FOREWORD

The Texas Juvenile Probation Commission's (TJPC) twelfth annual statistical report provides information regarding the magnitude and nature of juvenile activity and the juvenile probation system's response. This information is offered to help direct the state's effort to improve the juvenile justice system and reduce juvenile crime in Texas.

During calendar year 1992, police agencies in Texas arrested 136,416 juveniles between the ages of 10 and 17. Of this number 37,196 were warned and released, handled in magistrate courts or diverted, and 99,219 were referred to juvenile probation departments. In addition to police agency referrals, an additional 9,939 juveniles were referred by social agencies, parents, schools, the Texas Youth Commission (TYC), and others, for a total of 109,158. This is a 3,493 (3%) increase in referrals from the previous year. This increase resulted from a drastic increase in serious criminal activity of 6,239 delinquent conduct referrals (up 8%); and would have been even greater had there not been a change in the juvenile law which gave jurisdiction of most class C misdemeanors to magistrate courts.

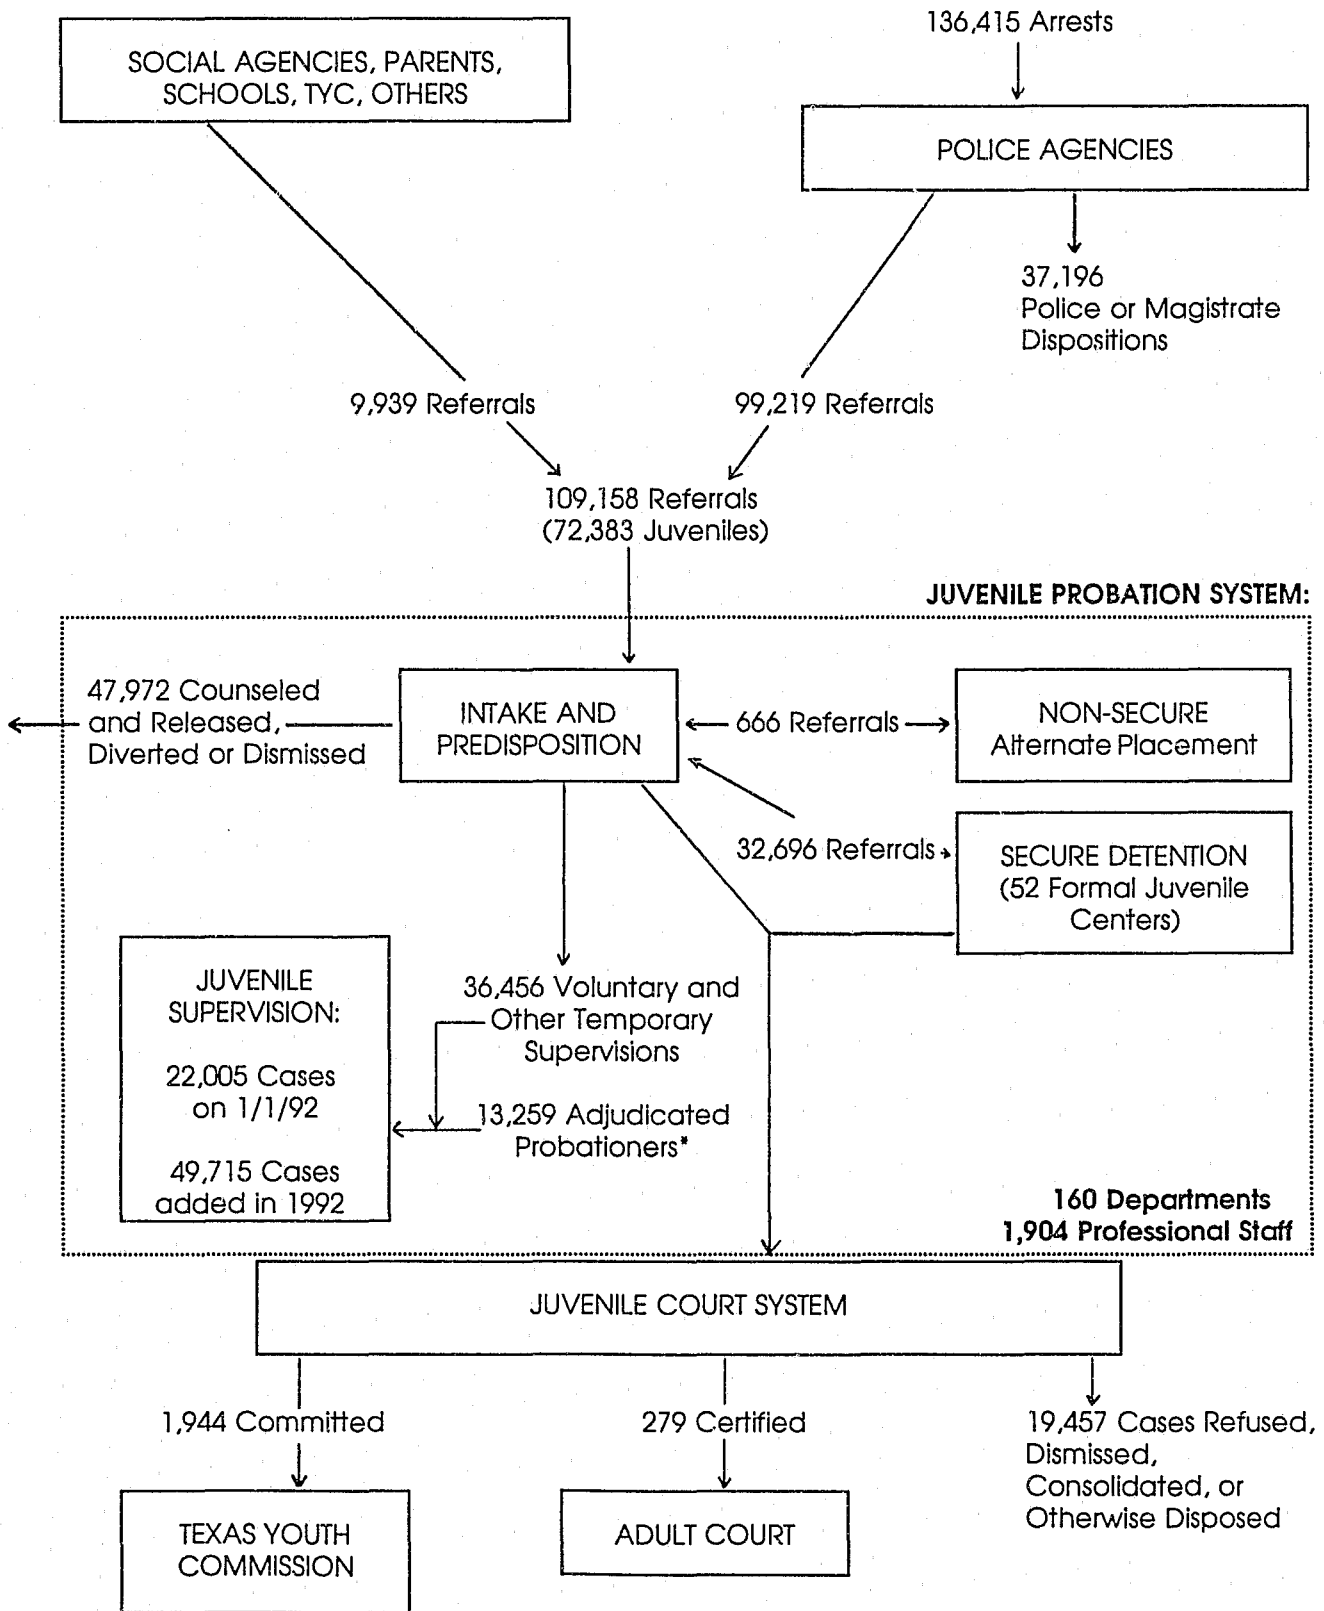

A total of 1,424 juvenile probation officers in 160 departments covered all of Texas' 254 counties. In addition, 480 certified and 689 part-time or on-call detention staff assisted by supervising juveniles held in the state's 52 secure juvenile detention facilities.

In 1992, 33,362 juveniles were detained prior to adjudication hearings. A total of 32,696 were held in secure juvenile detention centers and 666 juveniles were held in non-secure alternate placement facilities such as foster homes and emergency shelters. An additional 3,463 could have been held in non-secure facilities if such facilities had been available. Approximately 48 percent of all juveniles were released in less than one day.

Juvenile probation departments disposed of 47,972 referrals by counseling and releasing, diverting to other agencies for treatment, or dismissing the complaints, and initiated 36,456 voluntary or other temporary supervisions under guidelines of their juvenile boards.

