INTRODUCTION**ACQUISITIONS**

This report summarizes statistical information about the Maricopa County Juvenile Court Center in 1994. This report compares the court activity in 1994 with the activity of the prior four years (1990-1993).

The bulk of this report deals with juvenile delinquency and incorrigibility (status) referrals. Information is obtained from police reports, other referring entities, and from probation officers who interviewed the children and their families. It describes the number and characteristics of delinquency and incorrigible offense cases in 1994 handled by the Maricopa County Juvenile Court.

A child becomes known to the court by a "referral" which alleges that the child has violated the law in some way. It should be noted that many children whose actions or social conditions might warrant action by the Juvenile Court are not referred to the court and are therefore not included in these data. Some children are not referred simply because their illegal actions are not observed or reported, or the child is not apprehended. Furthermore, not all activities of juveniles, once reported to the police, are subsequently referred to the Juvenile Court. Some police agencies within the county use community counseling programs for children apprehended for minor offenses, followed by release to their parents. Consequently, the data presented in this report cannot be taken as a complete measure of the extent of delinquent behavior in Maricopa County.

When it has been decided by a referring agency that a child's action or social condition warrants intervention by the court, that child is referred, and when a child is referred, the intake division of the Juvenile Court begins the process of diagnosis and recommendation. There are numerous ways in which a referral may be dealt with by the court. However, the best interest of the child, balanced with what is in the best interest of the community, must always be considered.

Children also become known to the court when they are being adopted, when one or both parent's rights are being severed (usually prior to adoption), or when the child may have been neglected, abandoned or abused.

This report was prepared by the staff of the Division of Research and Planning of the Maricopa County Juvenile Court Center located at 3125 West Durango, Phoenix, AZ 85009. Questions may be directed to (602)506-4488.

Detained	16%	10%	7%	11%
Screened	5%	6%	6%	9%

During 1994, there were 9,109 requests (screened) for detention. This resulted in detention 8,090 times, or 88.8% of the requests were detained. A request for detention may occur when a Police or Court Officer believes, for the safety of the community or the juvenile, that physical detention may be required. The juvenile is taken to either of the two Maricopa County Juvenile Detention Centers and interviewed by

a Probation Officer. Based upon Supreme Court Rules and the Court Center's administrative policies, the Probation Officer has the option to release the juvenile to the parents or physically detain the juvenile pending court action. Probation Officers are available 24 hours a day, seven days a week. If the juvenile is detained, a petition must be filed and an advisory/detention hearing held within 24 hours.

In 1994, 8,090 juveniles were detained. Of those, 3,679 were detained for delinquent or incorrigible acts, and the remainder of 4,411 juveniles were detained for such reasons as: court holds, warrants, and children from other jurisdictions.

The average daily population in detention (including both facilities) was 311 juveniles in 1994. There has been a 56% increase in the average daily population of juveniles in detention from 1990 to 1994 with the detention capacity increasing only 18%. The average (mean) length of stay was 14 days. Length of stay does not have a normal distribution. Most juveniles stay fewer than 14 days while those who stay longer remain much

longer than the 1994 average might suggest.

Detention has been operating over its capacity for the past two years, with a percent over capacity in in 1993 of 12% and in 1994 of 24%.

Intake Caseload Cite-In First Set

The Intake cite-in is the interview of the referred juvenile and parent(s) at the Juvenile Court by a Probation Officer. Generally, these juveniles are first and second referral misdemeanors or status offenders. The Officer has the discretion to handle the referral without initiating a formal court process.

