represents a 2 percent increase from 1991. Recovered Property amounted to \$149,462,530 which is 43 percent of the total stolen, resulting in a \$197,436,079 property loss to victims in the State of Maryland during 1992. This property loss represents a 4 percent increase when compared to the property loss in 1991.

Value in Millions

MURDER

MURDER

Murder and nonnegligent manslaughter is the willful (non-negligent) killing of one human being by another.

VOLUME AND RATE

During 1992, a total of 596 murders were reported, this represents a 5 percent increase over 1991. Murder accounted for 1 percent of all violent crime and .2 percent of the crime index. In 1992, there were 12.1 murders per 100,000 population.

ANALYSIS OF MURDER

In 1992, 67 percent (400) of the total murders were cleared with 5 percent (29) of the murders involving only juvenile offenders.

There were 521 persons arrested in 1992 for murder, 94 percent (492) male, 87 percent (453) African American, 13 percent (68) White and 20 percent (104) juveniles.

During 1992, the largest number (240) occurred in the 30 and older age group representing 40 percent of the total.

Handguns predominate as the weapon most often used accounting for 66 percent (393) of the 1992 murders. This represents a 15 percent increase in handgun use when compared to the handgun use of 60 percent (342) in 1991. The next most used weapon was a knife accounting for 15 percent (88) of 1992 murders. This represents a 16 percent (105) decrease compared to 1991 knife use percentage.

Drug related murders accounted for 26 percent (154) of the total. When compared to the 1991 drug related murder total, there was an 11 percent (172) decrease.

When the offender is known to the victim, 9 percent (51) are family members and 3 percent (17) are boyfriend or girlfriend. There was a 29 percent decrease in family related murders as compared to 1991. Additionally, an acquaintance is listed in 38 percent (224) of 1992 murders. Strangers and unknown relationships accounted for two other large categories, 19 percent (113) and 45 percent (267) respectively.

In 45 percent (266) of the murders, the offenders are unknown and not described. When the race of the victim and offender is known the offender is most often someone of the same race.

ARSON

ARSON

Arson is any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

VOLUME AND RATE

During 1992, there were 2,510 arsons reported, this represents a 9 percent decrease over 1991. In 1992, there were 51 arsons per 100,000 population. Of the total arsons, 48 percent (1,212) were structures, while mobile and other property each accounted for 26 percent (649). Residential comprised 56 percent (681) of the structures at which arson was directed, with 20 percent (242) of all targeted structural property being uninhabited. The estimated value of property damage was over 20 million dollars.

In 1992, 19 percent (474) of the total arsons were cleared with 49 percent (233) of the arsons cleared involved only juveniles.

There were 490 persons arrested in 1992 for arson, 89 percent (437) male, 34 percent (165) African Americans, 65 percent (318) White and 57 percent (280) juveniles.

BATTERED SPOUSE

BATTERED SPOUSE

INTRODUCTION

The Maryland Battered Spouse Program was established through House Joint Resolution 32 which was introduced by Delegate Pauline Menes, requesting the Maryland State Police to maintain certain information on complaints of domestic assaults. The statistics in this report were collected from January 1, 1992 through December 31, 1992.

DEFINITION

A Battered Spouse in the Maryland Uniform Crime Reporting (UCR) Program is considered to be:

1. A married person living with their spouse upon whom an aggravated or non-aggravated assault was committed by their mate.
2. A married person estranged from their spouse upon whom an aggravated or non-aggravated assault was committed by their mate.
3. A male and female not married to each other and who are living together or had lived together at some time, upon whom an aggravated or non-aggravated assault was committed by their mate.

LIMITATIONS OF A BATTERED SPOUSE REPORTING PROGRAM

There are limitations to the information collected which should be clearly understood before any conclusions are drawn from the data presented in this report.

Procedures for handling non-aggravated spousal assaults vary between departments and counties of occurrence. In some instances, they are reported directly to the court system and not to a police department. They are often handled informally. Consequently, incomplete or inaccurate recording of the event may result.

While the current method of collecting Battered Spouse information for this report provides less than a complete picture, there is at present, no other informational system in general use gathering these statistics from police agencies that will more accurately perform this task.

CLASSIFICATION

Aggravated assault, as defined under the Maryland Uniform Crime Reporting Program, is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or severe bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which would result in serious personal injury if the crimes were successfully completed. An assault in which hands, fists and feet are used and severe personal injury to the victim results, is also classified as an aggravated assault.