Juvenile courts entered 13,259 probation orders, bringing to 49,715 the number of cases added to supervision. Juvenile courts also committed 1,944 juveniles to the Texas Youth Commission, certified 279 juveniles to stand trial as adults, and refused prosecution, dismissed, consolidated, or otherwise disposed of another 19,457 cases.

MOVEMENT OF JUVENILES 1992

* An additional 132 cases were not assigned to regular supervision in 1992.

TEXAS JUVENILE PROBATION SYSTEM 1992

INTRODUCTION

During calendar year 1992, TJPC collected statistical data regarding juveniles referred to the juvenile justice system from the 160 departments which cover all Texas counties. TJPC also surveyed the departments to obtain supplemental information. The statistical activity reports and the 1992 resource survey are the primary sources of this report.

Caution should be used in drawing general conclusions from juvenile probation statistics. The following data portray neither everything juvenile probation departments or courts do, nor how much time they spend on activities not represented by the statistics. There is no reliable way to ascertain the time spent by juvenile probation officers or juvenile judges in counseling, study, and research.

At least three factors are not represented in the juvenile probation activity statistics, and should be considered when evaluating them:

1. Juvenile probation officers in multi-county departments spend more time traveling than do officers in single-county jurisdictions;
2. A number of the juvenile probation officers serve both adult and juvenile capacities due to limited resources, and often operate under widely varying authorities and policies;
3. The juvenile justice system operates under the rules and authority of Title 3 of the Texas Family Code. Emphasis is placed on the rehabilitation of the juvenile through guidance, counseling, diversion, and treatment. Many of the cases statistically reported as being disposed as "counseled and released" or "dismissed or otherwise disposed," in fact occasion extensive rehabilitative efforts on the part of the juvenile probation system.

