Crime and Justice in New York State

1975 Annual Report

This is the first annual report of crime in New York State prepared pursuant to the responsibility assigned to the Division of Criminal Justice Services by Chapter 654 of the laws of 1974, effective January 1, 1975. This report also attempts to show in some measure the response of the criminal justice community to the problem of crime in New York State.

The data concerning offenses and arrests were developed from reports received from more than five hundred police agencies who participated in the New York State Uniform Crime Reporting program, which was initiated January 1, 1975 with the guidance of the Federal Bureau of Investigation. We are deeply indebted to the wholehearted cooperation and support of the police and sheriffs departments of this state.

The data concerning indictments, dispositions and sentences were derived from the Felony Processing System inaugurated in September, 1973. For this portion of the report we express our appreciation to the district attorneys whose contributions helped to make this report more meaningful.

Our objective in preparing this document has been to provide data and analysis that will prove useful not only to our fellow practitioners in the criminal justice community but also to the executive and legislative branches of government as well as to researchers, planners and the public.

We are confident that the continued cooperation and counsel of our contributors, our users and the Uniform Crime Reporting Advisory Group will assist us in making our future annual reports timely and comprehensive tools of criminal justice administration.

Frank J. Rogers
Commissioner

FOREWORD

The first duty of any government is to protect and preserve the society it serves, balancing freedoms and obligations and securing the safety of all its citizens.

In balancing those freedoms, justice dictates not only that the rights of those accused of breaking society's laws be protected, but also that the rights of the victims and potential victims of lawbreakers be protected.

Justice dictates swift, sure and humane punishment for serious crimes.

Justice dictates a corrective penal system, not a retributive one.

Justice dictates that our state institutions not be expensive breeding grounds of contempt which provide young offenders with advanced training in criminality and embitter older prisoners. We must recognize that most of the prisoners now in our institutions will return to society and, if we are to be just with society as a whole, we cannot return members whose only skill and predisposition is to prey on other members.

Justice and honesty dictate that we admit our current criminal justice system has failed to meet those goals. We are resolute in our commitment to improve the system for the benefit of the society as a whole.

INTRODUCTION

Chapter 654 of the laws of 1974 transferred from the Department of Correctional Services to the Division of Criminal Justice Services (DCJS) the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1, 1975. Simultaneously, DCJS also assumed the role of New York State Coordinator for the Federal Bureau of Investigation's (FBI) Uniform Crime Reports. This document is the first annual crime statistics report produced in the discharge of these dual responsibilities.

The bulk of the data contained in this report was obtained from the reports contributed by police agencies in New York State as part of their participation in the Uniform Crime Reporting program. As evidence of their wholehearted cooperation, participation in the program, although still voluntary in 1975, rose from 266 agencies in 1974, representing 85.4 percent of the state's population, to 542 agencies in 1975, representing approximately 99 percent of the population. Because of the increase in participation it is suggested that comparisons between different years, except for single agencies, be undertaken with extreme caution.

In addition to UCR data, this report also contains aggregate statistics from two other sources -- the Summary Criminal History (SCH) System and the Felony Processing System. The SCH system, which has been in operation since 1969, has provided data concerning felony arrests reported to DCJS via the submission of arrest fingerprint cards in compliance with Section 160.20 of the Criminal Procedure Law. The Felony Processing System, which has been in operation since September 1, 1973, has provided data concerning felony indictments, dispositions and sentences submitted by district attorneys in compliance with Section 837-a of the Executive Law. The data contained in this document complements the quarterly felony indictment reports provided the Governor and leaders of the legislature as required by law.

As the title of this report indicates, it is an attempt to show, to some extent, the problem of crime in New York State as it has been reported or become known to the police; and the response of the criminal justice community to this problem, as is reflected in the data concerning arrests reported by the police and the prosecution of those persons indicted for felonies. Admittedly, the criminal justice process encompasses more than offenses, arrests, indictments and dispositions. In addition, because we are dealing with aggregate data in the Uniform Crime Reporting (UCR) program, it is not possible to show a one-to-one relationship among offenses, arrests and

prosecution. It is hoped that with the development of other components of the Comprehensive Data Systems program, especially the Offender Based Transaction Statistics (OBTS) system, and with modifications in the UCR program, we will in future years be able to show such a relationship.

* * * * *

Victimization studies commissioned by the Law Enforcement Assistance Administration of the United States Department of Justice show that the number of crimes actually committed far outnumber the amount of crime reported in the Uniform Crime Reporting program. It should be recognized that UCR reflects the crimes which are reported to or otherwise become known to the police. For a variety of reasons, many citizens do not bring to the attention of the police the fact that they have been victimized by crime. Until such time as all citizens recognize the importance of reporting the incidence of all crimes to the police, UCR statistics will continue to reflect only a part of the total crime problem confronting American society.

The problem of crime is multi-faceted. The factors causing crime are many and varied. Few of the factors are controllable by the police, who are only one component of the criminal justice community and a very small part of society as a whole. While the criminal justice agencies are statutorily responsible for the enforcement and prosecution of our criminal laws, no segment of society can escape some degree of responsibility for the incidence of crime.

A factor seldom considered is that many of the crimes committed are of such a nature that the police are virtually powerless to prevent them. Offenses which occur inside buildings and spontaneous crimes which involve persons of the same family or individuals with a previous relationship cannot be prevented or deterred by police. The attention of law enforcement agencies should, therefore, be focused primarily on those crimes on which they can realistically be expected to have an impact.

The UCR data included in this report are divided into four main segments:

- A. Reports of Part I offenses comprising the following seven crime classifications:

1. Criminal Homicide
 - a. Murder and Non-Negligent Manslaughter
 - *b. Negligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Larceny
7. Motor Vehicle Thefts

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime and to show trends in crime.

- B. Age, Sex and Race of Persons Arrested
 1. Persons Under 18 Years of Age
 2. Persons 18 Years of Age and Over

The arrest reports reflect the number of persons arrested for Part I offenses, as described above, and the following Part II offenses:

Other Assaults
 Arson
 Forgery and Counterfeiting
 Fraud
 Embezzlement
 Stolen Property
 Vandalism
 Weapons
 Prostitution and Commercialized Vice
 Other Sex Offenses
 Drug Offenses
 Gambling
 Family Offenses
 Driving under the Influence
 Liquor Laws
 Drunkenness
 Disorderly Conduct

Vagrancy
 All Other Offenses (except Traffic)
 Suspicion*
 Curfew and Loitering Violations**
 Runaways**

The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

C. Law Enforcement Officers Killed or Assaulted

This report provides statistics on the number of New York State law enforcement officers killed or assaulted and describes in some detail the conditions under which the officers were assaulted.

D. Supplementary Homicide Report

This report provides details on homicides committed in New York State, describing the victims and the circumstances under which such homicides were committed.

While the New York State UCR program adheres closely to the policies of the national program, it does depart in one important respect. The FBI policy provides that only agencies whose jurisdiction encompasses a population exceeding 2500 shall report directly to the national program. Smaller agencies are generally directed by the FBI to report their data to the sheriff of the county and the latter is requested to include such data in the reports which he submits for his own agency.

In order to combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location index, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State, in accordance with state law.

*Not reported in New York State
 **Persons under 18 Report only

1948

Dear Mr. [Name],

I have received your letter of the 15th and am sorry that I cannot give you a more definite answer at this time.

