Preface

This is the ninth annual edition of the SOURCEBOOK OF CRIMINAL JUSTICE STATISTICS. Throughout each of these editions, the underlying rationale for the development of this compendium has remained salient. Briefly, it was felt that despite a growing sophistication in the general area of criminal justice data bases and information systems, many of these statistics were not widely known, much less utilized, by many in the criminal justice field. In part, this situation is a function of the traditional governmental and functional fragmentation of the many components of the criminal justice system in the United States. Therefore, the primary goal of the SOURCEBOOK OF CRIMINAL JUSTICE STATISTICS is to bring together into a single, comprehensive, reference volume, existing nationwide statistical data of interest to the broad criminal justice community. As such, SOURCEBOOK materials span agency, governmental, and functionally-specific boundaries.

The data included in this compilation are almost exclusively nationwide in scope. In instances where information is available only for groups of cities, States, and jurisdictions, these data are included if the topic represents an area of important substantive concern to the criminal justice field. Whenever possible, nationwide data are displayed by regions, States, or cities, both to enhance the utility of the information for local decisionmakers and to facilitate comparative analyses. An effort has been made to focus on State and local data rather than Federal data because Federal agencies handle only a small portion of crime-related transactions, and these Federal transactions may not be representative of the volume and nature of criminal justice transactions at other levels of government. However, the nationally-coordinated collection and reporting of State and local criminal justice statistics is relatively rare. Therefore, data relating to the Federal Government are often presented in the SOURCEBOOK because they are the only data available on a particular topic or the only data adequate for some purposes. The aim of SOURCEBOOK is *not* to compile data from individual States and localities, but rather to present data that have already been compiled and published by coordinating agencies or organizations.

Reporting periods

An important factor in the utility of a compendium such as SOURCEBOOK is the timeliness of the data contained therein. In each edition of SOURCEBOOK, an effort is made to focus on the most recent data available in each substantive area of relevance to criminal justice. Where possible, recent data are combined with information for earlier years to provide a basis for determining trends. Unfortunately, many agencies do not maintain reasonably current publishing schedules; consequently, their "most recent" reports

may pertain to data that are several years old at the time the publication is issued. In addition, data from special (nonannual) reports are included in the SOURCEBOOK. A further complication is that many agencies report data for fiscal years, which usually bridge two calendar years. As a result, it is frequently impossible to find a "common year" for which data from different sources are available, making comparisons of data from different sources difficult and somewhat imprecise.

It should also be noted that the fiscal year period for the Federal Government was changed in 1976, affecting comparability of time periods in some trend tables reporting Federal data. Prior to and including 1976, the Federal Government operated on a fiscal year that ran from July 1 through June 30. Beginning in October 1976, the Federal fiscal year encompasses the period Oct. 1 through Sept. 30. The period July 1-Sept. 30, 1976 is referred to as the "transition quarter." In some sources, data for the transition quarter are reported separately; in other sources, transition quarter data are included in the preceding or following fiscal year period. In still other sources, data for the transition quarter are not reported. SOURCEBOOK users are advised to consult the explanatory note attached to these tables in order to determine the time periods covered by the data.

In each successive edition of the SOURCEBOOK, an effort is made to update and expand upon the statistical data contained in previous editions. For annual publications such as the *Uniform Crime Reports*, the Federal Bureau of Prisons' *Statistical Report*, and other agency reports, annual updating simply involves replacing older information with newer information, taking care to identify any changes in methodology or reporting procedures that may have been introduced and that should be brought to the user's attention. For nonannual and special republishings (such as surveys, research reports, public opinion polls, and others), updating and expansion involves exhaustive searches for new or more recent material. Where it was deemed desirable, data from previous editions of the SOURCEBOOK have been retained, either alone or in conjunction with more recent information. In some cases, the topic covered by the previously presented data has remained an issue of substantive concern to the criminal justice community, but more recent statistical information on the topic has not been reported. In other cases, previously presented material is retained in conjunction with newer data to provide a perspective on trends.

Many tables in this volume have been developed by the SOURCEBOOK staff from previously untabulated data. In constructing these tables, an effort has been made to present these data in ways most useful to researchers, planners, operating agency personnel, and others.

Reliability of the data

It is clear that the data in this SOURCEBOOK cannot be any more reliable or complete than the original sources from which the data were taken. Accordingly, responsibility for the quality of the data must be borne by the original sources; responsibility for the selection and presentation of sources and tables rests with the SOURCEBOOK staff.

With few exceptions, the bodies of the tables presented in the SOURCEBOOK appear exactly as presented in the original sources. Although this involves some sacrifice in uniformity of tabular presentations, it is consistent with the major function of the SOURCEBOOK, which is to bring together data from diverse sources for presentation as originally published, rather than to transform or recompute the original data. As in previous editions, however, an attempt has been made to present more tables that were compiled by SOURCEBOOK staff. Such tables reflect a desire by the SOURCEBOOK staff to present trend data and State-by-State information about various characteristics or practices of criminal justice agencies or systems determined by statute, regulation, or administrative policy. Often, these kinds of data had to be reworked into appropriate tabular form from original sources. A table is considered to have been constructed by SOURCEBOOK staff when: (a) the table has been generated by the SOURCEBOOK staff from machine readable data provided by an agency, or (b) when the table has been derived from a narrative presentation. A table is considered to have been adapted by SOURCEBOOK staff when non-substantive modifications have been made to the original data for presentation in SOURCEBOOK.

Explanatory notes

Each table presented in the SOURCEBOOK includes several components designed to facilitate use of the data and ready access to the appropriate table. First, each table is labelled with a title. The title contains a description of the substantive topic of the information, the level of aggregation of the data, the major independent variables through which the data are broken down, and the time period represented by the data. Subject entries used in the Index at the end of the book are developed on the basis of the descriptive contents of these table titles.

Second, several forms of explanatory and cautionary notes are attached to the SOURCEBOOK tables. These notes are of three types, all of which provide background information or definitions helpful in using the tables. Those that begin with "NOTE: . . ." are written by the SOURCEBOOK staff or are adapted by SOURCEBOOK staff from narrative information in the original source. These notes may include information such as the agency or group sponsoring the data collection effort; summaries of survey procedures and response rates; brief definitions or explanations of terms, statutes, or variable categories presented in the table; and other information. In addition, some tables include brief notes in brackets "[]" immediately above the table body. These bracketed notes contain information that was attached to the table as presented in the original source.

Occasionally, such notes are provided by SOURCEBOOK staff to clarify the meaning of table entries. Finally, some tables include explanatory footnotes at the bottom of the table body; these footnotes are reprinted as they appeared in the original source. Often, these footnotes are keyed to specific table entries or variables that require additional explanation.

For sources that use complex survey methods or that require an extensive list of definitions of terms, the SOURCEBOOK staff prepares an explanatory appendix. These appendices, which are included at the end of the SOURCEBOOK, are designed to provide additional information and clarification regarding the data that are presented. Although the appendices provide more detailed information regarding these sources, even those sources for which appendices have been provided should be consulted for more complete and detailed explanations.

Cross-references to previous editions

Since the 1974 edition of SOURCEBOOK, the List of Table and Figure Equivalents has been provided to facilitate cross-references to earlier editions of SOURCEBOOK. This list specifies, for each table and figure appearing in the present edition, whether there is an equivalent table with data from an earlier year or an identical table with data repeated from the previous edition. This list, which should assist users interested in making comparisons with data contained in earlier editions, appears as part of the List of Figures and Tables; its use is explained in more detail at the beginning of that list.

Annotated sources and publishers list

Another aid developed to encourage use of the data sources presented in the SOURCEBOOK is the annotations of sources used in the compilation. Publications from which tables or figures have been taken for presentation in the SOURCEBOOK are described in these annotations. These summaries, which appear before the Appendices, include standard bibliographic information, plus additional elements such as periodicity of the publication, dates of tabular information appearing in the source (many sources, even annual reports, contain data for a number of years), a short summary of the contents of the source, and a listing of tables and figures in SOURCEBOOK that were taken from the source. The addresses of the publishers follow the annotations. This list has been provided so that readers may obtain a copy of the original document.

A Note on definitions of terms

Because data from so many sources are included in the SOURCEBOOK, similar or identical terms sometimes have different referents when used by different sources. For example, terms such as "case," "caseload," "rate," and "race/ethnicity," are differentially used by sources. Therefore, care should be exercised in ascertaining the meaning of terms as they are used by various sources. In an attempt

to aid the user in this regard, many definitions have been supplied in notes on tables and in the appendices to which table notes refer. Although an attempt has been made to provide definitions of terms that may be unclear or misleading, it is virtually impossible in a compilation of this type to provide, for each table, an exhaustive list of definitions and explanations that will satisfy the needs of all users.

Users with strong interests in particular tables—especially users who are not familiar with the substantive area to which those tables refer—are advised to consult the original sources for a more comprehensive explanation of subtleties with respect to data collection procedures, data exclusions, definitions of terms, and so on.

Organization of the SOURCEBOOK

The data included in the SOURCEBOOK have been divided into six sections. The first, "Characteristics of the Criminal Justice Systems," includes data on the number and types of criminal justice agencies and employees, criminal justice expenditures, workload of agency personnel, and so on. This section also includes most of the tables that summarize statutory, regulatory, or administrative characteristics or practices of criminal justice agencies on a State-by-State basis. The next section, "Public Attitudes Toward Crime and Criminal Justice-Related Topics," contains the results of nationwide public opinion polls on subjects such as fear of victimization; the death penalty; wiretaps; gun control; drug use; and evaluation of law enforcement, judicial, and correctional agency performance. In the third section, "Nature and Distribution of Known Offenses," data on several indicators of the extent of illegal activities can be found. These include proportions of persons reporting that they have used various drugs; surveys of individuals, households, and businesses that may have been victims of crimes; and law enforcement agency counts of offenses reported to them. The fourth section, "Characteristics and Distribution of Persons Arrested," includes counts of arrestees by age, sex, race, and area; proportions of known crimes cleared by arrests; and counts of illegal goods seized. "Judicial Processing of Defendants," the fifth section, contains information on the number of juveniles and adults processed through the courts, as well as the characteristics, dispositions, and sentences of the defendants. Finally, the sixth section, "Persons Under Correctional Supervision," provides data about persons on probation and parole, population and movement of inmates of Federal institutions, and characteristics of State prison inmates. This section also presents data on offenders executed, as well as offenders currently under sentence of death. Each of these six major sections into which the SOURCEBOOK is divided is introduced by brief comments giving a more detailed overview of the data contained in that section.

Sources of criminal justice data

Statistical information about crime and the criminal justice system in the United States is gathered and published by hundreds of operating agencies, academic institutions, re-

search organizations, public opinion polling firms, and other groups. These sources of data represent both the private and public sector, and within the public sector, the many levels of government that are involved in the collection and dissemination of criminal justice statistical data. Most SOURCEBOOK users are familiar with some of the most well known sources, such as the *Uniform Crime Reports* program of the Federal Bureau of Investigation and the annual series on *Prisoners in State and Federal Institutions* published by the Bureau of Justice Statistics.

In this section, the primary data sources on crime and criminal justice that are contained in the SOURCEBOOK are reviewed. The purpose of this brief summary is to familiarize the SOURCEBOOK users with the types of statistical data available in selected substantive areas, as well as to illustrate the areas in which deficiencies in availability of statistical data exist.

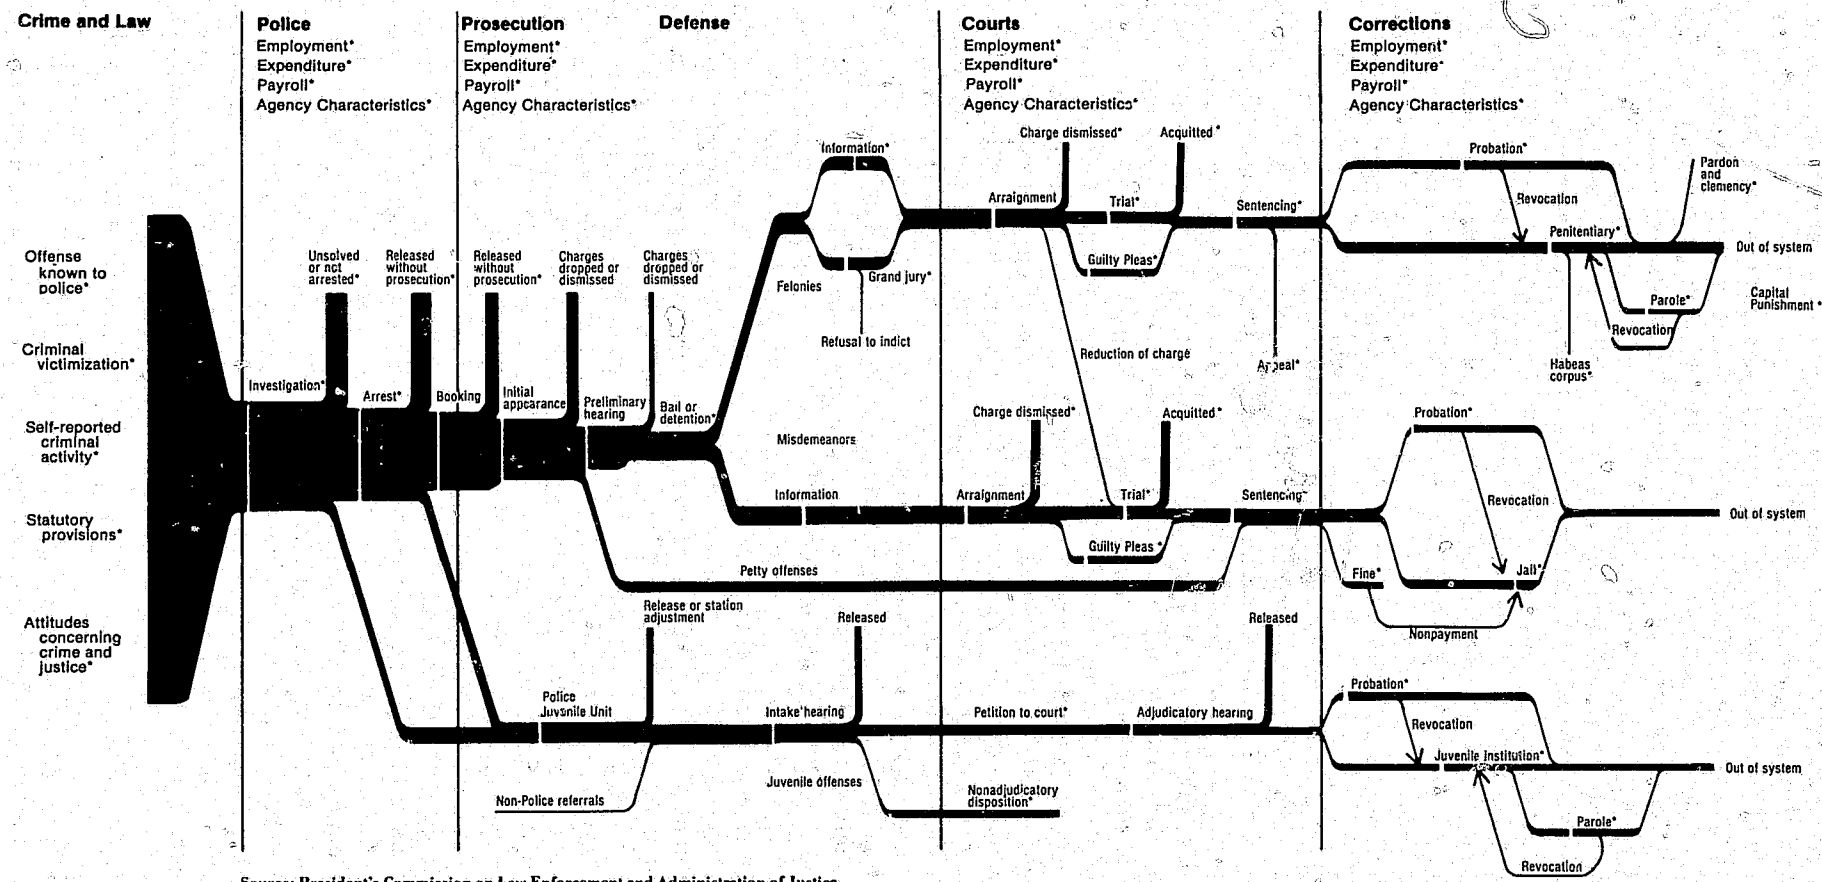

There are two primary sources of nationwide statistical data on the nature and extent of criminal activity in the United States. The *Uniform Crime Reports*, issued annually by the Federal Bureau of Investigation, reports the volume and rate of "crimes known to the police." These data are compiled by the FBI on the basis of information provided by local law enforcement agencies throughout the United States. Another source of data on the nature and extent of crime is the annual series of reports of the *National Crime Survey*, conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. The *National Crime Survey* data, derived from interviews with samples of households designed to be representative of the Nation, report on the estimated number and rate of personal and household victimizations.

These data are supplemented by a variety of data derived from self-report surveys on drug and alcohol use, gambling, and other illegal activities that are reported by several organizations. Agencies with specialized law enforcement functions, such as the Securities and Exchange Commission, Postal Inspection Service, Drug Enforcement Administration, Secret Service, and others collect statistical information on case processing and agency activities. In addition, private organizations such as the Association of American Railroads, American Humane Association, and National Education Association publish data on various forms of illegal activity related to their organizational purposes.

Information on personnel and expenditures for the criminal justice system is found in a variety of sources. Government publications, such as the *Budget of the United States Government* and agency annual reports, provide data on expenditures for criminal justice-related activities. The Bureau of Justice Statistics' publication, *Expenditure and Employment Data for the Criminal Justice System*, compiles data on criminal justice agency personnel, payroll, and expenditure. Various special surveys, such as the *Census of Local Jails*, the *Census of State Correctional Facilities*, and the *State Salary Survey* of probation and parole personnel conducted by the U.S. Office of Personnel Management contain information on personnel, source of funding, and expenditures for these segments of the criminal justice system. These sources are augmented by surveys con-

Figure A An overview of data included in the Sourcebook of Criminal Justice Statistics

NOTE: This figure has been adapted from the President's Commission on Law Enforcement and Administration of Justice to indicate areas in the criminal justice system for which data have been included in the Sourcebook. (These areas are marked with asterisks.) Using the criminal justice headings in this figure, the reader may refer to the Index at the end of the Sourcebook to locate relevant data.

Figure B An overview of data included in the SOURCEBOOK OF CRIMINAL JUSTICE STATISTICS, using table of contents entries

NOTE: The number in parentheses before each entry indicates the section of the SOURCEBOOK where data on that topic are found.

CRIME AND LAW	POLICE	PROSECUTION AND DEFENSE	COURTS	CORRECTIONS
(1) Criminal and civil justice agencies	(1) Employment and payroll for police services	(1) Expenditures, workload, employment, and payroll for defense activities	(1) Expenditures, employment, payroll, and salaries, of Federal judicial and court administrative personnel	(1) Expenditures, employment, and payroll for correctional activities
(1) Expenditures, employment, and payroll for criminal justice activities	(1) Salaries and employment characteristics of State police	(1) Employment and payroll for legal services and prosecution activities	(1) Workload and duties of the Federal Judiciary	(1) Employment, workload, and salaries for probation/parole officers
(1) Characteristics of crime victim compensation programs	(2) Attitudes toward performance of police	(1) Employment and salaries of attorney general's offices	(1) Characteristics of presidential appointees to Federal judgeships	(1) Characteristics of public and private juvenile facilities, staff, and residents
(1) Characteristics of intermittent confinement legislation	(2) Attitudes toward police use of force	(5) Requests for immunity by Federal prosecutors	(1) Expenditures, employment, and payroll for State judicial activities	(1) Utilization of drug abuse treatment service units
(1) Characteristics of privacy legislation	(4) Arrests, national estimates	(5) Cases argued and pending in U.S. Attorney's offices	(1) Qualification requirements, salaries, selection process and terms of office of trial and appellate judges	(1) Employment of and salaries for State correctional officers
(1) Characteristics of gun control legislation	(4) Number and rate of arrests	(5) Antitrust cases filed in U.S. District Courts	(1) Expenditures for and utilization of grand and petit jurors	(1) Unionization of State correctional officers
(1) Characteristics of marijuana legislation	(4) Characteristics of persons arrested	(5) Environmental, Economic Stabilization Act, and Energy Allocation Act cases filed in U.S. District Courts	(1) Statutory provisions governing age for juvenile court jurisdiction	(1) Characteristics of adult correctional and pre-release facilities
(2) Attitudes toward extent of crime	(4) Arrests in cities	(5) Cases referred to the U.S. Department of Justice for prosecution by the Securities and Exchange Commission	(1) Statutory provisions governing waiver of juveniles to criminal court	(1) Mental health staff and services in adult correctional facilities
(2) Attitudes toward safety in the home	(4) Arrests in suburban areas	(5) Prosecutions of violations of Immigration and nationality laws	(2) Public confidence in the U.S. Supreme Court	(1) Court orders and decrees about conditions in adult correctional facilities
(2) Attitudes toward safety on the streets	(4) Arrests in rural areas	(5) Prosecutions of corrupt officials	(2) Attitudes toward severity of courts	(1) Workload of U.S. Parole Commission hearing examiners
(2) Fear of crime	(4) Arrest rates		(5) Delinquency cases disposed of by juvenile courts	(1) Representation at parole consideration and revocation hearings
(2) Crime prevention precautions employed	(4) Clearance rates		(5) Court-authorized interception of wire and oral communication	(1) Statutory regulations on deinstitutionalization of juveniles
(2) Attitudes toward selected social issues	(4) Arrests for alcohol-related offenses		(5) Cases filed in U.S. District Courts	(2) Attitudes toward deterrent effect of prison sentences
(2) Attitudes toward causes of crime	(4) Arrests, self-report data		(5) Proposed and actual time limits for judicial processing	(2) Attitudes toward purposes of imprisonment
(2) Attitudes toward methods of dealing with crime	(4) Juvenile offenders taken into police custody		(5) Defendants disposed of in U.S. District Courts	(2) Attitudes toward capital punishment
(2) Attitudes toward legislation of abortion	(4) Arrests for drug law violations		(5) Prisoner petitions filed in U.S. District Courts	(6) Persons under supervision of the Federal Probation System
(2) Attitudes toward confidentiality of news sources	(4) Drug seizures		(5) Appeals filed in U.S. Courts of Appeals	(6) Drug users admitted to federally-funded drug abuse treatment programs
(2) Gun ownership	(4) Seizures by the U.S. Customs Service		(5) Petitions for writ of certiorari to the U.S. Supreme Court	(6) Characteristics of residents of public and private juvenile custody facilities
(2) Attitudes toward gun control	(4) Aliens deported from the United States		(5) Executive clemency applications	(6) Number and rate of inmates in local jails and characteristics of jail inmates
(2) Attitudes toward the use and effect of drugs and alcohol	(4) Activities of the U.S. Secret Service		(5) Dispositions and sentences of defendants charged with drug law violations in U.S. District Courts	(6) Number and rate of sentenced prisoners under 18 years of age in adult correctional facilities
(2) Attitudes toward legislation of marijuana	(4) Arrests for offenses against railroads		(5) Dispositions of persons arrested for offenses against railroads	(6) Prisoners in, rates of incarceration for, admissions to, and movement of prisoners in State and Federal Institutions
(2) Attitudes forbidding the sale of alcohol	(5) Criminal investigations by the U.S. Postal Inspection Service		(5) Dispositions of arrests by the U.S. Secret Service	(6) Characteristics of inmates in State correctional facilities
(2) Attitudes toward pornography			(5) Military:	(6) Movement of prisoners in, admissions to, and releases from Federal correctional facilities
(3) Estimated number of personal, household, and business victimizations			(5) Army personnel tried and convicted in U.S. Army General and Special Courts-Martial	(8) Life-term prisoners in correctional institutions
(3) Estimated percentage of non-reported personal and household victimizations			(5) Air Force personnel tried and convicted in U.S. Air Force General and Special Courts-Martial	(8) Population of U.S. Army, U.S. Navy, and U.S. Marine Corps correctional facilities
(3) Estimated rate of personal and household victimizations			(5) Navy and Marine Corps personnel tried and convicted in U.S. Navy and Marine Corps General and Special Courts-Martial	(6) Residents in pre-release facilities
(3) Estimated number of personal and household incidents, by specific incident characteristics			(5) Coast Guard personnel tried in U.S. Coast Guard Special Courts-Martial	(6) Releases from State and Federal Institutions
(3) Estimated number of personal victimizations, by specific incident characteristics				(6) Movement of prisoners paroled and conditionally released from State and Federal Institutions
(3) Estimated rate and number of household victimizations				(6) Deaths among prisoners under the jurisdiction of State and Federal correctional authorities
(3) Changes in rates of personal and household victimizations between 1973 and 1979				(6) Capital punishment:
(3) Households touched by crime between 1975 and 1980				Prisoners under sentence of death
(3) Child abuse, characteristics of reports, victims, and perpetrators				State and Federal prisoners executed
(3) Estimated number of personal victimizations of teachers				
(3) Reported alcohol use				
(3) Reported drug use among adults and youth				
(3) Offenses known to the police				
(3) Offenses in U.S. park areas				
(3) Selected causes of death				
(3) Murders known to the police				
(3) Robberies known to the police				
(3) Aggravated assaults known to the police				
(3) Burglaries known to the police				
(3) Larcenies known to the police				
(3) Violations of Federal bank robbery statutes				
(3) Motor vehicle thefts known to the police				
(3) Property loss due to selected crimes				
(3) Federal officers killed and assaulted				
(3) Law enforcement officers killed				
(3) Persons identified as killing law enforcement officers				
(3) Assaults on law enforcement officers				
(3) Drug thefts and illegal drug prices				
(3) Bombing incidents known to the police				
(3) International terrorists incidents against U.S. citizens and property				
(3) Hijackings and other criminal acts related to air transportation				
(3) Crime insurance policies, claims, and losses				
(3) Offenses against railroads				

ducted by the National Center for State Courts, the National Council on Crime and Delinquency, the American Correctional Association, the Fraternal Order of Police, and other groups.