The following definitions of terms apply to the statistical activity reported.

1. **Referral** means any occasion when a child is brought to the department's attention for alleged delinquent conduct or conduct indicating a need for supervision (CINS) and some contact by visit or interview occurs between the department and the juvenile or parents.
2. **Child** means a person who is 10 years of age or older, and under 17 years of age; or 17 years of age and under 18 years of age who is alleged or found to have engaged in delinquent conduct or CINS as a result of acts committed before becoming 17 years of age.

3. **Delinquent Conduct** means violation of any law punishable by incarceration, except traffic laws, and violation of juvenile court orders entered under section 54.04 or 54.05 of the Family Code, except by truancy, running away, or fineable offenses.
4. **Conduct Indicating a Need for Supervision (CINS)** means driving while intoxicated (first and second offense), inhalant abuse, running away, truancy, and violation of certain laws punishable by fine.
5. **Status Offense** means offenses that are not criminal when committed by adults; e.g., running away or truancy.

The 72nd Legislature changed the definitions of conduct indicating a need for supervision effective September 1, 1991. CINS conduct was changed to exclude the first offense of running away and to make parental consent a defense to truancy. In addition, a juvenile must be twice convicted of fineable offenses in criminal court, unless waived, before he might be charged with the third and subsequent offenses in juvenile court.

JUVENILE BOARDS

State law creates a juvenile board in every county. It is responsible for designating juvenile judges, appointing the chief juvenile probation officer, and setting the policy and budget for the juvenile probation department. Texas has 195 juvenile boards (83 multi-county boards and 112 single county boards).

Juvenile boards met an average of 4.3 times during 1992. TJPC provides funding and technical assistance to juvenile boards.

JUVENILE PROBATION DEPARTMENTS

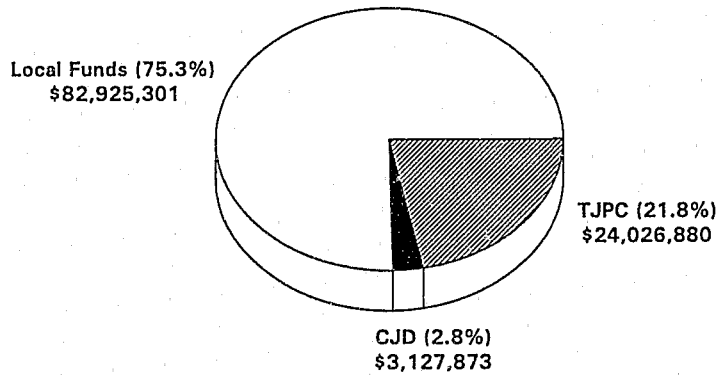

Structure and Staffing. Juvenile probation departments carry out the policies of juvenile boards and deliver services to juveniles referred to juvenile courts. There are 112 single county departments and 48 multi-county departments. Multi-county departments range from two to six counties. Fifty-two departments had only one staff member; 35 had no clerical support.

The workload of juvenile probation was managed by 2,712 salaried employees (1,904 probation and detention personnel and 808 clerical or other support staff). In addition, there were 689 hourly detention child care workers. Eighty departments used 2,657 volunteers for a total of 137,420 hours served. Twenty-nine departments served both adult and juvenile probationers. Most of the departments have separate juvenile probation officers.

Juvenile probation salaries averaged \$23,484 annually for certified juvenile probation officers, \$36,694 for chief juvenile probation officers and \$18,129 for certified detention child care workers.

Funding. Figure 1 shows funding available for juvenile probation services. Funding was increased approximately 8 percent from 1991. Funds for residential placement of juveniles on probation were available in 142 departments. One hundred nineteen departments used TJPC funds, 62 used federal funds administered by the Criminal Justice Division of the Governor's Office, and 101 used funds from the counties or other sources. Counties without residential placement funds must either find free placements in the private sector or commit to TYC juveniles who need to be removed from their homes.

FIGURE 1
Juvenile Probation Funding - 1992
(Total Funds \$110,080,054)

A total of 3,938 juveniles were placed in residential facilities, including foster homes and emergency shelters. This is a decrease of 6 percent from 1991, due entirely to the increased cost of community-based placements. Survey results detailing placements provided the statewide placement data shown in Figure 2. In 1992, 23 percent of probation funds were used to purchase placement services.

FIGURE 2

Parenting Classes	45	95	2,861
Teen Court	5	37	4,250

* Not all departments were able to give a precise number of juveniles served.

Probation departments also worked closely with independent school districts. In 1992, 803 of the 1,053 school districts had appointed the school liaison officers required by the Texas Education Code.

In addition to working with local school districts, probation departments also work closely with state child protective services. In 1992, of the 109,158 referrals (72,383 juveniles), 4,347 showed symptoms of sexual abuse, 3,757 physical abuse, and 12,784 emotional abuse.