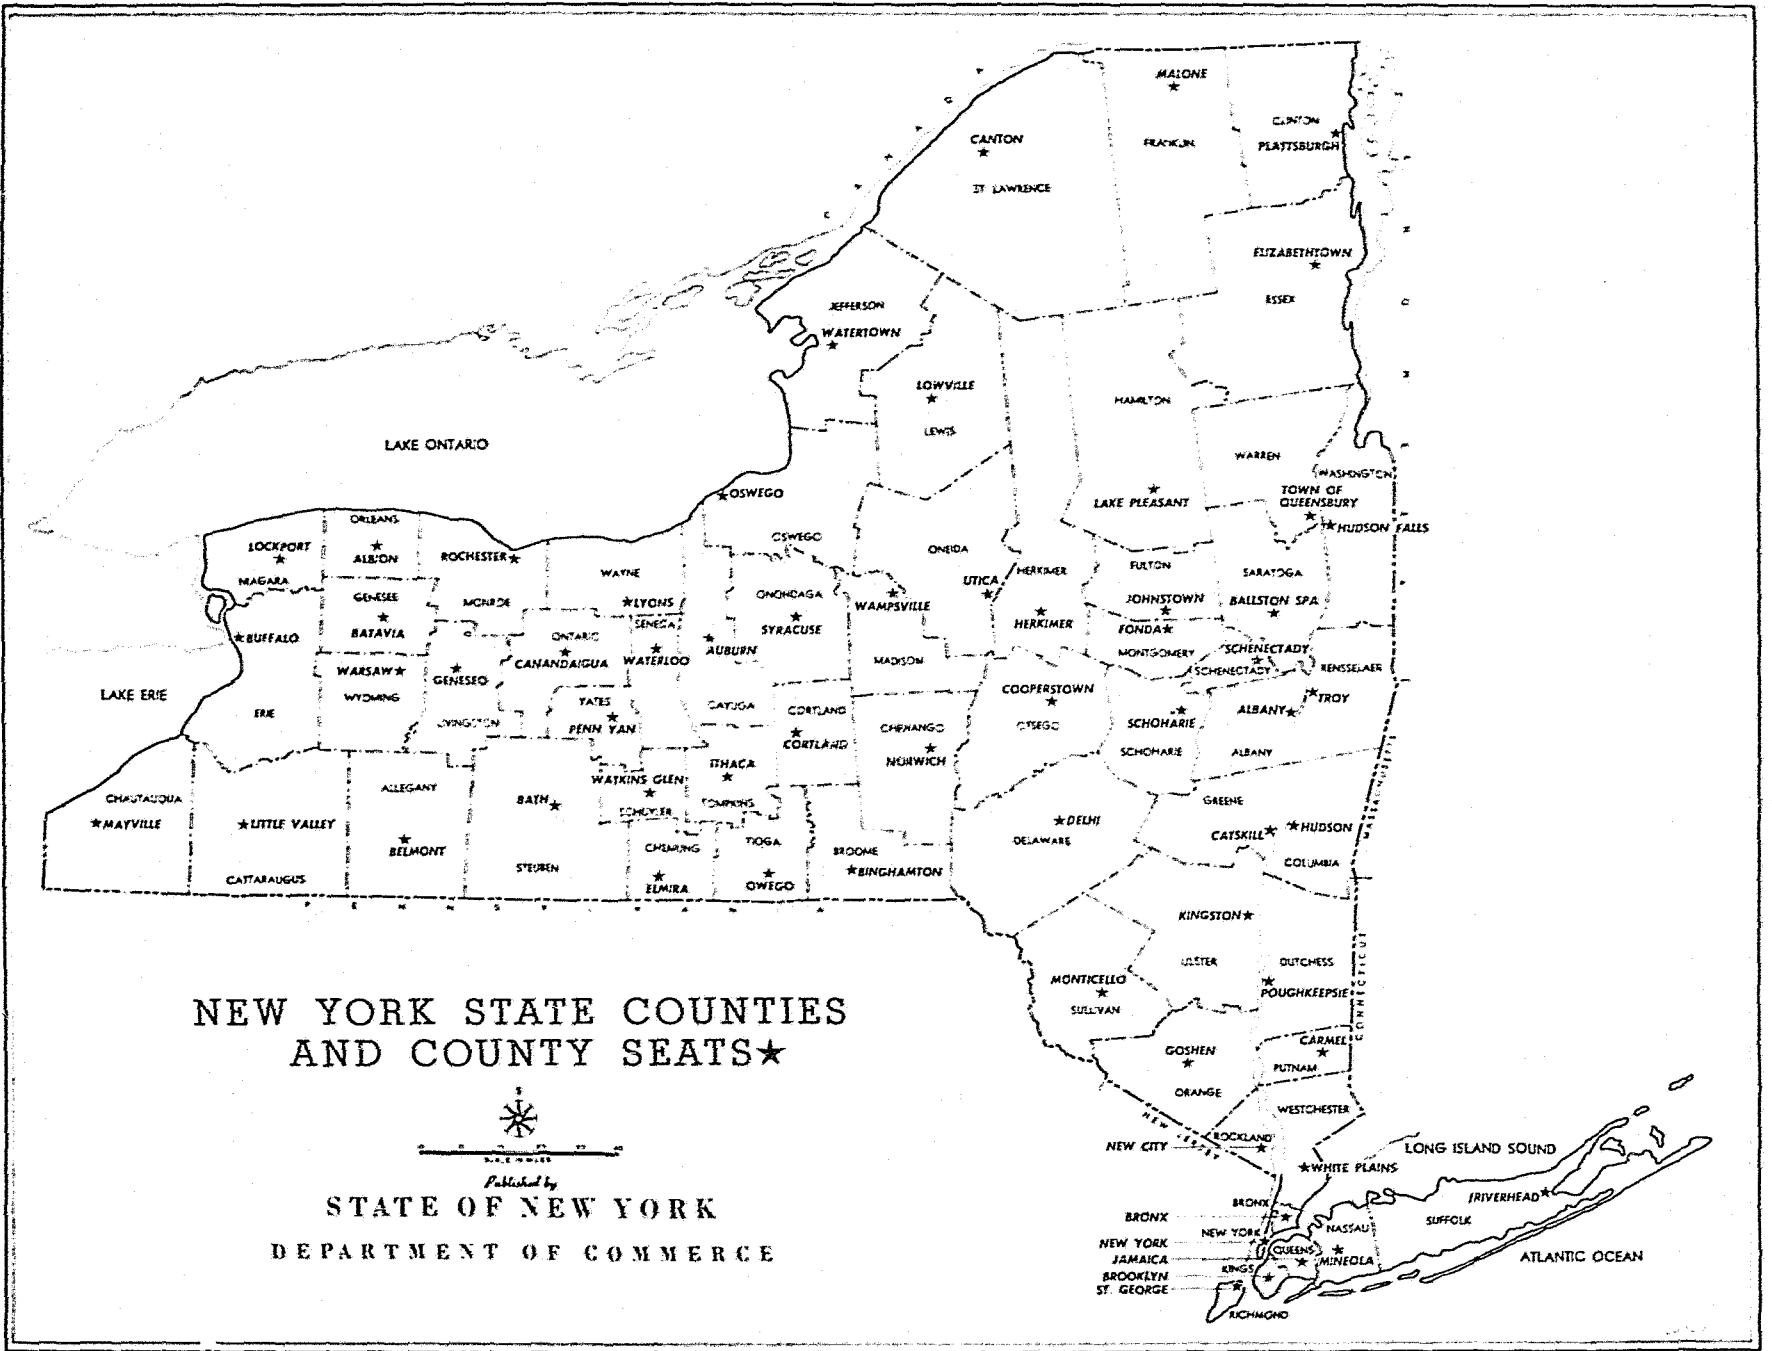

The matter is being reviewed and I will contact you again as soon as a final decision has been reached.

I am sure that you will understand the need for a thorough review of the situation.

Very truly yours,

[Signature]

The Problem

The crime problem confronting New York State, as indicated in the following pages, is a formidable one. A total of 1,009,327 Index Offenses have been reported by the police in New York State during 1975, almost two serious crimes every minute of every day during the year. If one accepts the conclusions of recent victimization studies, even this awesome figure represents only a portion of the Part I offenses committed during the year, and does not reflect at all the Part II offenses which are not reported in the UCR program. If one were to compare the total Index Offenses reported in 1975 with the number reported in 1974 -- 879,673 -- one would assume that crime in New York State has risen 14.7 percent. However, the experience of the Federal Bureau of Investigation's Uniform Crime Reporting Section has been that when a state program assumes responsibility for the UCR program in the state, the increased participation by police agencies and the improved quality of the reporting results in an exaggerated increase in reported crime. The New York State experience is consistent with past history in that respect.

Whereas in 1974, 266 New York State police agencies representing 85.4 percent of the population reported completely and directly to the FBI/UCR program, in 1975, 542 agencies representing 99.3 percent of the population participated fully in the New York State UCR program. In addition, the state was able to monitor agency reporting more closely than had been possible with the limited field staff available to the FBI/UCR program.

Because of these twin factors, we are confident that the real increase in crime in New York State for 1975 is substantially below the increase reflected in the comparison of raw data. We cannot emphasize too strongly, therefore, that comparisons between 1975 and previous years, except for individual agencies, may be very misleading.

A more realistic comparison of 1975 and 1974 crime levels in New York State can be obtained by comparing the data reported in eight of the largest police jurisdictions (see table on Page 6). These data, representing almost 75 percent of the total Index Offenses reported in the State in 1975, show a 12.1 percent increase.