Data on clearance and arrest rates are provided primarily by the *Uniform Crime Reports*. In addition, agencies such as the Drug Enforcement Administration, Immigration and Naturalization Service, and others collect data on clearances and arrests in cases under their jurisdiction.

Court-related data for the Federal system come from the Administrative Office of the U.S. Courts and the Federal Prison System. Although no uniform standardized court reporting system (comparable to the *Uniform Crime Reports*) currently exists at the State level, in the past the National Center for State Courts' publication, *State Court Caseload Statistics*, contained State-by-State information relating to the activities of State courts.

Data on probation systems are provided by the American Correctional Association. Information on correctional institutions is found in a number of sources, including the *Prisoners in State and Federal Institutions* series published by the Bureau of Justice Statistics, as well as in special purpose reports such as the *Survey of Inmates of State Correctional Facilities*. Information on Federal prisoners is available in the annual *Statistical Report of the Federal Prison System*. In addition to these sources, data on prison populations and characteristics of correctional facilities and inmates are provided by surveys conducted by the American Correctional Association and numerous private research groups and individual researchers.

Statistics on parole services are collected and reported by the *Uniform Parole Reports* program of the National Council on Crime and Delinquency, the American Correctional Association, and the U.S. Parole Commission. Discharges from State and Federal correctional facilities are reported in the *Prisoners in State and Federal Institutions* series issued by the Bureau of Justice Statistics.

In the juvenile justice system, data on offenses and on juveniles taken into custody are reported by the Federal Bureau of Investigation's *Uniform Crime Reports*. Data on the volume of cases disposed of by juvenile courts are provided in *Delinquency 1978* by the National Center for Juvenile Justice.

Juvenile correctional data are provided by a number of sources. The *Children in Custody* series issued by the Office of Juvenile Justice and Delinquency Prevention reports data on the number of juveniles held in public and private juvenile correctional facilities. In addition, the American Correctional Association collects data on juvenile correctional facilities, probation and parole officers, and juveniles under correctional supervision. There is no nationwide reporting system that collects data on parole ("aftercare") outcome for juveniles.

Figures A and B are included here to help provide the SOURCEBOOK user with an idea of the availability of criminal justice data from a systematic perspective. In Figure A, the flow-chart originally published by the President's Commission on Law Enforcement and Administration of Justice has been adapted to indicate where data are available and

where gaps exist. In this figure, asterisks have been attached to those areas of the criminal justice process for which data are presented in the SOURCEBOOK. Entries in this figure without asterisks are entries for which the relevant data are either unavailable or do not meet the SOURCEBOOK inclusion criteria.

From Figure A, the user might be tempted to conclude that the SOURCEBOOK now includes a wide range of system-wide data, and that major gaps in various stages of the justice process are becoming scarce. Such a conclusion, however, would not be justified. In a recent review of sources of basic criminal justice statistics, the Director of the National Council on Crime and Delinquency Information Center reported that the "availability of statistical data on crime and criminal justice in the United States ranges from a total lack of fundamental figures on some subjects to extensive, exotic minutiae on others." Moreover, the review reported that the coverage of these data is neither uniform, regular nor comparable in terms of reporting over time and across political subdivisions (Source: Eugene Doleschal, "Sources of Basic Criminal Justice Statistics: A Brief Annotated Guide with Commentaries," *Criminal Justice Abstracts*, Vol. 11, No. 9, March 1979).

These limitations of national criminal justice data availability can be seen by reference to Figures A and B. For some areas, such as the measurement of crime and the number of persons under correctional supervision, relatively comprehensive data sources are available on an annual basis. However, for many other areas of the criminal justice system, including the pretrial stages, court processing stages (such as grand jury, jury trial, and others), sentencing, and post-dispositional outcome for juvenile offenders, the available data may be comparatively meager and of limited coverage, particularly at the State and local government levels. In some instances, most of the available data pertain only to the Federal system.

A more detailed picture of the availability of data across the system is presented in Figure B. From Figure B, it can be seen that far more data are available in the "Corrections" area than in the "Prosecution" area. Moreover, a much greater variety of information than can be easily charted in Figure A is actually presented in SOURCEBOOK. When consulting these two figures, it should be understood that, as of this edition, criminal justice data are (a) lacking in a number of important areas; (b) uneven in terms of quality and comprehensiveness; and, (c) not uniformly collected at the Federal, State, and local levels of government. For more detailed information on the contents of the sources discussed above and on criminal justice data sources generally, readers are advised to consult the Annotated List of Sources and References in this volume.

Each year the staff of the SOURCEBOOK reviews hundreds of research reports, journals, books, agency annual reports, and other sources to select data for SOURCEBOOK. Initially, the material is reviewed to determine whether the subject matter is appropriate and consistent with the purpose of the SOURCEBOOK. Methodological characteristics of the source materials, such as representativeness, adequate response rates, and coverage of the data, are ex-

amined. In some cases, follow-up contact between the SOURCEBOOK staff and authors and researchers is required to clarify procedures and to determine definitions of terms used in various studies. The result of this search is a wide variety of data sources that represent nearly all stages of the criminal justice system.

Because the SOURCEBOOK is an annual publication, critical comments and suggested changes will be especially helpful in the preparation of subsequent editions. Of special interest are suggested sources of criminal justice-related data—preferably, but not necessarily, national in scope—that have not been included in this edition. Although some sources were intentionally excluded or were unavailable at

the time that this volume went to press, there may be other sources that have been overlooked. In revising the SOURCEBOOK, it will also be helpful to know the purposes for which it was consulted and the extent to which the SOURCEBOOK was useful in achieving those purposes. A special page for comments and suggestions has been included at the end of the book, immediately following the Index. When cut out, folded, and taped as indicated, the page forms a preaddressed self-mailer by which the desired information can be furnished to the Bureau of Justice Statistics of the U.S. Department of Justice and transmitted to the editors at the Criminal Justice Research Center, Albany, New York.

Guide to symbols used in tables

The following symbols have been used uniformly, unless otherwise noted in specific tables:

- Represents the quantity zero or rounds to less than half the unit of measurement shown.
- NA Data not separately enumerated, tabulated, or otherwise available.
- X Figure not applicable because column heading, stub line, or other contingencies make an entry impossible, absurd, or meaningless.
- B Not computed because the base figure is too small to generate a derived figure that meets statistical standards for reliability.
- ✓ Signifies the presence of the relevant attribute.
- () Figure in parentheses is the base on which percentages or other statistics in the table column or row have been calculated. A lower case italic letter in parentheses in a table cell is a footnote entry.
- No entry in original source; reason not differentiated in original source.

Where a different symbol meaning is used in order to preserve clarity within the context of a given table, this is so noted for that particular table.

Acknowledgments

Many people representing a variety of agencies and organizations have contributed their talents and efforts to the compilation of the ninth annual edition of SOURCEBOOK. The editors are grateful to all of these people who assisted in this work.

We especially appreciate the cooperation of those agencies that contributed the statistical data that is the raw material of SOURCEBOOK. In many cases, these agency personnel provided invaluable help by releasing prepublication copies of materials, assisting SOURCEBOOK staff in locating new types of data, and graciously answering myriad questions about definitions of terms, survey procedures, and limitations of specific statistical information. In this respect, the following persons were particularly helpful: Howard N. Snyder, National Center for Juvenile Justice; Gladys Lavelle, Federal Bureau of Prisons; Steven Schroefel, Immigration and Naturalization Service; Paul Cassagrande, Drug Enforcement Administration; and James McCafferty and the staff of the Administrative Office of the United States Courts.

Special thanks are due to the staff of the U.S. Department of Justice, Bureau of Justice Statistics for their continuing input to the project. In particular, Sue A. Lindgren, our project monitor, has spent many hours reviewing our draft materials and making substantive suggestions for the improvement of the SOURCEBOOK.

Again we have been fortunate to have the service of a dedicated and experienced staff within the Criminal Justice Research Center. As in previous editions, both the accuracy and attractiveness of the SOURCEBOOK have been enhanced by the talents of our Production Coordinator, Ann L. Pastore. Ann's contributions to SOURCEBOOK range from the creation of most of the graphic artwork in the volume to

overall responsibility for the many phases of the physical production of the manuscript. Her experience and demanding attention to detail are invaluable to the project, and we gratefully acknowledge our indebtedness to her. Sharleen Brittell, our Editorial Assistant, obtained the annual sources from agencies, translated the research staff's instructions, supervised copymarking, and maintained the project's permission to reprint files. Marjorie J. Jones and Laurie Martin provided valuable clerical assistance in the preparation of the manuscript. Gail Wells, our project typist, prepared most of the tables for the production process. Lowell Tarigjerd, our computer programmer, generated most of the National Crime Survey tables from machine-readable data tapes.

The SOURCEBOOK could not have been completed without the efforts of our research staff to identify, locate, evaluate, annotate, digest, document, and organize the vast amount of material to be considered for inclusion in the SOURCEBOOK. We are most grateful to Marilyn A. Chandler, Research Analyst, and Maureen McLeod, Bob Langworthy, and Kenneth Adams, Research Assistants, for their talent, expertise, and perseverance in this effort. Finally, we would also like to thank the administrative staff of the Criminal Justice Research Center for their continued assistance with the project.

In anticipation of public use of the SOURCEBOOK, we also wish to thank those users who provide us with feedback regarding their use of the SOURCEBOOK and with suggestions for additional inclusions in subsequent editions, either by using the questionnaire at the end of the book or by personal contact with the editors at the Criminal Justice Research Center, One Alton Road, Albany, New York 12203.

List of figures and tables and List of figure and table equivalents

To aid users who are interested in making comparisons with data contained in the 1980 SOURCEBOOK, the last column in the following list of figures and tables presents the number of equivalent tables and figures in the 1980 SOURCEBOOK. Table and figure numbers marked with an asterisk (*) contain identical data in both the 1980 and 1981 editions. These tables have been repeated from 1980 to 1981, with possible changes in titles and notation for accuracy and consistency within this edition. The table and figure identifiers in this column that appear without asterisks are those for which most recent data are presented in (generally) the same format as in the listed table from the earlier (1980) edition. Tables for which dashes (—) appear in the last column have no comparable table in the 1980 edition.

Figure	Page	Equivalent figure number in 1980 SOURCEBOOK	Figure	Page	Equivalent figure number in 1980 SOURCEBOOK
1.1 Criminal justice expenditures of Federal, State, and local governments, by type of activity, United States, fiscal years 1971 and 1979	5	1.2	2.9 Positive attitudes toward the job performance of local, State, and Federal law enforcement officials, United States, selected years 1967-81	196	—
1.2 Expenditures for criminal justice activities, by type of activity and level of government, United States, fiscal year 1979	7	1.3	2.10 Respondents approving of a policeman striking a citizen under certain circumstances, United States, selected years 1973-80	199	2.5
1.3 Criminal justice full-time equivalent employment for Federal, State, and local governments, by type of activity, United States, fiscal years 1971 and 1979	20	1.4	2.11 Respondents agreeing that courts in own area do not deal harshly enough with criminals, by race, United States, 1972-78 and 1980	206	2.6
1.4 Percent distribution of full-time police employees, by sex, United States, on Oct. 31, 1979	51	1.7	2.12 Attitudes toward capital punishment for persons convicted of murder, United States, selected years 1953-81	209	—
1.5 Estimated percent distribution of expenditures of Criminal Justice Act monies for defender services in Federal courts, by type of activity, fiscal year 1980	55	1.11	2.13 Gun owners' reasons for possessing a handgun or pistol, United States, 1978	214	2.8*
1.6 Expenditures for Federal courts, by type of expense, fiscal year 1980	78	1.8	2.14 Attitudes toward a Federal law requiring that all handguns be registered by Federal authorities, United States, 1975 and 1978-80	217	—
1.7 Selected personnel of the Federal courts, years ending June 30, 1972-80	81	1.9	2.15 Respondents favoring the legalization of marijuana use, United States, selected years 1969-80	226	2.10
1.8 Duties performed by magistrates in U.S. District Courts, year ending June 30, 1980	86	1.12	2.16 Respondents favoring a law forbidding the sale of alcoholic beverages, United States, selected years 1936-81	228	—
1.9 Juror expenditures in U.S. District Courts, by type of juror and expenditure, year ending June 30, 1980	110	1.13	3.1 Estimated percent of personal victimizations not reported to police, by type of victimization, United States, 1973-79	234	3.1
1.10 Pre-release facilities, by type and size of facility, United States, on Mar. 31, 1978	148	—	3.2 Estimated percent of household victimizations not reported to police, by type of victimization, United States, 1973-79	235	3.2
2.1 Perceptions about changes in the level of crime in own area, United States, selected years 1969-81	178	2.1	3.3 Estimated rate (per 100,000 females 12 years of age or older) of rape victimization, United States, 1973-79	245	3.4
2.2 Respondents feeling unsafe in their homes at night, United States, 1972, 1975, 1977, and 1981	179	—	3.4 Estimated rate (per 100,000 persons 12 years of age or older) of robbery victimization, United States, 1973-79	246	3.5
2.3 Attitudes toward personal safety on the streets compared to a year ago, United States, selected years 1966-81	180	2.3	3.5 Estimated rate (per 100,000 persons 12 years of age or older) of assault victimization, United States, 1973-79	246	3.6
2.4 Respondents reporting fear of walking alone at night, United States, selected years 1967-81	181	—	3.6 Estimated rate (per 100,000 persons 12 years of age or older) of personal larceny with contact victimization, United States, 1973-79	247	3.7
2.5 Reported fear of being murdered, robbed, or assaulted, United States, 1980	184	—	3.7 Estimated rate (per 100,000 persons 12 years of age or older) of personal larceny without contact victimization, United States, 1973-79	247	3.8
2.6 Respondents taking precautions for protecting their homes, by type of precaution taken, United States, 1980	186	—	3.8 Estimated rate (per 100,000 households) of household burglary victimization, United States, 1973-79	248	3.9
2.7 Respondents taking precautions against being victimized when going out, by type of precaution taken, United States, 1980	187	—	3.9 Estimated rate (per 100,000 households) of household larceny victimization, United States, 1973-79	248	3.10
2.8 Respondents rating selected problems as severe in own community, by community size, United States, 1977-78	188	2.4*			

Figure	Page	Equivalent figure number in 1980 SOURCEBOOK	Figure	Page	Equivalent figure number in 1980 SOURCEBOOK
3.10 Estimated rate (per 100,000 households) of motor vehicle theft, United States, 1973-79 . . .	249	3.11	5.1 Requests for immunity by Federal prosecutors to the U.S. Attorney General and witnesses involved in these requests, by origin of request, fiscal years 1973-80	385	5.1
3.11 Estimated rate (per 100,000 persons 12 years of age or older) of personal victimization, by sex of victim and type of victimization, United States, 1979	250	3.12	5.2 Civil and criminal trials argued by U.S. Attorneys' offices, fiscal years 1970-79	394	5.2
3.12 Estimated rate (per 100,000 persons 12 years of age or older) of personal victimization, by race of victim and type of victimization, United States, 1979	252	3.13	5.3 Civil and criminal cases pending in U.S. Attorneys' offices, by age of case, on Sept. 30, 1979	395	5.3
3.13 Estimated rate (per 100,000 persons 12 years of age or older) of personal victimization, by age of victim and type of victimization, United States, 1979	255	3.14	5.4 Criminal cases pending in U.S. Attorneys' offices, by offense, on Sept. 30, 1979	396	5.4
3.14 Victims of child abuse or neglect, by age and sex, 33 jurisdictions, 1979	278	3.17	5.5 Criminal cases filed in U.S. District Courts, by type of offense, year ending June 30, 1980	399	5.5
3.15 Perpetrators of child abuse or neglect, by age and sex, 33 jurisdictions, 1979	279	3.18	5.6 Criminal defendants disposed of in U.S. District Courts, by type of disposition, year ending June 30, 1979	408	—
3.16 Reported cocaine use and most recent use among high school seniors, United States, 1975-80	284	3.19	5.7 Civil and prisoner lawsuits against the Federal Government filed in U.S. District Courts, years ending June 30, 1960-80	414	5.6
3.17 Reported marijuana use and use in past month among adults, young adults, and youth, United States, selected years 1971-79	288	3.21*	5.8 Defendants in U.S. District Courts charged, convicted, and imprisoned for violations of drug laws, years ending June 30, 1945-79	422	—
3.18 Reported alcohol, cigarette, and marijuana use among adults, young adults, and youth, United States, selected years 1971-79	292	3.22*	5.9 Average sentence of imprisonment for defendants imprisoned for marijuana violations from U.S. District Courts, years ending June 30, 1962-79	423	5.7
3.19 Estimated rate (per 100,000 inhabitants) of offenses known to police, by type of offense, United States, 1960-79	294	3.23	5.10 Obscenity complaints received by the U.S. Postal Inspection Service and commercial pornography dealers convicted in Federal courts, fiscal years 1969-80	430	—
3.20 Estimated rate (per 100,000 inhabitants) of violent crime known to police, by offense and extent of urbanization, 1979	300	3.24	5.11 Criminal proceedings in cases referred by the Securities and Exchange Commission to the U.S. Department of Justice for prosecution, fiscal years 1968-79	434	5.8

Section 1:

CHARACTERISTICS OF THE CRIMINAL JUSTICE SYSTEMS

Data in this section provide information on the basic structure, organization, employment patterns, and expenditures of criminal justice systems in the United States. Because some criminal justice functions are primarily administered at the local level (e.g., local law enforcement agencies), and others are primarily administered at the county level (e.g., jails) or the State level (e.g., prisons), there are, indeed, many criminal justice systems to consider.

Information is presented on the structure, extent, and scope of various criminal justice activities throughout the Nation; accordingly, tables in this section address not only the number of agencies performing various criminal justice functions, but also expenditures, employment, and workloads of these agencies. Also integrated in this section are tables that present a variety of structural or legal characteristics of criminal justice systems.

This section begins with an overview of criminal justice agencies and subsequently presents more specific data in various areas of criminal justice: law enforcement, adjudication (including information on defense and prosecution, the judiciary, and jurors), juvenile justice, and corrections (including data on probation and parole and State correctional facilities).

The introductory overview describes the distribution of personnel and monies at Federal, State, and local levels of government for many criminal justice agencies and activities using information obtained largely from *Justice Agencies in the United States*, compiled by the Bureau of Justice Statistics (BJS).

The second segment of this section presents tables on police expenditures and employment gathered from the *Uniform Crime Reports* as well as the Bureau of Justice Statistics surveys.

The next part of this section details various aspects of the adjudication process. Data on defense and prosecutorial activities come from sources such as the National Association of Attorneys General. Information on the judiciary follows. The expenditures, employment, and workload of the Federal judiciary are highlighted as well as information on the judicial salaries, qualifications, terms of office, and methods of selection for State trial and appellate court judges.

Correctional activities, services, and organizations are described by a large number of data sources. In addition, expenditure and employment data, salaries, and characteristics of correctional organizations are included. Information is provided specifically on probation; public and private juvenile custody facilities; drug abuse treatment service units; Federal, State, and local adult correctional facilities; and parole.

The final segment consists of tables derived from statutory or administrative sources. Juvenile court jurisdiction, including provisions on the waiver of juveniles to criminal court and the deinstitutionalization of juveniles, are presented. Statutory regulations on crime victim compensation programs, intermittent confinement, the privacy of information, gun control, and marijuana conclude the section.

Table 1.1 Federal criminal and civil justice agencies, by type of agency or facility and location

NOTE: Between 1976 and 1978, the U.S. Bureau of the Census updated this directory of criminal and civil justice agencies for the U.S. Department of Justice, Bureau of Justice Statistics. These data summarize the results of the various surveys used to update the "National Justice Agency List." Agencies handling civil and criminal matters are included in the list because many agencies

have mixed criminal/civil jurisdictions and cannot provide separate budget, manpower, and caseload data for their civil and criminal functions. For an explanation of data collection, exact dates of survey data, and definitions of terms, see Appendix 1.

Table 1.3 Criminal justice expenditures of Federal, State, and local governments, by type of activity and expenditure, United States, fiscal years 1971-79

NOTE: This survey of expenditure and employment is conducted annually by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. In general, six categories of activity are covered: police protection, judicial, legal services and prosecution, public defense, corrections, and other. Data are also collected for each of three levels of government: Federal, State, and local. Local government coverage includes all county governments, all municipalities having a 1977 population of 10,000 or more, and a sample of the remaining cities and townships under 10,000 population. The survey panel was comprised, therefore, of the Federal Government, the 50 State governments, and 11,835 local governments (3,040 county governments, 6,728 municipalities, and 2,067 townships).

Because all State and county governments were surveyed, data relating to them are not subject to sampling error (i.e., variations that might result if a different sample were used.) However, data reported for local governments are estimates that are subject to sampling error. Local government estimates are accurate (at the 95 percent level of confidence) to within three-quarters of 1 percent of the totals that would have been expected if all local governments were surveyed.

Field compilation and mail canvass methods were used to obtain the data reported and were supplemented by reference to a variety of published government documents such as budgets, financial statements, and audit reports. Expenditure data are

generally for the fiscal year. For the Federal Government, fiscal year 1979 refers to the period beginning Oct. 1, 1978 and ending Sept. 30, 1979; State expenditure data cover the fiscal year ending June 30, 1979, except for New York (Mar. 31, 1979), Texas (Aug. 31, 1979), and Alabama and Michigan (Sept. 30, 1979). For local governments, the 1979 fiscal years reported are those that closed between July 1, 1978 and June 30, 1979; most municipalities and counties ended their fiscal years on Dec. 31, 1978 or June 30, 1979. Employment data are for October 1979, for all levels of government. For details of survey methodology and definitions of terms, see Appendix 2.