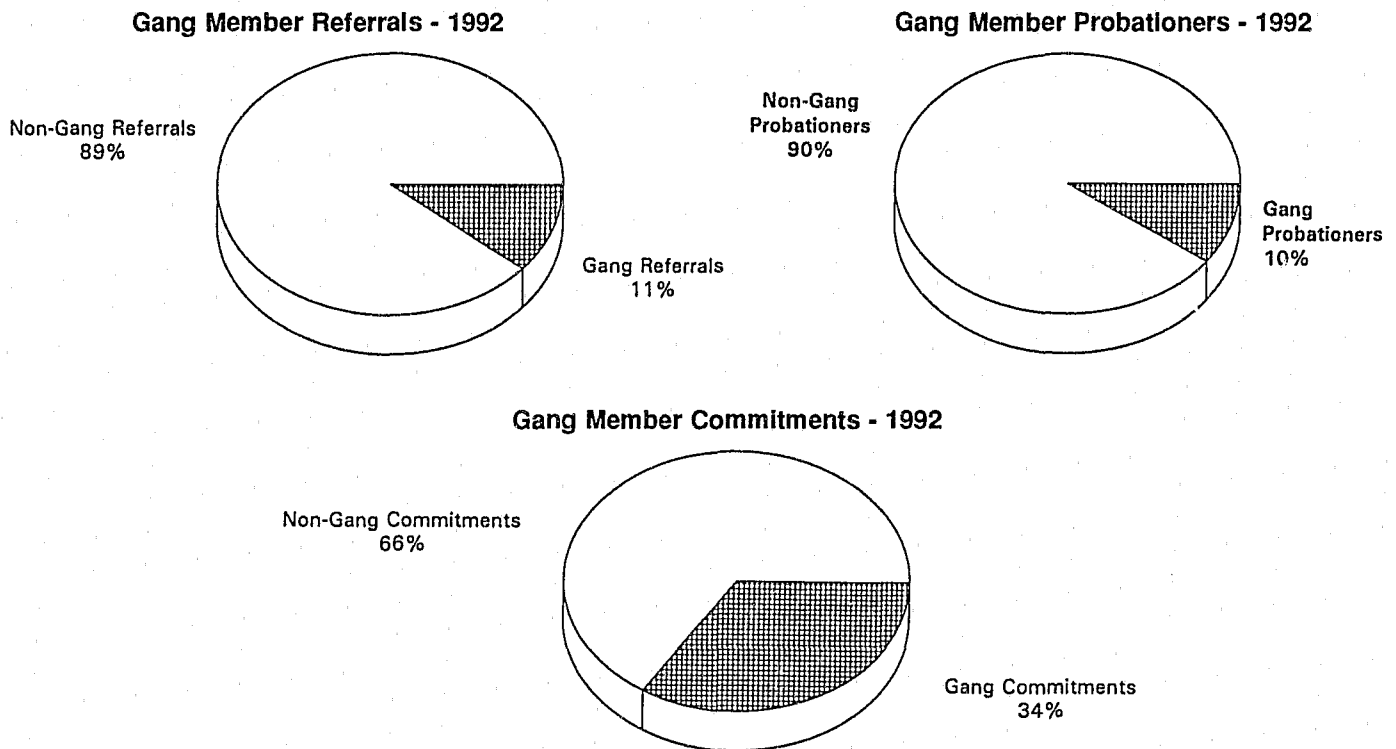

As required by the 70th Legislature, probation departments now assess court and probation fees against adjudicated juveniles. Probation fees are also permissible in informal adjustment cases. In 1992, departments collected \$112,085 in court fees in 5,308 cases; \$363,665 in probation fees in 6,385 cases; and \$134,923 in informal adjustment fees in 4,978 cases.

Education, Training, and Certification. By the end of 1992, TJPC had certified 2,409 juvenile probation officers and 792 detention child care workers. During 1992, 159 departments provided 98,873 hours of training to 2,522 staff for an average of 39 hours of training per staff member to meet TJPC standards. Forty-eight percent of the training was provided in-house and the remainder was provided outside. The Texas Juvenile Probation Commission, through 7 regional, 16 statewide, and 5 on-site training sessions, conducted 2,520 hours of training for 1,658 participants for a total of 8,178 contact hours. This comprised 16 percent of outside training provided.

Gangs and Substance Abuse. Violent crime by Texas juveniles has risen dramatically with homicide as the fastest growing category, up 143% since 1987. Preliminary analysis reported that this increase was directly related to two major factors: extensive growth in gang related crimes and increased involvement in substance abuse and its impact on both violent as well as property crimes. Both urban and rural counties are experiencing problems with gangs and substance abuse.

The 1992 statewide resource survey resulted in 55 percent of the departments being able to clearly identify a total of 1,328 juvenile gangs in their combined jurisdictions. The impact of these gangs is evident (see Figure 4). Gang activity represents 11 percent of all referrals and 10 percent of all probationers. In addition, it represents 34 percent of all commitments to TYC. While gang members are not a large part of total activity, their involvement is in the more serious felony crimes resulting in commitment to TYC.

