## Selected findings

Thirteen percent of all locally administered jails in the U.S. are in the West (table A).

Jails in the West held 24 percent of the Nation's total jail population on February 15, 1978 (table B).

Jail capacity in the West was 23 percent of the total in the Nation and was expected to increase 7 percent between 1978 and 1980 (table C).

Over one-third (36 percent) of the beds in general-purpose confinement units are in dormitory rooms designed for 16 or more inmates (table D).

The ratio of inmates to total employees (full-time and part-time) in this region was 2.9 to 1; the ratio of inmates to custodial personnel was 5.8 to 1 (table E).

Seventy percent of the jails in the West reported giving inmates a health interview or screening upon admission (table F).

Introduction

This report presents data from the 1978 National Jail Census for the jails in the West region. It is one in a series of four reports on local jails. The other three reports are for the Northeast, North Central, and South regions.

The 1978 National Jail Census and the companion Survey of Inmates of Local Jails were conducted for the Bureau of Justice Statistics by the Bureau of the Census. Summary results of these two surveys were published in a preliminary report released in February 1979. Additional data from the 1978 National Jail Census will be published in subsequent reports. Data from the 1978 Survey of Jail Inmates is presented in the report *Profile of Jail Inmates*.

Organization of this report

This report is designed as a ready reference for data for individual local jails in the U.S. during 1978, specifically the West region. The text begins with an overview of the 1978 National Jail Census and the Survey of Inmates of Local Jails and their historical development.

The general overview is followed by a summary of findings of all local jails in the Nation, highlighting findings for the jails in the West region. The methodology section documents the survey coverage, survey period, data collection, data limitations, and definitions. In addition, information on how to obtain the local jail listing is included.

The final section is comprised of eight tables presenting facility characteristics data for each of the individual jails in the West region:

- Table 1 presents data on the jail's retention authority, the average inmate population, and the number of inmates on February 15, 1978, by detention status;
- Table 2, the design/rated capacity, the number and average floor space of various size confinement units, and age of jail and planned changes by 1982;
- Table 3, the number of jail employees by occupation category and full-time or part-time status;
- Table 4, medical services;
- Table 5, work-release and weekend sentence programs;
- Table 6, the number of inmates held for other authorities;
- Table 7, drug- and alcohol-related services for the 149 jails with an average daily population of 50 or more inmates; and
- Table 8 lists the jails reporting inmate deaths during calendar year 1977, the number of inmates who died, and the cause of death.

Appendix A provides a listing of each of the jails that were closed for renovation on the census reference day (February 15, 1978) that were scheduled to reopen before December 31, 1982. Appendix B contains a listing of each of the jails that were closed on February 15, 1978, that have definite plans to build or acquire a new jail before December 31,

1982. Appendix C exhibits the two questionnaires used in the 1978 National Jail Census.

Historical development

1970 Jail Census

The first National Jail Census was conducted in the Spring of 1970 for the Statistics Division (now the Bureau of Justice Statistics) of the Law Enforcement Assistance Administration by the Bureau of the Census. The census identified 4,037 locally administered jails in the United States with a retention authority of 48 hours or more. The jail population on the census reference date (March 15, 1970) was 160,863.

Information was also obtained for all jails on the composition of the inmate population by type of retention, by sex and by whether adult or juvenile; design capacity; retention authority; age of institution; and employment and expenditure data. Additional information for all county jails and jails in cities of 25,000 population or greater was collected on the age of the cells and the presence of recreational, educational, medical, and visiting facilities.

The results of the census were published in *1970 National Jail Census*, which presented summary data for the United States and State-by-State totals and *Local Jails: A Report Presenting Data for Individual County and City Jails from the 1970 National Jail Census\**, which presented inmate, institutional, and expenditure and employment data for each of the jails canvassed.

1972 Jail Census

Another jail census in 1972 was conducted in conjunction with the first survey of jail inmates. The 1972 census obtained additional information on the types and characteristics of jail employees; the availability of medical facilities, recreational facilities, federally funded manpower and training programs, and various counseling and treatment programs; and the extent of participation in work-release, weekend sentence, and pre-trial intervention programs. The facility data from the 1972 census were published in *The Nation's Jails\**, and the inmate data in *Survey of Jail Inmates, 1972: Advance Report\**.

1978 Jail Census

The 1970 and 1972 efforts laid a strong foundation for the 1978 National Jail Census and its companion Survey of Inmates of Local Jails. In addition to updating the basic facility data collected in 1970 and 1972, the 1978 census obtained for the first time detailed data on the confinement units in the Nation's jails. For each jail, information was collected on the number of cells, rooms, dormitories or other units where inmates spend the night, reported by design size (designed for 1, 2, 3 to 4, or 5 or more inmates); the average floor space of one unit of each size; and the total number of inmates assigned to all units of each size on the census day. These data were collected in response to a congressional mandate for an assessment of the Nation's correctional system. Similar data were obtained for State prisons and community facilities during the 1979 Census of State Correctional Facilities, also conducted by the Bureau of the Census for the Bureau of Justice Statistics. Together, these two data sets provide for the first time a comprehensive inventory of confinement space in the Nation's State and local adult correctional facilities.