One of the weaknesses in the Uniform Crime Reporting program is that the property claims, which are far more numerous than crimes against the person - 853,665 - in 1975, so heavily skew the Crime Index that even drastic changes in any one or

all of the violent crimes may not be reflected in the total Index charts. To offset the imbalance, the Index has been divided, in recent years, into 'Violent' and 'Non-Violent' crimes. This permits the highlighting of trends in the incidence of violent crimes, with which the public is most concerned.

New York State 'Violent' crimes represent 15.4 percent of Index Offenses as opposed to the 84.6 percent comprising the 'Non-Violent' crimes. Murder in New York in 1975 represented 0.2 percent of Index Crimes. Murder, because of its serious nature, was probably the one crime which was as completely reported in 1974 as it was in 1975, despite the greater number of agencies reporting in 1975. 1,981 murders were reported in 1975, as opposed to 1,913 in 1974, an increase of 3.6 percent.

Forcible Rape, which represents 0.5 percent of the Index Offenses in New York in 1975, shows a 1.2 decrease from 1974 -- 5,145 to 5,082. Since reports of rape decreased, despite the greater number of agencies reporting in 1975, we believe that these data more accurately reflected the true incidence of this crime than other Index Offenses, with the exception of Murder. Robbery, with 93,363 offenses reported, represents 9.3 percent of Index Offenses, while Aggravated Assault contributes 5.5 percent to the total.

Of the 'Non-Violent' crimes, Burglary is 29.6 percent of the Index Offenses, Larceny represents 43.5 percent and Motor Vehicle Thefts 11.4 percent.

Crime rates are based on the number of offenses for some unit of the total population, usually 100,000. However, not everyone in a population is equally exposed to all crimes, and in several instances some persons can never be the victim of a given crime. For example, under New York State law a male cannot be the victim of a rape. It might be more useful and more meaningful, therefore, if crime rates were calculated against the susceptible portion of the population rather than against the total population. Accordingly, in calculating the crime rate for rape, we have used a population base of females of the age of five and older. Employing the revised population base, we find that the crime rate for the susceptible female population -- 57.3 -- is almost double the crime rate for the total population -- 28.4.

Similarly, in calculating the offense of motor vehicle theft, we believe that a more realistic measure of the probability of that offense occurring is to measure the incidence against the number of registered vehicles. Accordingly, we find that in New York State the crime rate for motor vehicle theft is 567.5 when calculated in the usual manner, and 1552.2 when the base is the number of registered vehicles in the state. Much of this wide disparity is created by the data from New York City, where there is a lower ratio of vehicle registration to population than in the rest of the state and where conversely, the highest incidence of motor vehicle theft was reported -- 83,202 offenses versus 115,407 offenses for the entire state.

The charts reflecting the monthly fluctuations of offenses show that both 'Violent' crimes and 'Non-Violent' crimes peaked in August, which is somewhat at variance with a long held belief that violent crimes occur with greater frequency during the summer months because of the greater opportunity for personal contacts, and that non-violent crimes usually occur with greatest frequency during the colder, darker months of the year. Another divergency from existing theory is the high level of violent crime in the entire latter half of the year, especially during October (whose level was only slightly below that of the peak month of August).

As is to be expected, the bulk of the crime is committed in urban centers. The table showing crime by Metropolitan Planning Areas (MPA) indicates that 84.2 percent of the total Index Offenses was reported as occurring in those areas. New York City leads the way with 57.7 percent of the state total. There are seven MPA's encompassing 73.9 percent of the population, but only 9.4 percent of the state's area.

The table of offenses reported by selected municipalities grouped according to population shows that New York City has the highest crime index rate -- 7681.2 per 100,000 population -- with the next highest rate occurring in the group of municipalities with populations in the 100,001-500,000 population range.

Analysis of the types of weapons used in the commission of robbery discloses somewhat surprisingly that 32.5 percent were committed by strong-arm methods, such as unarmed muggings, while firearms were employed in 30.9 percent of the cases. In aggravated assaults, the knife or other cutting instrument was the most frequently used weapon in 32.3 percent of the reported cases, with "Other Dangerous Weapons" close behind at 31.1 percent.

Data for agencies which reported in 1974 and were discontinued in 1975 are omitted.

ROBBERY
PERCENT DISTRIBUTION BY TYPE OF WEAPON
NEW YORK STATE
1975

ROBBERY: Definition - the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

AGGRAVATED ASSAULT
PERCENT DISTRIBUTION BY TYPE OF WEAPON
NEW YORK STATE
1975

AGGRAVATED ASSAULT: Definition - an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.

Homicide

Homicide (Murder and Non-Negligent Manslaughter) is the one offense in the Uniform Crime Reporting program for which detailed data is received for each offense. The analysis which this type of reporting permits is indicative of the advantages which can accrue from a crime reporting program which collects data for each offense rather than the aggregate data now being collected. Six states have already initiated this type of reporting. New York State will shortly be examining the feasibility of installing a similar system.

Analysis of the New York homicide reports discloses that males far outnumber females as victims, 78.9 to 20.7 percent (sex of 0.4% of victims was unknown). Blacks were victims of homicide in 47.3 percent of the cases, whites 29.6 percent of the time, and hispanics, mostly in New York City, were victimized in 21.8 percent of the cases.

The largest number of victims is in the 25-29 age group, with the 20-24 and 30-34 age categories close behind. Together those three groups account for more than 44 percent of all homicide victims but only slightly more than 23 percent of the State's population.

The need for stricter handgun laws and more effective enforcement of existing laws is reflected in the statistics: handguns were used in the commission of 45.4 percent of all homicides. All types of firearms, including handguns, were involved in more than 51 percent of the offenses. Cutting instruments were next highest as homicide weapons -- 26.9 percent.