* The total line for each sector, and for the total criminal justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation that would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount. The intergovernmental expenditure lines are not totaled for the same reason.

^a Data for municipalities, and the local governments totals that include municipal data, are estimates subject to sampling variation; data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.
^b Estimated population of States as of July 1, 1977 is derived from U.S. Bureau of the Census Current Population Reports, Series P-25, No. 7901.

^c The relation of criminal justice total expenditure to total general expenditure is based on data for general purpose governments only and does not include data for State-operated liquor stores, independent school districts, or special districts.
^d Less than half the unit of measurement shown.

Table 1.14 Employment and payroll for State and local criminal justice activities, by State and level of government, October 1971-October 1979-Continued

(Dollar amounts in thousands)

Table with columns for State and level of government, and sub-columns for October 1971, October 1972, and October 1973. Each sub-column contains Full-time equivalent employment and October payroll. Rows include Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, and Oregon.

See footnotes at end of table.

Table with columns for State and level of government, and sub-columns for October 1974, October 1975, October 1976, October 1977, October 1978, and October 1979. Each sub-column contains Full-time equivalent employment and October payroll. Rows include Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, and Oregon.

* Data for municipalities, and the local governments totals that include municipal data, are estimates subject to sampling variation; data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.
 † Amounts do not add precisely to totals due to rounding.

Table 1.15 Federal criminal justice budget authorities and outlays, fiscal year 1980 (actual) and 1981-86 (estimated)

NOTE: These data are from the revised budget submitted by President Reagan to Congress on Mar. 10, 1981. The budget authority (actual or estimated) for each fiscal year includes appropriations for that year, as well as for future years, that have been approved by Congress. The outlays (actual or estimated) for the corresponding year are funded partially by the budget authority and partially through unspent funds allocated in previous years. "Outlays" are defined as values of checks issued, interest accrued on public debt, or other payments made, and net of refunds and reimbursements.

[In billions of dollars]

Table 1.16 Allocation of Office of Justice Assistance, Research, and Statistics (OJARS) funds, by type of budget activity, fiscal year 1981

NOTE: The Justice System Improvement Act of 1979 authorized the establishment of the Office of Justice Assistance, Research, and Statistics (OJARS) as the successor agency to the Law Enforcement Assistance Administration (LEAA). This new body is responsible for coordinating the activities of its component bureaus. Research and statistical activities are to be conducted by the National Institute of Justice (NIJ) and the Bureau of Justice Statistics (BJS), respectively.

[In thousands of dollars]

Type of budget activity	Fiscal year 1981
Total	\$144,397
Office of Justice Assistance, Research, and Statistics, total	124,244
Juvenile justice formula grants	60,819
Criminal justice formula grants (Part D)	0
National priority grants program (Part E)	0
General criminal justice grants program (Part F)	0
Training, total	0
Educational development	0
Prosecutor training	0
General criminal justice training	0
Crime prevention programs	0
Juvenile justice programs, total	36,250
Special emphasis	21,250
Juvenile Justice Institute	11,000
Technical assistance	3,000
Concentration of Federal efforts	1,000
Public Safety Officers' Benefits Program	12,500
Executive direction and control, Office of Juvenile Justice and Delinquency Prevention	2,535
Executive direction and control, Office of Justice Assistance, Research, and Statistics	0
Administrative services, Office of Justice Assistance, Research, and Statistics/Law Enforcement Assistance Administration	12,140
Executive direction and control, Law Enforcement Assistance Administration	0
Research and statistics, total	20,153
Research, evaluation, and demonstration programs	10,545
Justice statistical programs	5,242
Executive direction and control, National Institute of Justice	2,996

Table 1.19 Number and rate (per 1,000 inhabitants) of full-time police employees,^a by geographic division and size of place, on Oct. 31, 1979

NOTE: These data are collected annually by the FBI Uniform Crime Reporting Program. "Full-time police employees" includes both police officers and civilian employees. Police officers include all "full-time, sworn personnel with full arrest powers." This excludes persons performing guard or protection duties (e.g., school crossing guards) who are not paid from police funds. Civilian employees include persons such as clerks, radio dispatchers, meter maids, stenographers, mechanics, etc. Persons not paid from police funds are excluded. Employees on leave with pay are also excluded. U.S. Department of Justice, Federal Bureau of Investigation, *Uniform Crime Reporting Handbook* (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 77-81. These data are for employees who were on the payroll on Oct. 31, 1979. The "interquartile range" is defined as the range of values that includes the middle 50 percent of the cases in a distribution. For a list of States in geographic divisions, see Appendix 3.

Geographic division	Population group						
	Total (8,818 cities; population 143,946,000)	Group I (58 cities, 250,000 to and over; population 41,674,000)	Group II (110 cities, 100,000 to 249,999; population 16,000,000)	Group III (280 cities, 50,000 to 99,999; population 19,137,000)	Group IV (603 cities, 25,000 to 49,999; population 20,671,000)	Group V (1,515 cities, 10,000 to 24,999; population 23,641,000)	Group VI (6,252 cities under 10,000; population 22,824,000)

Table 1.23 Salary range for State troopers, by State, 1981

NOTE: These data were compiled by the Kansas Highway Patrol from an annual survey of State police agencies listed with the International Association of Chiefs of Police. The salaries listed are for the basic grade, first-line police officer, commonly titled "trooper" in State police agencies. Salaries for Iowa, Nebraska, Nevada, and South Dakota have been rounded to the nearest dollar.

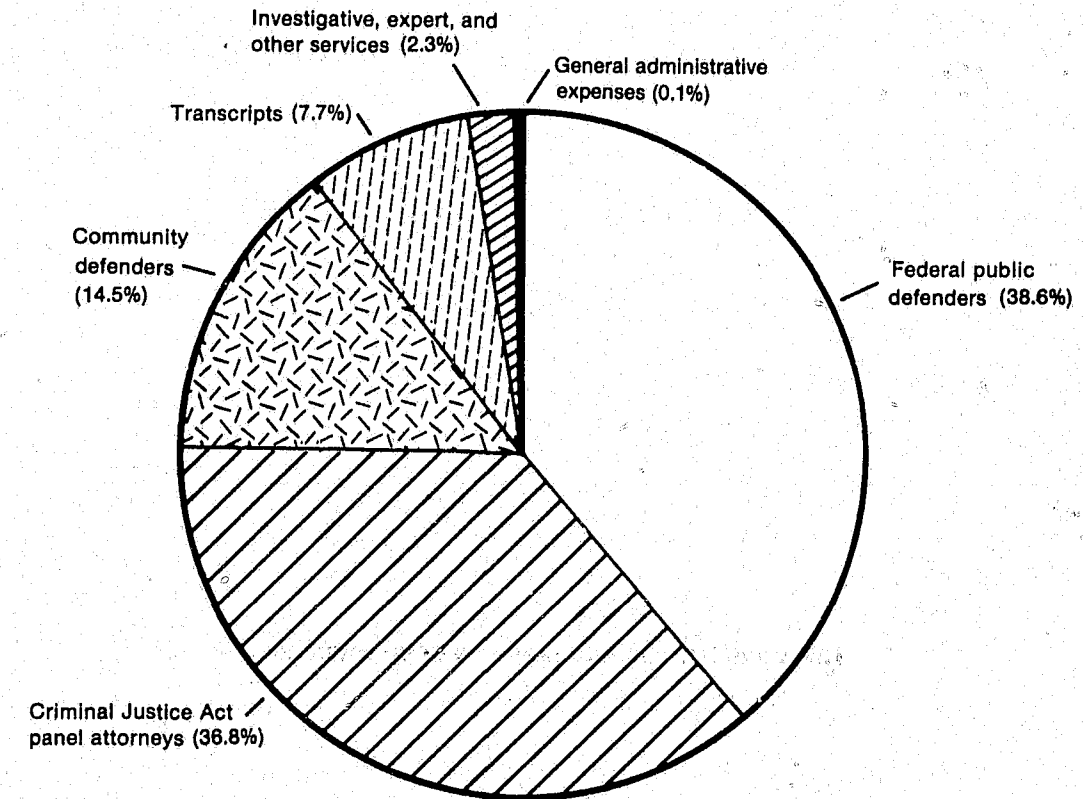

State	Beginning salary	Highest salary
Alabama	\$15,158	\$17,823
Alaska	21,408	29,808
Arizona	15,435	20,695
Arkansas	10,426	15,990
California	21,852	24,972
Colorado	15,324	20,544
Connecticut	14,431	17,561
Delaware	14,300	20,393
Florida	12,611	16,641
Georgia	12,284	20,436
Idaho	13,416	19,788
Illinois	15,816	24,732
Indiana	13,364	20,176
Iowa	12,605	20,544
Kansas	16,416	24,684
Kentucky	12,576	20,124
Louisiana	11,628	20,784
Maine	11,440	18,741
Maryland	13,570	18,541
Massachusetts	13,528	16,158
Michigan	14,052	22,991
Minnesota	15,084	21,456
Mississippi	12,420	19,080
Missouri	14,832	26,312
Montana	13,570	20,345
Nebraska	13,234	18,701
Nevada	14,877	20,905
New Hampshire	13,027	17,859
New Jersey	12,768	17,243
New Mexico	12,672	18,996
New York	12,715	20,558
North Carolina	12,996	19,476
North Dakota	14,232	20,016
Ohio	14,248	18,429*
Oklahoma	12,276	16,700
Oregon	14,508	21,468
Pennsylvania	13,457	22,491
Rhode Island	12,975	18,270
South Carolina	12,424	22,857
South Dakota	11,715	20,300
Tennessee	10,980	15,812
Texas	16,152	17,256
Utah	14,285	22,281
Vermont	9,646	17,290
Virginia	13,420	18,340
Washington	17,436	23,652
West Virginia	12,000	(*)
Wisconsin	14,196	20,376
Wyoming	14,712	22,824

* Plus a 10-percent increase after 5 years.
 * Troopers receive an increase equivalent to \$25 per month every 3 years.

Source: Table constructed by SOURCEBOOK staff from data provided by the Kansas Highway Patrol, Planning, Research and Staff Inspection.

Figure 1.5 Estimated percent distribution of expenditures of Criminal Justice Act monies for defender services in Federal courts, by type of activity,^a fiscal year 1980

NOTE: Federal public defenders are salaried employees of the Federal Government, appointed by the Circuit Council of the U.S. Circuit Courts of Appeals. There are 32 public defender offices. Community defenders provide services for Federal defendants similar to those provided by Federal public defenders. However, community defenders are supported through Federal grants to non-profit corporations. There are 9 community defender offices. In districts without community defender offices, attorneys are appointed by the court from a "panel" of available attorneys. For a listing of the judicial districts in which Federal public defenders and community defenders are operating, see Source, Exhibits I and J.

* The sector relating to "Investigative, expert, and other services" includes Federal public defender and community defender expenses made in this category.

* Data for municipalities, and the local governments totals that include municipal data, are estimates subject to sampling variation; data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.
^b Amounts do not add precisely to total due to rounding.
^c Less than half the unit of measurement shown.

Figure constructed by SOURCEBOOK staff.

Table 1.33 Characteristics of presidential appointees to U.S. District Court judgeships, by Presidential administration, 1963-80

NOTE: These data were compiled primarily from unpublished hearings by the Senate Judiciary Committee that contained prepared biographical statements. In addition, an investigation was made of biographical directories, including various editions of Who's Who (Chicago: A.N. Marquis Co.), The American Biographical Directory (New York: Charles Scribner's Sons), The American Law Directory (Summit, N.J.: Martinus-Hubbell), State legislative handouts, and relevant newspaper articles from the home States of nominees and appointees. Law firms are categorized according to membership size: five or more members for a large firm; three or four for medium firms; and one or two for small firms. Percent subtotals for occupational experience sum to more than 100 because some appointees have had both judicial and prosecutorial experience. The American Bar Association's (ABA) ratings are assigned to candidates after investigation and evaluation by the ABA's Standing Committee on Federal Judiciary, which considers prospective Federal judicial nominees only upon referral by the U.S. Attorney General or at the request of the United States Senate. The ABA's Committee evaluation is directed primarily to

professional qualifications—competence, integrity, and judicial temperament. Factors including intellectual capacity, judgment, writing and analytical ability, industry, knowledge of the law, and professional experience are assessed. To be rated "exceptionally well qualified," the prospective nominee has to stand at the top of the legal profession in the community involved and have outstanding legal ability, wide experience, and the highest reputation for integrity and temperament. Similar high standing in the general community is also required. To be rated "well qualified," the nominee has to have the Committee's strong affirmative endorsement and be regarded one of the best available for the vacancy from the standpoint of competence, integrity, and temperament. The evaluation of "qualified" indicates that it appears the prospective nominee would be able to perform satisfactorily as a Federal judge with respect to competence, integrity, and temperament. When a nominee is found "not qualified," it means that the Committee's investigation indicates that the prospective nominee is not adequate from the standpoint of competence, integrity, or temperament (American Bar Association, Standing Committee on Federal Judiciary [Chicago: American Bar Association, 1980], pp. 3-5).

Figure 1.8 Duties performed by magistrates in U.S. District Courts, year ending June 30, 1980

NOTE: The Federal Magistrates Act [28 U.S.C. 636(b)] provides the authority under which magistrates assist courts in the performance of "additional duties." This authority was both broadened and clarified by Public Law 94-577, Oct. 21, 1976, and by new procedural rules governing most habeas corpus proceedings in the district courts, effective Feb. 1, 1977. The changes make clear the ability of the parties of a civil case to consent to have the case referred

to a magistrate for trial as a special master; the changes also empower magistrates to conduct evidentiary hearings in prisoner petition cases. Additionally, the role of magistrates in providing pretrial assistance to district judges in both dispositive and non-dispositive matters has been clarified. A magistrate's authority to conduct arraignments following indictment in a criminal case is provided under Rule 10 of the Federal Rules of Criminal Procedure in 85 districts.

* Data for municipalities, and the local governments totals that include municipal data, are estimates subject to sampling variation; data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.
^b Amounts do not add precisely to totals due to rounding.
^c Less than half the unit of measurement shown.

Table 1.37 Number and term of judges of appellate and major trial courts, by type of court and jurisdiction, 1979—Continued

Jurisdiction	Court of last resort	Appellate courts		Intermediate appellate court	Number of judges	Term (in years)	Major trial courts	Number of judges	Term (in years)
		Number of judges	Term (in years)						
District of Columbia	Court of Appeals	9	15	X	X	X	Superior Court	44	15
American Samoa	High Court: Appellate	8 ^a	(¹)	X	X	X	High Court: Trial	8 ^a	(¹)
Guam	X	X	X	X	X	X	Superior Court	5	7
Puerto Rico	Supreme Court	8	To age 70	X	X	X	Superior Court	92	12

^a Does not include senior judges, i.e., judges between the ages of 65 and 70 who are eligible for assignment to judicial duties but who have retired from full-time service as a judge.
^b Elective judgeships. Retired and sitting circuit judges are assigned full time to appellate court as needed.
^c Composed of circuit and associate judges who have full jurisdiction of circuit court. Associate judges serve 4 years.
^d A unified system with 92 district court judges who possess full jurisdiction of the court. An additional 13 district associate judges, 27 full-time judicial magistrates, and 161 part-time judicial magistrates have limited jurisdiction. District associate judges and full-time judicial magistrates serve 4 years; part-time magistrates, 2 years.
^e Seventy district judges, 67 associate district judges, and 74 district magistrate judges.
^f Terms for new judgeships are for 10, 8, or 6 years; elected thereafter for 6-year terms.
^g In January 1981, there will be 7 supreme court judges and 31 district court judges.
^h Effective January 1980.
ⁱ With reappointment to age 70.

^j To age 70; judges may be certificated thereafter as supreme court justices for 2-year terms up to age 76.
^k The appellate divisions may establish appellate terms to hear appeals from local courts. County courts, although basically trial courts, may hear appeals from certain local courts.
^l Twenty-four justices permanently authorized; in addition, as of Dec. 31, 1978, 20 justices and certificated retired justices had been temporarily assigned.
^m Or until term as supreme court justice expires. Presiding justices of four appellate divisions are appointed for remainder of their terms as supreme court justices.
ⁿ Special district judges serve at pleasure of district judges by whom they are appointed.
^o Subject to ruling on constitutionality.
^p Six years for superior judges; 4 years for assistant judges.
^q Chief justice and associate justice sit in all divisions as well as court of last resort except in major cases; trial court judges sit in all divisions of the High Court by designation of the chief justice.
^r Appointed. See Source, pp. 156, 157 for details.

* Member of or admitted to bar; Alabama—licensed to practice law in the State; Connecticut, Illinois, Nebraska, New Jersey, New York, Virginia, Washington—shall not engage in private practice; Montana, Virginia, Washington (for appellate courts), Wisconsin—member of bar at least 5 years.
^b For court of appeals, 5 years.
^c For court of appeals.
^d Good character. Maryland—integrity and wisdom.
^e State citizenship.
^f There must be one judge residing in each of State's three counties.
^g No more than three justices can be of same major political party; at least two justices must be of other major political party.
^h No more than bare majority of judges can be of same major political party; remainder of judges must be of other major political party.
ⁱ Qualified voter. Nevada—qualified elector in State for supreme court justices; in State and district for trial court judges. Oregon—qualified elector in county of residence for court of appeals judges.
^j Judges must be under 70 years of age at time of election or appointment.
^k Member of State bar 10 years, or 5 years a trial judge.
^l Part-time judicial magistrates not required to be learned in law, but like full-time magistrates, must be an elector of the county of appointment, less than 72 years of age, and retire upon attaining that age.
^m Justices of supreme court, judges of court of appeals, and district court judges, at time of

appointment, must be of an age that will permit them to serve an initial and one regular term before reaching age 72. Magistrates must be of an age that will permit them to serve a full term of office before reaching age 72.
ⁿ District and associate district judges must be regularly admitted to the bar; district magistrate judges need not be admitted to the bar, but if not they must be certified by the supreme court as qualified to serve.
^o Sobriety of manner.
^p No legal qualifications in State constitution.
^q Required number of years as qualified voter.
^r In Nebraska.
^s No legal qualifications.
^t Residence or principal law office in State.
^u Associate district judges required to be licensed to practice in the State; 2 years of practice required; age not specified.
^v Shall continue to be licensed attorney while holding office.
^w Must be pronounced qualified by the Legislative Screening Committee.
^x Thirty years for judges of court of appeals and court of criminal appeals.
^y Five out of 10 years preceding appointment.
^z Shall not seek or accept nonjudicial elective office, or hold any other office of public trust, or engage in any other incompatible activity.
^{aa} Shall have practiced law in State at least 1 year immediately preceding election or appointment.

Table 1.39 Salaries of judges of appellate and general trial courts, and date of last salary change, by type of court and jurisdiction, as of Jan. 31, 1981

NOTE: The salaries reported for the highest appellate courts refer to salaries paid to associate justices, not chief justices. National averages for the highest appellate and general trial courts are based on figures for the 50 States. For intermediate appellate courts, the average is based on the 31 States that have such courts. All averages are based on the lowest salary of the range or on salaries without supplements. Salaries including supplements are shown in parentheses immediately beneath the figures for State-paid salaries. Supplements may include payments for travel and other business expenses, and locally authorized salary increments. Some data have been revised from original presentation using information provided by Source.

Jurisdiction	Type of court			Date of last salary change
	Highest appellate court	Intermediate appellate court	General trial court	
Alabama	\$49,000	\$48,000	\$36,550 (50,550)	10/1/80
Alaska	74,198 to 84,584	69,240	66,900 to 78,805	1/1/81

Table 1.40 Method of selection for and length of initial and retention terms of the highest appellate court justices, by State, as of October 1980

NOTE: These data were completed through a survey of State statutes; they were then verified by personnel of the American Judicature Society in each State. "Partisan election" refers to elections in which the judicial candidates' names appear on the ballot with their respective party labels; "nonpartisan election" refers to the situation when no party labels are attached to judicial candidates' names on the ballot. "Retention election" refers to an election in which a judge runs unopposed on the ballot and the electorate votes solely on the question of his continuation in office. In the retention election the judge must win a majority

of the vote in order to serve a full term except in Illinois which requires 60 percent (Source, p. 6) and information provided by the authors. "Nominating commission" refers to the nonpartisan body, composed of lawyers and nonlawyers, which actively recruits, screens, and nominates prospective judicial candidates to the executive for appointment. "Initial selection" is defined as the constitutional or statutory method by which judges are selected for a full term of office. "Retention" refers to the method used to select judges for subsequent terms of office.

State	Initial selection		Retention	
	Method*	Term	Method	Term (in years)
Alabama	Partisan election	6 years	Partisan election	6
Alaska	Nominating commission	Until next general election but not less than 3 years	Retention election	10

* In States that use nominating commissions, the governor makes the appointment.
 * The highest State court is named the Court of Appeals.
 * The appointment requires the approval of the elected executive council.
 * Oklahoma and Texas have two courts of final jurisdiction: the supreme court, which has final civil jurisdiction; and the court of criminal appeals, which has final criminal jurisdiction.

^a In States that use nominating commissions, the governor makes the appointment.
^b Counties with populations less than 150,000 select and retain superior court judges in nonpartisan elections for 4-year terms.
^c The term in Atlanta is 8 years.
^d Circuit court associate judges are appointed by the circuit judges in each circuit for 4-year terms, as provided by supreme court rule.
^e In Vanderburgh County, the two candidates for the nonpartisan election are chosen by the judicial nominating commission.
^f Retention elections are used in Vanderburgh County.
^g A nominating commission is used for the superior court judges of Allen, Lake, St. Joseph and Vanderburgh Counties.
^h Twenty-two of 29 districts use a nominating commission for district judge selection; the

remaining 7 select district judges in partisan elections.
ⁱ Seven of 29 districts use partisan elections.
^j Nominating commissions are used for selecting circuit court judges in Jackson, Clay, and Platte Counties, and the City and County of St. Louis.
^k An associate circuit court judge's term is 4 years; also in counties that use nominating commissions the appointed judge serves until the next general election but not less than 1 year.
^l Retention elections are used in Jackson, Clay, and Platte Counties, and the City and County of St. Louis.
^m Subject to approval by an elected five-member executive council.
ⁿ Special judges of the superior court are appointed by the governor and serve 4-year terms.
^o Special judges of the superior court are reappointed by the governor and serve 4-year terms.

^a In States that use nominating commissions, the governor makes the appointment unless otherwise footnoted.
^b In Tucson, the mayor appoints magistrates.
^c In Denver County, the mayor appoints judges to the county court from a list of names submitted by a nominating commission.
^d Appointment is by the chief justice.
^e Reappointment is by the nominating commission.
^f Full-time magistrates are appointed by the district judges of the election district. Part-time magistrates are appointed by a nominating commission.
^g Part-time magistrates serve 2-year terms.
^h Subject to the approval of an elected executive council.
ⁱ Any judge who serves 10 consecutive years as a county district judge, in his third term, is granted tenure in office during good behavior.
^j If the municipal court judge serves only one municipally, initial selection and retention is locally determined.
^k Unless otherwise specified by local law.
^l Unless otherwise provided for by supreme court rule; full-time law trained magistrates serve for a term of 4 years.
^m Justice Courts are of two types: county and municipal. County selection and retention is presented in the table; Municipal selection and retention is locally determined. The term of office for both is 4 years.
ⁿ Exists in only one county.

Figure 1.9 Juror expenditures in U.S. District Courts, by type of juror and expenditure, year ending June 30, 1980

NOTE: Grand jurors hear "...evidence of criminal activity presented by the prosecution and determine whether the government's evidence is sufficient to justify the bringing of formal criminal charges" (Source, p. A-124). Petit jurors "...determine questions of fact. In any civil or criminal action, through hearing the evidence presented at trial" (Source, p. A-125). Attendance fees are paid to these jurors in compensation for their services. Federal petit

jurors are selected from a group of those available to serve—the jury venire—for a given day. Of those selected from this initial group, some will be excluded after the voir dire process—questioning under oath by the judge. Individuals who are excused after the voir dire process are still paid an attendance fee. "Other" expenditures include miscellaneous payments for the comfort and convenience of both petit and grand jurors.