The 1978 census also obtained considerable information on the availability of medical facilities and services, including admission health screenings, admission physical examinations, medical facilities and medical personnel within the jail, number of inmates receiving prescription medication, and number of inmate deaths during calendar year 1977 by cause of death.

Jails in the West

The West ranks third among the four regions in the number of jails, having only one-third as many as the South, and half as many as the North Central region (Table A). The 566 jails in the 13 States of the West constitute only 16 percent of all jails in the country. One State in this region (Hawaii) has no locally operated jails; an integrated jail-prison system is operated by the State. Alaska, which also operates an integrated jail-prison system, had, in addition, six locally operated jails. Over 60 percent of the jails in the West had an average daily population of 20 or fewer inmates.

Number of jail inmates in the West

Jails in the West held 24 percent of the total jail population on February 15, 1978—the second largest percentage of all four regions (Table B). As in the other three regions the jail population was predominantly adult male (91 percent); however, the West had the largest proportion of adult female inmates (8 percent). Juveniles made up only 1 percent of the total.

Bed capacity

Jails in the West had 23 percent of the total jail bed capacity. Over 60 percent of the capacity for this region is in California. The West reported an anticipated net increase of 7 percent in the number of beds between 1978 and 1980 (Table C), and California accounted for more than 60 percent of the increase.

Number of beds by size of unit

Over one-third (36 percent) of the beds in general-purpose confinement units in the West are in units designed for 16 or more inmates (Table D). This is the largest percentage of all regions. Conversely, the West has the smallest proportion of its beds in the one-inmate category—only 9 percent.

Jail employment

The West had 19 percent of the jail employees compared with 24 percent of the jail population (Table E). The ratio of inmates to total employees (full-time and part-time) in the West was 2.9, and the ratio of inmates to custodial personnel was 5.8—the highest of all the regions. As in the North Central and Southern regions, the West had a large proportion of part-time administrators (sheriffs and deputies who perform law enforcement or judicial duties in addition to serving in the jail).

Health assessment for jail admissions

Seventy percent of the jails in the West reported giving inmates a health interview or screening upon admission (Table F). This was consistent with the percentages reported in the North Central region and South but below that reported in the Northeast. Only 1 percent of the jails in the West reported administering a medical physical examination as part of the admission procedure.

Inmates held because of overcrowding

A small portion of the jail population in the West (2 percent) consisted of inmates held because of overcrowding elsewhere (Table G). A majority of these (53 percent) were being held for other local jurisdictions.

Jail census methodology: Sources and limitations of the data

Coverage

The 1978 National Jail Census covered all locally administered jails in the Nation. In this census, a jail was defined as a confinement facility intended for adults but sometimes holding juveniles that holds persons detained pending adjudication and/or persons committed after adjudication, usually for sentences of a year or less. Specifically excluded from the census were drunk tanks, lock-ups, and similar "holding facilities" that do not hold persons after they have been formally charged. State-operated jail systems in Connecticut, Delaware, Hawaii, Rhode Island, and Vermont were also excluded, as were juvenile institutions, community-based prerelease facilities (halfway houses, work-release or study-release facilities, etc.), hospitals for the criminally insane, treatment facilities for drug addicts and/or alcoholics, and jails located in United States territories.

The mailing list used for the census was derived from the National Justice Agency List, which is maintained by the Census Bureau for the Bureau of Justice Statistics. This list was reviewed against the following sources:

- The 1978 edition of *American Correctional Association Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Paroling Authorities*, and
- The 1978 State Comprehensive Law Enforcement Plans prepared by each State for the Law Enforcement Assistance Administration.

Survey period

This report reflects jails operating on February 15, 1978. Information on inmate deaths is for calendar 1977.

Data collection

The census was conducted by mail, with an initial mailout of 3,761 questionnaires in February 1978. (The final universe of 3,493 was reached after eliminating facilities that were not in operation on the census reference day or did not meet the criteria for a jail.) Two survey questionnaires were used—a CJ-3 form sent to 651 jails with an average daily inmate population of 50 or more and a CJ-4 form sent to 3,110 jails with an average daily inmate population of less than 50. (The average daily population figure was based on the 1977 Directory Survey of Law Enforcement Agencies and Jails). Nonrespondent jails were sent second mail requests and then mailgrams. Telephone contact was made if necessary. A response rate of 99 percent was achieved. The mail questionnaires used in the census are exhibited in the appendix.

