## INTRODUCTION

The purpose of this document is to provide a record of the number and characteristics of those individuals who have been committed to the custody of the Attorney General of the United States.

Trend tables, volume summaries and distributions of offender characteristics comprise this report. The trend tables provide comparative statistics for the last ten years on size, movement, average time served and average sentence length of offenders in Federal Prison System institutions.

For our users convenience, summaries of the volume of the Fiscal Years admissions and discharges, as well as the population on the last day of Fiscal Years 1976 and 1977, are included. The summary totals are the most accurate record of population size and change during the year. The reports on offender characteristics are organized into three sections: Year-End Population (Tables A), Admissions (Tables B) and Discharges (Tables C). Historical trend tables are included only in the 1977 section of this report.

Prior and current reports only present statistics on Federal Institution populations. Statistics concerning the nature of the population housed in non-federal facilities are not currently available, although there are data on the size of this group. Discharge Tables for Fiscal Year 1977 provide data on average sentence length and average time served of individuals transferred from Federal institutions to Contract Facilities and subsequently released on parole, mandatory release or by expiration of sentence. Data on the number and characteristics of the population in Federal facilities are prepared in Federal Prison System institutions and processed by the automated Inmate Information System in the Central Office in Washington, D.C.

Special attention should be given to the representativeness and completeness of the data in the characteristics tables. These data pertain only to the Federal offender population housed in Federal institutions during or on the last day of the fiscal year. Further, the data describe primarily the sentenced population. Because the unsentenced population is transient in nature, it is difficult to obtain a complete profile of their characteristics. However, since more than 95% of the Federal offender population is under sentence, it is assumed that the characteristics of the sentenced population are representative of the total offender population in Federal institutions.

To aid the reader, reports which are not 100% complete are annotated with the actual reporting universe and the completeness of the report as a percentage of that universe. For example, there were 25,954 sentenced prisoners in Federal institutions on June 30, 1976. A report on the sentenced population, which only totals 24,430, will be annotated "Universe = 25,954," and "Completeness = 94.1%." To further aid interpretation, some of the reports which show average sentence length have two total lines. Depending upon other variables in the report, average sentence length statistics can be heavily skewed by the very short sentences for immigration offenses, and the very long sentences for violent crime offenses. For this reason, one total line including and one total line excluding these two offense classes are provided. The violent crimes class includes assault, kidnapping, robbery, homicide, and rape. Each of these reports has been footnoted.

If this document does not satisfy your needs for information on the Federal offender population, please advise us and attempts will be made to accommodate the changes that you suggest.

FISCAL YEARS 1976 - 1977  
YEAR-END POPULATION DATA SUMMARY

<u>Population Size</u>	<u>Fiscal Year 1976</u>	<u>Fiscal Year 1977</u>
Sentenced Population	25,954	28,482
Unsentenced Population	1,080	1,395
On Furlough	123	385
	<u>27,157</u>	<u>30,262</u>
Housed in Non-Federal Facilities	5,835	5,474

The approximate distributions by race and sex are as follows:

	<u>Fiscal Year 1976</u>	<u>Fiscal Year 1977</u>
White	62.1	60.2
Black	36.0	38.1
American Indian	1.6	1.4
Asian	0.2	0.2
Other	0.1	0.1
Male	94.8	94.3
Female	5.2	5.7

On September 30, 1977, the Bureau's inmate population numbered 30,262 an increase of 3,105 or 11.4 percent over the June 30, 1976 Fiscal Year-End count. Commitments from the courts made up the major part of our sentenced population. Parole and mandatory release violators represented 6.8 percent of our population in 1976 and 7.7 percent in 1977. The most frequent offense categories among the sentenced population were Drug Law violations, Robbery and Larceny-Theft offenses (included are Postal Larceny, National Motor Vehicle Theft Act and Theft from Interstate Commerce).

\* Population reporting is done on a fiscal year basis. The base figure for each year's statistic is the population count at each Federal facility at midnight on the last day of the prior fiscal year. This count is always less than the total number of individuals assigned to serve sentence in Federal institutions. Many are in temporary release status, in-transit between institutions, or temporarily housed in non-Federal facilities during their participation in a legal process. They return to the incarcerated population and have to be considered when determining the net change in population size during the subsequent fiscal year.