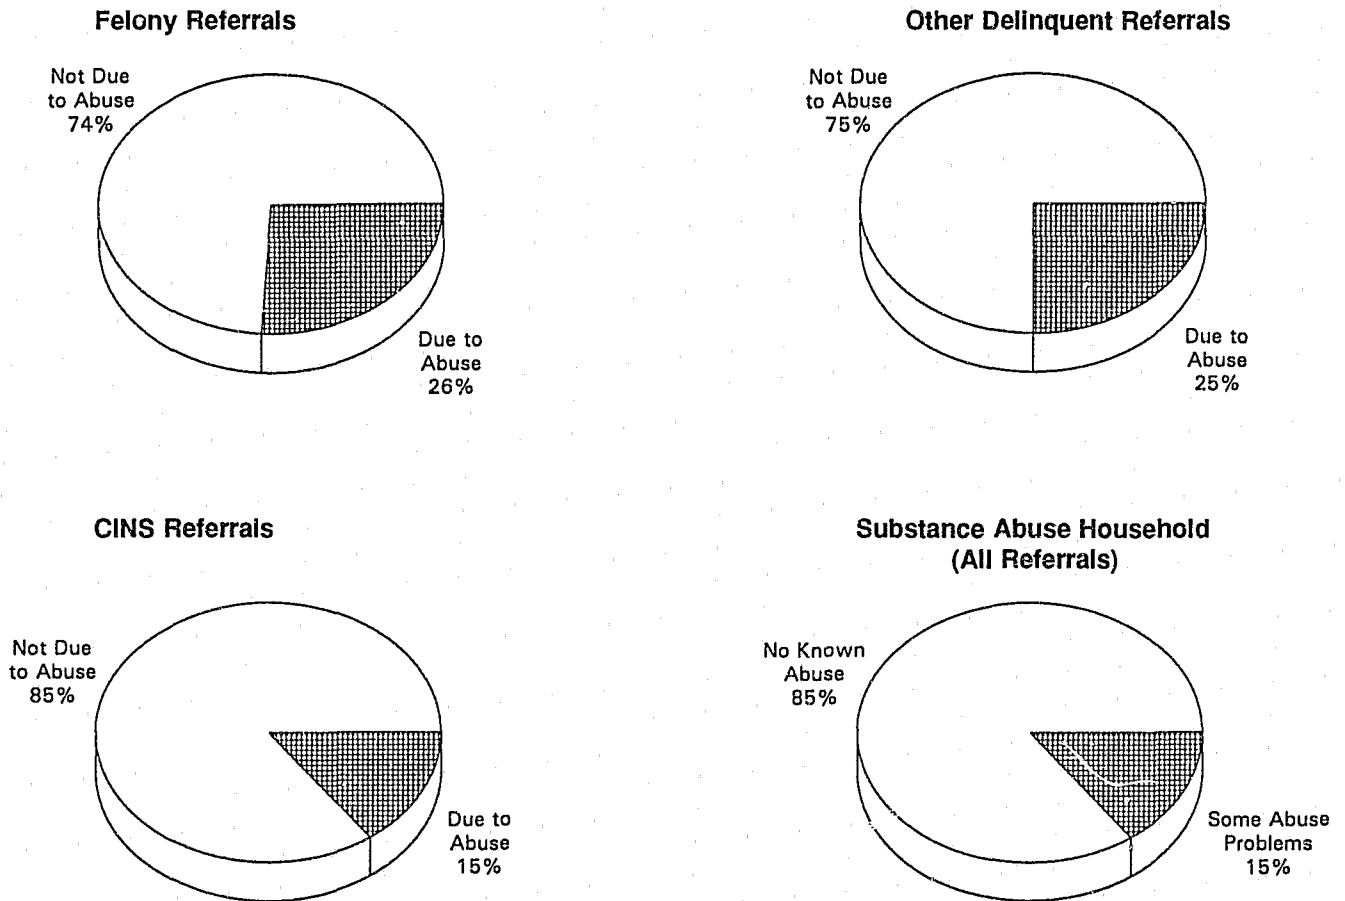

**FIGURE 4
Juvenile Gang Involvement**

In 1992, local probation departments handled 44,701 referrals involved in some form of substance abuse. Of the 109,158 referrals (72,383 juveniles), 4,988 showed symptoms of inhalant abuse, 19,548 drug abuse and 20,165 alcohol abuse. Local probation departments provided services to 9,533 juveniles and spent \$3,601,568 treating substance abuse problems. Nine hundred seventy seven (977) juveniles were placed in 127 different residential substance abuse facilities, and 1,634 juveniles were placed in 58 different non-residential programs.

The true cost of juvenile involvement in substance abuse can be measured more completely by the number of referrals whose involvement in such abuse is the direct cause of their criminal behavior. In 1992, 15 percent of all referrals came from homes with some substance abuse problems, 26 percent of all felony referrals, 25 percent of all other delinquent conduct referrals and 15 percent of all CINS referrals were directly attributed to the juvenile being a substance abuser (See Figure 5).

STATEWIDE JUVENILE ACTIVITY 1992

Statewide data on referrals, detentions, dispositional activities, and supervision workloads are contained in the four subsections that follow. Prior year comparisons are provided where possible. An abbreviated county-by-county summary of each of the four parts is appended.