Any assault in which hands, fists and feet are used and no serious injury to the victim results, is classified as a non-aggravated assault.

AGGRAVATED/NON-AGGRAVATED ASSAULT

During 1992, a total of 3,076 spousal assaults reported were of an aggravated nature. This represents a 5% increase over the 2,939 aggravated spousal assaults reported in 1991. Aggravated assaults were 18% of the total spousal assaults in 1992, the same as in 1991.

1:00 P.M.	517	491	492	479	410
2:00 P.M.	587	573	497	489	437
3:00 P.M.	688	573	531	528	449
4:00 P.M.	740	655	679	609	593
5:00 P.M.	795	737	730	770	707
6:00 P.M.	870	950	981	872	839
7:00 P.M.	996	950	980	950	924
8:00 P.M.	1,064	1,031	1,055	979	1,001
9:00 P.M.	1,159	1,212	1,184	1,112	1,065
10:00 P.M.	1,100	1,114	1,124	1,056	1,079
11:00 P.M.	1,196	1,261	1,240	1,135	1,071

Analysis: In the last five years over 54% of all spousal assaults have consistently occurred between the hours from 6:00 P.M. to 3:00 A.M. and over 48% during the three day period, Friday through Sunday. When combined this would indicate that most spousal assaults are likely to occur between 6:00 P.M. and 3:00 A.M. on Friday, Saturday and Sunday.

*VOLUME

A total of 16,834 spousal assaults were reported to Law Enforcement Agencies during 1992. This represents an increase of 2.7% percent when compared to 1991. Spousal assaults were 19.8% of the 84,854 total assaults reported to UCR in 1992.

VICTIM

In 1992, the spousal assault victims were female in 82.6 percent of all cases as compared to 83.9 percent in 1991, a 1.5 percent decrease in the female victim ratio.

During 1992, 57.1 percent of the victims were White, 42.0 percent African American and .9 percent were of other races. In 1991, 58.8 percent were White, 40.3 percent African American and .9 percent were of other races.

Most victims of spousal assault are between 25 to 40 years of age, 63.8 percent in 1992 compared to 62.8 percent in 1991.

CLEARANCES

There are two ways of clearing a case. One is by making an arrest and charging the person (s) with the offense. The second is known as an exceptional clearance whereby the police know the identity and location of the person (s) who committed the offense and have enough information to arrest them but there is some reason beyond their control that prevents them from making the arrest. The most frequent reason is the victims neglect or refusal to prosecute.

Of all spousal assaults reported in 1992, 82.6 percent were cleared, 24.3 percent by arrest and 58.3 percent exceptionally. In 17.3 percent of the incidents the dispositions of the cases were unknown. During 1991, 81.8 percent of all spousal assault cases were cleared, 25.3 percent by arrest and 56.6 percent exceptionally. In 18.1 percent of the cases, the dispositions were unknown.

The following chart reflects the ratio of Spousal Assaults as compared with the total of all (Spousal and Non-Spousal) Assaults. It also reflects the percentage of Aggravated Spousal Assaults as compared with the Non-Aggravated Spousal Assaults. These comparisons are made on a State and County level.

INDEX OFFENSE DATA

The tables contained within this section were designed to provide quick reference to statistical crime information relative to the different reporting areas of the State Of Maryland.

The tables are broken down by Region. Within each Region information is listed in County name sequence and is further detailed to show the activity experienced by individual police agencies. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

- | | | |
|------------------------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Regional Total | - | This line indicates the total activity of all the Counties within the indicated Region. |
| County Total | - | This line indicates the total activity of all reporting Agencies within the indicated County. |
| Sheriff | - | This line indicates the total activity reported by Sheriff's Offices. This includes activity which may have occurred within the corporate limits of towns in that County. |
| County Police Department | - | This line indicates the total activity reported by County Police Departments. This includes activity which may have occurred within the corporate limits of towns in that County. |
| State Police | - | This line indicates the total activity reported by all State Police installations within the indicated reporting area. This includes activity which may have occurred within the corporate limits of towns in that County. |
| Municipal Police Departments | - | This line indicates the total activity reported by the specified police departments and includes only those crimes which were handled by that department. |

INDEX OFFENSE DATA (cont'd)

The five regions used in the Maryland Uniform Crime Reporting Program are as follows:

Region I - Eastern Shore

- Caroline County
- Cecil County
- Dorchester County
- Kent County
- Queen Anne's County
- Somerset County
- Talbot County
- Wicomico County
- Worcester County