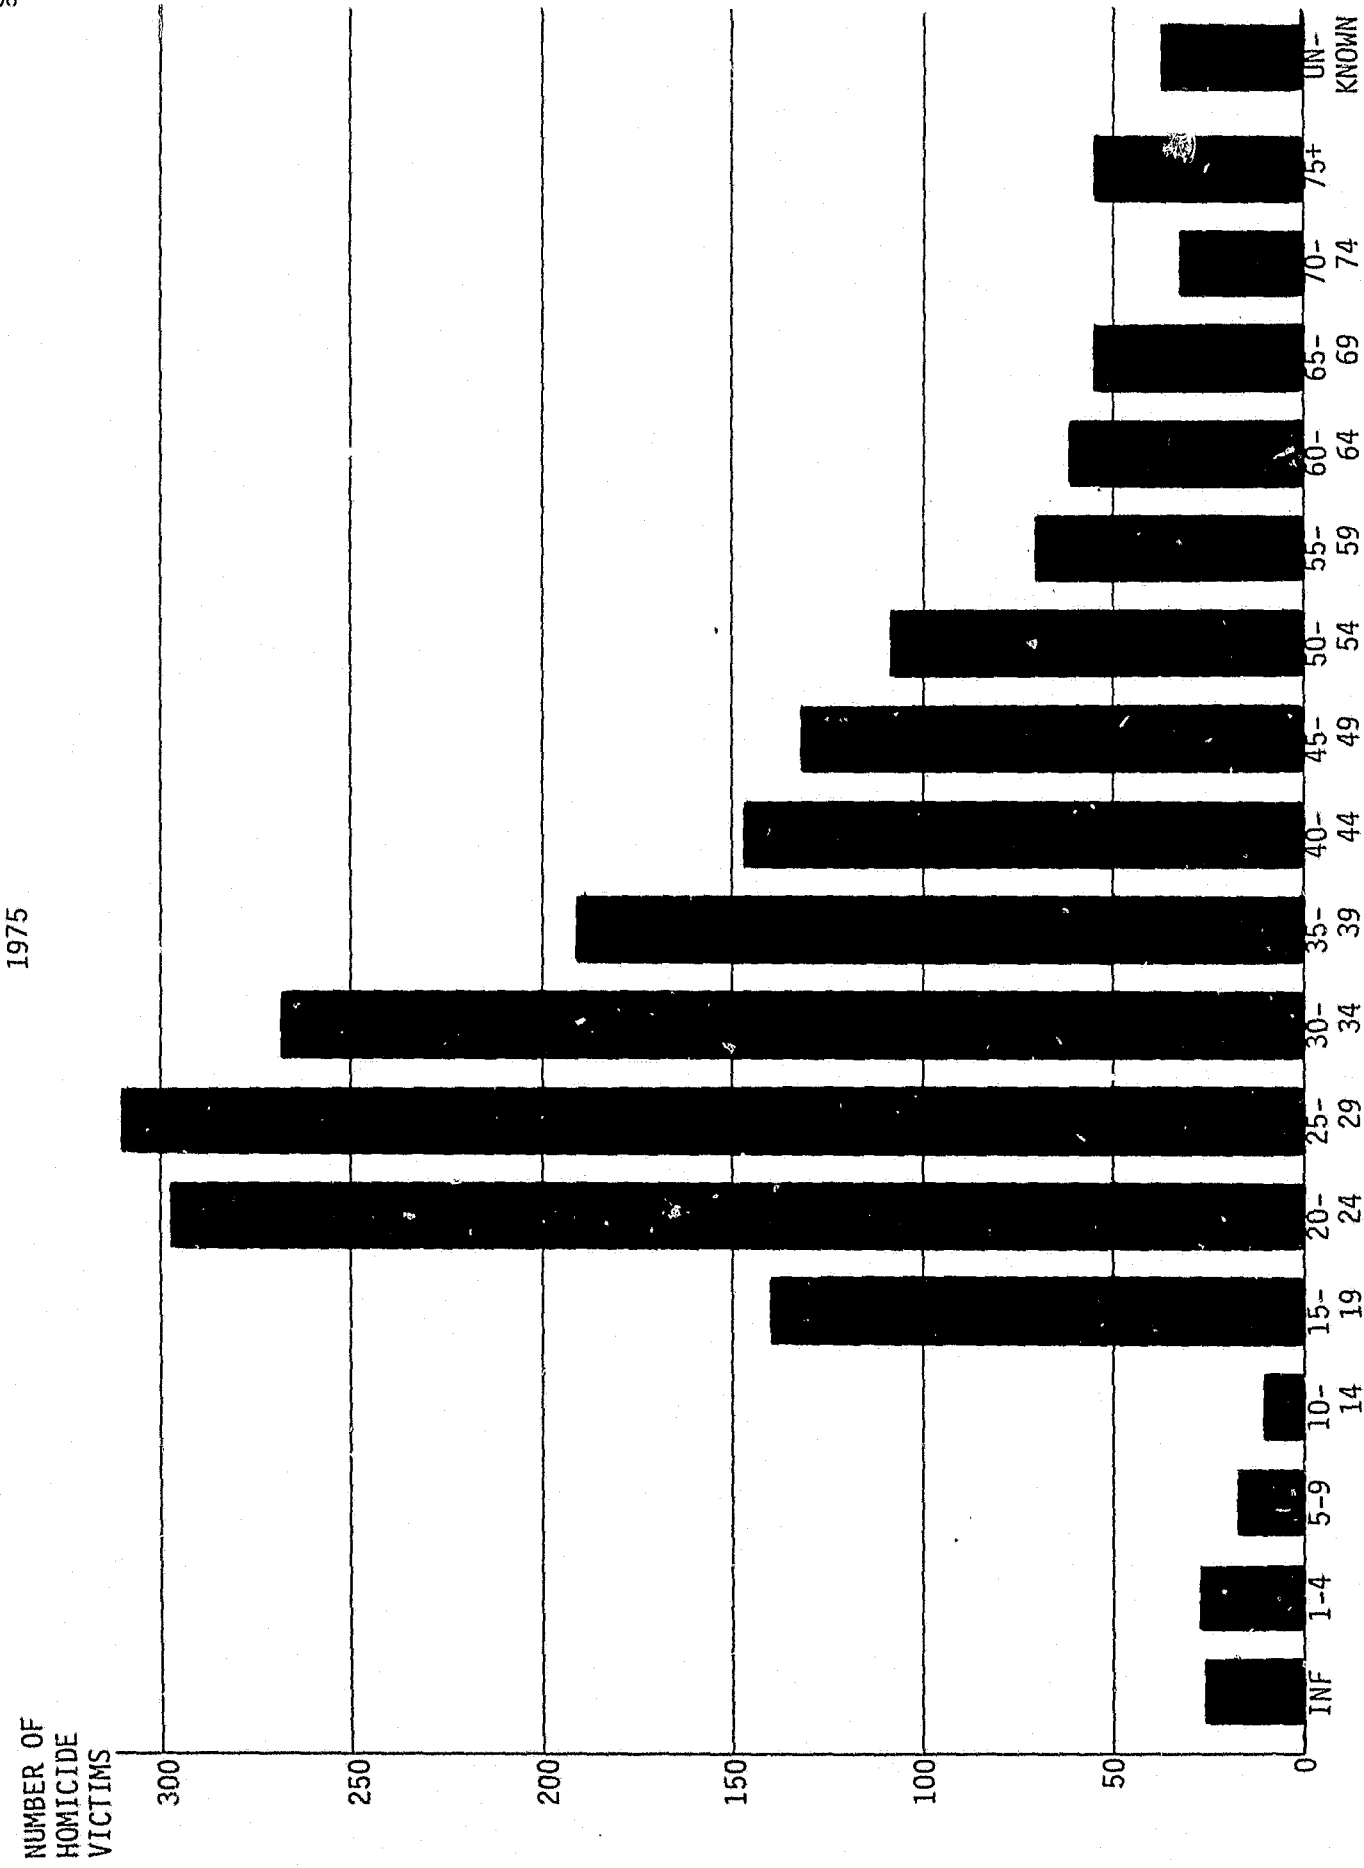

Examination of the circumstances under which homicides occurred shows that the perpetrator and the victim knew each other prior to the crime in 22.8 percent of the cases. Family slayings accounted for 10.5 percent of all homicide cases, while 12.3 percent of the cases concerned persons who had some type of previous relationship and 21.7 percent occurred during the commission of other felonies. It is important to note that older persons are in the group most vulnerable to felony homicide. Of 271 victims 55 years and older, 125 or 46 percent were slain during the commission of robberies. Almost 55 percent of all homicides were committed inside a building, indicating that in a majority of cases the police were not in a position to act as a deterrent.

Infants under the age of 1 accounted for 26 of the 80 children under the age of 15 who were homicide victims during the year.

HOMICIDE WEAPONS

T H E

R E S P O N S E

Arrests

The arrest data presented in this section of the report are derived from two sources. The first nine tables, which reflect total arrests effected by police agencies, are compiled from reports submitted through the Uniform Crime Reporting program. The last two tables are generated from the arrest fingerprint file maintained by the Division of Criminal Justice Services.

Since New York State law requires that a fingerprint card be submitted to DCJS as a result of each felony arrest, the file is an excellent source of data concerning statewide felony arrest activity. The fingerprint file data describes felony arrests only and therefore varies substantially from the total arrests reported in the first nine tables.

Total Arrests

Total arrests reported in New York State during 1975 amounted to 573,306. Of this number, 180,650 arrests -- 31.5 percent -- were for Part I offenses, in contrast to the 1,009,632 Part I offenses reported during the year.

392,656 arrests were for Part II offenses, generally considered the less serious violations of law, but which include offenses such as Arson, Kidnapping, Dangerous Weapons, and Drug Offenses. Since the UCR program does not collect data for Part II offenses, we can make no comparison between offenses reported and arrests effected for those crime classifications. During 1976, the New York State program will attempt to cover this gap in reporting by collecting offense data for Part II offenses as well as arrest data.

Part II arrests included 26,825 for Drunkenness, 72,990 for Disorderly Conduct and 95,541 for Other Offenses. These three groups accounted for 49.8 percent of all Part II offense arrests. (NOTE: On January 1, 1976, Public Intoxication - Alcohol - ceased to be a criminal violation in New York State.)

Arrests for the "Violent" crimes included in Part I offenses accounted for 55,130 or 30.5 percent of the total Part I arrests. "Violent" crimes reported to the police, however, accounted for only 15.4 percent of Index Crime reported in 1975. Obviously, the police were more effective in apprehending the perpetrators of violent crime than in corralling those who committed crimes against property. This can be explained by several factors. Crimes of violence are more reprehensible, create public resentment and fear and thus

command a high percentage of law enforcement's attention and effort. Crimes of violence almost always involve a personal confrontation between the offender and the victim so that the police are usually provided with a witness and with a description of the perpetrator. Crimes against property, conversely, are usually committed by stealth, where the perpetrator is seldom observed and where little investigative assistance is provided to the police.

Adult arrests -- ages 16 and over -- comprised 83.5 percent of all arrests in New York State during 1975. Of the adults arrested, 79.4 percent were males, 20.6 percent were females. Among juveniles arrested, the distribution was 84.2 percent and 15.8 percent females. Current population estimates indicate that 74 percent of the population in New York State is age 16 and over, while 26 percent is under 16 years of age.