Total juror expenditures: \$33,622,100
 Grand juror expenditures: \$8,862,900
 Petit juror expenditures: \$24,759,200

Table 1.45 Petit juror utilization in U.S. District Courts, years ending June 30, 1971-80

NOTE: See NOTE, Figure 1.9. In this table, data for 1971 are for 93 District Courts; 1972 through 1977 data are for 94 District Courts; and 1978 through 1980 data are for 95 District Courts. The Juror Usage Index is the average number of jurors on hand for each jury trial day; it is calculated by dividing the total number of available jurors by the total number of jury trial days.

* Data for municipalities, and the local governments totals that include municipal data, are estimates subject to sampling variation; data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.

† Amounts do not add precisely to totals due to rounding.

‡ Less than half the unit of measurement shown.

Table 1.48 Parole staff supervising conditional releasees and probationers, by jurisdiction, on Dec. 31, 1979

NOTE: These data were collected as part of the Uniform Parole Reports aggregate survey conducted in 1980 and represent information voluntarily provided by the U.S. Parole Commission and parole/correction agencies in the 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands. "Caseload-carrying staff" only includes staff who actually supervise parole, probation, or other cases, based on authorized full-time equivalent staff positions. "Probation/other" refers only to parole staff who exclusively supervise these clients. It does not include the large number of probation officers who also perform such services in separate probation offices. "Mixed caseloads" refers to parole staff who supervise a combination of conditional releasees, probationers, and others. "Other" includes work release, pretrial release, diversion cases, and

Juvenile and misdemeanor parolees. The term "conditional releasees" includes parolees and mandatory releasees. A parolee is defined as a person released to community supervision (primarily but not exclusively from prison) by a discretionary act of the paroling authority, who must report to a supervising agent (parole officer), and who must observe other conditions until discharged. A mandatory releasee is a prisoner released to community supervision as a result of good-time or other statutory sentence reduction measures. Alaska and the California Youth Authority were unable to provide complete data on caseload-carrying staff. For information on reporting procedures of specific agencies, survey methodology, and definitions of terms, see Appendix 4.

Source: National Council on Crime and Delinquency, Uniform Parole Reports, Parole in the United States: 1979 (San Francisco: National Council on Crime and Delinquency, Research Center West, 1980), pp. 36, 37. Table adapted by SOURCEBOOK staff.

Table 1.49 Probation, parole, and conditional release cases supervised and presentence reports completed by parole authority staff, by jurisdiction, on Dec. 31, 1979

NOTE: See NOTE, Table 1.48. If a jurisdiction did not report data for all categories of cases supervised, except "interstate compact" and "other," a total figure was not computed. Seven jurisdictions were unable to provide complete data on total cases supervised: Alaska, Kansas, Minnesota, North Carolina, Vermont, Virginia, and Wyoming. Three other jurisdictions were unable to provide data on presentence reports: Alaska, Oregon, and Texas.

Only presentence reports prepared by the parole supervision agency are shown; no other reports prepared are included in this table. Caseload equivalent was computed by dividing the number of presentence reports by five (Source, p. 43). For information on the reporting procedures of specific agencies, survey methodology, and definitions of terms, see Appendix 4.

Source: National Council on Crime and Delinquency, Uniform Parole Reports, *Parole in the United States: 1979* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1980), pp. 36, 37. Table adapted by SOURCEBOOK staff.

Table 1.50 Workload of Federal probation officers, years ending June 30, 1972-80

NOTE: Persons under supervision of the Federal Probation System include persons placed on probation—either by U.S. District Courts, U.S. magistrates, or at the request of U.S. attorneys (deferred prosecution)—and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" amounts to fewer than 180 days, then release occurs without supervision.

The number of officers required for presentence investigations was derived by dividing the number of presentence investigations by 128, which according to a time study is the number of presentence investigations one officer could produce in 1 year. The number of officers available for supervision was derived by subtracting the number of officers required for presentence investigations from the number of probation officer positions. (This explanation was provided by the Administrative Office of the United States Courts, Division of Probation.)

Years ending June 30	Probation officer positions	Presentence investigations	Officers required for presentence investigation	Officers available for supervision	Supervision cases	Average supervision cases per officer
1972	549	27,558	215	334	49,023	147

Table 1.52 Salary range for State probation and parole officers, by jurisdiction, as of Aug. 1, 1980

NOTE: These data pertain to salaries of State or territorial employees and do not include salaries of county or municipal employees. The reported information was collected from a survey conducted by the U.S. Office of Personnel Management, Office of Intergovernmental Personnel Programs. The Office of Intergovernmental Personnel Programs in conjunction with officials of the 50 States, the District of Columbia, and the Virgin Islands standardized job categories for reporting of salary ranges. The categorization of State job titles was based on the elements contained in job descriptions.

A probation or parole officer is the "beginning level in correctional work, involving juvenile or adult probationers and parolees. Incumbents in this class are responsible for making routine pre-sentence and pre-hearing investigations for the use of judicial or correctional officials in probation and parole proceedings. Work also involves supervising released offenders, preparing periodic reports on their activities, and recommending remedial action when appropriate. Work is performed under the general supervision of judicial and correctional officials. This class usually requires the equivalent of graduation from college with some specialized study in corrections, sociology, or a related field" (Source, p. 94).

[Mean minimum salary—\$13,326. Mean maximum salary—\$17,992.]

^a Cost of living increase of 7.5 percent added Oct. 1, 1980.
^b Longevity payments are authorized but not included in the range reported.
^c Geographic salary differentials are paid to adjust for cost of living; the base salary range has been reported.
^d Minimum qualifications are significantly lower than those defined.
^e Effective as of Sept. 1, 1980.
^f Officers have no probation functions.
^g Officers are paid a "non-standard rate" of 16 percent above the normal salary rate. "Non-standard rates" are used in lieu of overtime for classes in which incumbents usually work more than 40 hours per week and are unable to control their work schedule.
^h A sliding percentage increase was made on Oct. 1, 1980. Minimum salary levels were frozen in fiscal year 1981.
ⁱ Salary ranges include 8 hours per week of built-in overtime at straight time.
^j Trainees are paid \$12,395 for the first year and \$14,485 for the second year.
^k Effective Sept. 1, 1980, salary was increased 5.1 percent.
^l Minimum qualifications are significantly higher than those defined.

Table 1.53 Salary range for State senior probation and parole officers, by jurisdiction, as of Aug. 1, 1980

NOTE: See NOTE, Table 1.52. A senior probation or parole officer "is the first line of direct supervision over employees performing professional corrections work. Incumbents in this class assign cases to subordinate professionals, critically review case reports, assist in the resolution of difficult probation and parole problems, and train new staff in professional corrections techniques. The work involves considerable public contact with judges, local law enforcement

officers, individual probationers and parolees, and social welfare agencies. Work is performed under the general direction of a professional superior. This class usually requires the equivalent of graduation from college with some specialized study in corrections, sociology, or a related field and considerable experience in professional corrections work" (Source, p. 95.) No comparable class within the scope of this definition could be found for Hawaii.

Table 1.54 Salary range for State directors of probation and parole services, by jurisdiction, as of Aug. 1, 1980

NOTE: See NOTE, Table 1.52. A director of probation or parole service performs "highly responsible administrative and professional corrections work in directing a state-wide program of probation and parole investigation and supervision. The work involves responsibility for the establishment and maintenance of uniform methods and procedures in the administration of probation and parole services, including the promulgation of agency standards for investigation, supervision, case workload, recordkeeping, and activity report content. General direction is received from high-level judicial and correctional authorities with respect to broad policies and programs. This class typically requires the equivalent of college graduation with some specialized study in corrections, sociology, or a related field and extensive experience in professional corrections work" (Source, p. 96). No comparable class within the scope of this definition could be found for Arizona, Connecticut, Georgia, Hawaii, Illinois, Indiana, Minnesota, New York, and West Virginia.

Table 1.55 Selected characteristics of public juvenile custody facilities, United States, selected years 1971-75

NOTE: These data are from the censuses of State and local juvenile detention and correctional facilities. The censuses were conducted by the U.S. Bureau of the Census for the Law Enforcement Assistance Administration. Data for 1972, 1976, and 1978 are not available. The first two censuses, 1971 and 1973, were restricted to public facilities, but all later censuses were expanded to include private facilities.

The data for 1971-75 are as of June 30, and for 1977 and 1979 as of Dec. 31, except for figures on admissions and departures, average daily number of residents, occupancy rate, expenditures, and operating costs, which are for an annual period, either the calendar or fiscal year. For a description of data collection procedures and definitions of terms, see Appendix 5.

Selected characteristics	1971	1973	1974	1975	1977	1979
Number of facilities, total	722	794	829	874	992	993
Short-term	338	355	371	387	448	458
Long-term	384	439	458	487	544	535
Facility occupancy rate (percent of facilities) ^a						
Occupied less than 70 percent	36	44	42	36	32	34
Occupied 70 to 100 percent	48	44	46	51	59	55
Occupied more than 100 percent	16	12	12	13	9	11
Number of personnel, total	43,372	44,845	46,276	52,534	61,060	60,889
Full-time	39,521	39,216	39,391	41,156	43,322	44,234
Part-time	3,851	5,629	6,885	11,378	17,738	16,655

Table 1.56 Selected characteristics of public juvenile custody facilities, by type of facility, United States, on Dec. 31, 1977 and 1979

NOTE: See NOTE, Table 1.55. The classification of "physical environment" was first used in the 1977 and 1979 censuses. It was determined by responses to questions on the degree of access to the community and the extent of in-house physical and staff controls. A majority of facilities identified in earlier censuses as detention centers, diagnostic centers, or training schools, and

a significant proportion of ranches, fall into the "institutional" category. Most of those previously identified as shelters or group homes, as well as some ranches, are classified as "open." For a description of data collection procedures and definitions of terms, see Appendix 5.

Selected characteristics	Type of facility					
	All facilities		Short-term		Long-term	
	1977	1979	1977	1979	1977	1979

Source: U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, *Children in Custody: Advance Report on the 1979 Census of Private Juvenile Facilities* (Washington, D.C.: U.S. Department of Justice, 1981), Table 3.

Table 1.61 Number, total funding, budgeted capacity, and utilization rate of drug abuse treatment units, by jurisdiction, on Apr. 30, 1979

NOTE: These data were collected through the National Drug and Alcoholism Treatment Utilization Survey (NDATUS). In previous years the survey included only those facilities involved in the treatment of drug abuse; expansion of the survey to include alcoholism treatment units reflects a joint effort between the National Institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA). Units expected to report were identified prior to the survey through a review of records of the Food and Drug Administration, the Veterans Administration, the Federal Bureau of Prisons, the individual State agencies for drug abuse and alcoholism, and through previous NDATUS efforts and NIAAA unit listings.
 A total of 9,101 units reported to NDATUS; of these, 6,411 were classified as treatment service units—"a unit that reports a budgeted treatment capacity" (Source, p. 1). Of the 6,411 treatment units, 2,192 were drug abuse treatment units, 2,821 were alcoholism treatment units, and 1,398 were combined drug abuse and alcoholism treatment units. These data are from the

3,590 treatment units reporting drug abuse treatment only or both drug abuse and alcoholism treatment. They represent 95 percent of all known drug abuse treatment units in the United States, Puerto Rico, American Samoa, Guam, the Trust Territories, and the Virgin Islands. The comparability of these data to those collected in previous years is affected by the inclusion of the alcoholism treatment units. For example, alcoholism treatment units, which may treat only one or two drug abuse clients and are thus considered drug abuse treatment units, will create what appears to be an increase in the number of drug abuse units, staff, and funds (Source, p. 2).
 "Budgeted capacity" is defined as the number of clients a unit is able to treat when operating at full capacity. "Utilization rate" is the number of actual clients in treatment divided by the budgeted treatment capacity. "Total funding" includes all sources of funding for all units. The funding data are not based on audits and should be considered estimates. See Source, pp. 1, 2 for more information.

Source: U.S. Department of Health, Education, and Welfare, National Institute on Drug Abuse, *Executive Report, April 1979, Data from the National Drug and Alcoholism Treatment Utilization Survey (NDATUS)*, Statistical Series F, No. 7 (Washington, D.C.: U.S. Government Printing Office, 1980), p. 10.

Table 1.62 Employees of adult correctional facilities, by level of government, occupational group, and employment status, United States, 1978

NOTE: The data presented below are from a mail survey conducted by Abt Associates for the National Institute of Justice. These data were obtained in response to a questionnaire mailed to correctional agencies in the 50 States, the District of Columbia, and the Federal Prison System. In each of these 52 jurisdictions, a central coordinator was designated to assist in the data collection effort. In 40 jurisdictions, the survey was completed by the central coordinator who was responsible for overseeing the data collection for all the facilities within that correctional system. The remaining 12 officials requested that the survey instruments be mailed directly to the individual facilities. Follow-up telephone calls were used to clarify ambiguous or missing

responses. In all, questionnaires were completed by 38 Federal and 521 State correctional facilities during the period between March 1978 and December 1978. The survey was confined to adult correctional facilities. It did not include juvenile correctional facilities, correctional facilities under the jurisdiction of the Department of Defense or Indian reservations, or police lockups that hold persons for less than 48 hours. "Adult correctional facilities" include only those facilities primarily holding prisoners 24 hours per day. "Custodial personnel" are correctional officers. "Service personnel" are treatment staff (Source, p. 89).

Table 1.63 Salary range for State correctional officers, by jurisdiction, as of Aug. 1, 1980

NOTE: See NOTE, Table 1.52. A correctional officer performs "correctional work in maintaining order and directing the conduct of inmates in a State correctional institution. An incumbent escorts inmates within the area of an institution, conducts searches of inmates and their living quarters for control of contraband and for cleanliness and sanitation, and stands watch on armed

post or patrols grounds. Supervision is received through regulations and oral instructions of supervising officers who review work by inspections. This class usually requires some work experience and the equivalent of a high school education" (Source, p. 24).

^a Cost of living increase of 7.5 percent added Oct. 1, 1980.
^b Longevity payments are authorized but not included in the range reported.
^c Geographic salary differentials are paid to adjust for cost of living; the base salary range has been reported.
^d Effective as of Sept. 1, 1980.
^e Minimum qualifications are significantly lower than those defined.
^f Eligible for a supplement of \$100 per month when working in riot control activities.
^g Reflects upgrading of one job group via collective bargaining effective Mar. 30, 1980 but still pending funding by the legislature.

^h A sliding percentage increase was made on Oct. 1, 1980. Minimum salaries were increased by 6 percent; maximum salaries were increased by 10 percent. Minimum salary levels were frozen in fiscal year 1981.
ⁱ New correctional officers hired into trainee classes at a starting salary of \$9,180.
^j Salary range includes \$25 per week hazardous duty pay.
^k Additional \$200 per month if work is in a penitentiary.
^l The salary rate for trainees is \$11,348 per year; the training period lasts 12 weeks.
^m Effective Sept. 1, 1980, salary was increased 5.1 percent.

Table 1.64 Salary range for State correctional sergeants, by jurisdiction, as of Aug. 1, 1980

NOTE: See NOTE, Table 1.52. A correctional sergeant performs "the first line of direct supervision over employees who maintain order and direct the conduct of inmates in a State correctional institution. The Correctional Sergeant is responsible for supervising the maintenance of security and the direction of activities of a portion of a correctional institution's population during an assigned watch. An incumbent may have charge of small but difficult areas of custodial activities relating to the correctional facility. This class usually requires some work experience in corrections" (Source, p. 25).
No comparable class within the scope of this definition could be found for the Virgin Islands.

Table 1.65 Salary range for State correctional superintendents, by jurisdiction, as of Aug. 1, 1980

NOTE: See NOTE, Table 1.52. A correctional superintendent performs "high level administrative work of unusual difficulty in planning, organizing, and directing all activities carried on within a large adult correctional institution. The incumbent assumes responsibility for the security and welfare of all residents and employees of the institution. Work is performed under administrative direction and is reviewed for compliance with laws, policies, and agency objectives. This class usually requires the equivalent of college level training and extensive experience in corrections, including some responsible supervisory experience" (Source, p. 26).
No comparable class within the scope of this definition could be found for West Virginia.

Table 1.66 Unionization of correctional officers, by jurisdiction, 1979

NOTE: This information was collected through a mail survey of the department of corrections in each jurisdiction conducted in August and September 1979.

Questions: "1. Are employees at your correctional facility currently unionized? 2. If so, when did this take place? 3. If not already unionized, is there a movement within your state institutions for correctional officers to unionize? 4. If unionized, has there been a strike or any sort of collective bargaining action since 1976?"

Table 1.67 Full- and part-time staff and ratio of inmates to full-time staff in adult correctional facilities, by type of facility, region, and State, 1979

NOTE: These data are from the 1979 Survey of Inmates of State Correctional Facilities and the 1979 Census of State Correctional Facilities conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. A correctional facility was considered a community-based residence rather than a confinement facility if at least half of the residents were regularly permitted (or eligible) to depart unaccompanied for the daily use of community resources, such as schools or treatment programs, or for seeking or holding employment.

Table 1.72 Local adult correctional facility cells, by percent of cells greater than or equal to selected cell sizes, region, and State, 1978

NOTE: These data were provided to the Source by the U.S. Bureau of the Census from their 1978 National Jail Census. The Census Bureau questionnaires solicited information about local facility and inmate characteristics on Feb. 15, 1978. Of the 3,493 local facilities surveyed, 28 did not respond.

[Percent greater than or equal to cell size shown]

Table 1.73 Confinement units and extent of overcrowding in adult correctional facilities, by type of facility, size of unit, region, and State, 1979

NOTE: See NOTE, Table 1.67. One-person units include all units with less than 60 square feet of floor space and those with 60 to 119 square feet of floor space that are rated to hold one person. Multiple-person units include all units with 60 to 119 square feet of floor space that are rated to hold more than one person. Dormitories are defined as units with 120 square feet or more of floor space. A unit was designated as overcrowded if it was smaller than 60 square feet or if it provided less than 60 square feet of floor space per inmate. The number of overcrowded units was obtained by multiplying the average square footage of one unit by the number of units with that average square footage and dividing the product by the number of inmates occupying those units on census day. This method may result in a slight overstatement of the number of overcrowded units. It also combines general housing units with those used for special purposes, such as protective custody or medical units (Source).

Table 1.74 Adult correctional pre-release centers, by type of facility, legal status of residents, region, and jurisdiction, on Mar. 31, 1978

NOTE: See NOTE, Table 1.62. State and Federal coordinators were asked to identify any privately or locally operated pre-release centers that housed sentenced inmates under their jurisdiction. Follow-up telephone calls were used to clarify ambiguous or missing responses. In all, questionnaires completed by the survey sample included 402 adult pre-release facilities operated under Federal, State, local, or private authority during the period between March 1978 and December 1978.

A pre-release facility was defined as any publicly or privately operated correctional facility that housed and supervised its residents for less than 24 hours daily and whose residents were sentenced and under Federal or State jurisdiction in 1978. Excluded from the survey were facilities for juveniles serving only paroles or probationers, police lockups, or of the Department of Defense, facilities serving only parolees or probationers, police lockups, and large penal institutions having a work release program for only a small number of inmates. "Sentenced" was defined as those residents sentenced to custodial supervision. Others included in the "total" figure include parolees, probationers, volunteers, pre-trial detainees, and alcoholics or drug addicts undergoing treatment.

Figure 1.10 Pre-release facilities, by type and size of facility, United States, on Mar. 31, 1978

NOTE: See NOTES, Tables 1.62 and 1.74. Information was not available from one pre-release facility.

Source: William DeJong, *American Prisons and Jails, Volume V: Supplemental Report—Adult Pre-Release Facilities*, U.S. Department of Justice, National Institute of Justice (Washington, D.C.: U.S. Government Printing Office, 1980), p. 41, Table 3.14. Figure constructed by SOURCEBOOK staff.

Table 1.75 Mental health staff and services in adult correctional facilities, by selected facility characteristics and jurisdiction, as of August 1980

NOTE: These data were collected through a mail questionnaire survey sent to the central offices of all correctional systems in the 50 States, Guam, Puerto Rico, the Canal Zone, the Federal System, the Armed Forces correctional systems, and Canadian regional and federal systems. The response rate, after followup procedures, was 72 percent; for all reporting institutions there

was an average monthly total population of 232,090 inmates. Data for Canada have been excluded from this presentation by SOURCEBOOK staff. Some data have been revised from their original presentation from information received from the authors.

Jurisdiction	Selected facility characteristics					Mental health staff (number of)										Services			
	Average in-mate monthly population	Facility location (percent of institutions)		Type of facility (percent of inmates in each facility)			Psychiatrists	Psychiatric nurses	Nurses	Social workers	Psychologists		Clinical psychologists	Non-clinical psychologists	Para-professional counselors	Consulting psychologists	Unit for emotionally disturbed	Number of units throughout system	Average population of unit

^b Transferred to State mental institutions or other appropriate institution.
^c California—8.2 percent close class and 2.5 percent pending class; Colorado—29 percent close class; Idaho—48.5 percent close class; New York—9.0 percent reception class considered maximum; North Carolina—5.89 percent close class and 0.79 percent other; Virginia—4.7 percent unknown.
^d Sociologists, M.A. level.
^e On contract.
^f Idaho—two registered nurses, two medical technical assistants, and two medics; Missouri—6 registered nurses and licensed practical nurses; Rhode Island—two volunteers twice a week; South Carolina—18 licensed practical nurses; Federal Prison

System—248 physician assistants.
^g Any other than adult males transferred to Department of Mental Health.
^h Combined numbers for psychiatric and psychological services.
ⁱ Part-time; New Jersey—2 part-time psychiatrists; Texas—2 part-time; Federal Prison System—plus 6 psychologists and 25 estimated part-time psychiatrists.
^j Three principal psychologists; three associated psychologists; four psychologists; eight psychologists II, and one recreational therapist.
^k Plus seven satellite facilities.
^l Psychological services staff are clustered into several major mental health operations within the major institutions and dispersed throughout each of the six geographical areas.

^m Oregon—Women's Correctional Center; U.S. Army—disciplinary barracks, Ft. Leavenworth, Kan.
ⁿ Correctional counselors.
^o Counselors and lay counselors.
^p Putting them in individual cells.
^q Transfer inmates to Federal institutions and/or other appropriate facility.
^r Transfer to hospital.
^s Caseworkers.
^t One warden, two assistant wardens, a coordinator's or staff training position, and one warden special assistant, all of whom are Ph.D. psychologists.
^u Estimate.

* Court orders and decrees may deal with more than one issue and therefore may be counted more than once. Due to reporting error or the absence of more specific information, the totals listed under each issue will not add up to the total number of court orders and decrees in effect.
^b The number of court orders and decrees is unknown.
^c No response given.

Source: Joan Mullen and Bradford Smith, *American Prisons and Jails, Volume III: Conditions and Costs of Confinement*, U.S. Department of Justice, National Institute of Justice (Washington, D.C.: U.S. Government Printing Office, 1980), p. 32.

Table 1.77 Characteristics of State adult paroling authorities, by jurisdiction, 1980

NOTE: This information was collected through a mail survey sent to the director of each State department of corrections. Questionnaires may have been forwarded to another office. If no response to the survey was received, information from last year's directory was repeated. New Hampshire has no central department of corrections (Source, p. 165). Data for New York, which did not appear in the table were received from the Source.

