THE NATION'S CORRECTIONAL POPULATION TOPS 5 MILLION

WASHINGTON, D.C. -- More than 5.1 million Americans--or almost 2.7 percent of the adult population--were under some form of correctional supervision last year, the Department of Justice reported today. Almost three-quarters of these men and women were being supervised in the community on probation or parole. The others were confined in jail or prison.

The number of adults incarcerated or under supervision in the community increased 3.9 percent during 1994. Since 1980 the number has almost tripled, growing at an average annual rate of 7.6 percent.

At the end of last year, 2,962,000 adults were on probation under community supervision rather than incarceration. An additional 690,000 adults were on parole--conditional supervised release after serving a prison term but subject to being returned

(MORE)

to incarceration for rule violations or other offenses. Three-quarters of probationers and parolees were required to maintain regular contact with a supervising agency. The other offenders were not required to have regular contact (9 percent) or had failed to report and could not be located (9 percent).

Texas had the largest number of adults on probation and parole with more than 503,000 under such supervision, followed by California with 370,000. At the end of 1994, more than 3.8 percent of all adults in Texas were on probation or parole.

Thirteen states reported that fewer than 1 percent of their adult populations were on probation or parole. North Dakota had the lowest probation and parole supervision rate (450 offenders per 100,000 adults), followed by West Virginia (517), Mississippi (552) and Kentucky (553).

Overall, the state and federal probation and parole populations rose by 2.0 percent during 1994. Six states reported increases of at least 10 percent in their probation populations, and 11 reported similar increases in their parole populations. Alabama, with a 14.5 percent rise in their probation population,

(MORE)

and Iowa, with a 27.1 percent rise in the parole population, led the nation.

Twelve states and the Federal probation system reported a decrease in the number of adults on probation, led by South Dakota (down 6.2 percent), California (down 5.8 percent) and the Federal system (down 6.8 percent).

Half of all offenders on probation in 1994 were on probation for a felony. A quarter were on probation for a misdemeanor. One of every seven probationers had been convicted of driving while intoxicated or under the influence of alcohol. Almost all of the offenders on parole (95 percent) had served a felony sentence in jail or prison.

Approximately 21 percent of the nation's probationers were women, as were 10 percent of the parolees.

About 64 percent of the adults on probation were white, and 35 percent were black. Ninety percent of adults on parole were men. Fifty-two percent of adults on parole were white, 46 percent were black.

Note: Every year some States update their counts. Counts for probation, prison, and parole population are for December 31 each year. Jail population counts are for June 30 each year. Prisoner counts are for those in custody only. Because some persons may have multiple statuses, the sum of the number of persons incarcerated or under community supervision overestimates the total correctional population.

^aIncludes convicted and unconvicted adult inmates.

^bJail count is estimated.

Number of persons under supervision per 100,000 adult U.S. residents

2,670 On December 31, 1994, 2.7% of all adults in the United States were under some form of correctional supervision.

1,899 1.9% of all adults were supervised in the community on probation or parole.

771 Jails and prisons held 771 adults for every 100,000 U.S. adult residents.

Explanatory notes

The 1994 Probation and Parole Data Surveys provide a count of the total number of persons supervised in the community on January 1 and December 31, 1994, and a count of the number entering and leaving supervision during the year. These surveys cover all 50 States, the District of Columbia, and the Federal system.

Probation

The 1994 Probation Data Survey was sent to 273 separate respondents — 39 central State reporters and 234 separate State, county or court agencies. States with multiple reporters were Alabama (3), Arizona (2), Colorado (9), Florida (15), Georgia (2), Michigan (114), Missouri (2), New Mexico (2), Ohio (53), Oklahoma (3), Tennessee (3), Washington (24), and West Virginia (2).

The State of Indiana, 13 local agencies in Michigan, 3 in Ohio, and 1 each in Colorado and Florida did not provide data. For Indiana the population on 12/31/93 was used. For other agencies the 12/31/93 population count was used as the 1/1/94 count. An estimate for the 12/31/94 count was calculated by multiplying the 1/1/94 count by the rate of growth that the agency's respective State experienced in 1994.

Parole

The 1994 Parole Data Survey was sent to 54 separate respondents — 52 central reporters, the California Youth Authority, and 1 municipal agency. States with multiple reporters were Alabama (2) and California (2).