Analysis of the arrests for "Violent" crimes disclosed that of the 55,130 persons arrested, 83.8 percent were adults, of whom 89.9 percent were males and 10.1 percent were females. Among the juveniles arrested for "Violent" crimes, 88.9 percent were males and 11.1 percent were females.

Of the adults arrested, 96,236 or 20.1 percent were in the 16 through 18 age group and, therefore, eligible to be adjudicated youthful offenders (except in certain rare instances). Youthful offender status operates to relieve the individual of the onus of a criminal record.

41,150 juveniles were arrested for Part I offenses. Of these 21.6 percent were for the "Violent" offenses and 78.4 percent were for property crimes. Juvenile delinquency adjudications similarly serve to relieve the individual of the onus of a criminal record.

Felony Arrests

In 1975 a total of 127,095 felony arrests were reported to the Division of Criminal Justice Services by New York State law enforcement agencies via arrest fingerprint submissions, a rise of 1.0 percent over 1974 figures. Statewide, drug felony arrests declined 9.8 percent while non-drug arrests rose 2.7 percent.

Geographically, New York City reported felony arrests little changed from the previous year at 0.9 percent below 1974. Similar declines were recorded in both drug (0.2 percent) and non-drug (1.0 percent) arrests. In contrast to New York City, 1975 total felony arrests in the Suburban Area of New York City (Nassau, Suffolk, Rockland and Westchester Counties) were up 1.1 percent over 1974 while Upstate rose 7.0 percent.

Both areas recorded sharp declines in 1975 felony drug arrests from the previous year accompanied by increases in non-drug arrests.

Non-drug felony arrests for the State as a whole recorded a total of 111,154 arrests, an increase of 2.7 percent over 1974. New York City declined 1.0 percent while the Suburban Area of New York City reported a rise of 10.8 percent and Upstate New York increased 13.0 percent.

Drug Arrests

The drug arrests include arrests for Penal Law Article 220, Public Health Law Article 33 and for the following sections of Penal Law Article 200, which deal with bribery in drug cases, 200.04, 220.12, 200.22, 200.27.

The UCR data indicates that most law enforcement agencies in the State appear to be concentrating their enforcement efforts on offenses involving marijuana. There is currently a great deal of debate concerning the relative seriousness of such violations. The severe drug laws which were enacted in 1973 were intended to attack the entire illegal drug problem but most especially those dealing in "hard drugs." To the extent that enforcement, especially outside New York City, is so heavily oriented towards enforcement of marijuana violations, those laws do not appear to have achieved their objectives.

The statistics show that of the 40,798 arrests reported for violation of the Controlled Substances Laws (narcotic drugs), 27,644 or 67.8 percent involved marijuana. If one considers only the enforcement activity outside New York City, the figures reveal that of the 23,405 arrests for Controlled Substances Laws violations, 20,293 or 86.7 percent are for violations involving marijuana.

86.5 percent of the 10,237 New York State arrests for opium, cocaine and derivatives was effected in New York City, which is attributable to two factors: the heavy concentration of the hard drug traffic in the city and the enforcement policy of the New York City Police Department which focuses its enforcement effort on the more serious narcotic drug violations.

Drug felony arrests totaled 15,941 cases statewide in 1975, down 9.8 percent below the previous year. Although 1975 New York City drug arrests remained nearly unchanged (down 0.2 percent) from 1974, sizeable declines were recorded in the Suburban Area of New York City at 29.7 percent below 1974 and

Upstate New York down 12.6 percent. Overall, drug arrests accounted for 12.5 percent of all felony arrests in 1975, slightly below the 14.0 percent represented in 1974. In New York City, drug arrests accounted for a slightly larger proportion of all felony arrests in 1975 (9.7 percent) compared to 1974 (9.6 percent). In the Suburban Area of New York City, drug arrests declined from 23.8 percent of total arrests in 1974 to 16.5 percent in 1975. Drug arrests Upstate accounted for 19.3 percent of total in 1975, down from the 23.6 percent represented in 1974.

The following 20 tables present statistics concerning New York State indictments and felony proceedings for the years 1974 and 1975. Data are obtained from a statistical reporting system based on individual reports of each indictment and each disposition submitted by the County District Attorneys' Office on report form DCJS-1020 "Felony Indictment and Prosecution Report". The unit of count in the reporting system is the defendant-indictment. This includes all defendants indicted and all indictments processed as follows:

1. When several defendants are named in one proceeding or indictment, each defendant is counted separately.
2. When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The tables focus on three major geographical areas of the state: New York City, Suburban Area of New York City, and Upstate. The Suburban Area of New York City includes the counties of Nassau, Suffolk, Rockland, Westchester, areas characteristically different from either New York City or Upstate. In addition, similar information is presented for the four Judicial Departments in New York State. Tables also spotlight drug cases.

Tables of data are presented in four categories: 'All Felony Charges'; 'All Felony Drug Charges'; 'Drug Offenses After 8/31/73'; and 'Class A Drug Offenses Effective 9/1/73'. 'All Felony Drug Charges' refers to charges made against any "drug law" in effect at the time of the charge. 'Drug offenses after 8/31/73' refers to charges that were made against laws in effect after 8/31/73 including the "new" laws initiated 9/1/73 and those that continued in effect after 8/31/73. 'Class A Drugs as of 9/1/73' refer to charges based on only those "new" laws that became effective on 9/1/73.

The use of offender-based statistics and the tracking of each case for each defendant from time of indictment until final disposition makes possible the measuring of elapsed times between various stages in processing. The times used in the tables are median days. The median is obtained by ranking all the values in a specific category (e.g., time from indictment to disposition) and choosing the middle number -- that is, the value with an equal amount of number above and below it.

As a result, median values are not influenced by very large and very small numbers the way "average" values are.

It should be remembered that the data reported pertains to cases handled during the period specified and that cases disposed do not necessarily refer to the cases indicted in that period.

DEFENDANT-INDICTMENTS

District Attorneys throughout the State reported 35,454 defendant-indictments during 1975, down 1.3% below 1974. This decline was entirely attributable to New York City with a recorded drop of 10.0%. Indictments for the Suburban Area of New York City increased 6.6% over 1974 and Upstate New York rose 12.8%. The decline in New York City indictments reflects the "Early Case Assessment" program that became effective in New York City in July, 1975.

The small decline of 1975 defendant-indictments from 1974 obscures the dramatic drop in drug felony indictments for that period. Statewide, drug felony indictments fell 23.9% with all geographical areas contributing to the decline: New York City down 20.9%, the Suburban Area of New York City down 35.5%, and Upstate New York down 18.8%. The drop in drug felony indictments was accompanied by a comparable rise in non-drug felony indictments in the Suburban Area of New York City, up 20.5%, and in Upstate New York, up 20.6%.

It should be noted that compared to 1974, indictments for Class A drugs did not decline at the same rate as total drug felonies. Overall, the 1975 decline of 15.6% in Class A drug felonies from the previous year can be primarily attributed to a drop of 21.0% in New York City, as the decline in the Suburban Area of New York City was limited to 2.0% and Upstate New York rose 7.2%. Also, Class A drug indictments continued to be nearly as important in 1975 as in 1974 despite a lessening influence of drug indictments in general. Class A drug indictments dropped from 8.9% of all indictments in 1974 to 7.6% in 1975, compared to a decline in all drug felonies from 18.0% of total in 1974 to 13.9% in 1975.

DISPOSITIONS

A total of 32,532 felony defendant-indictments were disposed of in 1975, up 12.4% over the 28,949 cases reported in 1974. Overall, 4,580 indictments for drug offenses disposed of in 1975 were up only 4.2% over the volume disposed of in 1974 although the category 'Drug Offenses After 8/31/73' increased 94.4% and 'Class A Drug Offenses Effective 9/1/73' increased 184.2%. The dramatic rise in the last two categories reflects the movement through the courts of the "new" drug law cases initiated in September 1973.

Trials, either with a jury or without a jury, involved 9.3% of the indictments disposed of statewide, a small increase over the 8.1% reported in 1974. New York City reported 11.1% of the current year indictments disposed by trial, with the Suburban Area of New York City at 6.7% and Upstate New York at 7.2%. The proportion of trial cases disposed by conviction totaled 65.5% overall in 1975 and 64.0% in 1974. In contrast to overall figures, drug charges reported 10.0% disposed by trial in 1975 up from the 8.2% figure in 1974 with a conviction rate of 79.0% in 1975 compared to 74.0% in 1974.