JUVENILE REFERRAL ACTIVITY

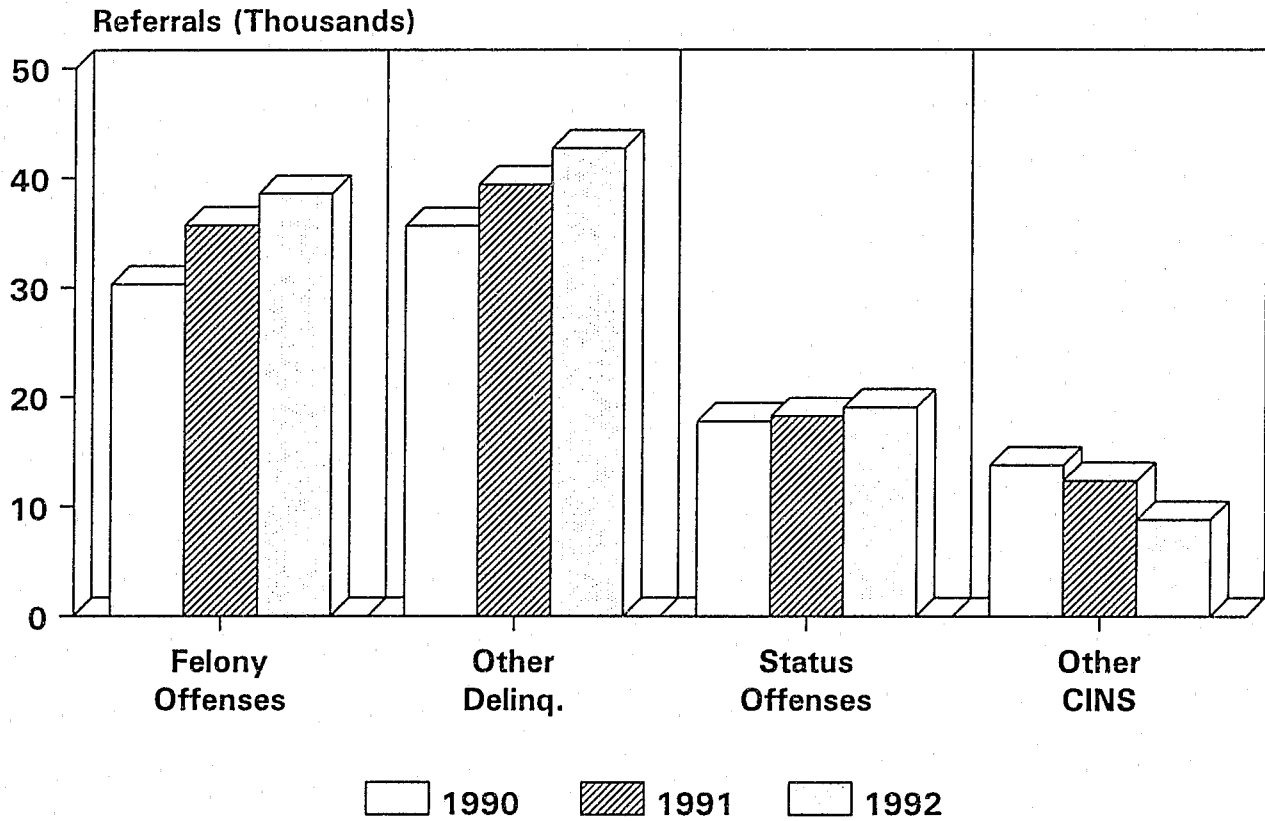

There were 109,158 referrals to juvenile probation authorities in Texas, an increase of more than 3 percent over 1991 (see Figure 6). The number of juveniles referred in 1992 increased to 72,383, compared to 72,182 juveniles in 1991. The percentage of referred juveniles with prior referrals was up slightly to 50 percent. Most juveniles referred were in-county residents (94 percent), and in school (89 percent). The proportion of dropouts referred declined. Police agencies made 9 out of 10 referrals. The number of referred juveniles who had previously been committed to TYC dropped slightly from 2.5% in 1991, to 2.3% in 1992.

FIGURE 6
Referrals vs. Juveniles Referred

The increase in referrals in 1992 can be attributed entirely to an increase in felony and other delinquent referrals (see Figure 7). Both were up over 8 percent from 1991.

FIGURE 7
Offense Distribution of Referrals

The distribution of referrals by age, sex, and race generally showed few changes in 1992. But the increase in referrals was shown in minority youth ages 13, 14 and 15.

JUVENILE DETENTION ACTIVITY

Of the 109,158 juveniles referred, 75,796 were immediately released to their parents or other responsible adults. The remaining 33,362 were detained: 32,696 were held in the 52 secure detention facilities, and 666 were placed in non-secure detention.

Referrals increased 3 percent from 1991, and the incidence of secure detention also increased by 3 percent (see Figure 11). The use of non-secure alternatives declined 25% from the preceding year. Forty-eight percent of all juveniles detained were released in less than one day compared to 45 percent in 1991. Ten percent, or 3,463, of the juveniles securely detained could have been placed in alternative non-secure settings had they been available. Statewide, detention facilities operated at 81 percent average capacity for 1992.