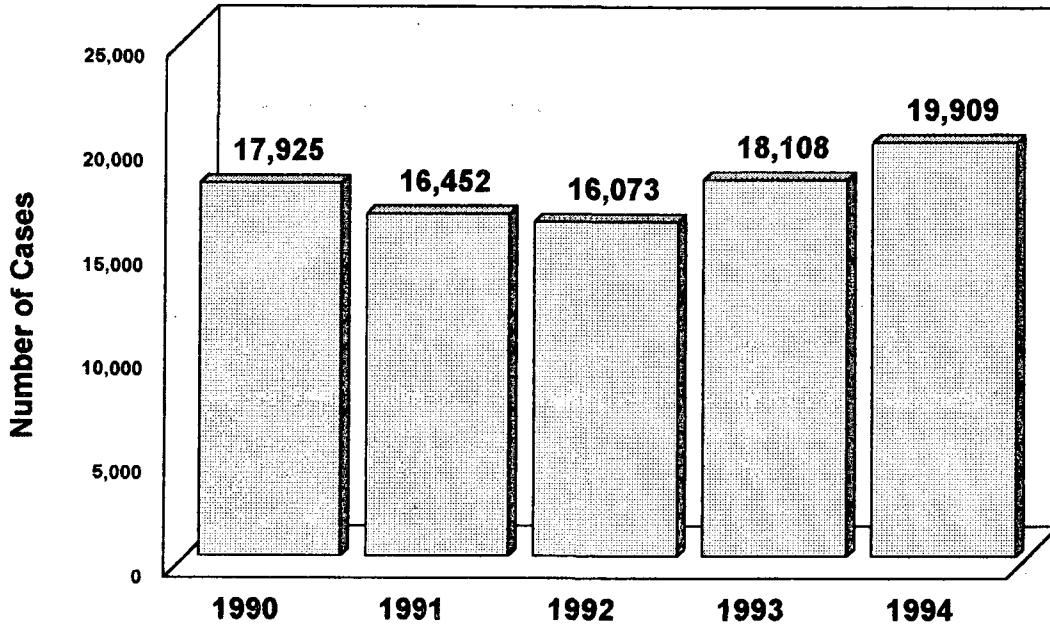

The above graph shows the average number of days to first cite-in, measuring how quickly the Intake Division is able to get to the caseload assigned. In 1994, it took 73 days from date of complaint to date cite-in took place. A second measure is the number of pending (unfinished) cases as shown in the graph to the right. There were 5,810 pending cases in 1994, a 47% increase from 3,956 pending cases in 1993.