DISPOSITIONS - (continued)

Guilty Pleas accounted for 92.1% of the convictions reported statewide in 1975, slightly below the 93.3% figure for 1974 with all areas of the State contributing to the decline.

Convictions totaling 25,249 cases in 1975 were 11.9% above the 22,570 conviction cases reported in 1974. They accounted for 77.6% of the reported dispositions in 1975 compared to 78.0% in 1974. New York City convictions accounted for 74.2% of all dispositions in the City while the Suburban Area of New York City reported convictions at 83.8% of total indictments disposed and Upstate at 81.2% of all indictments disposed. These figures showed little change from 1974 with New York City at 75.6%, Suburban Area of New York City at 82.2% and Upstate New York at 80.7% of dispositions by convictions. It should be noted that convictions do not in all cases represent convictions on felony charges.

In 1975, 34.4% of total convictions were disposed by commitment to state correctional institutions, a larger proportion than the 31.6% reported in 1974. Sentences to local correctional institutions accounted for 14.7% of total disposed by conviction in 1975, nearly unchanged from the 14.2% reported in 1974. Although the volume of cases sentenced to probation increased in 1975 over 1974, the proportion of cases at 41.3% of total convictions represents a smaller percentage than those disposed by conviction in 1974 at 43.7%.

Sentences for drug convictions showed a more dramatic increase in the proportion sentenced to state institutions. Sentences to state correctional institutions accounted for 32.8% of the cases disposed by conviction in 1975 compared to 23.7% in 1974. Local institutions received 10.2% of total convictions in 1975 and 10.8% in 1974. Probation received fewer cases as well as a smaller proportion of total convictions at 44.9% in 1975, down from 53.4% in 1974.

PROCESSING TIME

For both 1975 and 1974 the median time to process felony cases resulting in dismissal or acquittal in New York State took more than twice as long as the median time to process convictions, due primarily to the high percentage of convictions resulting from guilty pleas.

The median time for processing dispositions in 1975 was 137 days from indictment to disposition, slightly above the 133 median days reported in 1974.

a/ Numeric change is not computed as there were no cases in 1974.

Sentences

Unless there is but one mandatory penalty, the sentence given an offender will depend partly on the identity of the sentencing judge. The law provides little, if any, guidelines regarding the weight to be given to the many aggravating and mitigating circumstances of the crime, the offender, and the victim. Judges need not and generally do not give reasons for their sentencing decisions. Since the legal sentencing frames are normally broad, especially for the more serious crimes, similar offenses under similar circumstances may receive substantially different sentences.¹

The tables in the following pages give vivid testimony to this statement.

The first table shows that sentences imposed on murder convictions in New York are fairly consistent, with only two convicted defendants not being committed to a state institution. However, if one looks at the terms of the prison sentences, one finds that while the great majority receive life sentences, 37 defendants received prison terms ranging from 1-3, to 20-25 years.

Of particular note is the high percentage of defendants convicted of other felonies displayed in the tables who are placed on probation: 34.3 percent in 1975 and 35.0 in 1974. Although the ratio is higher for the property crimes than for the violent crimes, a surprisingly high proportion -- 28.7 percent -- of Robbery and Aggravated Assault defendants were placed on probation.

Property crime defendants, Burglary and Larceny, are extended even more leniency in sentencing considerations. Of the total 5841 Burglary defendants convicted in 1974 and 1975, 2583 or 44.2 percent were placed on probation. Larceny defendants also fared well in the judicial process. Of a total 2369 Larceny convictions in 1974 and 1975, 1159 or 48.9 percent received probation sentences. It should be noted that these data relate to felony convictions only.

Overall, the differences between the sentences handed out in 1974 and 1975 were not significant.

¹"Sentencing Councils: A Study of Sentence Disparity and Its Reduction," by Shari Seidman Diamond and Hans Ziesel. University of Chicago Law Review, 43:1, p. 110. (1976)

The table showing the distribution of maximum sentences vividly illustrates the wide range of sentences meted out for convictions for the same crime category. Murder, for example, shows a range from 1-3 years to life imprisonment; Rape, first degree, from 3 years to 20-25 years imprisonment; Robbery, first degree, from 1 year to life imprisonment.

A project to study the wide range of criminal case sentencing has been commissioned by LEAA and is being directed by Professor Leslie Wilkins of the State University of New York and Dr. Don Gottfredson of Rutgers University through the Criminal Justice Research Center, Inc., Albany, New York. The study has found that the wide variety of sentences imposed upon defendants does not reflect inequity or injustice. They have found that the problem is more complicated than that: eighty factors, singly or together, could have influenced sentencing decisions, according to the study.

The factors identified by researchers generally fall within four major categories: prior criminal record, seriousness of the offense, mitigating or aggravating circumstances, and indications of an individual's stability.

The information is being catalogued into model average sentences to help judges decide what a typical sentence would be for an individual case in a specific jurisdiction. LEAA anticipates that at least one model will be operating in four jurisdictions by next year.

The Division of Criminal Justice Services has initiated a study to examine sentencing practices in New York State. It is hoped that the conclusions reached in this project can be related to the findings of the LEAA study to produce recommendations that will result in the meting out of more equitable justice in New York State.

We are presenting the following tables for selected crimes with considerable statistical trepidation since we know they do not reflect a one-to-one relationship among offenses, arrests and indictments, even within the same crime classification. That will not be possible unless and until we adopt a transaction reporting system for offenses and arrests that will permit us to follow a crime from the time it is reported until the case is finally disposed of.

We do feel, however, that it is important to show the relative activity of the system among reported offenses, arrests, indictments and convictions within specific offense classifications in the Crime Index, if only to give some indication of how the "Criminal Justice System" is contending with the problem of crime in New York State.

The following three exhibits utilize data from several different (and not always comparable) sources. Data on offenses and arrests come from Uniform Crime Reports submitted to DCJS in 1975 and to the FBI in 1974. The 1974 arrest data are, admittedly, incomplete, but they have been exhibited for the sake of plotting two consecutive years. "Drug Arrest Charges" data are obtained from fingerprint cards submitted to DCJS and reflect the number of arrest charges rather than the number of arrested persons. Indictment, disposition, conviction, and sentence data are obtained from Felony Indictment reports submitted to DCJS by the various district attorneys in New York State. Here, the unit of count is the defendant-indictment; see page 109 for definition.

Due to delays in the judicial process, data at two separate stages of the process need not represent the same set of defendants. For example, a portion of those persons indicted in 1975 were arrested in 1974. Some of those convicted in 1975 may have been arrested or indicted in 1974 or possibly earlier.

Homicide

In both years, there were more Homicide Indictments reported than Homicide Arrests, possibly due to offenders who are arrested once but indicted for more than one offense. The fact that, in both years, the number of dispositions exceeds the number of indictments can be attributed to cases pending from prior years and may reflect the results of additional judges having been appointed in the past several years.

TOTAL	100	100

If 1975 can be taken as a typical year, then approximately one half of all homicides in New York State lead to incarceration in a State Correctional Facility for the perpetrator.