Table 1.78 U.S. Parole Commission hearing examiner workload, by type of hearing or record review, and region, fiscal years 1978-80

NOTE: The hearing examiner's workload consists of in-person hearings and record reviews. At an in-person hearing the offender appears before the examiner and can introduce additional information for consideration. At a record review only information contained in the prisoner's case file will be considered. Some data reported as hearings were actually record reviews because the prisoner was serving concurrent Federal and State sentences in a State institution. "Initial hearing" refers to the initial parole determination hearing for an eligible prisoner; for further information, see 28 C.F.R. 2.12 (1980). "One-third hearing" was covered under 28 C.F.R. 2.14(a) (1976) until it was phased out. The section provided that a prisoner sentenced to a maximum term of more than 18 months under 18 U.S.C. 420 5(b) (2), 18 U.S.C. 294, or 26 U.S.C. 5871, could not be continued past one-third of the maximum sentence. The one-third hearing was phased out after implementation of presumptive date procedures in September 1977. Additionally, "pre-hearing record reviews" (28 C.F.R. 2.14(b) (1976) were replaced by 1977. The general procedure in either case was a review of the presumptive date record reviews. The general procedure in either case was a review of the presumptive date record reviews. If the recommendation was to grant parole, and the regional commissioner concurred, no in-person hearing was conducted. A presumptive date refers to the set time at which a prisoner can expect to be released (either by parole or mandatory release) if he maintains a record of good institutional conduct and a suitable release plan (28 C.F.R. 2.12 (b)(1)). "Statutory review hearings" were replaced by statutory interim hearings. The purpose of the "interim hearing" is to consider any significant developments or changes that may have occurred subsequent to the initial hearing. At the interim hearing the presumptive release date that had

been set may be advanced, retarded or rescinded for disciplinary infractions, or remain unchanged; for more information see 28 C.F.R. 2.14 (a) (1980). "Review hearing" refers to subsequent parole hearings intended to focus on developments or changes in the prisoner's status. "Recission hearing" is covered under 28 C.F.R. 2.34. The section provides that if a prisoner has been granted parole and has subsequently been charged with institutional misconduct sufficient to become a matter of record, the parole grant may be retarded and the case scheduled for a recission hearing, where cancellation of the parole grant is at issue. An increase in recission hearings was accompanied by a larger reduction in regular review hearings. A "retroactive record review" is a special type of consideration resulting from a revision of the parole decision guidelines in June 1979; for more information, see 28 C.F.R. 2.20, 2.21. For information on the local revocation hearing and institutional revocation hearing, see 28 C.F.R. 2.48-2.52 (1976). If probable cause is established, the parolee may be returned to the institution to await the final revocation hearing. The five regions of the United States are defined in the following manner: Northeast—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia; Southeast—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee; North Central—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin; South Central—Arkansas, Louisiana, New Mexico, Oklahoma, Texas; and West—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

Table 1.80 Representation at parole consideration and revocation hearings conducted by the U.S. Parole Commission, by type of hearing and region, October 1974 to September 1980

NOTE: See NOTE, Table 1.78. According to provisions of the Parole Commission and Reorganization Act, "parole applicants may be accompanied at their [consideration] hearings by a representative of their choice, who may make a statement on the applicant's behalf." Furthermore, alleged parole violators are entitled to representation by retained or court-appointed attorneys or by others at their parole revocation hearings. The following table refers to the percentage of hearings conducted at which parole applicants or alleged parole violators had some type of representation. The data for parole revocation refer only to the final revocation hearing. All data refer to the 12-month period of Oct. 1 to Sept. 30. Data for 1978 have been revised from earlier reports by the Source.

Table 1.81 Statutory provisions governing the maximum age for juvenile court jurisdiction, by jurisdiction, as of mid-1979

NOTE: These data were compiled by the Community Research Forum, University of Illinois at Urbana-Champaign, for the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Juvenile codes in the 50 States, the District of Columbia, Guam, Puerto Rico, American Samoa, the Virgin Islands, and the Trust Territories were analyzed. This is an update of an earlier survey of juvenile codes by Mark A. Levin and Rosemary Sarri entitled Juvenile Delinquency: A Comparative Analysis of Legal Codes in the United States, National Assessment of Juvenile Corrections (Ann Arbor, Mich.: The University of Michigan, 1974). "Original jurisdiction" refers to the authority of a court to commence proceedings; that is, establishment of court jurisdiction over an offender. "Continuing jurisdiction" refers to the authority of a court once the juvenile is brought within the purview of the court. Thus, in the table the maximum age for original jurisdiction is the age below which a juvenile court has authority to initiate proceedings, and the data for continuing jurisdiction refer to the age at which juvenile court control must end.

The data refer to juveniles who are alleged to have committed criminal acts or who have allegedly violated a law (delinquents); those whose acts would be noncriminal if committed by an adult (status offenders); and the dependent, abused, or neglected child. Information pertaining to court jurisdiction over juveniles was drawn from States' statutes. Differences in terminology may or may not reflect substantive differences in courts' jurisdictions. Additionally, other relevant material, contained in the rules of court or legal memorandums, was not consulted when compiling these data. A "V" indicates that there is an explicit affirmative statutory provision in this area. A blank indicates either that there is a statutory provision but it does not provide for such a procedure, that the statute is silent on the matter, or that there is no provision within the juvenile code. States' statutes should be consulted for the full text and meaning of specific provisions. Some data have been revised from their original presentation on the basis of information provided by the author.

Jurisdiction	Original jurisdiction			Continuing jurisdiction	
	Maximum age (in years)	Age determining jurisdiction		Maximum age (in years)	Institutionalization beyond 21 years or age of majority

Table 1.81 Statutory provisions governing the maximum age for juvenile court jurisdiction, by jurisdiction, as of mid-1979—Continued

* For delinquents and others who committed a crime under State laws, 18; no provision otherwise.
 ** For delinquents, 20; no provision otherwise.
 *** Twenty-one years of age unless the juvenile was at least 16-years-old when a serious offense was committed and commitment to the Youth Authority occurred. In such instances, jurisdiction up to 23 years of age is permitted.
 **** For delinquents and status offenders, 16; for dependent, neglected, or abused children, 18.
 ***** Not permitted for dependent, neglected, or abused children.
 * For delinquents, 19; for all others, 18.
 ** Not permitted for dependent, neglected, or abused children and status offenders.
 *** For dependent, neglected, or abused children, 18; for status offenders and delinquents, 17, except where an offender committed an act of delinquency and has been placed under the supervision of the court or on probation to the court—then up to the age of 21.
 **** For dependent, abused, or neglected juveniles, 18; for all others, 21.
 ***** Eighteen years of age for status offenders and dependent, neglected, or abused children; up to 17 years of age for delinquents.
 * No provision except all orders automatically terminate for delinquents upon reaching 18 years of age.
 ** Eighteen years of age for dependent, neglected, or abused children; 18 years for status offenders; and 18 years for those who were adjudicated delinquent when under 13 and were subsequently committed to the Department of Corrections. For all other delinquents, the maximum age is 21.
 *** For delinquents, 21; otherwise no provision.
 **** For dependent, abused, or neglected children, 18; for all others, 17.
 ***** Eighteen years of age for delinquents and status offenders.
 * If dangerous to public because of mental or physical deficiency, disorder, or abnormality.
 ** For dependent, abused, or neglected children and status offenders, 18; for delinquents, 18.
 *** For delinquents, 19; for dependent, abused, or neglected children, 21.
 **** For delinquents and status offenders, 21; no provision for dependent, abused, or neglected juveniles.
 ***** Homicide only.
 * For delinquents, 21; for all others, 18.
 ** For delinquents and male status offenders, 16; for female status offenders and all dependent, abused, or neglected children, 18.
 *** For delinquents, 17; for all others, 21.
 **** For dependent, neglected, or abused juveniles, 21; for all others, 17.
 ***** Seventeen years of age for status offenders and dependent, neglected, or abused juveniles, or if a prior act of delinquency was committed after turning 12 and before reaching 16 years of age.
 * Age of majority.
 ** For delinquents, 19 or 20; for all others, 18.

Table 1.82 Statutory provisions governing waiver of juveniles to criminal court, by State

NOTE: These data were collected through a review of statutes and juvenile courts' rules of the 50 States and the District of Columbia. "Waiver" is the procedure by which court jurisdiction is determined for a youth whose alleged conduct, if committed by an adult, would constitute a crime. Waiver, also referred to as transfer or certification, generally involves removal of a case from the jurisdiction of the juvenile court to that of the criminal court. However, in some States the criminal court exercises initial jurisdiction over a case and may waive or transfer jurisdiction back to the juvenile court. States may also have a combination of these waiver provisions; depending on the age of the alleged offender and/or the offense, the case may be transferred to or from criminal court. This table presents information only for provisions governing the waiver of youth from juvenile to criminal court; for information on provisions relating to transfers from criminal court, see Source. The waiver decision is usually made after a hearing and is based upon criteria specified by statute; see Table 1.83 for a detailed presentation of this material. Three States—Nebraska, New York, and Vermont—have no waiver provisions of this type. In

Nebraska, the juvenile and criminal courts have concurrent jurisdiction over certain cases and the prosecutor decides in which court to file the case, thus making the waiver determination. All three States permit waiver to the juvenile court from the criminal court. These data reflect the language contained in juvenile court statutes. Differences in terminology may or may not reflect substantive differences in transfer procedures. Additionally, the data do not reference other, more general, criminal laws that may regulate waiver procedures or court practices. A blank indicates that there is an explicit affirmative statutory provision in this area; a blank indicates that there is a statutory provision but it explicitly does not provide for such a procedure, either that there is a statutory provision but it explicitly does not provide for such a procedure, that the statute is silent on this matter, or that there is no provision within the juvenile code. States' statutes should be consulted for the full text and meaning of specific provisions. Some data have been revised from their original presentation as a result of information provided by the author.

State	Statutes current as of	Minimum age at which allowed (in years)	Mentally ill or retarded child may be waived	Waiver				Restricted to certain crime(s)
				At discretion of				
				Court	Prosecutor	Child		
Alabama	1981	14		✓	(*)			Felony; any crime if child presently under commitment as a delinquent
Alaska	1979	Any age		✓				None
Arizona	1980	Any age		✓		✓		None
Arkansas	1980	15		✓				Any offense
California	1979	16	(*)	✓	(*)			Violation of any criminal statute or ordinance
Colorado	1979	14		✓	✓			Felony
Connecticut	1979	14	✓	✓				Class A felony or second serious juvenile offense
		14	✓	✓				Murder; class A or B felony, if previously adjudicated a delinquent for commission of A or B felony
Delaware	1980	14		✓	(*)			Felony committed during escape or AWOL from mandatory Department of Correction commitment
		16		✓	(*)			Any delinquent act
District of Columbia	1980	15	(*)	✓	(*)			Felony
		16 ^a	(*)	✓	(*)			Any offense if child already under commitment for delinquency
		18 ^b	(*)	✓				Offense committed before 18
Florida	1980	14		✓	(*)	(*)		Any crime
		14		✓	(*)			Second violent offenses: murder, sexual battery, armed robbery, aggravated battery, aggravated assault
Georgia	1979	13		✓				Capital or life offenses
		15		✓				Any crime
Hawaii	1980	16	(*)	✓				Felony
Idaho	1979	15	✓	✓	(*)	(*)		Any crime
Illinois	1980	13		✓	(*)	(*)		Crimes
Indiana	1980	10		✓	(*)	(*)		Murder
		14		✓	(*)	(*)		Heinous or aggravated act or part of repetitive pattern of less serious delinquent acts
		16		✓	(*)	(*)		Class A or B felony
Iowa	1979	14		✓	(*)	(*)		Public offense
Kansas	1980	16		✓	(*)			Crime
Kentucky	1980	Under 16		✓				Capital offense or class A felony
		16		✓				Any felony
Louisiana	1979	15		✓	(*)	(*)		Any crime if previously adjudicated delinquent for specified offenses; no previous adjudication necessary if charged with armed robbery or offense punishable by life imprisonment
Maine	1979	Any age		✓	(*)			Criminal homicide 1st or 2nd; class A, B, or C felony
Maryland	1980	Under 15		✓	✓	✓		Capital or life crime
		15		✓	✓	✓		Any crime
Massachusetts	1980	14		✓				Child previously committed to Division of Youth Services as delinquent and present offense punishable by life imprisonment; offense involved infliction or threat of serious bodily harm
Michigan	1980	15		✓	(*)			Felony
Minnesota	1979	14		✓	✓			Violation of State or local law or ordinance
Mississippi	1979	13		✓	(*)			Any crime
Youth Court		13		✓				Felony
Family Court		13		✓				
Missouri	1980	14		✓		(*)		Felony; traffic offense
		17 ^c		✓		(*)		Any State law or municipal ordinance
Montana	1979	16		✓	(*)			Homicide, arson, aggravated assault, robbery, burglary, rape, aggravated kidnaping, possession of explosives, sale of drugs for profit
Nevada	1980	16		✓				Felony
New Hampshire	1979	Any age	✓	✓	(*)	(*)		Felony
New Jersey	1979	14		✓		✓		Any offense
		14		✓		✓		Homicide; treason; violent crime; drugs, but addict cannot be waived
New Mexico	1980	15	(*)	✓				Murder
		16 ^d	(*)	✓				Felony
		16 ^e	(*)	✓				Certain crimes transferable under sec. 32-1-30; assault with intent to commit violent felony, kidnap, aggravated battery, dangerous use of explosives, rape, robbery, aggravated burglary, aggravated arson

See footnotes at end of table.

Table 1.82 Statutory provisions governing waiver of juveniles to criminal court, by State—Continued

State	Statutes current as of	Minimum age at which allowed (in years)	Mentally ill or retarded child may be waived	Waiver				Restricted to certain crime(s)
				At discretion of				
				Court	Prosecutor	Child		
North Carolina	1980	14		✓				Felony
North Dakota	1980	16	(*)	✓		✓		Crime or public offense
Ohio	1979	15		✓				Felony
Oklahoma	1979	Any age	(*)	✓	(*)			Felony
Oregon	1980	16		✓				Crime; violation of municipal ordinance
Pennsylvania	1980	14		✓		(*)		Felony; except case referred by criminal court under 42 sec. 6355 (d)(e)
Rhode Island	1979	16		✓				Indictable offense
South Carolina	1979	Any age	(*)	✓				Murder and rape
		16		✓				Felony or misdemeanor
South Dakota	1979	Any age		✓				None
Tennessee	1979	15	(*)	✓				Murder, manslaughter, rape, robbery with deadly weapon, kidnaping
		16	(*)	✓				Crime or public offense
Texas	1980	15		✓				Felony
Utah	1980	14		✓				Felony
Virginia	1980	15		✓	(*)	✓		Offenses punishable by imprisonment
Washington	1979	16		✓	(*)	(*)		Class A felony or attempt, assault 2nd, extortion 1st, indecent liberties, kidnaping 2nd, rape 2nd, robbery 2nd
West Virginia	1980	Any age		✓				Treason, murder, robbery with deadly weapon, kidnaping, arson 1st, sexual assault 1st, a second violent felony or a third felony
		16		✓		(*)		Violent felony or second felony
		16		✓		(*)		Any crime
Wisconsin	1979	16	(*)	✓	(*)	(*)		State criminal law
Wyoming	1980	Any age	(*)	✓	(*)	(*)		Crimes

^a May move for or request waiver.
^b Unclear.
^c District attorney may refuse criminal case by not filing an information within 5 days, in which case the juvenile court retains jurisdiction.
^d No discretion, "court shall transfer . . ."
^e No discretion, "transfer hearing shall be held."
^f Unless incompetent to participate in proceedings, but child must then be "committed" to a mental hospital.
^g For youth aged 16 years or older, offenses under the jurisdiction of the juvenile court do not include murder, rape, burglary 1st, robbery while armed, or assault with intent to commit such an offense. Offenders alleged to have committed such offenses do not face waiver proceedings; the criminal court already has exclusive jurisdiction over them.
^h Child and parent may demand.
ⁱ Shall move for or request waiver.
^j Not if committable.
^k Child and counsel may demand waiver.
^l The court "shall" waive unless . . .
^m On own motion or petition of State's attorney.
ⁿ Court refers to prosecutor who decides whether to prosecute.
^o Up to 21 years of age and within juvenile court's continuing jurisdiction.
^p May move for or request waiver if over 17 years of age.
^q Two sections of the statutes delineate these provisions; each section stipulates different criteria

and findings for the waiver decision; see Table 1.83.
^r Waiver is mandatory for capital offenses.
^s If over 17 years of age.
^t Consideration given to juvenile's ability to distinguish right from wrong.
^u Petitioner may request that family court transfer case to general sessions. If request denied, petitioner may appeal to circuit court which may, in its discretion, exercise general sessions' jurisdiction or relinquish jurisdiction to family court.
^v Mandatory transfer if child is charged with a felony and has been previously tried as an adult and convicted of a felony.
^w May make motion for waiver; if court decides to retain jurisdiction and the crime is punishable by death or more than 20 years' imprisonment, the decision to retain can be appealed.
^x May elect with consent of counsel.
^y Child may demand for any crime.
^z Whether a proper subject for commitment is a criterion for waiver under statute, no explicit prohibition to the transfer of the mentally ill or mentally retarded child.
^{aa} Judge may move for or request waiver if he/she removes himself/herself from future proceedings.
^{ab} Only if reasonable grounds to believe child not subject to commitment to a mental health/mental retardation institution.
^{ac} County attorney makes initial decisions whether to file in juvenile court or criminal court. Thereafter, either court may decide to transfer to the other.

Table 1.83 Statutory provisions governing hearings and criteria for waiver of juveniles to criminal court, by State

NOTE: See NOTE, Table 1.82. In situations in which there are multiple provisions defining who may be waived, the procedures for transfer are the same unless indicated otherwise. Nebraska, New York, and Vermont do not have waiver from the juvenile to the criminal court. They do, however, permit waiver from adult court to juvenile court. These data reflect the language contained in juvenile court statutes. Differences in terminology may or may not reflect substantive differences in criteria or procedures. Additionally, the data do not reference other, more general,

criminal laws that may regulate court practices. A "J" indicates that there is an explicit affirmative statutory provision in this area; a blank indicates either that there is a statutory provision but it explicitly does not provide for such a procedure, that the statute is silent in this matter, or that there is no provision within the juvenile code. States' statutes should be consulted for the full text and meaning of specific provisions. Some data have been revised from their original presentation as a result of information provided by the author.

State	Statutes current as of	Hearings					Criteria for waiver		
		Required	Notice	Right to counsel	Court required to provide reasons for decision	Recording and transcript provided	Non-amenability to treatment	Need to protect society	Showing required that child committed act

Table 1.83 Statutory provisions governing hearings and criteria for waiver of juveniles to criminal court, by State—Continued

State	Statutes current as of	Hearings				Criteria for waiver			
		Required	Notice	Right to counsel	Court required to provide reasons for decision	Recording and transcript provided	Non-amenability to treatment	Need to protect society	Showing required that child committed act
Utah	1980	✓		✓					
Virginia	1980	✓	✓	✓			✓ ⁱ	✓ ⁱ	Alleged
Washington	1979	✓		✓	✓		✓ ^h	✓	Probable cause
West Virginia	1980	✓	✓	✓	✓		(^h)	(^h)	
Wisconsin	1979	✓	✓	✓	✓		(^h)	(^h)	Probable cause ^h
Wyoming	1980	✓	✓	✓		✓	✓	✓	Prosecutive merit of the complaint

^a Unless waived.
^b Inclear.
^c Written findings required.
^d Required only where a youth is charged with a class A felony or this is the second serious juvenile offense.
^e Statute requires a showing as to both aspects—non-amenability to treatment and need to protect society.
^f Unclear; statutory language requires a "full investigation and hearing."
^g For those 10 years or older and charged with murder, or 16 years or older charged with a class A or B felony, the court shall waive "unless it would be in the best interests of the child and of the welfare and safety of the community for him to remain in the juvenile system."
^h Guardian ad litem.
ⁱ Minutes.
^j If requested or ordered by the court.
^k Only one or the other required—non-amenability to treatment or need to protect society.
^l Procedures and criteria differ by court. The youth court requires a hearing, with notice and counsel, and a record with reasons for the transfer. The criteria are: non-amenability to treatment or need to protect society; probable cause must exist to believe the alleged youth committed the act. In the family court the law requires only a "full investigation" before waiver. There are no charges filed against a youth.
^m Verbatim recording.
ⁿ Probable cause alone is sufficient for transfer if the alleged crime is treason, murder, robbery with a deadly weapon, kidnaping, arson 1st, or sexual assault 1st.
^o Statute requires showing as to each aspect—non-amenability to treatment and need to protect society and reasonable grounds to believe offender committed act.
^p Unclear; statute requires "full investigation" only.
^q For those charged with murder or certain violent felonies, the court must "consider" non-amenability to treatment in the transfer decision; for all others who are alleged to have committed other felonies, the court must have a showing as to non-amenability to treatment and the need to protect society.
^r Upon request.
^s For those charged with murder or rape there is no provision governing the procedures to be followed in making the waiver decision; for youth 16 years or older charged with other felonies or a misdemeanor, the statute requires a "full investigation."
^t No explicit criteria to be used in the waiver decision for youth charged with murder or rape; for all others potentially subject to waiver, the statute requires a showing of non-amenability to treatment and/or need to protect society and a criminal charge.
^u The relevant language provides, "contrary to the best interests of the child or public."
^v Not required if offense charged is armed robbery, rape, or murder.
^w Statute authorizes court to transfer upon "consideration of the child's mental and physical condition, maturity, emotional attitude, home or family environment, school experience, and similar personal factors, if there is probable cause."
^x Probable cause alone is sufficient for transfer if the alleged crime is treason, murder, robbery with a deadly weapon, kidnaping, arson 1st, or sexual assault 1st.

Table 1.84 Statutory regulations on the confinement of status offenders in juvenile or adult detention and correctional facilities, by State

NOTE: The Juvenile Justice and Delinquency Prevention Act of 1974 established an Office of Juvenile Justice and Delinquency Prevention (OJJDP) within the Law Enforcement Assistance Administration of the U.S. Department of Justice. In establishing OJJDP, Congress outlined major objectives to be achieved. One of the most prominent was the deinstitutionalization of status offenders (juveniles who are charged with or who have committed an offense that would not be criminal if committed by an adult, e.g., running away, truancy) and nonoffenders (e.g., dependant or neglected children). The Act seeks to bar confinement of status offenders and nonoffenders in (1) secure public or private facilities used for the lawful custody of accused or adjudicated juveniles; or (2) public or private facilities, secure or nonsecure, which are used for the lawful custody of accused and convicted adult offenders (Source, p. 1). The Act does permit status offenders to be held in secure confinement for less than 24 hours.

The following definitions apply to data presented in the table: a "yes" means that the State's statutes require deinstitutionalization of status offenders, but it does not necessarily mean compliance with the mandate of the 1974 OJJDP Act. If a State has a general prohibition coupled

with an exception permitting secure placement for a subcategory of status offenders it was considered a "yes." A State that has a general prohibition coupled with an exception that could be applicable to all status offenders was given a "no."
 "Pre-adjudication" refers to the period extending from the time a juvenile is taken into custody by the police to the time a disposition is ordered by the court; "post-adjudication" begins at the point at which the juvenile is subject to a court disposition and extends until she/he is no longer under the jurisdiction of the court.
 Distinctions between the categories juvenile offender and status offender may or may not be made in a State's statutes outlining juvenile court jurisdiction. Such distinctions (or lack thereof) may influence the range of detention and dispositional options available for each group of juveniles. In the table, a "V" means that there is a separate category that includes status offenders and no other group of juveniles; where one does not appear, State statutes do not discriminate between the two groups—that is, status and criminal type juvenile offenders are combined.