Region II - Southern Maryland

- Calvert County
- Charles County
- St. Mary's County

Region III - Western Maryland

- Allegany County
- Carroll County
- Frederick County
- Garrett County
- Washington County

Region IV - Washington Metropolitan Region

- Montgomery County
- Prince George's County

Region V - Baltimore Metropolitan Region

- Baltimore City
- Anne Arundel County
- Baltimore County
- Harford County
- Howard County

Crime Rates for the individual agencies are not calculated in the following table because of overlapping jurisdictions in many cities of municipal, county and state law enforcement agencies. This table contains the offenses as reported by the individual agencies with crime rates for the county and region totals. Arson offenses in this table are listed opposite the agency reporting the Arson.*

*Arson figures included are not computed in the total offenses or crime rates.

MARYLAND

ARREST DATA

ARREST DATA

The Maryland Uniform Crime Reporting Program requires the submission of monthly reports of persons arrested in the state. A record of arrest activity for both Part I and Part II crimes is received from state, county and municipal law enforcement agencies showing the age, sex and race of persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 269,144 arrests for Part I and Part II criminal offenses were reported during 1992. In 1991, there were 274,492 arrests which represents a 2 percent decrease. Based on 1992 population estimates, there were 5,483.8 arrests per 100,000 population in Maryland. The arrest rate for 1991 was 5,648.0 representing a 3 percent decrease in the arrest rate.

A person is counted on the monthly arrest report each time they are arrested. This means that a person may be arrested several times during a given month and would be counted each time. However, a person is counted only once each time regardless of the number of crimes or charges involved. A juvenile is counted as "arrested" when the circumstances are such that, if the juvenile were an adult, an arrest would have been counted or when police or other official action is taken beyond a mere interview, warning or admonishment.

Arrest figures do not indicate the number of individuals arrested or summonsed since, as stated above, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activities in a given geographic area as well as providing an index for measuring the involvement in criminal acts by the age, sex and race of perpetrators.

During 1992, 24 percent of all reported arrests were for Crime Index Offenses the same as in 1991. Analysis of Crime Index Arrest Data indicates that larceny comprised the highest percentage of all arrests for Crime Index offenses, with 50 percent of the total in 1992 and 49 percent in 1991. The drug abuse, other assaults, driving under the influence and disorderly conduct categories continue to record the highest percentage of arrests for Part II offenses. These offenses accounted for 45 percent of the total arrests for Part II offenses in 1992.

Adult	224,884	227,450	233,266	226,605	228,867	208,231
TOTAL	264,066	269,144	274,492	264,055	266,125	246,516

VIOLENT CRIME ARRESTS

Arrests for crimes of violence accounted for 22 percent of the total arrests for Crime Index Offenses and 5 percent of the total arrests for both 1992 and 1991.

A further evaluation indicates that arrests for robbery and aggravated assault represented the highest percentage of the total arrests for violent crimes with 32 and 57 percent, respectively.

PROPERTY CRIME ARRESTS

Property Crimes arrests represented 78 percent of all arrests for Crime Index Offenses and 19 percent of the total arrests in 1992, the same as 1991.

The highest percentage of property crime arrests continues to occur in the larceny category with 65 and 62 percent, respectively.

DRUG ABUSE VIOLATION ARRESTS

Information pertaining to drug abuse violation arrests is collected according to specific drug categories and whether the arrest was for sale or manufacture or possession of a specific drug. During 1992, a total of 31,835 arrests for drug abuse law violations were reported compared to 1991 with 29,902 arrests, resulting in a 6 percent increase.

Evaluation of the reported data discloses that 27 percent of all persons arrested for drug abuse violations were under 21 years of age and 11 percent were under 18 years of age in both 1992 and 1991.

Analysis of individual categories showed that the highest percentage of arrests, which involved opium or cocaine and derivatives, decreased to 67 percent in 1992 from 68 percent in 1991. Marijuana involvement increased to 24 percent in 1992 from 23 percent of the drug abuse arrests in 1991. Of the total drug abuse arrests 60 percent were for possession while 40 percent were for sale or manufacture in 1992, compared to 59 and 41 percent respectively in 1991.