Intake Caseload Cases Pending At Year End

Intake Caseload

New Referrals Received

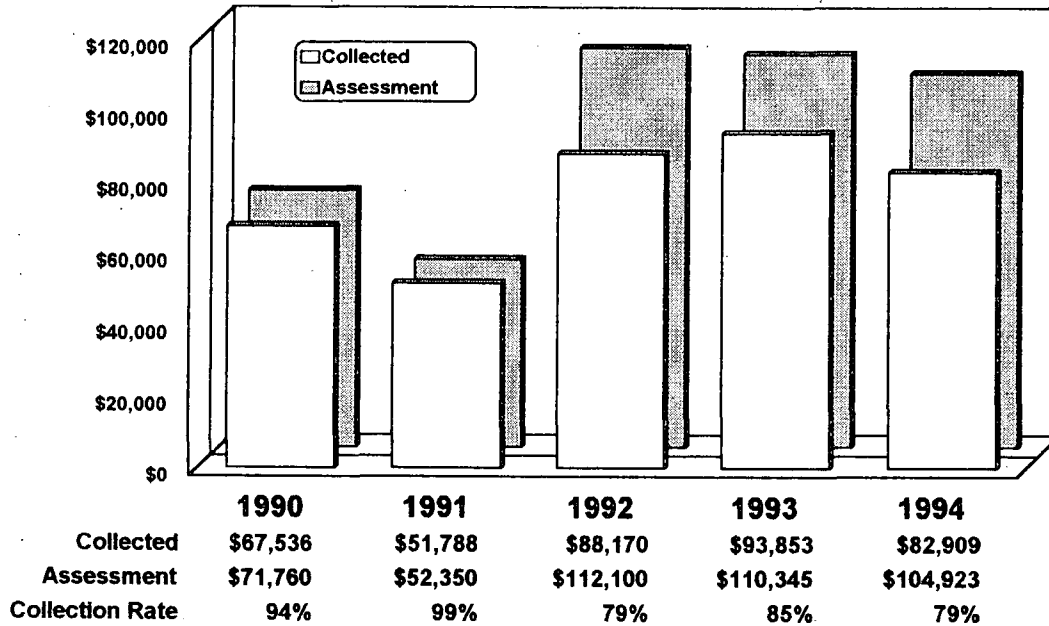

Referrals (complaints) where no formal petition is filed may be adjusted by the Probation Officer after the initial interview with the juvenile and parent(s). If the juvenile has acknowledged involvement in the alleged offense, the matter will not be adjusted until specific conditions established by the Probation Officer are met. Conditions of adjust may include referral to community agencies for family counseling, individual

counseling, specialized education, and awareness programs such as alcohol and drug abuse, restitution to victims, voluntary work hours in the community, voluntary restitution, fines, and other similar options.

The number of New Referrals Received to the Intake Division has shown an increase from 18,108 in 1993 to 19,909 New Referrals in 1994, or a 10% increase in the last 5 years.

PIC-ACT

Assessment and Collection

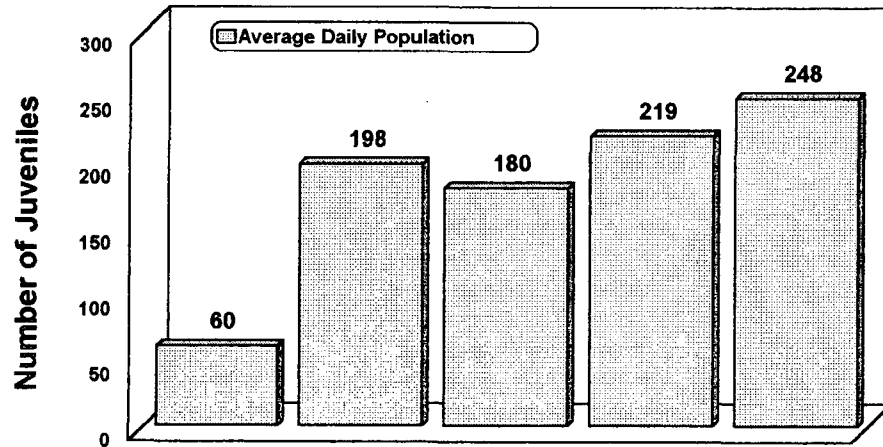

The Progressively Increasing Consequences Act (PIC-ACT) became effective through legislative action on July 1, 1984. If after conducting an intake interview with the alleged juvenile offender and parent(s), and the juvenile acknowledges responsibility for the delinquent act or alcohol offense, the Juvenile Probation Officer may adjust the delinquency complaint once the juvenile has complied with specific conditions.

Assessments made for Intake Services in 1994 have decreased 5% over 1993 to \$104,923, and collections have

decreased 12% over 1993 to \$82,909 for 1994. The collection rate is 79%.

This legislation concentrates on first and second time offenders in hopes of eliminating future delinquent behavior patterns before they become firmly established. The development of PIC-ACT centers on the debate of whether holding youthful offenders more accountable for their delinquent behavior will result in a lower incidence of recidivism. Programs sponsored under PIC-ACT are currently in operation in all 15 counties in Arizona.

Average Number of Days	52.3	40.3	36.2	37.9	47.3

Home Detention is an alternative between structured institutional detention and unconditional release back into the community. Juveniles originally held in the juvenile detention facility, but being allowed to return home pending Court, may be assigned to Home Detention. In this program, the juvenile's freedom is greatly restricted and the Home Detention staff maintain frequent and close contact with the juvenile on an

unannounced basis to assure compliance with the conditions of release.

As compared to 1993, juveniles placed on Home Detention increased slightly from 1,839 to 1,954 in 1994. Juveniles released, also increased from 1,796 in 1993 to 1,927 in 1994. The average daily population in Home Detention is 248 juveniles with an average length of stay of 47.3 days in 1994.