State	Distinction between status and juvenile offender	Deinstitutionalization required	Exception/explanation
Alabama	✓	Yes	
Pre-adjudication		Yes	Second time status offenders and those not amenable to treatment may be committed to secure facilities.
Post-adjudication			
Alaska	✓	No	Department of Health and Social Services is not mandated to establish separate detention facilities for status offenders.
Pre-adjudication		Yes	Second time status offenders may be committed to secure facilities.
Post-adjudication			
Arizona	✓	No	Police officer may place status offender in a shelter care or minimally secure facility.
Pre-adjudication		Yes	
Post-adjudication			
Arkansas	✓	No	A juvenile taken into custody may be detained in secure detention for 72 hours to determine, among other things, if she/he is a juvenile in need of supervision.
Pre-adjudication		Yes	
Post-adjudication			
California	✓	Yes	An alleged status offender may be held in secure detention for 12 hours to check for outstanding warrants. A runaway may be held for 24 hours to arrange return to her/his parents, or for 72 hours if the distance from the county is too far to accomplish return in 24 hours.
Pre-adjudication		Yes	
Post-adjudication			
Colorado	✓*	Yes	A runaway from Colorado may be securely detained for 48 hours. Out-of-State runaways may be securely detained for 7 days. Children who are alleged to be CHINOS, children whose behavior or conditions endanger their own or others' welfare, may, after a court finding, be securely detained indefinitely.
Pre-adjudication		Yes	
Post-adjudication			
Connecticut	✓	Yes	Statute only prohibits placement in State-run secure training school, but is silent on placement in private secure facilities.
Pre-adjudication		No	
Post-adjudication			
Delaware	✓*	No	Statute prohibits the detention and placement of alleged and adjudicated status and nonoffenders with delinquents, but is silent on placement in a secure facility exclusively for status and nonoffenders.
Pre-adjudication		No	
Post-adjudication			
Florida	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
Georgia	✓	Yes	An alleged status offender may be securely detained for 72 hours with a 48-hour extension upon court approval.
Pre-adjudication:		No	
Nonoffenders			
Status offenders			
Post-adjudication:		Yes	Upon a court finding that the adjudicated status offender is not amenable to treatment she/he may be committed to the same facilities to which delinquents are committed.
Nonoffenders		No	
Status offenders			
Hawaii	(*)	No	Statute prohibits commitment to facilities in which delinquents are held but is silent on whether status offenders may be committed to secure facilities used exclusively for status offenders.
Pre-adjudication		No	
Post-adjudication			
Idaho		Yes	
Pre-adjudication:		No	
Nonoffenders		No	
Status offenders		No	
Post-adjudication			
Illinois	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
Indiana	(*)	Yes	Alleged runaways may be securely detained for 48 hours.
Pre-adjudication		Yes	
Post-adjudication			

See footnotes at end of table.

Table 1.34 Statutory regulations on the confinement of status offenders in juvenile or adult detention and correctional facilities, by State—Continued

State	Distinction between status and juvenile offender	Deinstitutionalization required	Exception/explanation
Iowa	✓*	Yes	
Pre-adjudication		Yes	
Post-adjudication			
Kansas	✓	No	An alleged status offender may be securely detained for 48 hours prior to a court hearing and an additional 24 hours after a hearing, excluding nonjudicial days.
Pre-adjudication		Yes	
Post-adjudication			
Kentucky	✓	No*	An alleged status offender may be securely detained for 24 hours, excluding nonjudicial days, prior to a hearing and for an additional 10 days following such hearing. Upon the child's consent such detention can be continued for an additional 10 days.
Pre-adjudication		Yes	After adjudication a status offender can be securely detained for 24 hours and for an additional 10 days pending disposition with child's consent. The disposition of a status offender cannot be to a secure residential facility.
Post-adjudication			
Louisiana	✓	Yes	
Pre-adjudication		No	Statute prohibits placement of status and nonoffenders with Department of Corrections, but does not specifically prohibit placement in private secure facilities.
Post-adjudication			
Maine	✓	Yes	An alleged runaway may be securely detained for 6 hours.
Pre-adjudication		Yes	
Post-adjudication			
Maryland	✓	Yes	
Pre-adjudication		No	Statute prohibits status offenders from being committed to facilities for delinquents, but is silent on placement of status offenders to a secure facility exclusively for status offenders.
Post-adjudication			
Massachusetts	✓	Yes	Status offenders are handled in the social service system rather than through the juvenile justice system.
Pre-adjudication		Yes	Habitual school offenders and truancy violators, if deemed by the commissioner to be unmanageable, can be transferred to a training school.
Post-adjudication			
Michigan		No	
Pre-adjudication		No	
Post-adjudication			
Minnesota	(*)	Yes	
Pre-adjudication		Unclear	
Post-adjudication			
Mississippi	✓	No	Statute prohibits committing status and nonoffenders to the State training school, but is silent on placement in other State or private secure facilities.
Pre-adjudication		No	
Post-adjudication			
Missouri	(*)	No	
Pre-adjudication		Yes	Second-time status offenders can be committed to secure facilities within Division of Youth Services.
Post-adjudication			
Montana	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
Nebraska	✓	No	Statute prohibits placement of status offenders in State-run secure facilities, but is silent on placement in private secure facilities.
Pre-adjudication		No	
Post-adjudication			
Nevada	✓	No	Statute favors placement of status offenders in separate facilities from delinquents, but does not mandate such placement.
Pre-adjudication		No	
Post-adjudication			
New Hampshire	✓	Yes	
Pre-adjudication		Yes	A status offender found guilty of contempt (a second-time status offender) may be placed in the youth development center, although separate from delinquents.
Post-adjudication			
New Jersey	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
New Mexico	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
New York	✓	Yes	
Pre-adjudication		Yes	
Post-adjudication			
North Carolina	✓	Yes	Alleged runaways may be securely detained for 24 hours. Juveniles who, due to self-inflicted injuries or attempted self-injuries, are a danger to themselves may be securely detained.
Pre-adjudication		Yes	
Post-adjudication			

See footnotes at end of table.

Table 1.84 Statutory regulations on the confinement of status offenders in juvenile or adult detention and correctional facilities, by State—Continued

State	Distinction between status and juvenile offender	Deinstitutionalization required	Exception/explanation
North Dakota	✓		
Pre-adjudication:		Yes	
Nonoffenders		No	
Status offenders		No	Statute prohibits status offenders from placement in the State-run secure facilities, but is silent on placement in private secure facilities.
Post-adjudication			
Ohio	✓		
Pre-adjudication		No	
Post-adjudication		No	An adjudicated status offender may be committed to a secure facility if the court finds the juvenile not to be amenable to treatment.
Oklahoma	✓		
Pre-adjudication		Yes	Alleged runaways may be securely detained if the court finds it necessary for the child's or community's welfare.
Post-adjudication		Yes	Adjudicated status offenders placed with the Department of Human Services may be transferred to a secure facility if an administrative hearing results in a finding that the juvenile is unmanageable in a less restrictive setting. No child deemed a status offender solely on the basis of truancy or violation of school attendance laws may be removed from her/his home.
Oregon	(*)		
Pre-adjudication		Yes	Alleged runaways may be securely detained; children whose behavior immediately endangers their health may also be securely detained.
Post-adjudication		Yes	
Pennsylvania	✓ ^a		
Pre-adjudication		Yes	
Post-adjudication		Yes	
Rhode Island	✓		
Pre-adjudication		No	
Post-adjudication		No	
South Carolina			
Pre-adjudication		Yes ^d	
Post-adjudication		No	
South Dakota	✓		
Pre-adjudication		No	
Post-adjudication		Yes	
Tennessee	✓		
Pre-adjudication:			
Nonoffenders		Yes	Statute recommends but does not require that alleged status offenders not be detained for longer than 24 hours exclusive of judicial days.
Status offenders		No	Runaways may be detained for no more than 5 days including weekends and holidays.
Post-adjudication		No	Adjudicated status offenders should not categorically be institutionalized except if upon three or more court proceedings they are found to be unruly and not amenable to treatment or rehabilitation.
Texas			
Pre-adjudication		No	
Post-adjudication		No	
Utah			
Pre-adjudication		No	
Post-adjudication:			
Nonoffenders		Yes	
Status offenders		No	
Vermont	✓		
Pre-adjudication		Yes	Statute requires status offenders to be under the authority of the commissioner of social and rehabilitation services and delinquents under the authority of the commissioner of corrections.
Post-adjudication		Yes	Although statute provides for secure placement alternative in certain cases, there is no facility for the secure placement of status offenders. Weeks School has been closed and the only remaining secure facility is limited to delinquents.
Virginia	✓		
Pre-adjudication		Yes	Alleged status offenders may be securely detained for good cause for up to 72 hours.
Post-adjudication		Yes	
Washington	✓		
Pre-adjudication		Yes	An alleged runaway placed in a crisis residential center who either takes an unauthorized leave or is by her/his conduct suicidal or a danger to others may be securely detained for 24 hours.
Post-adjudication		Yes	
West Virginia	(*)		
Pre-adjudication		Yes	
Post-adjudication		No	An adjudicated status offender may be committed to a secure facility if the court finds that the juvenile is unmanageable and not amenable to treatment in a less restrictive setting. Placement must be in a portion of the facility exclusively used for status offenders.

Table 1.84 Statutory regulations on the confinement of status offenders in juvenile or adult detention and correctional facilities, by State—Continued

State	Distinction between status and juvenile offender	Deinstitutionalization required	Exception/explanation
Wisconsin	✓		
Pre-adjudication		Yes	An alleged status offender who, having been placed in a non-secure setting, runs away may be securely detained.
Post-adjudication		Yes	
Wyoming	✓		
Pre-adjudication		No	
Post-adjudication:			
Nonoffenders		No	Statute prohibits committing nonoffenders in the State-run secure facilities, but is silent on placement in private secure facilities.
Status offenders		No	

^a Status offenders are included in the category of dependent children.
^b Separate subsection of delinquent category covers status offenders.
^c Based on 1980 legislation, but not effective until July 1, 1982.
^d After January 1982.

Source: Warren N. Paul and Helga S. Watt, *Deinstitutionalization of Status Offenders: A Compilation and Analysis of State Statutes*, Legislative Technical Assistance in Juvenile Justice Project, Report No. 4 (Denver, Colo.: The State Legislative Leaders Foundation, 1980), pp. 54-57.

Table 1.85 Statutory regulations on the detention of juveniles in adult correctional facilities, by State

NOTE: The Juvenile Justice and Delinquency Prevention Act of 1974 established an Office of Juvenile Justice and Delinquency Prevention (OJJDP) within the former Law Enforcement Assistance Administration of the U.S. Department of Justice. In establishing OJJDP, Congress outlined major objectives to be achieved. One of the most prominent was the separation of juveniles from adults in jails and correctional facilities. The relevant language of the 1974 Act, Sec. 223(a)(13), provides "... that juveniles alleged to be or found to be delinquent and youths within the purview of paragraph (12) shall not be detained or confined in any institution in which they have regular contact with adult persons incarcerated because they have been convicted of a crime or are awaiting trial on criminal charges." OJJDP defines "no regular contact" as meaning at least sight and sound separation (Source, p. 1). These data were compiled from statutes of the 50 States relating to the placement of juveniles in jails and adult correctional

facilities in both pre- and post-adjudication stages. The most recent legislative supplements were used in compiling the information, which most often included 1979 legislative changes. Data for Arizona, Florida, Indiana, Maine, Mississippi, and Missouri, North Carolina, Oklahoma, South Carolina, and Washington include legislative changes enacted in 1980. The following definitions apply to data presented in the table: a "yes" means that the State's statutes require some type of separation between juveniles and adults in adult correctional facilities, but does not necessarily mean compliance with the current OJJDP standard of sight and sound separation; "pre-adjudication" refers to the period extending from the time a juvenile is taken into custody by the police to the time a disposition is ordered by the court; "post-adjudication" begins at the point at which the juvenile is subject to a court disposition and extends until she/he is no longer under the jurisdiction of the court.

State	Separation required	Type of separation required	Exception/explanation
Alabama:			
Pre-adjudication	Yes	Room separate and removed from all contact	
Post-adjudication	Yes		No explicit prohibition
Alaska:			
Pre-adjudication	Yes	Sight and sound separation	
Post-adjudication	Yes		No explicit prohibition
Arizona:			
Pre-adjudication	Yes	Physical separation	
Post-adjudication	Yes	Physical separation	
Arkansas:			
Pre-adjudication	Yes	No regular contact	
Post-adjudication	Yes	No regular contact	
California:			
Pre-adjudication	Yes	No regular contact	
Post-adjudication	Yes	No regular contact	Youth Authority substantially separates juveniles and adults in its facilities.
Colorado:			
Pre-adjudication:			
Under 14 years	Yes	Total prohibition	
14 to 16 years	Yes	Detained separately	Court shall order detention in a jail, lockup, etc. only if no other suitable place of confinement is available or if the child is being held for criminal proceedings (Source, p. 8).
16 to 18 years	No		
Post-adjudication	Yes	Total prohibition	
Connecticut:			
Pre-adjudication	Yes	Total prohibition	
Post-adjudication	No		Court may transfer a youth 14 or over who is a danger to himself or others to a correctional institution.
Delaware:			
Pre-adjudication	Unclear		
Post-adjudication	Yes		The Department of Corrections has separate custodial and training facilities for youthful offenders.
Florida:			
Pre-adjudication	Yes	Total prohibition	
Post-adjudication	Yes	Total prohibition	
Georgia:			
Pre-adjudication	Yes	Physical separation	
Post-adjudication	Yes	Total prohibition	
Hawaii:			
Pre-adjudication	No		Court may order a juvenile whose conduct endangers his own safety to a jail.
Post-adjudication	Yes	Total prohibition	
Idaho:			
Pre-adjudication	Yes	Sight and sound separation	
Post-adjudication	Yes	Segregated from adults	Court can commit a juvenile to jail for 30 days.
Illinois:			
Pre-adjudication:			
Under 16 years	Yes	Total prohibition	
Under 17 years	Yes	Physical separation	
Post-adjudication	Yes	Total prohibition	Juvenile is committed to the Department of Corrections, which has a separate juvenile division.
Indiana:			
Pre-adjudication	Yes	No more than incidental contact	
Post-adjudication	Yes	No more than incidental contact	Court can commit any juvenile to a jail for 10 days and can order a juvenile 17 years 6 months old to a jail for 60 days.
Iowa:			
Pre-adjudication:			
Under 14 years	Yes	Total prohibition	
14 years or older	Yes	Entirely separate	Court may order a juvenile who is a danger to others to be detained in a jail.
Post-adjudication	Yes		No explicit prohibition
Kansas:			
Pre-adjudication	Yes	Physical separation	
Post-adjudication	Yes		No explicit prohibition
Kentucky:			
Pre-adjudication:			
Under 16 years	Yes	Sight and sound separation	Court may jail a juvenile upon finding that the juvenile is a danger to himself or others in the juvenile detention facility.
16 years or older	Yes	Sight and sound separation	
Post-adjudication	No		The court may commit a juvenile placed with the department on a felony charge to the State penitentiary, if the department determines the juvenile will not benefit from its facilities.

Table 1.85 Statutory regulations on the detention of juveniles in adult correctional facilities, by State—Continued

State	Separation required	Type of separation required	Exception/explanation
Louisiana:			
Pre-adjudication:			
Under 15 years	Yes	Total prohibition	
15 years or older	Yes	Entirely separate	Court may order a juvenile who is a danger to the safety of other juveniles in detention to be detained in a jail.
Post-adjudication	Yes		No explicit prohibition
Maine:			
Pre-adjudication	Yes	No regular contact	Intake worker and/or the court can jail a juvenile who is found to be beyond the control of the detention facility staff.
Post-adjudication	Yes	Sight and sound separation (administrative jail standards)	Court can sentence juvenile to 30 days in a jail.
Maryland:			
Pre-adjudication	Yes	Total prohibition	
Post-adjudication	Yes	No contact with adults	Court may order commitment to a penal institution based upon an individualized treatment plan.
Massachusetts:			
Pre-adjudication	Yes	Separate distinct place	
Post-adjudication	Yes	Total prohibition	
Michigan:			
Pre-adjudication:			
Under 15 years	Yes	Total prohibition	
15 years or older	Yes	Sight and sound separation	Court may order a juvenile who is a menace to other children or cannot be safely detained to be placed in a jail.
Post-adjudication	Yes	Total prohibition	Statutes eliminated jail commitment as a juvenile disposition.
Minnesota:			
Pre-adjudication	Yes	Physical separation	
Post-adjudication	Yes	Total prohibition	
Mississippi:			
Pre-adjudication	Yes	Physical separation and lack of substantial view	
Post-adjudication	Yes		No explicit prohibition
Missouri:			
Pre-adjudication	Yes	No contact	
Post-adjudication	Yes	Room or ward entirely separate	Court may commit a juvenile to a jail if his habits constitute a menace to himself or others.
Montana:			
Pre-adjudication	Yes	Sight and sound separation	
Post-adjudication	Yes	Total prohibition	
Nebraska:			
Pre-adjudication:			
Under 14 years	Yes	Total prohibition	
14 to 16 years	Yes	Sight and sound separation	
16 years or older	No		
Post-adjudication:			
Under 16 years	Yes	Total prohibition	
16 years or older	No		
Nevada:			
Pre-adjudication	Yes	Place entirely separate/separate cell	
Post-adjudication	Yes		No explicit prohibition
New Hampshire:			
Pre-adjudication:			
Pre-arrestment	Yes	No contact	
Post-arrestment	Yes	Physical separation/separate room or ward. Prohibition on using solitary confinement cell.	Court may order a juvenile whose conduct or habits are likely to promote serious bodily harm to self or others to be detained in a jail.
Post-adjudication	Yes	Physical separation/separate room or ward. Prohibition on using solitary confinement cell.	Court may commit a juvenile who is at least 17 to a jail for a term no greater than that which an adult could receive for the same crime.
New Jersey:			
Pre-adjudication	Yes	Apart from adults	
Post-adjudication	Yes		No explicit prohibition
New Mexico:			
Pre-adjudication	Yes	Totally separate and removed	
Post-adjudication	Yes	Total prohibition	
New York:			
Pre-adjudication	No		Division for Youth must approve the detention of a juvenile in a jail.
Post-adjudication	Yes		No explicit prohibition
North Carolina:			
Pre-adjudication	Yes*	Totally separate from adult facility	
Post-adjudication	Yes		No explicit prohibition
North Dakota:			
Pre-adjudication	Yes	Room separate and entirely removed	Court or juvenile supervisor must hold that public safety requires the juvenile's detention and no juvenile detention facility is available.
Post-adjudication	Yes		No explicit prohibition
Ohio:			
Pre-adjudication	Yes	Room separate and removed/sight and sound	Court may order juvenile over 15 detained in jail if public safety requires such detention.
Post-adjudication	Yes		No explicit prohibition

See footnote at end of table.

Table 1.85 Statutory regulations on the detention of juveniles in adult correctional facilities, by State—Continued

State	Separation required	Type of separation required	Exception/explanation
Oklahoma:			
Pre-adjudication: 12 years or older	Yes	Room or ward entirely separate	If the detention or shelter facility has no space, If the court has not designated a detention or shelter facility. No explicit prohibition
15 years or older	Yes	Room or ward entirely separate	
Post-adjudication	Yes	Room or ward entirely separate	
Oregon:			
Pre-adjudication: 14 years or older	Yes	Slight and sound separation	If a suitable juvenile detention facility is not available. Court may order a juvenile whose conduct or condition endangers his welfare or others in the detention facility to be detained in a jail.
16 years or older	Yes	Slight and sound separation	
Post-adjudication	Yes	Total prohibition	
Pennsylvania:			
Pre-adjudication	Yes	Total prohibition	
Post-adjudication	Yes	Total prohibition	
Rhode Island:			
Pre-adjudication	Yes	Not directly connected with any jail	No explicit prohibition
Post-adjudication	Yes	Not directly connected with any jail	
South Carolina:			
Pre-adjudication	Yes	Physical separation/room or ward entirely separate	Superintendents of the two schools for boys may transfer juveniles to Board of Corrections for placement in a penal institution.
Post-adjudication	No	Physical separation/room or ward entirely separate	
South Dakota:			
Pre-adjudication	Yes	Physical separation/room separate from a jail	Total prohibition
Post-adjudication: Under 15 years	Yes	Physical separation/room separate from a jail	
15 years or older	No	Physical separation/room separate from a jail	
Tennessee:			
Pre-adjudication	Yes	Separate and removed	Upon court order that public safety requires such detention.
Post-adjudication	Yes	Separate and removed	
Texas:			
Pre-adjudication	Yes	Physical separation	Total prohibition
Post-adjudication	Yes	Physical separation	
Utah:			
Pre-adjudication: Under 16 years	Yes	Total prohibition	The juvenile can be detained in a jail upon a court finding that the juvenile's conduct or condition endangers the welfare of others in the juvenile detention facility. No explicit prohibition
16 years or older	No	Total prohibition	
Post-adjudication	Yes	Total prohibition	
Vermont:			
Pre-adjudication	Yes	Total prohibition	A juvenile charged with a crime punishable by death or life imprisonment may be detained in a jail upon a court finding that public safety demands such detention.
Post-adjudication	Yes	Total prohibition	
Virginia:			
Pre-adjudication: Under 15 years	Yes	Total prohibition	Total prohibition
15 years or older	Yes	Total prohibition	
Post-adjudication: 10 years and under	Yes	Total prohibition	
Over 10 years	Yes	Total prohibition	State Board of Corrections has established separate juvenile institutions. Court may sentence a juvenile to an adult facility upon a finding that the juvenile is not amenable to treatment.
15 years or older	No	Total prohibition	
Washington:			
Pre-adjudication	Yes	Separate building	Separate building
Post-adjudication	Yes	Separate building	
West Virginia:			
Pre-adjudication: Under 14 years	Yes	Total prohibition	Court may order juveniles charged with a violent felony to be detained in jail.
14 years or older	Yes	Juvenile portion of a jail not within sight of adults	
Post-adjudication	Yes	Total prohibition	A juvenile at least 14 who is committed to an industrial home or correctional institution may be placed in a jail for 96 hours awaiting transportation.
Wisconsin:			
Pre-adjudication	Yes	Room separate and removed/room not used for administrative or disciplinary segregation	Court may order a juvenile who is a risk to others in the detention facility, based on previous acts, to be detained in a jail.
Post-adjudication	Unclear	Room separate and removed/room not used for administrative or disciplinary segregation	
Wyoming:			
Pre-adjudication	Yes	Separate	Court may commit a juvenile to a jail for 10 days.
Post-adjudication	Yes	Segregated from adults	

⁴ Until July 1, 1983; after that date there is to be a total prohibition on confinement of juveniles in adult correctional facilities.

Source: Warren N. Paul and Helga S. Watt, *Juveniles in Adult Correctional Facilities: A Compilation and Analysis of State Statutes*, Legislative Technical Assistance in Juvenile Justice Project, Report No. 5 (Denver, Colo.: The State Legislative Leaders Foundation, 1980), pp. 41-43.

Table 1.86 Characteristics of crime victim compensation programs in 28 jurisdictions, as of Apr. 1, 1980

NOTE: These data update 1978 data published in Deborah M. Carrow, *Crime Victim Compensation: Program Model*, U.S. Department of Justice, National Institute of Justice (Washington, D.C.: U.S. Government Printing Office, 1980). The present data were compiled through an analysis of statutory provisions for each State. According to the Source, Rhode Island passed a victim compensation program in 1972 that is to take effect 120 days after Federal legislation is enacted. However, since Federal legislation has not been forthcoming, the program has never been initiated. Louisiana also passed a victim compensation statute in 1972, but never funded the program. The law was repealed in 1976, apparently again because Federal legislation was not forthcoming. Both Nevada and Georgia have a compensation program only for "good samaritans." This refers to persons injured or killed while trying to prevent the commission of a crime, or while attempting to aid a law enforcement officer in an arrest. Both States limit such awards to \$5,000 (Source, p. 491). "Year program enacted" refers to the year that the legislation providing for a victim compensation program was passed. In all cases, except New York, Ohio, Washington, and Wisconsin, victim compensation programs were implemented in the same year that the authorizing legislation was enacted.