JUVENILE DISPOSITION ACTIVITY

Dispositions were made in 98,952 juvenile cases (see Figure 12). Juvenile probation departments disposed of 63,881 of these cases, with 47,972 cases counseled and released, diverted, or dismissed and 15,909 cases placed on informal adjustment.

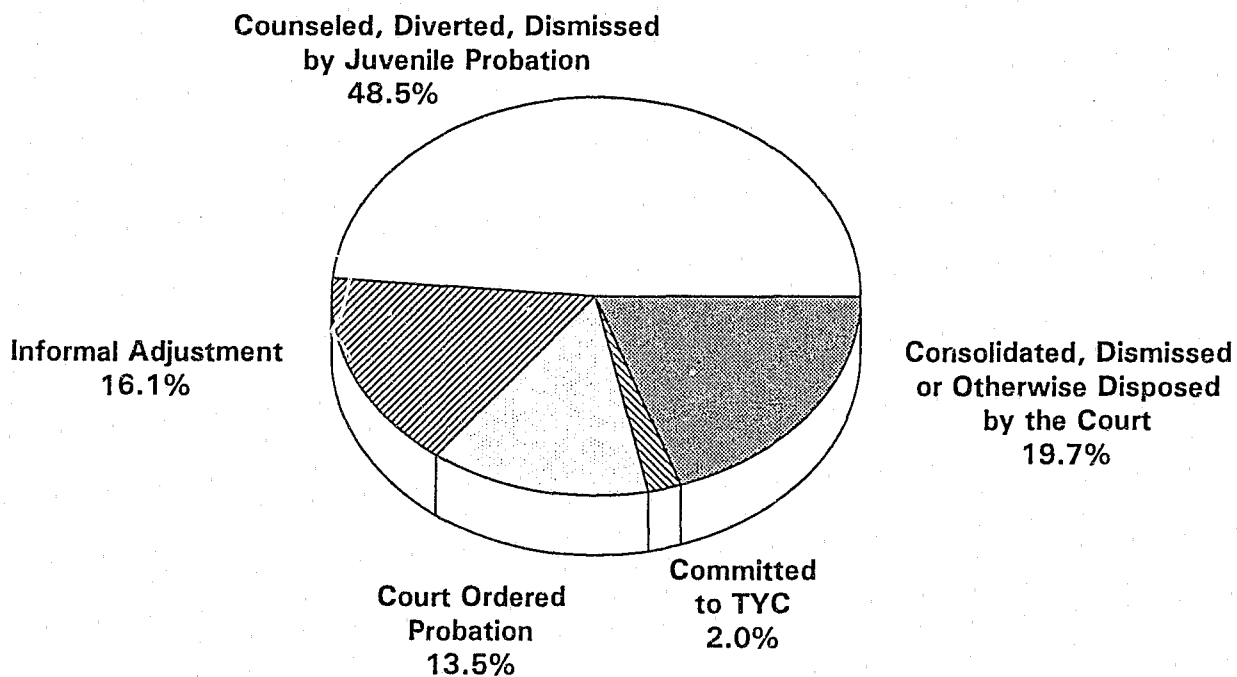

The remaining 35,071 cases were resolved by the juvenile court or prosecutor. Of these, the court adjudicated to probation 13,391 cases; certified and transferred to adult court 279 cases; refused, consolidated, dismissed or otherwise disposed 19,457 cases; and adjudicated and committed to TYC 1,944 cases.

Although the number of serious referrals increased, the actual rate at which juvenile courts committed juveniles to TYC declined. Several factors affect this.

- 899 juveniles were placed on probation in long-term, local secure detention facility programs (up 126% from 1991);
- 4,978 juveniles were informally adjusted or placed on probation in available non-secure alternative placements (up 231% from 1991);

- 2,321 juveniles were diverted using TJPC's expanded Intensive Supervision Program (up 34% from 1991);
- 288 of the 1,944 commitments to TYC were due to lack of suitable alternative placement resources available at the time of disposition (down 16% from 1991);
- 833 juveniles were placed on community-based probation using electronic monitoring devices (up 104% from 1991);
- the Border Children Justice Projects, which serve juvenile Mexican citizens charged with criminal offenses in Texas, diverted 227 juveniles from commitment to TYC (down 4% from 1991); and
- an additional 110 juveniles were diverted from TYC through "other" programs or services (i.e. boot camps).

ALL OTHER SUPERVISIONS

<u>Beginning of Period</u>	<u>Added to Supervision</u>	<u>Left Supervision</u>	<u>End of Period</u>
10,674	36,456	34,336	12,794

Notes:

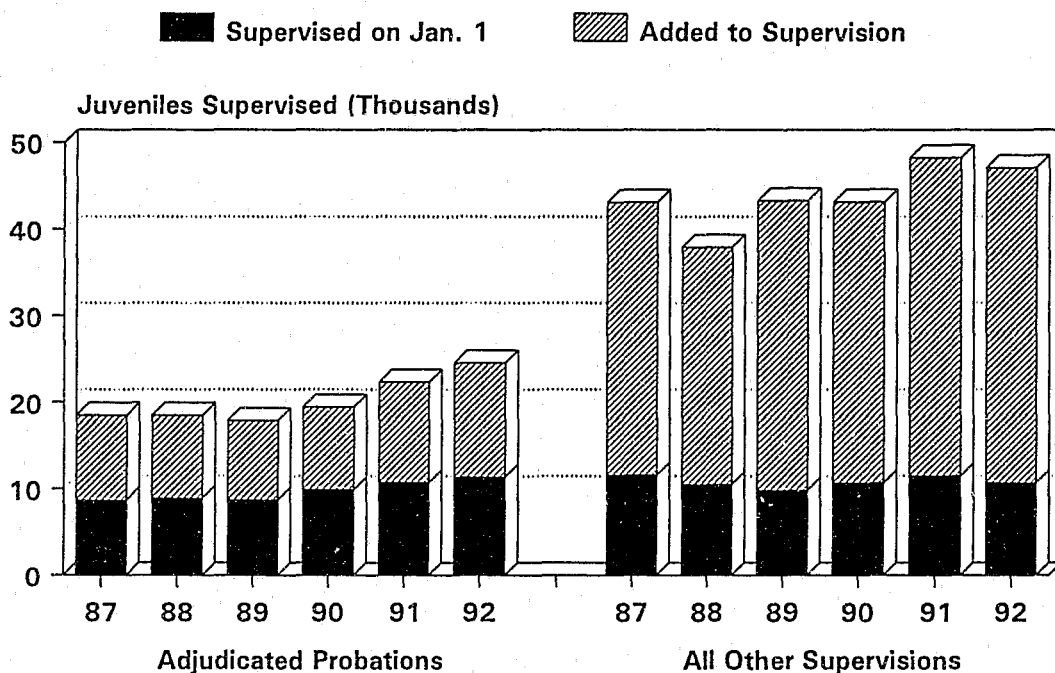

1. Cases shown as added to supervision include both cases originally filed in a jurisdiction and cases transferred from other jurisdictions in or outside Texas.
2. All other supervisions are informal adjustments, temporary supervisions of juveniles whose cases are pending dispositions but who require active supervision, and short term courtesy supervisions.
3. It is possible that a juvenile may be counted in more than one category.

SUPERVISION WORKLOAD ACTIVITY

On January 1, 1992, 22,005 juveniles were receiving active supervision from juvenile probation departments. During the year, 13,259 court ordered probations and 36,456 informal adjustments and temporary supervisions were added for a total of 49,715 (see Figure 13).

During 1992, 1,289 (12%) of the 10,775 court ordered probations failed and resulted in either TYC commitment or adult criminal trial. On December 31, 1992, 26,609 juveniles were under active supervision. Juvenile probation departments accepted 109,158 referrals and supervised 71,720 juveniles, for a total of 180,878 juveniles served during the year.

FIGURE 13
Supervision Workload

SUMMARY

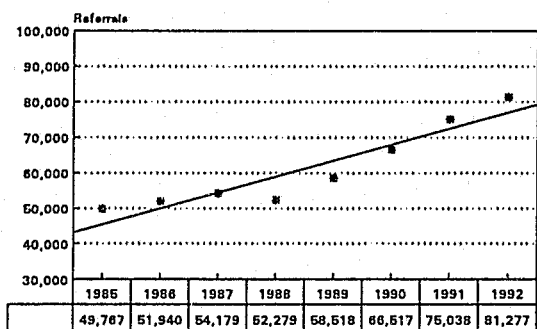

Examination of 1992 statistics, which included discussions with numerous juvenile justice personnel, indicates that juvenile involvement with drug and gang related activities is the major cause of the increase in serious juvenile crime. This conclusion was also reported in 1989, 1990 and 1991; however, 1992 did show some promising changes.

While the rates of increase in the number of delinquent and felony referrals from 1990 to 1991 were 13 and 15 percent, respectively, the rates of increase from 1991 to 1992 were only 8 percent each. In other words, the rate of increase was not as substantial as in previous years. Also, the actual number of children referred stayed constant. Even more important was the utilization of local community based programs, rather than TYC state correctional facilities. During 1992, the use of probation rose almost 14 percent, while commitments to TYC declined almost 6 percent.

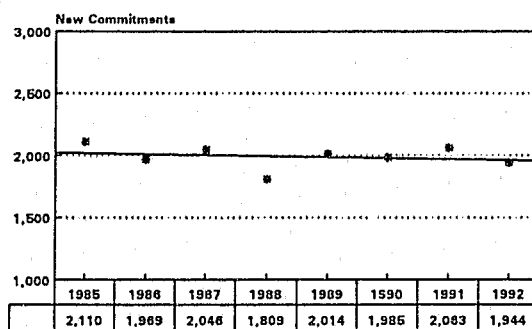

These favorable results are directly related to the Legislature's commitment to the support of locally developed and operated community based corrections and delinquency prevention programs. Beginning September 1, 1992 (Fiscal Year 1993), community corrections programs were available statewide due to increased funding by the Legislature.

As stated above, 1992 trends indicate success in dealing with the rise in juvenile crime; however, careful analysis of complete 1993 data relating to the success of these local programs will be essential to support their continuation and expansion.