Placement

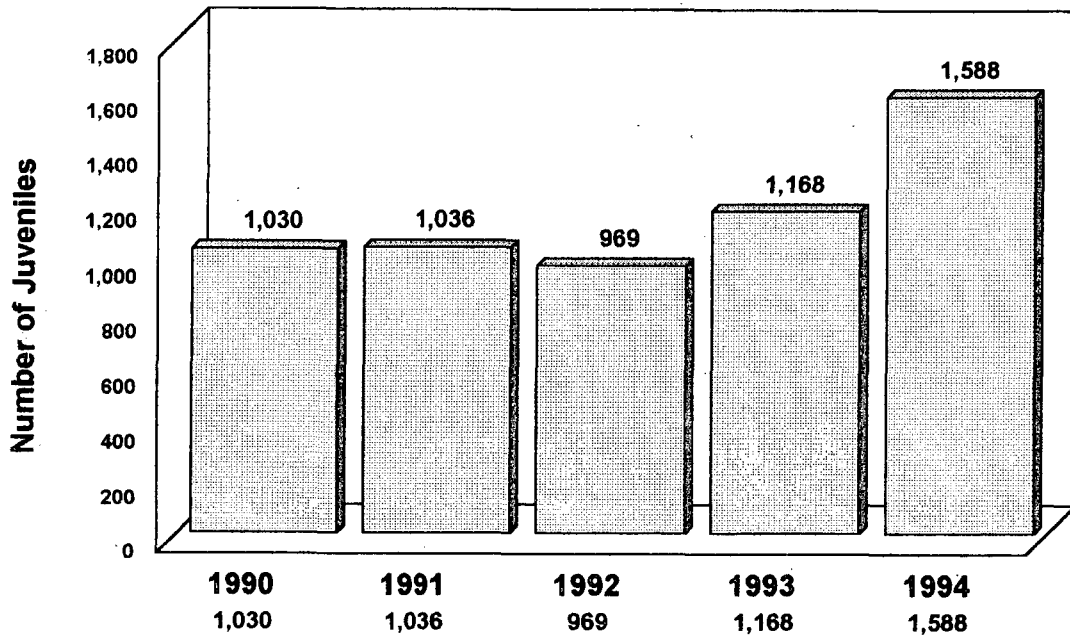

The number of juveniles in Placement during 1994 was 303 juveniles in Residential Care and 755 juveniles in Day and Evening Care. Residential placement has decreased by 18% from 1990 to 1994, with a peak of 430

juveniles in 1992. Day and Evening Care has increased 190% in the same five years.

The cost per day for a juvenile in 1994 was \$123.12 for Residential care, and \$56.17 for Day & Evening Care .

Diversions Programs

Diversions programs are established and supervised by various municipalities for the needs of some first time misdemeanant offenders in their communities. These programs are developed by agreement with the Court Center as provided by statute.