	Year program enacted	Program placements			Maximum compensation award	Emergency award	Attorney's fees award
		New administrative agency	Existing administrative agency	Court system			
Alaska	1972	✓			\$25,000 ^a	✓ ^b	✓ ^c
California	1965		✓		23,000 ^d		✓ ^e
Connecticut	1978	✓			10,000		✓ ^f

Virgin Islands	1968	✓			15,000 ^{bi}		✓ ^{bj}

^a Per victim \$25,000; \$40,000 for two or more survivors.
^b Maximum of \$1,500.
^c Twenty-five percent of first \$1,000 awarded; 15 percent of next \$9,000 awarded; 7.5 percent of next \$10,000 awarded.
^d For medical expenses \$10,000; for lost earnings \$10,000; for rehabilitation \$3,000.
^e Ten percent of award up to \$500.
^f Fifteen percent of award.
^g No set limit.
^h Fifteen percent of award up to \$1,000.
ⁱ Maximum of \$500.
^j Limited to "reasonable fees."
^k Fifteen percent of awards over \$1,000.
^l For contested cases only.
^m Fifteen percent of an award under \$5,000; 10 percent of an award over \$5,000.
ⁿ Maximum of \$750 for burial expenses.
^o No limit on benefits in case of permanent disability or death.
^p Maximum of \$1,000.
^q Ten to 20 percent of award, up to \$3,000.
^r Board decides fees.
^s Maximum of \$1,100 for burial expenses.
^t Five percent of award maximum.
^u Fifteen percent of award maximum.
^v Unlimited medical expenses; \$20,000 maximum for wages.
^w Three emergency awards of \$500 each are allowed.
^x Maximum of \$500 for burial expenses.
^y For medical expenses, and loss of earnings and support \$25,000 maximum; for loss of earnings alone \$10,000 maximum; for death benefits \$15,000 maximum.
^z No limit since the amounts are set by workmen's compensation. If the victim was unemployed, his survivors receive a maximum of \$7,500 for burial expenses.
^{aa} Specific payments are not specified.
^{ab} Maximum of \$2,000 for burial expenses.
^{ac} Twenty percent of award maximum.
^{ad} Maximum of \$1,500 for burial expenses; \$10,000 maximum in death benefits.

Table 1.87 Characteristics of statutory provisions authorizing intermittent confinement in 30 States, as of May 1979

NOTE: Intermittent confinement, also referred to as periodic, part-time, partial, nonconsecutive, weekend, or nighttime confinement, is statutorily authorized in 30 States. The remaining States and the Federal jurisdiction have not established explicit provisions for this sentencing alternative.

State	Eligibility	Purposes	Time periods for interval of confinement and/or maximum duration of sentence	Place of confinement	Consequences of failure to appear
Arizona	Condition of probation	Not stated	At whatever time or intervals, consecutive or nonconsecutive, the court shall determine, within the period of probation, as long as the period actually spent in confinement does not exceed 1 year or the maximum period of imprisonment ... whichever is shorter.	County jail	Not stated
Arkansas	Condition of probation	Not stated	At whatever time or consecutive or nonconsecutive intervals within the period of suspension or probation; not to exceed 90 days for felony or 30 days for misdemeanor; any part of a 24 hour period shall constitute a day of confinement.	County jail, city jail, or other ... local detentional, correctional, or rehabilitative facility	Not stated
California	Condition of probation	Employment	Not stated	City or county jail	Not stated
Colorado	Condition of probation	Employment/education	During such time or for such intervals within the period of probation ... not to exceed 90 days for felony, 60 days for misdemeanor, or 10 days for petty offense (unless part of work or education release program; maximum can be 2 years or maximum period of imprisonment, whichever is less.	County or city jail, or any other facility	Considered an escape
Florida	Whenever punishment in the county jail is prescribed	1. Paid employment; 2. conduct his own business or profession; 3. participate in an educational or vocational training program	During necessary and reasonable hours	Jail or county facility	Considered an escape from custody
Georgia	Misdemeanor in which a 6-month sentence or less is imposed; special mention of traffic offenses	Employment	At the discretion of the sentencing judge; a weekend term shall be counted as serving 2 days of the full sentence; confinement during nonworking hours during any day shall be counted as a full day.	Not stated	Not stated
Hawaii	Condition of probation for felony or misdemeanor	Not stated	Not exceeding 6 months	Not stated	Not stated
Illinois	Felony or misdemeanor/person who is 17 years of age or older	1. Seek employment; 2. work; 3. conduct a business or other self-employed occupation, including housekeeping; 4. attend to family needs; 5. attend an educational institution, including vocational education; 6. obtain medical or psychological treatment; 7. for any other purpose determined by the court.	Certain days or during certain periods of days or both; up to 2 years or the longest sentence of imprisonment that could be imposed for the offense, whichever is less; calculated on duration of term rather than upon basis of actual days spent in confinement	Not stated	Not stated
Indiana	Condition of probation	Not stated	Whatever time or intervals (consecutive or intermittent) within period of probation; not more than 60 days and must be completed within 1 year; computed on actual days in confinement	County or local penal facility	Not stated
Kentucky	Condition of probation	Not stated	At whatever time or intervals, consecutive or nonconsecutive; time spent in confinement shall not exceed 6 months or the maximum term of imprisonment, whichever is shorter	County jail	Not stated
Maryland	Prince George's County—offense must permit confinement in county detention center; Queen Anne's County—person sentenced to a period of confinement in county jail; Anne Arundel—county jail	Prince George's County—not stated; Queen Anne's County—working at gainful private employment; Anne Arundel—work	Prince George's County—during any 48 hour period, in any 7 day period, with each period of confinement to constitute not less than 2 days of the sentence imposed; total sentence may not exceed 30 2-day periods; Queen Anne's County—Department of Parole and Probation shall determine the time; Anne Arundel—"reasonable hours"	Prince George's County—detention center or place of confinement under jurisdiction of the sheriff; Queen Anne's County—county jail; Anne Arundel—detention center	Prince George's County—not stated; Queen Anne's County—considered an escape (misdemeanor); Anne Arundel—not stated

Table 1.87 Characteristics of statutory provisions authorizing intermittent confinement in 30 States, as of May 1979—Continued

State	Eligibility	Purposes	Time periods for interval of confinement and/or maximum duration of sentence	Place of confinement	Consequences of failure to appear
Massachusetts	First offense sentenced to jail or house of correction for a term not to exceed 1 year	Not stated	Not later than 6 pm Friday and released at 7 am Monday (if Monday is holiday, then on Tuesday at 7 am) provided total time served is equal to sentence imposed	Jail or house of correction	Not stated
Michigan	Condition of probation/not applicable to person placed on probation for life	Not stated	Not more than 6 months, at such time or intervals, which may be consecutive or nonconsecutive, within the probation period ... (or) the maximum period of imprisonment ... If this maximum is less than 6 months	House of correction or county jail	Not stated
Minnesota	Sentenced to jail	Employment	During such times as he is not employed or between times of employment	County jail, workhouse, and lockup	Considered contempt of court
Montana	Sentenced to county jail	Continue regular employment	During hours when not employed	County jail	Not stated
Nebraska	Condition of probation	Not stated	Periodically or return to custody after specified hours not to exceed 90 days	County jail	Not stated
New Hampshire	Committed to penal institution other than state prison (less than 1 year); suspended sentence of incarceration	Obtaining or working at gainful employment or for such other purpose as the court may deem conducive to his rehabilitation	Such times or intervals of time as the court may order; any part of a day spent in the free community shall be counted as a full day toward the serving of sentence unless otherwise provided by the court; suspended sentence—weekends or at such times or intervals of time as the court may direct; any part of day shall count as a full day toward the sentence. In no event shall the number of days confinement exceed the number of days in the minimum term, where there is one, or in the maximum term	Penal institution other than state prison; suspended sentence—institution to which sentenced	Considered an escape
New York	Other than second or persistent felony, for class D or E felony, or for any offense not a felony; and the court is not imposing any other sentence of imprisonment at the same time; and defendant not under any other sentence with a term in excess of 15 days imposed by any other court	Not stated	On days or during certain periods of days, or both; may specify a period of continuous confinement not to exceed 15 days to commence at the commencement of the sentence; calculated on basis of the duration of term, rather than upon the days spent in confinement	Not stated	Not considered a separate crime; however, modification or revocation of sentence is possible
North Carolina	Condition of probation for offense with a maximum penalty that does not exceed 10 years	Employment	At whatever time or intervals within probation, consecutive or nonconsecutive, the court determines; total of all periods of confinement ... may not exceed 6 months or one fourth the maximum penalty, whichever is less, and no confinement ... may be required beyond 2 years of conviction	Custody of Department of Correction or a designated local confinement or treatment facility	Not stated
North Dakota	Not stated	Not stated	Not stated	Penitentiary or regional detention facility or state farm if felony; county jail, state farm or regional detention facility if misdemeanor	Not stated
Ohio	Condition of parole; "definite term of imprisonment of not more than six months"	To continue at his occupation or care for his family	Overnight, or on weekends, or both, or at such other time or times as will allow him to continue his occupation or care for his family	County jail or workhouse	Not stated

Table 1.87 Characteristics of statutory provisions authorizing intermittent confinement in 30 States, as of May 1979—Continued

State	Eligibility	Purposes	Time periods for interval of confinement and/or maximum duration of sentence	Place of confinement	Consequences of failure to appear
Oregon	Sentence under 6 months or as a condition of probation	Employment or to seek employment; education	Fair and reasonable hours of the day or week; period not to exceed 1 year or one-half the maximum, whichever is less	County jail	Not stated
Pennsylvania	Not specified	1. To work at employment; 2. to seek employment; 3. to conduct business or to engage in self-employment, including housekeeping and attending to the needs of the family; 4. to attend an educational institution or participate in a course of vocational training; 5. to obtain medical treatment; 6. to devote time to any other purpose approved by the court.	Court specify length of the term, which may not exceed the maximum term; minimum sentence shall not exceed one-half the maximum	In a correctional or other appropriate institution	Not stated
Rhode Island	First time offender excluding capital offense	Continue usual occupation or education	Nonworking or study hours	Minimum security facility at Adult Correctional Institutions	Not stated
South Dakota	Condition of probation	Not stated	For a specific period not exceeding 60 days or sentence which was imposed or which may be imposed, whichever is less; may be further restricted to certain days or to certain parts of days specified by court ...	County jail	Not stated
Tennessee	Sentence of less than 1 year in county jail or workhouse	Not stated	Nonconsecutive days which may include but is not limited to week-ends, between hours to be specified until sentence is served or convicted person lawfully released prior to expiration ...	County jail or workhouse	Time limits are specified beyond which a continued absence shall be considered an escape
Texas	Jail time sentence	Employment	Off-work hours or on weekends/on consecutive days or weekends	Jail	Not stated/may require bail
Virginia	Sentence to jail and if dependents may become public charges or otherwise proper and suitable candidate for work release	Employment	Release on days he is regularly employed or during the time necessary to proceed to his place of employment, perform his work, and return to quarters designated by his custodial authorities; supervised by probation officer while on work release	Jail	Considered an escape
West Virginia	Sentenced to 1 year or less	1. To work at employment; 2. to seek employment; 3. to conduct his own business or to engage in other self-employment, including, in the case of a woman, housekeeping and attending to the needs of her family; 4. to attend an educational institution; 5. to obtain medical treatment; 6. to devote time to any other purpose approved by the court.	During necessary and reasonable hours	Jail	Not stated
Wisconsin	Condition of probation	Employment	Between the hours or periods of employment not to exceed 1 year	County jail	Not stated

Table 1.88 State and Federal privacy statutes, by type of information regulated and jurisdiction, as of 1980

NOTE: This information was compiled by a survey of State and Federal laws. All States have constitutional provisions similar to the first and fourth amendments to the United States Constitution; only a few have written into their State constitutions specific language protecting the right to privacy, but several have statutes protecting one or more specific areas of privacy. "Privacy statutes" refers to statutes or sections of a State's constitution indicating a general

or specific right to privacy. "Privileged communication" refers to information that is private because of a particular relationship (e.g., communication between a person and a psychologist or clergyman). Because of the universal nature of lawyer-client and husband-wife privilege, these statutes have not been included in the section on privilege.

Jurisdiction	Type of information regulated																		
	Arrest records	Bank records	Computer crime	Credit records	Criminal justice information systems	Government data banks	Employment records	Insurance records	Mailing lists	Medical records	Miscellaneous	Polygraph tests by employer	Privacy statutes	Privileged communications	School records	Social Security numbers	Tax records	Telephone solicitations	Wiretap

Table 1.89 Statutory restrictions on the purchase, carrying, and owning of handguns in 36 States

NOTE: These data were compiled by the National Rifle Association's Institute for Legislative Action from State statutes. Data are presented for 36 States; current information for the other 15 jurisdictions was unavailable, but is being compiled by the Institute. In addition to State laws, the purchase, sale, and in certain circumstances, the possession and interstate transportation of firearms are regulated by the Federal Gun Control Act of 1968 and Title VII of the Omnibus Crime Control and Safe Streets Act. Also, cities and localities may have their own firearms ordinances in addition to Federal and State laws.

These data refer to general State laws regulating handgun purchase, possession, and ownership. In many cases, certain situations or classes of individuals are exempt from these provisions. For example, possession of a handgun on one's own property may not fall within statutory provisions regarding licensing to carry. Law enforcement and military personnel are also routinely exempt from many of these prohibitions.

There is wide latitude in States' statutes that regulate handgun sale, possession, or use by

persons previously convicted of a felony. Some States specify a prior conviction, but only for certain types of felony offenses (usually violent or personal crimes); others disregard prior convictions if the offender received a pardon or had relief from civil disabilities granted, if the conviction occurred 5 to 10 years prior to the application for a license; still others permit consideration of arrests or misdemeanor offenses. Thus, the category "felons" refers to general statutory prohibitions in this area. In a similar manner the category "mentally incompetent" can include those who have been committed to a mental institution or those who are "of unsound mind." A prior history of mental health problems and treatment may or may not create an exception to State's provisions for the purchase, possession, or use of a handgun. Differences in terminology may or may not reflect substantive differences in State and local statutes and ordinances. Further, the Source notes that State firearms laws are subject to frequent change. State and local statutes and ordinances, as well as local law enforcement authorities, should be consulted for full text and meaning of statutory provisions.

Table 1.89 Statutory restrictions on the purchase, carrying, and owning of handguns in 36 States—Continued

* "For use with a purpose to employ it as a weapon against a person."
 * Except with the written permission or consent of a parent or guardian.
 * Unless under the direct supervision of an adult.
 * No handgun can be legally possessed in the District unless it is registered. All handguns registered in the District prior to Sept. 23, 1976, were required to have been re-registered by Feb. 5, 1977. After that date no more handguns could be registered. Thus, it is unlawful to possess, acquire, or bring into the District of Columbia any handgun that was not registered as of Feb. 5, 1977. Carrying a handgun in the District is prohibited. All firearms are to be kept at one's home or place of business.
 * To obtain a registration certificate, the applicant must be over 21 years of age or be over 18 and have a liability statement signed by his guardian.
 * If the applicant has been hospitalized at a mental hospital or alcohol or drug treatment center within 5 years of his application for a license to carry, the judge has the discretion, after considering the recommendation of the superintendent of the hospital or treatment center, to issue or deny the license.
 * Any handgun that is registered and lawfully possessed may be loaned to another, even though he be a minor, at a target range for a period not longer than to allow the other person to use it for target shooting.
 * May possess if under the immediate control of a parent, guardian, or other adult who has a valid Firearms Owner's Identification Card (FOI); or may apply for an FOI if no prior misdemeanor

convictions or delinquency adjudications and with the written consent of the guardian, who must not be ineligible himself for an FOI.
 * May not carry unless under the supervision of a person at least 18 years of age or on the premises of his or her place of residence.
 * A handgun may be sold by a dealer to a person who (1) presents a handgun transfer or carrying permit, or (2) who has undergone a 7-day waiting period and a handgun transfer report has been filed.
 * The person may request that no record be kept of the fact that he is a receiver of a handgun. The police chief or sheriff shall sign the transfer report and return it to the person receiving the handgun. Thereafter, no government employee or agency shall maintain a record of the transfer that identifies the person who received the handgun.
 * Permit required for purchase by felon; also unlawful for ex-felons to own, possess, or control a handgun unless it was obtained through the purchase permit procedure.
 * "Emotionally unstable."
 * Safety training course certificate required in addition to application.
 * With "intent to go armed."
 * Alien license issued by Director of Motor Vehicles required. It may be issued upon the certificate of the consul within the State who represents the alien's country, stating that said alien is a responsible person.

Table 1.90 Characteristics of marijuana laws in States that have decriminalized possession of marijuana, as of May 1981

NOTE: Distribution of marijuana by gift or for no remuneration is treated as simple possession in California, Colorado, Minnesota, and Ohio (for up to 20 grams). Mississippi has mandatory minimum fines of \$100 for first offense and \$250 for second offense within a two-year period, but State Judges can suspend payment of these fines. Subsequent offenses are subject to increased penalties in Minnesota, Mississippi, New York, and North Carolina.

State	Maximum fine imposed	Maximum amount possessed	Classification of offense	Effective date
Alaska	\$100	Any amount in private for personal use or 1 ounce in public ^a	Civil	Sept. 2, 1975
California	\$100	1 ounce	Misdemeanor—no permanent criminal record	Jan. 1, 1976
Colorado	\$100	1 ounce	Class 2 petty offense—no criminal record	July 1, 1975
Maine	\$200	Any amount ^b for personal use	Civil	Mar. 1, 1976
Minnesota	\$100	1½ ounces	Civil	Apr. 10, 1976
Mississippi	\$250	1 ounce	Civil	July 1, 1977
Nebraska	\$100	1 ounce	Civil	July 1, 1978
New York	\$100	25 grams (approximately ¾ ounce)	Violation—no criminal record	July 29, 1977
North Carolina	\$100	1 ounce	Minor misdemeanor	July 1, 1977
Ohio	\$100	100 grams (approximately 3½ ounces)	Minor misdemeanor—no criminal record	Nov. 22, 1975
Oregon	\$100	1 ounce	Civil	Oct. 5, 1973

^a The Supreme Court of Alaska ruled in 1975 that the constitutional right of privacy protects the possession of marijuana for personal use in the home by adults. This decision invalidates the \$100 fine for simple possession in the home.

^b There is a rebuttable presumption that possession of less than 1½ ounces is for personal use and possession of more than 1½ ounces indicates an intent to distribute.

Source: Table provided to SOURCEBOOK staff by the National Organization for the Reform of Marijuana Laws.

Section 2:

PUBLIC ATTITUDES TOWARD CRIME AND CRIMINAL JUSTICE-RELATED TOPICS

During the past decade, a large number of surveys of public opinion, on a variety of criminal justice topics, have been conducted in the United States. Many of these surveys have been conducted by public opinion researchers in connection with political campaigns or in general social surveys; some others were conducted for governmental agencies or commissions concerned with specific problem areas. In addition, raw data provided by the National Opinion Research Center from its General Social Surveys were tabulated by the SOURCEBOOK staff for inclusion in this edition.

The majority of the opinion surveys contained in this section drew samples of households designed to be representative of households in the continental United States. Respondents were then selected from these households and interviewed. For a description of the general survey sampling procedures of The Gallup Poll, the National Opin-

ion Research Center, Louis Harris and Associates, the ABC-Washington Post Poll, and the NBC News and The Associated Press Poll, see Appendix 6.

The wide range of topics examined in these opinion surveys includes fear of crime and victimization, public attitudes about the cause of crime, the relative seriousness of crime as a social problem, performance of law enforcement and the U.S. Supreme Court, the danger and effects of drugs and alcohol, gun ownership and gun control, and the legalization of various offenses.

The survey results are generally broken down by background characteristics of respondents—such as race, sex, age, and income—enabling comparisons across important social dimensions. Finally, because some of the same questions have been asked repeatedly by a given source over the years, many trend tables have been constructed by the SOURCEBOOK staff and are presented in this section.

Figure 2.1 Perceptions about changes in the level of crime in own area, United States, selected years 1969-81

NOTE: For a discussion of public opinion survey sampling procedures, see Appendix 6.

Question: "In the past year, do you feel the crime rate in your area has been increasing, decreasing, or has it remained the same as it was before?"

Table 2.3 Fear of specific criminal victimization and general fear of crime, by demographic characteristics, United States, 1980

NOTE: The findings reported below result from a random digit-dial telephone survey conducted during April and May 1980 of 1,047 adults in the United States. The resulting survey was weighted to more closely approximate the general adult population, 18 years and older, in both sex and income characteristics.

The concrete fear index is a Guttman scale measuring how often a person worries specifically about being the victim of murder, sexual assault, mugging, knifing, beating, or armed robbery. Answers to each of the six questions that formed the concrete fear index were scored 0 if the response was "rarely" or "never" and 1 if the response was "frequently" or "sometimes," for a possible total score of 6. The concrete fear index score was then classified as "high" if it was 3 to 6 and "moderate to low" if less than 3.

The formless fear index is a Guttman scale measuring the frequency of nonspecific worry about safety in one's home, neighborhood, and larger community. Answers to each of the six questions that formed the formless fear index were scored 0 if the response was "very safe" or "somewhat safe" and 1 if the response was "somewhat unsafe" or "very unsafe," for a possible total score of 6. The formless fear index score was then classified as "high" if it was 3 to 6 and "moderate to low" if it was less than 3.

For further discussion of the survey and indices, see Appendix 7.

Table 2.5 Public school teachers' concern about physical attack by students, by region, student enrollment, teaching level, and frequency of concern, United States, 1980

NOTE: These data were collected from a mail survey sent to a sample of public school teachers drawn at random from a sample of school systems in the United States, also selected at random. Of the 2,185 public school teachers to whom the mail survey was sent, 1,738 or 80.3 percent, completed and returned the questionnaire. The States comprising each region are as follows: Northeast—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont; Southeast—Alabama,

Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia; Middle—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin; and West—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Question: "How concerned are you that you may be physically attacked by a student?"

	[Percent*]				
	Never	Rarely, once or twice a semester	Occasionally, once or twice a month	Frequently, once or twice a week	Constantly, every day
Total	72	23	3	1	1
Region:					
Northwest	68	25	5	1	1
Southeast	70	26	2	1	1
Middle	77	20	2	1	1
West	74	23	2	1	0
School system enrollment:					
25,000 students and over	59	32	5	2	2
3,000 to 24,999 students	76	20	3	0	1
2,999 and fewer students	80	20	1	0	0
Teaching level:					
Elementary	81	17	2	1	0
Junior high	66	29	2	1	2
Senior high	64	30	5	1	1

Figure 2.8 Respondents rating selected problems as severe in own community, by community size, United States, 1977-78

NOTE: Louis Harris and Associates conducted this survey on the quality of community life for the Policy Studies Division of the U.S. Department of Housing and Urban Development (HUD). Between Dec. 1, 1977 and Jan. 10, 1978, 7,074 one-hour interviews were conducted with adults, 18 years and older, across the country. A "city" was defined in accord with the definitions used by the U.S. Bureau of the Census as a central city of a Standard Metropolitan Statistical Area (SMSA); 3,298 interviews, or 31 percent of the weighted sample, were with city inhabitants.

A "suburb" was defined as a place within an SMSA, excluding central cities; 3,229 interviews, or 39 percent of the weighted sample, were with suburban respondents. "Town" and "rural" areas included cities, towns, and villages with a 1970 population of 2,500 or less not located within an SMSA; 547 interviews were categorized as town/rural, comprising 30 percent of the weighted sample.

Question: "I am going to read you some problems facing people in some cities. Please indicate whether you feel it is a severe problem, or not a problem at all in this [city/suburb/town]?"

Source: U.S. Department of Housing and Urban Development, Office of Policy Development and Research, *The 1978 HUD Survey on the Quality of Community Life* (Washington, D.C.: U.S. Department of Housing and Urban Development, 1978), p. 217.

Table 2.10 Attitudes toward the most important problem facing the country, United States, 1978-81

NOTE: For a discussion of public opinion survey sampling procedures, see Appendix 6.

Question: "What do you think is the most important problem facing this country today?"

