March 1978

Preface

This Bibliography, Report #9 in our Technical Issue Paper series, represents a complete listing of all sources cited in the other eight Technical Issue Papers. It contains all books, journal articles, government publications, conference papers, unpublished manuscripts, and research reports, both foreign and domestic, which were cited directly in any of our other papers. The only citations consistently omitted from the Bibliography are state and federal statute sources. In addition, a great deal of material was used by our research staff for background purposes but was not directly cited; these sources have also been omitted.