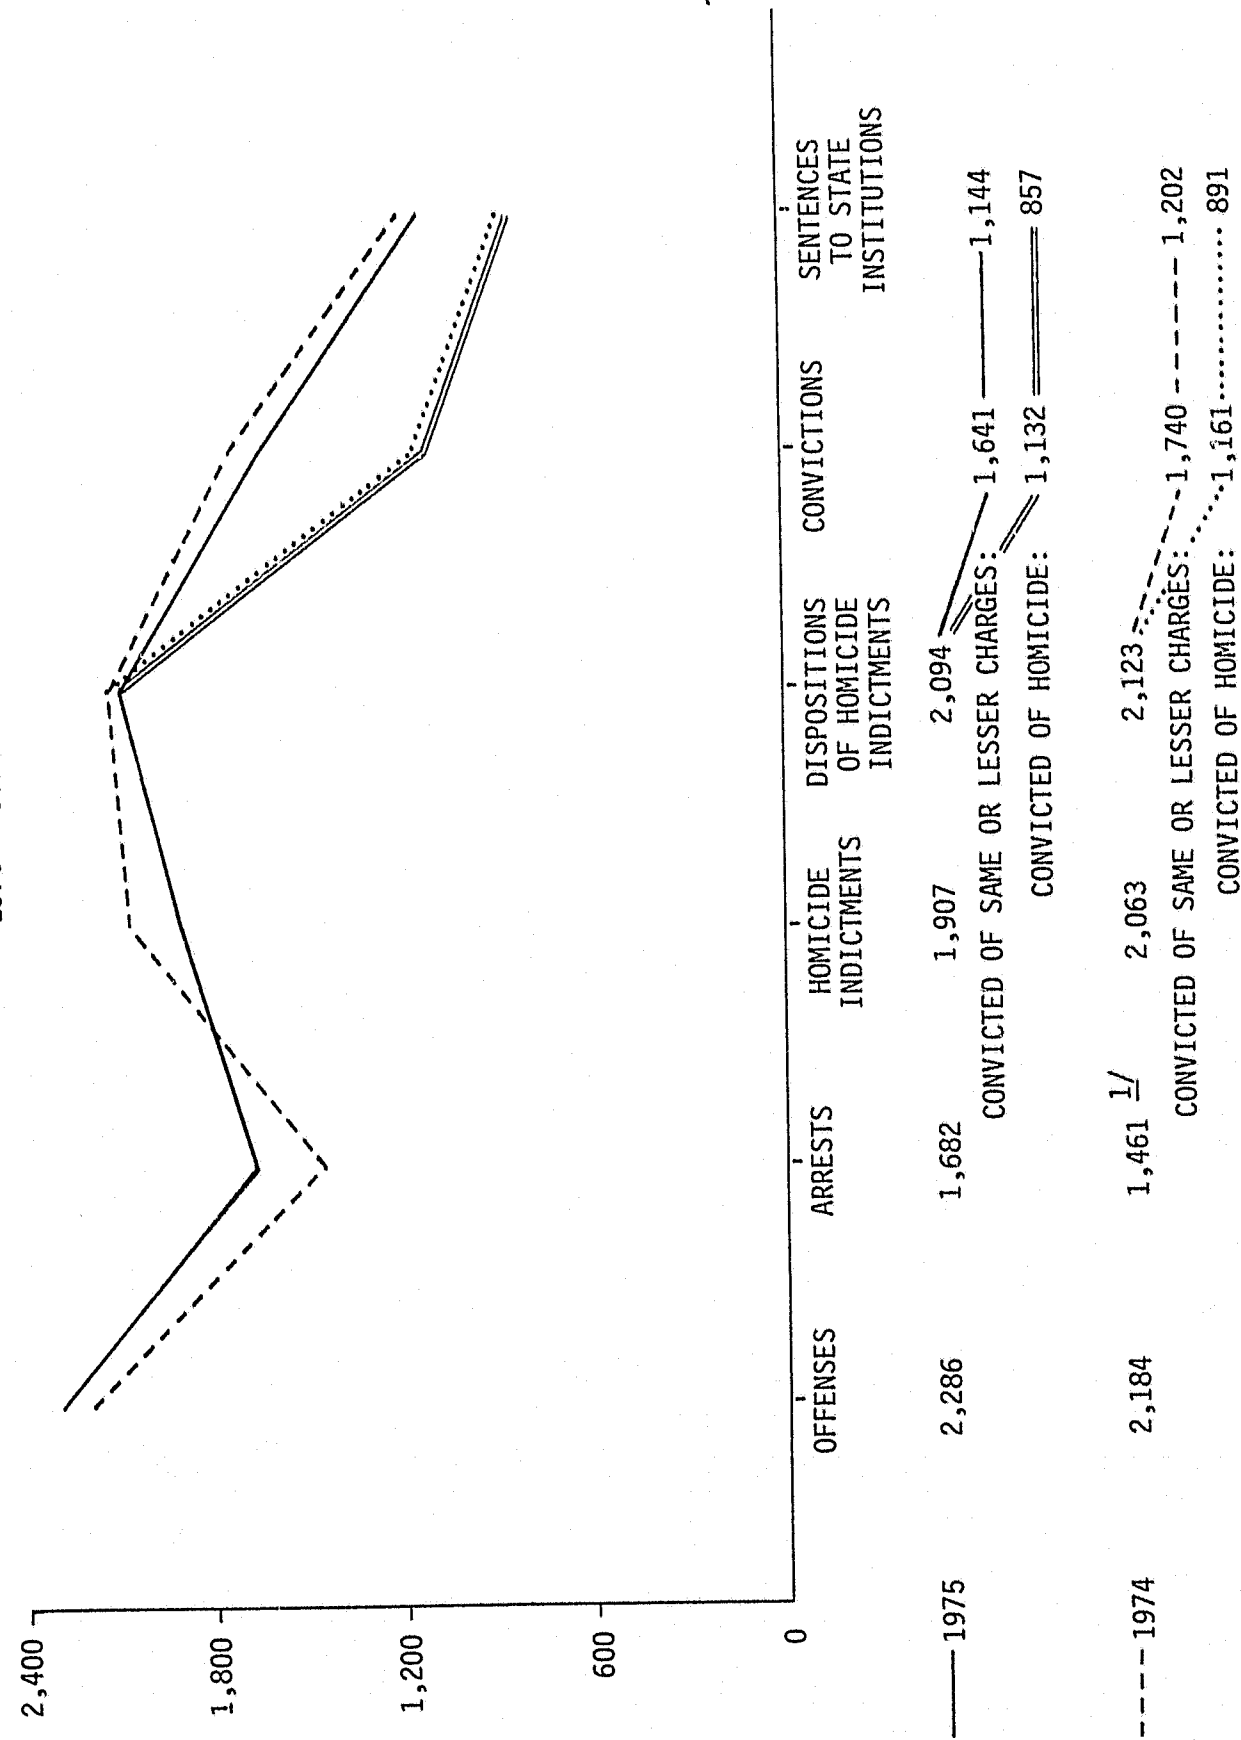

Robbery

The data showing the levels of activity in connection with robbery charges is at once enlightening and discouraging. There were less than one quarter as many robbery arrests effected as robbery offenses reported during both 1974 and 1975. Similarly, there were less than one quarter as many convictions for robbery as there were arrests effected for robbery. Of those convicted for robbery, 62 percent were sentenced to state institutions. The ratio between arrests and sentences to state institutions in 1975 was more than 7:1; between offenses reported and sentences to state institutions the ratio in 1975 was more than 28:1.