Possession of marijuana increased to 20 percent of the total drug abuse arrests in 1992 from 19 percent in 1991. Possession of opium or cocaine and derivatives represented 33 percent of the total drug abuse arrests in 1992, as compared to 34 percent in 1991. Arrests for sale or manufacture of marijuana accounted for 4 percent of the total drug abuse arrests in both 1992 and 1991. Sale or manufacture of opium or cocaine and derivatives decreased to 33 percent of the total drug abuse arrests in 1992 from 34 percent in 1991.

GAMBLING ARREST

A total of 218 Gambling arrests were reported during 1992. In 1991, 208 persons were arrested for Gambling violations resulting in a 5 percent increase.

Arrests for Gambling offenses amounted to .1 percent of all reported Part I and Part II arrests in 1992, the same as in 1991. Persons under the age of 18 made up 20 percent of all Gambling arrests compared to 7 percent in 1991.

ENFORCEMENT

EMPLOYEE DATA

LAW ENFORCEMENT OFFICERS KILLED

Three law enforcement officers were killed in the line of duty in Maryland during 1992. The following summaries are based on information provided by their Department and the Federal Bureau of Investigation who conduct in-depth investigations of these tragic incidents in which law enforcement officers have made the supreme sacrifice in the performance of their duties.

SEPTEMBER 21, 1992

A Baltimore City Police Officer died from a gunshot wound received while investigating a call for a domestic disturbance. Upon arrival the four year veteran entered the residence. He apparently became involved in a struggle with the 29 year old male suspect during which the officer was stabbed numerous times and shot in the head. When other officers entered the premises they exchanged gunfire with the suspect killing him.

OCTOBER 1, 1992

A Maryland State Trooper died from injuries sustained in a vehicle accident while responding to a reported personal injury accident. The Trooper was a five year veteran of the Department.

OCTOBER 27, 1992

A Prince George's County Police Sergeant died from injuries sustained in a vehicle accident while in pursuit of a suspected stolen vehicle. During the early morning hours the eighteen year veteran observed a vehicle in an area experiencing a high degree of vehicle thefts. The vehicle had several occupants and was being operated in a suspicious manner. The operator refused to stop and a pursuit ensued during which the Sergeant's cruiser left the roadway striking a tree.

LAW ENFORCEMENT OFFICERS ASSAULTED

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting System regarding the problem of assaults on local, county and state law enforcement officers. The large number of reported assaults on sworn officers is in part due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

A total of 4,401 law enforcement officers in Maryland were victims of assault in the line of duty during 1992, compared to 4,732 assaults during 1991 resulting in a 7 percent decrease.

The rate of assaults on law enforcement officers for the state was 35 assaults for every 100 sworn officers in 1992, compared to 37 assaults per 100 sworn officers in 1991.

Physical force was used in 85 percent of all assaults on police officers.

The greatest number of assaults 1,609 (37 percent) occurred while officers were responding to disturbance calls (family disputes, man with a gun, etc.). 33 percent of assaults on police officers occurred between 10:00 P.M. and 2:00 A.M.

A total of 4,291 assaults on law enforcement officers were cleared during 1992 amounting to a 98 percent clearance rate.

LAW ENFORCEMENT EMPLOYEE DATA

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program in Maryland incorporates the collection of pertinent data relating to the police of the State. Information regarding police employee strength is discussed in this section.

This information is submitted by county, municipal and state law enforcement agencies and compiled on an annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 1992.

LAW ENFORCEMENT EMPLOYEE RATES

In 1992, the average number of full-time law enforcement employees (county, municipal and state) including civilian employees, amounted to 3.3 for each 1,000 inhabitants of the State. The rate based on sworn personnel only (excluding civilians), amounted to 2.6 per 1,000 population. In 1991, the average number of full-time law enforcement employees amounted to 3.4 for each 1,000 inhabitants and 2.7 sworn personnel per 1,000 inhabitants of the State.

The ratio of law enforcement employees per 1,000 population in any given area or municipality is influenced by a number of factors, much the same as the crime rate. The determination of law enforcement strength for a given county or municipality is based on factors such as population density, size and character of the community, geographic location, proximity to metropolitan areas and other conditions which exist in the area generating the need for law enforcement services. Employee rates also differ among agencies since, in particular, there is a wide variation of the responsibilities and level of activity within various law enforcement agencies. The information in this section relates to reported police employee strength and should not be interpreted as recommended strength for any area.

CIVILIAN EMPLOYEES

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. Some police administrators use civilians in this capacity, thus freeing the sworn personnel for actual police related services.

As of October 31, 1992, 3,547 or 22 percent of the total number of police employees in Maryland were civilians.