Telephone followup procedures were also used to clarify inadequate and inconsistent census returns.

Limitations

Because a complete census was conducted of all local jails meeting the selection criteria, the data are not subject to sampling error. The data are subject to response error, however. Such error was kept to a minimum through quality control checks. In this regard, it should be noted that for any items on the census questionnaire unobtainable from available records, reasonable estimates were requested.

The data reported in this publication do not reflect changes that have taken place since February 1978.

All data reflect State-by-State variation in legal codes and procedures, governing a jail's retention authority, and facility-by-facility variation in inmate classification and housing practices. Thus caution is required when making comparisons.

Definitions

**Local jail.** A confinement facility administered by a unit of local government (county or city) intended for adults but sometimes holding juveniles that holds persons detained pending adjudication and/or persons committed after adjudication, usually for sentences of a year or less. Temporary holding facilities ("lock-ups") that do not hold persons after they have been formally charged in court (usually within 48 hours of arrest) are excluded.

**Adult.** A person who is within the original jurisdiction of a criminal, rather than a juvenile, court because his or her age at the time of an alleged criminal act was above a statutorily specified limit.

**Juvenile.** A person subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law. Persons above the statutory age limit for juveniles who are being held under special "youth statutes," e.g., "youthful offenders" in California, "adolescents" or "minors" in New York, etc. are classified as adults.

**Confinement unit.** Any cell, room, dormitory, or other unit where inmates spend the night. Confinement units are further categorized as:

- **General purpose units.** Units intended to house the general inmate population.

- **Special purpose units.** Units intended to meet specialized housing needs, e.g., an infirmary, trustee cells, isolation cells, etc. Special purpose units can include both units with beds and those without beds, e.g., "drunk tanks," "bull-pens," etc.

**Bed capacity.** The number of beds in a jail calculated by multiplying the number of confinement units of each design size (e.g., 1, 2, 3, 4, or 5 or more persons) by its design size and summing the results for all size categories. Includes beds in general purpose units and special purpose units with beds.

**Jail employees.** All payroll and nonpayroll personnel who work at a jail full-time or part-time.

- **Full-time personnel.** Personnel who work full-time at the jail.

- **Part-time personnel.** Personnel who work part-time at the jail including full-time employees who perform other duties in addition to those at the jail. Jail employees are further categorized as:

- **Administrative.** Chief jailer (or sheriff or chief of police), deputies, and/or assistants who work at the jail in an administrative capacity.

- **Custodial officers.** Guards, jailers, etc. who supervise the inmate population.

- **Clerical and maintenance personnel.** Typists, secretaries, janitors, cooks, ground-keepers, etc.

- **Service personnel.** Teachers, social workers, counselors, psychologists, doctors, and other medical personnel, etc. who provide professional services to the inmates.

- **Other.** Personnel who can not be classified as one of the above.

- **Health interview/screening.** An initial assessment of an inmate's health from observation and medically related questions, made at the time of admission.

- **Medical physical examination.** A health assessment based on medical tests such as

taking blood pressure, blood or urine samples, chest x-ray, eye and ear examination, etc.

Availability of data

Copies of *Profile of Jail Inmates 1978* are available from the National Criminal Justice Reference Service, Box 6000, Rockville, Maryland 20850.

Data tapes for the 1978 jail census and survey of inmates are available for public use through the Criminal Justice Archive and Informational Network maintained for the Bureau of Justice Statistics. Information regarding the Archive and its procedures can be obtained by writing the Criminal Justice Archive and Informational Network, P.O. Box 1248, Ann Arbor, Michigan 48106 or by calling area code 313/763-3485.

A name and address listing of local jails can be obtained on magnetic tape, microfilm, computer printout or mailing labels. For details, contact the Bureau of Justice Statistics, U.S. Department of Justice, Washington, D.C. 20531.

<sup>1</sup>The health interview or "screening" is an initial assessment of the person's health which is made from observing and asking medically-related questions such as "are you on medication?", etc. Code 1 = all inmates receive a medical screening, 2 = none receive a medical screening, 3 = some receive a medical screening.  
<sup>2</sup>The physical examination involves such things as taking blood pressure, blood or urine sample, chest x-ray, eye and ear examination, etc. Code 1 = all inmates receive physical examination, 2 = none receive a physical examination, 3 = some receive a physical examination.  
<sup>3</sup>The "Other" category consists of those facilities having shared medical facilities, a hospital prison ward, etc.  
<sup>4</sup>Code 1 = frequency of sick calls in jail once a week, 2 = frequency of sick calls in jail 2 to 6 times a week, 3 = frequency of sick calls in jail is daily, 4 = never have sick call in jail.  
<sup>5</sup>The number given represents those inmates receiving medication under prescription at the time the questionnaire was completed by the facility.