Drug Felony Charges

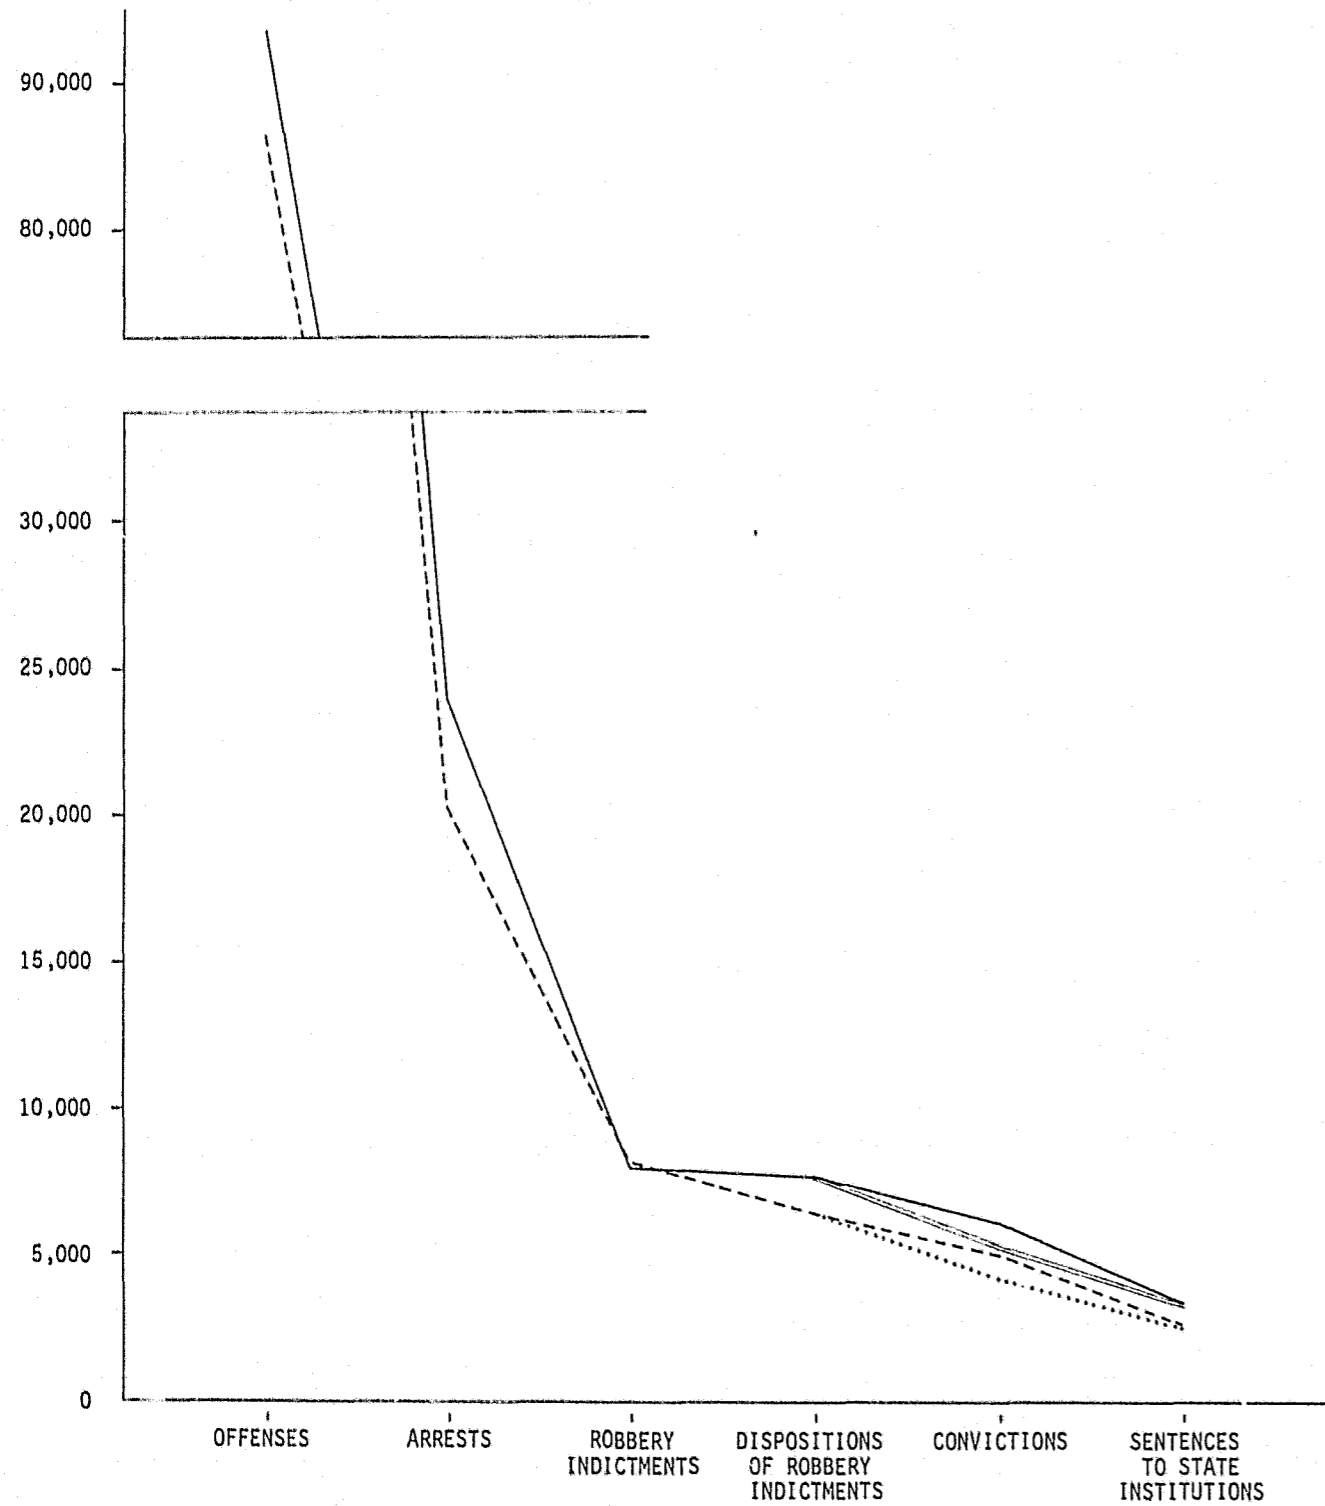

The drug felony chart demonstrates that the criminal justice system processes Class A Felony drug charges quite differently than lesser felony drug charges. Although 66.6 percent of defendant/indictments for felony drug offenses were disposed of by conviction, only 21.8 percent were committed to a state correctional institution. Of those convicted of Class B or lower felonies, only 11.5 percent were sentenced to state incarceration, whereas 69.0 percent of the Class A drug felonies resulted in sentences to state institutions.

Law Enforcement Officers Killed or Assaulted

One of the reports submitted by the police under the UCR program is the Law Enforcement Officers Killed or Assaulted Report. During 1975, 10 law enforcement officers were feloniously slain in New York State, 7 of them in New York City.

5198 officers were reported assaulted during the year, with 4079 of the assaults resulting in injury to the officers. More than 75 percent of those assaulted were New York City police officers.

73.1 percent of the assaults were committed by physical force without the use of a weapon; 9.6 percent involved the use of firearms and 3.7 percent were committed with a knife or other cutting instrument.

Surprisingly, 57.2 percent of the assaults were committed on police officers assigned to a two-man vehicle.

Slightly less than one-third of the assaults were committed on police officers while they were effecting an arrest.

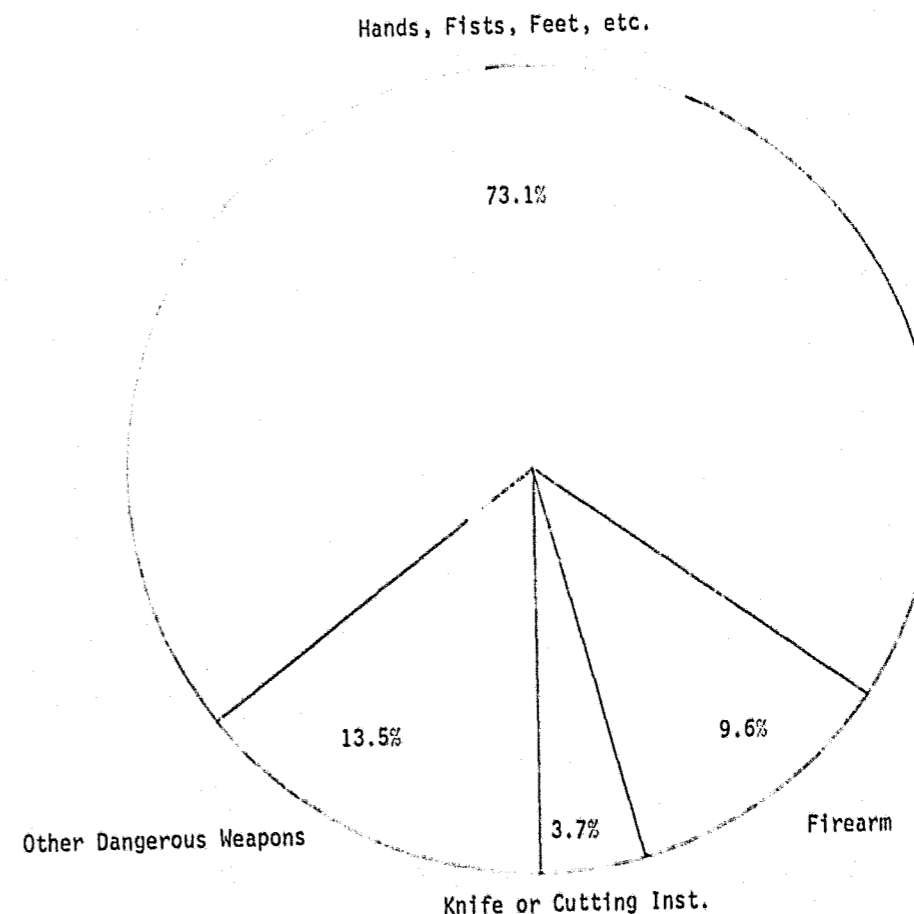

As might be expected, more than half of the assaults -- 52.3 percent -- occurred between the hours of 6:00 PM and 2:00 AM, when the police usually experience their greatest activity.

Law Enforcement Employees

Police agencies of New York State reported that as of October 1, 1975, they employed 66,880 employees (uniformed and civilian, full time and part time). Of these, 33,401 were employed in the New York City Police Department, followed by the Nassau County Police Department with 4736, the New York State Police with 3991 and the Suffolk County Police Department with 3287.

62,384 were full-time employees of whom 54,660 were uniformed officers and 7724 were civilians. 4496 were part-time employees of whom 2465 were uniformed officers and 1851 were civilians. Of the 57,305 uniformed officers in the state, 56,405 were males and 900 were females.