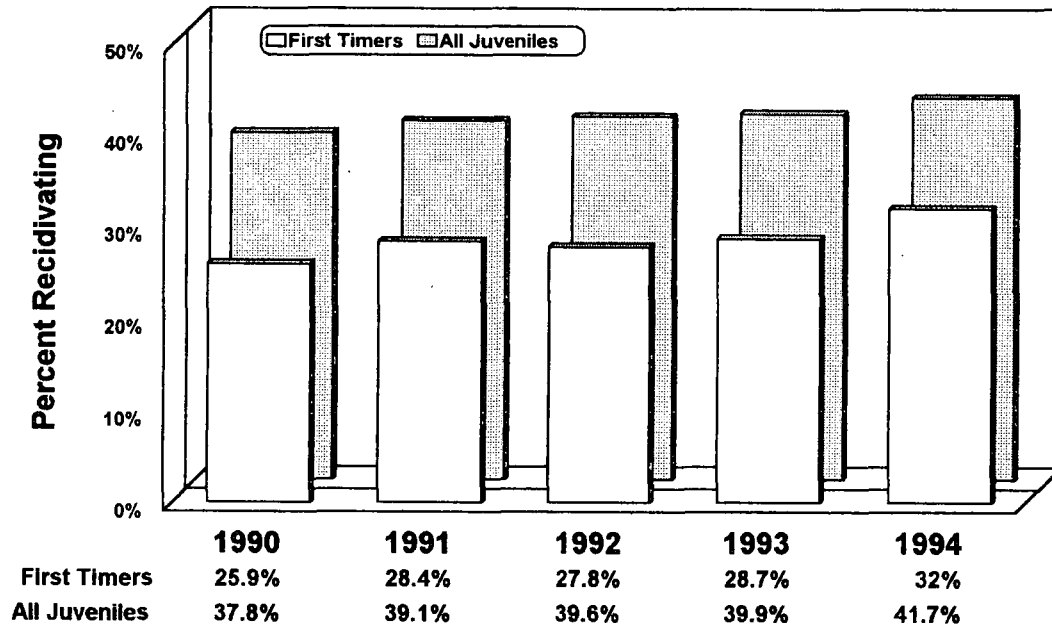

Several municipalities within Maricopa County have designed First Offender and Diversion Programs to work with juveniles in the community.

Cities such as Phoenix, Mesa, Tempe, Glendale, Peoria, Scottsdale, Avondale, Chandler, and Gilbert have various types of diversion programs for the first time offender.

In the past five years, the number of juveniles assigned to diversion programs increased significantly by 54%, with 1,030 in 1990 and 1,588 in 1994.

Recidivism

Tracks a Juvenile for One Year After Referral

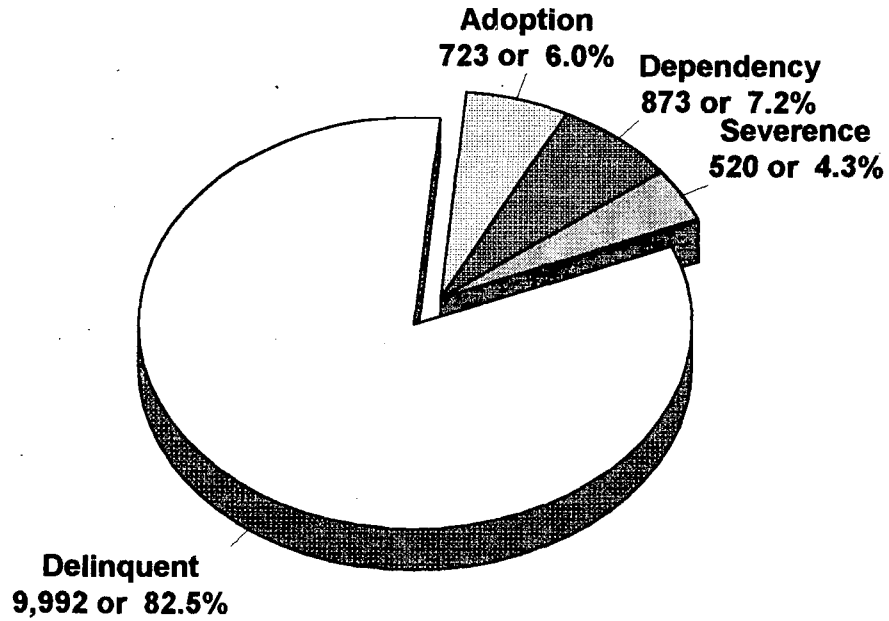

In this table, recidivism is defined as the probability of a subsequent referral within one year of the initial referral, i.e., the probability of a subsequent arrest (guilt may not have been determined). Administrative offenses (Holds), and technical probation violations (i.e., no law violation charged) are not counted as initial referrals or subsequent referrals. Juveniles 17 years or older at the initial referral, not considered. As soon as a juvenile reaches the age of 18, the Juvenile Court loses all jurisdiction over that person.

Two samples are used above. The sample called "First Timers" utilized only the first referral to Juvenile Court as the initial referral, while "All Juveniles" utilize any referral except an administrative offense or probation violation.

The percent of juveniles recidivating has been gradually increasing over the past five years. In 1994, 32% of all First Time Offenders recidivate, and approximately 42% of All Juveniles recidivate.