Most important problem	May 19-22, 1978	May 4-7, 1979	Jan. 25-28, 1980	Sept. 12-15, 1980	Jan. 30-Feb. 2, 1981
High cost of living/inflation	60	57	39	61	73

Table 2.18 Attitudes toward causes of increasing crime, United States, 1981

NOTE: The Gallup Organization conducted 1,030 telephone interviews across the Nation between Jan. 16-23, 1981 for the Newsweek Poll. The margin of error is plus or minus 3 percent (Source, p. 47).

Question: "What is most responsible for the increasing rate of crime?"

[Percent*]	
Causes	
Unemployment	37
Courts too lenient	20
Breakdown of family, society, values	19
Punishment not severe enough	13
Drugs	13
TV violence, movies	3

* Percents do not add up to 100 because of multiple responses.

Table 2.19 Reasons given for increased levels of crime by respondents who believe crime has increased in their community, United States, 1981

NOTE: The data presented below are from a subsample of people, 54 percent of 1,540 respondents, who believe there is more crime in their community now than a year ago. The specific screen question was, "Is there more crime in this area than there was a year ago, or less?" Those responding that there was more crime were then asked the question below. For a discussion of public opinion survey sampling procedures, see Appendix 6.

Question: "In your opinion, why is there more crime in this area than there was a year ago?"

[Percent*]	
Reason for higher level of crime	
Economic problems:	
Unemployment	21
High cost of living	16
Lack of money/poverty	6
Inadequate legal system:	
Judges too lenient	15
Inadequate police protection	11
Breakdown in morality:	
Drugs, alcohol	18
Lack of parental guidance, discipline	12
Decline in morality/permissiveness	9
Dissatisfaction with life	2
General attitudes in our society	2
Population increase/overcrowding	11
Miscellaneous	6
Don't know	7

* Total adds to more than 100 percent because of multiple responses.

Table 2.29 Reported confidence in police, by selected victimization experience of respondent or acquaintance, United States, 1980

NOTE: See NOTE, Table 2.3. The "confidence in the local police index" is the simple sum of responses to six dichotomized questions dealing with police performance and perceived police attitudes. "High" confidence scores were assigned respondents who answered that they agreed with 3 to 6 of the positive dimensions of the confidence questions. If the total of positive responses was less than 3 then a "low" confidence score was assigned. For further discussion of the survey and indices, see Appendix 7.

Table 2.35 Attitudes regarding the objectives of imprisonment, by demographic characteristics, United States, 1970 and 1981

NOTE: The questions below are from the 1970 survey. In 1981, the last phrase of questions A and B were changed to "... or protecting society from future crimes he might commit?" For a discussion of public opinion survey sampling procedures, see Appendix B.

Question: A. "Do you think the main emphasis in most prisons is on punishing the individual convicted of a crime, trying to rehabilitate the individual so he might return to society as a productive citizen, or putting him in prison to protect society from future crimes he might commit?"

Question: B. "Now what do you think should be the main emphasis in most prisons—punishing the individual convicted of a crime, trying to rehabilitate the individual so he might become a productive citizen, or imprisoning him to protect society from future crime he might commit?"

Table 2.40 Respondents reporting household ownership of a handgun or pistol, by demographic characteristics, United States, 1978

NOTE: This survey was conducted by Cambridge Reports, Inc. for the Center for the Study and Prevention of Handgun Violence. A sample of 1,500 Americans was selected in a manner to reflect the total adult population of the United States. The interviews were conducted between Apr. 20, and May 15, 1978, by trained professional interviewers under the supervision of the corporation's field staff.

The 50 States were divided into 6 regions in the following manner: Northeast—Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont; Industrial—Delaware, Indiana, Maryland, Michigan, New Jersey, Ohio, Pennsylvania, and West Virginia; Midlands—Illinois, Iowa, Minnesota, Missouri, and Wisconsin; South—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia; Central—Arizona, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, and Wyoming; and Pacific—Alaska, California, Hawaii, Oregon, and Washington.

In all the tables from this Source, the sample sizes for the technical/vocational education category and the Jewish religion category were too small to produce reliable estimates.

Question: "Does anyone living in this immediate household own a handgun or pistol or not?"

Table 2.51 Respondents agreeing that selected substances are addictive, by type of substance and age category, United States, selected years 1971-79

NOTE: These data are based on six nationwide sample surveys conducted by the Response Analysis Corporation for the National Commission on Marihuana and Drug Abuse (1971 and 1972 surveys) and for the National Institute on Drug Abuse (1974, 1976, 1977, and 1979 surveys). "Not sure" and "no answer" have been omitted in this table. For definitions of terms, sample design, sample characteristics compared with U.S. Bureau of the Census estimates, and statistical reliability, see Appendix 8. For additional information on methodology, including bases for subgroups surveyed in 1971, 1972, 1974, 1976, 1977, and 1979, and copies of the various instruments used to collect the data, see appendices in the Source and follow-up reports from Response Analysis Corporation.

Question: "... which things are addictive? That is, anybody who uses it regularly becomes physically and psychologically dependent on it and can't get along without it."

Table adapted by SOURCEBOOK staff.

Table 2.52 High school seniors' perceptions of the harmfulness of drug use, by type of drug and frequency of use, United States, 1975-80

NOTE: These data are from a series of nationwide surveys of high school seniors conducted by the Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1980. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 65 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 83 percent of

all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables refer to the number of unweighted cases. Alcohol and cigarette use are included in selected tables. For survey methodology and definitions of terms, see Appendix 9.

Question: "How much do you think people risk harming themselves (physically or in other ways), if they . . .?"

Type of drug and frequency of use	Percent saying "great risk"*					
	Class of 1975 (N = 2,804)	Class of 1976 (N = 3,225)	Class of 1977 (N = 3,570)	Class of 1978 (N = 3,770)	Class of 1979 (N = 3,250)	Class of 1980 (N = 3,234)
Try marijuana/hashish once or twice	15.1	11.4	9.5	8.1	9.4	10.0
Smoke marijuana/hashish occasionally	18.1	15.0	13.4	12.4	13.5	14.7
Smoke marijuana/hashish regularly	43.3	38.6	36.4	34.9	42.0	50.4
Try LSD once or twice	49.4	45.7	43.2	42.7	41.6	43.9
Take LSD regularly	81.4	80.8	79.1	81.1	82.4	83.0
Try cocaine once or twice	42.6	39.1	35.6	33.2	31.5	31.3
Take cocaine regularly	73.1	72.3	68.2	68.2	69.5	69.2
Try heroin once or twice	60.1	58.9	55.8	52.9	50.4	52.1
Take heroin occasionally	75.6	75.6	71.9	71.4	70.9	70.9
Take heroin regularly	87.2	88.6	86.1	86.6	87.5	86.2

Section 3:

NATURE AND DISTRIBUTION OF KNOWN OFFENSES

This section contains data that have been collected on the extent and nature of criminal incidents. A number of collection methods and strategies are represented by these data. Because it is well-known that crimes reported to the police are not the universe of crimes that occur, efforts have been made to complement police reports of offenses known with additional indicators of the occurrence of illegal behavior. Perhaps the most commonly used alternative method of assessing the occurrence of illegal behavior has been with surveys. These have been of two general types: (1) surveys of households and businesses to determine the rates and characteristics of those who have been *victims* of illegal acts; and (2) surveys of the general population to determine the proportions and characteristics of those who may have *engaged* in illegal acts.

The initial segment of this section presents data from the National Crime Survey (NCS), which is sponsored by the Bureau of Justice Statistics of the U.S. Department of Justice and conducted by the U.S. Bureau of the Census. The NCS is a multi-faceted national probability survey of households that regularly provides information regarding the nature and extent of common crime, its costs, characteristics of victims, and characteristics of criminal events.

The next segment of the section begins with tables providing information on self-reported alcohol and drug use among adults and youth. These data are from national surveys conducted by researchers for the National Institute on Drug Abuse. Thus, this segment includes information on the use of over-the-counter drugs, marihuana, hashish, glue, PCP, LSD, cocaine, heroin, methadone, and alcohol. Some tables display the distribution of drug use by demographic characteristics of the respondents.

The final segment of this section contains data compiled through the use of the official records of agencies. The Uniform Crime Reports provides data on offenses known to the police that are tabulated by city, county, Standard Metropolitan Statistical Area, population size group, and geographic division. Trends in the characteristics of known offenses are also reported, as is information on law enforcement officers killed and assaulted. This part of the section also supplies data on offenses committed in U.S. park areas; bombings; motor vehicle thefts; drug thefts; Federal alcohol, tobacco and firearms cases; hijackings; child abuse; offenses against railroads; and the Federal Crime Insurance Program.

Table 3.1 Estimated number of personal and household victimizations, by reporting to police and type of victimization, United States, 1979^a

NOTE: These estimates are based on data derived from surveys that were undertaken in connection with the Bureau of Justice Statistics' National Crime Survey program. In these surveys, conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics, representative national samples of households and businesses were drawn. In the personal and household portion of the survey, victimization data were collected for all household members who were at least 12 years of age; therefore, victimizations of those under 12 years of age were not counted in the survey. Some crimes, such as homicide, were not counted. The business portion of the survey was not conducted after 1976. For survey methodology and definitions of terms, see Appendix 10.

Type of victimization	Total		Reported to police		Not reported to police		Don't know whether reported to police	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent

Table 3.6 Estimated number of personal and household victimizations not reported to police, by reason given for not reporting to police and type of victimization, United States, 1979*

NOTE: See NOTE, Table 3.1. Because respondents may have given more than one reason for not reporting the victimization to the police, the row sum of the "reason for not reporting to the police" may exceed "total victimizations not reported." In 1979, new response categories for "reason for not reporting the victimization to the police" were used. Because of this change, caution should be observed in comparing the 1979 results with earlier years—particularly for the category "nothing could be done." For survey methodology, definitions of terms, and a discussion of changes in the 1979 interview schedule, see Appendix 10.

Type of victimization	Total victimizations not reported	Reason for not reporting victimization to police					
		Nothing could be done		Victimization not important enough		Police wouldn't want to be bothered	
		Number	Percent	Number	Percent	Number	Percent
Personal victimizations:

Table 3.7 Estimated rate (per 100,000 units of each respective category) of personal and household victimization, by extent of urbanization and type of victimization, United States, 1979^a

NOTE: See NOTE, Table 3.1. The figures in this table estimate rates of personal and household victimization. Estimated rates of personal victimization are based on the number of persons 12 years of age or older. Estimated rates for household victimization are based on the number of households. "Base" represents the estimated number of units falling into each category of the independent variable. For household victimizations, the number of incidents is equivalent to the number of victimizations because the household is considered to be the victim. To obtain the

estimated number of victimizations that correspond to any given rate, multiply the particular rate by the base figure for that column and divide by 100,000. A "Standard Metropolitan Statistical Area" generally includes a core city with a population of 50,000 or more inhabitants and the surrounding counties that share certain metropolitan characteristics. For survey methodology and definitions of terms, see Appendix 10.

Type of victimization	Core cities within Standard Metropolitan Statistical Areas	Areas within Standard Metropolitan Statistical Areas, but outside of core cities	Areas outside of Standard Metropolitan Statistical Areas	Total
[Rate per 100,000 persons 12 years of age or older]				
Personal victimizations:				
Base	50,372,127	71,057,513	56,813,365	178,243,005
Rape and attempted rape	135	110	80	108
Robbery	1,170	561	224	626
Robbery with injury	394	189	86	214
Serious assault	209	99	49	114
Minor assault	186	90	36	100
Robbery without injury	535	225	73	264
Attempted robbery without injury	241	147	66	148
Assault	3,442	2,812	1,961	2,719
Aggravated assault	1,329	978	711	992
With injury	491	277	274	336
Attempted assault with weapon	839	702	437	656
Simple assault	2,113	1,834	1,250	1,726
With injury	529	479	332	446
Attempted assault without weapon	1,584	1,355	918	1,280
Personal larceny with contact	577	227	103	287
Purse snatching	165	46	7	67
Attempted purse snatching	63	20	2	26
Pocket picking	350	161	94	193
Personal larceny without contact	9,941	9,963	6,643	8,899
[Rate per 100,000 households]				
Household victimizations:				
Base	24,067,978	30,368,021	25,051,426	79,487,426
Burglary	10,949	7,931	6,548	8,409
Forcible entry	4,148	2,368	1,746	2,711
Unlawful entry without force	4,353	3,780	3,647	3,912
Attempted forcible entry	2,448	1,783	1,155	1,787
Larceny	16,183	14,088	9,813	13,375
Under \$50	8,382	7,633	5,553	7,204
\$50 or more	5,717	4,898	3,207	4,613
Amount not ascertained	850	695	585	708

Table 3.13 Estimated number of personal and household incidents, by time of occurrence and type of victimization, United States, 1979*

NOTE: See NOTE, Table 3.1. Because a personal incident may involve more than one victim, the number of personal victimizations can be expected to exceed the number of personal incidents. For household victimizations, the number of incidents is equivalent to the number of victimizations.

Type of victimization	Time of occurrence												
	Total		6 a.m. to 6 p.m.		6 p.m. to midnight		Midnight to 6 a.m.		Nighttime, but time unknown		Don't know or not ascertained

Table 3.14 Estimated number of personal incidents, by place of occurrence and type of victimization, United States, 1979^a

NOTE: See NOTE, Table 3.1. Because a personal incident may involve more than one victim, the number of victimizations can be expected to exceed the number of incidents. In 1979, new response categories for the "place of occurrence" were used. Because of this change, caution should be observed in comparing the 1979 results with earlier years. For survey methodology, definitions of terms, and a discussion of changes in the 1979 interview schedule, see Appendix 10.

Type of victimization	Place of occurrence					
	Total		Inside home or other building		Vacation home, hotel, motel

Table 3.16 Estimated number of personal incidents, by type of weapon used and type of victimization, United States, 1979^a

NOTE: See NOTE, Table 3.1. Because a personal incident may involve more than one victim, the number of personal victimizations can be expected to exceed the number of personal incidents. Because more than one weapon may have been used in a given incident, the sum of the "type of weapon" entries in any given row may exceed the number of "incidents with weapon." For survey methodology and definitions of terms, see Appendix 10.

Table 3.17 Estimated number of personal incidents and percent with weapon, by perceived age of lone offender and type of victimization, United States, 1979^a

NOTE: See NOTE, Table 3.1. Because a personal incident may involve more than one victim, the number of victimizations can be expected to exceed the number of incidents. It must be stressed that this table reflects the victim's perception of the offender; the accuracy of these perceptions

has not been extensively studied in the NCS developmental work. For survey methodology and definitions of terms, see Appendix 10.

Type of victimization	Perceived age of lone offender									
	Total		Under 12		12 to 20		21 or older		Don't know or not ascertained	
	Number	Percent with weapon	Number	Percent with weapon	Number	Percent with weapon	Number	Percent with weapon	Number	Percent with weapon
Rape and attempted rape	156,020	25	0	X	33,853	21	121,493	26	674	B
Robbery total	455,953	42	2,454	B	170,794	39	260,634	44	22,071	B
Robbery and attempted robbery with injury	151,968	32	0	X	51,568	24	88,746	38	11,654	B
Robbery without injury	178,958	52	0	X	72,183	52	99,145	56	7,830	B
Attempted robbery without injury	125,027	39	2,454	B	47,043	36	72,743	38	2,787	B

Table 3.32 Estimated rate (per 100,000 motor vehicles owned) of attempted and completed motor vehicle thefts, by selected characteristics of household and type of victimization, United States, 1979^a

NOTE: See NOTE, Table 3.1. Estimated rates are based on the number of motor vehicles owned, rather than on the number of households or persons. "Base" represents the estimated number of vehicles owned by those in various categories of the independent variables. To obtain the estimated number of victimizations that correspond to any given rate, multiply the particular rate shown by the base figure and divide by 100,000.

Included in this table, but not included in other tables in which vehicle thefts are shown, are vehicle thefts or attempts that occurred in conjunction with more serious crimes such as rape or robbery. For survey methodology and definitions of terms, see Appendix 10.

[Rate per 100,000 motor vehicles owned]

Characteristics of household	Motor vehicle theft			
	Base	Total	Completed	Attempted
All households	132,341,000	1,126	743	383
Race of head of household:				
White	121,270,000	1,051	687	364
Black and other races	11,072,000	1,951	1,355	596
Age of head of household:				
12 to 19	1,243,000	3,714	2,625	1,089
20 to 34	40,533,000	1,564	1,054	510
35 to 49	40,401,000	1,088	727	361
50 to 64	34,125,000	838	517	321
65 and older	16,039,000	522	328	194
Tenure:				
Home owners	99,724,000	740	482	258
Renters and no cash rent	32,618,000	2,304	1,538	766
Persons in household:				
One	15,004,000	1,503	1,011	492
Two to three	69,463,000	1,055	679	376
Four to five	39,082,000	984	655	329
Six or more and not ascertained	8,792,000	1,665	1,174	491

Table 3.38 Reports of child abuse or neglect, by type of report, 33 jurisdictions, 1979

NOTE: These data were collected by the National Study on Child Neglect and Abuse Reporting of the American Humane Association. The data were compiled from the reports of the 31 States and 2 territories that submitted individual case information. They do not represent the total number of reports received because reports were edited by the National Study's staff for correctness and completeness. Only edited reports have been tabulated. The reader is urged to use caution in making comparisons across the annual reports. Major changes have been made in the data base system for 1979 that affect comparisons with earlier reports. Specifically, the use of "substantiated reports" only for the national analyses has been abandoned because of the variation in definitions across States as to what constitutes a substantiated report. The National Study defines an abuse report as a report of intentional, nonaccidental injury, harm, or sexual abuse inflicted on a child. A neglect report is a report of the responsible caretaker's nonprovision of care essential to a child, such as food, clothing, shelter, medical attention, education, or supervision (Source, p. 77). It should be noted, however, that definitions of abuse and neglect, and reporting procedures vary from State to State. For information on methodology of the study, see Appendix 11.

Type of report	Number	Percent
Abuse	58,772	25.1
Neglect	111,162	47.5
Abuse/neglect	42,858	18.3

Table 3.39 Public school teachers reporting whether they have been physically attacked by students, by region, student enrollment, teaching level, and number of attacks, United States, 1980

NOTE: These data were collected from a mail survey sent to a sample of public school teachers drawn at random from a sample of school systems in the United States, also selected at random. Of the 2,165 public school teachers to whom the mail survey was sent, 1,738, or 80.3 percent, completed and returned the questionnaire. The States comprising each region are as follows: Northeast—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont; Southeast—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia; Middle—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin; West—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Question: "Have you been physically attacked by a student within the past 12 months?"

	[Percent*]			
	No	Once	Twice	Three times or more

Table 3.42 Reported alcohol use and most recent use among high school seniors, by sex, region, population density, and college plans, United States, 1980

NOTE: These data are from a series of nationwide surveys of high school seniors conducted by the Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1980. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 83 percent of

all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables refer to the approximate number (i.e., rounded to the nearest hundred) of unweighted cases. These data were derived from the questions indicated below. For survey methodology and definitions of terms, see Appendix 9.

Question: "On how many occasions have you had alcoholic beverages to drink in your lifetime? On how many occasions have you had alcoholic beverages to drink during the last 12 months? On how many occasions have you had alcoholic beverages to drink during the last 30 days?"

O'Malley, *Highlights from Student Drug Use, 1975-1980*, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1981), pp. 20, 22, 24. Table adapted by SOURCEBOOK staff.

Table 3.43 Reported drug use within last 12 months among high school seniors, by type of drug, United States, 1975-80

NOTE: See NOTE, Table 3.42. Data for the categories "inhalants" and "hallucinogens" are underestimated because some users of amyl and butyl nitrites, and PCP fail to report in these drug categories. The 1979 and 1980 surveys address this issue by asking specific questions about amyl and butyl nitrites (inhalants) and PCP (a hallucinogen) on one survey alternate form,

representing approximately one-fifth of the total yearly sample. These data were then used to adjust the 1979 and 1980 data for underreporting in these drug categories. For survey methodology and definitions of terms, see Appendix 9.

Question: "On how many occasions, if any, have you used . . . in the last 12 months?"

Type of drug	Percent who used in last 12 months*					
	Class of 1975 (N=9,400)	Class of 1976 (N=15,400)	Class of 1977 (N=17,100)	Class of 1978 (N=17,800)	Class of 1979 (N=15,500)	Class of 1980 (N=15,900)

O'Malley, *Highlights from Student Drug Use, 1975-1980*, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1981), pp. 20, 22, 24. Table adapted by SOURCEBOOK staff.

Table 3.46 Reported drug use among adults, young adults, and youth, by type of drug, United States, selected years 1972-79

NOTE: These data are based on six nationwide sample surveys conducted by the Response Analysis Corporation for the National Commission on Marihuana and Drug Abuse (1971 and 1972 surveys) and for the National Institute on Drug Abuse (1974, 1976, 1977, and 1979 surveys). The data in this table were derived from any positive response to the questions listed below.

For the years prior to 1979 the data reported for marihuana refer only to marihuana use. For 1979, the data reported for marihuana use refer to marihuana and/or hashish use. For survey methodology, including the bases for subgroups surveyed in each of the survey years, and definitions of terms, see Source and Appendix 8.

Questions: "About how old were you when you first tried a cigarette? Did you ever take (sedatives, tranquilizers, stimulants, analgesics) just to see what it was like and how it would work; just to enjoy the feeling they give you; for some other nonmedical reason, and not because you needed it? When was the most recent time that you used (marihuana or hashish, inhalants, LSD or other hallucinogens, cocaine, heroin)? When was the most recent time you had a drink?"

Type of drug	[Percent reporting ever used drug]

Table adapted by SOURCEBOOK staff.

Table 3.49 Reported drug use among adults, young adults, and youth, by use of alcohol and type of drug, United States, 1979

NOTE: See NOTES, Tables 3.46 and 3.47. These data were constructed by combining the questions below into the four categories shown in the table. The "current drinkers" category was derived by any positive response to the question about alcohol use. For survey methodology and definitions of terms, see Appendix B.

Questions: "When was the most recent time you had a drink? Did you ever take (barbiturates and other sedatives, tranquilizers, amphetamines and other stimulants, analgesics) just to see what it was like and how it would work; just to enjoy the feeling they give you, or for some other nonmedical reason, and not because you needed it? When was the most recent time you used (marihuana or hashish, LSD or other hallucinogen, cocaine, heroin)?"

[Percent reporting ever used drug]

Figure 3.18 Reported alcohol, cigarette, and marijuana use among adults, young adults, and youth, United States, selected years 1971-79

NOTE: See NOTE, Table 3.46. For 1974, 1976, 1977, and 1979, current smoker was defined as "smoked within past 30 days." The 1971 and 1972 definition of current smoker was "smoked at present time." For 1971, data on alcoholic beverages were reported separately for beer, wine, liquor, and not summed to represent any drinking of alcohol. Data for some years have been revised from previous reports. For survey methodology and definitions of terms, see Appendix B.

Questions: "During the past month have you smoked any cigarettes? During the past 30 days, on about how many days did you drink any alcoholic beverages? When was the most recent time you used marijuana, hashish?"

^a Current cigarette and alcohol use not asked this year.

Fishburne, and Ira Cisin, *National Survey on Drug Abuse: 1977, A Nationwide Study—Youth, Young Adults, and Older People, Volume I, Main Findings*, U.S. Department of Health, Education, and Welfare, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 45, 58; and Patricia M. Fishburne, Herbert I. Abelson, and Ira Cisin, *National Survey on Drug Abuse: Main Findings 1979*, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 38-40. Figure constructed by SOURCEBOOK staff.

Table 3.54 Estimated number and rate (per 100,000 inhabitants) of offenses known to police, by offense, United States, 1960-79

NOTE: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencies (police, sheriffs, and State police) report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, and motor vehicle theft. A count of these crimes, which are known as Part I offenses, is taken from records of all complaints of crime received by law enforcement agencies from victims or other sources and/or from officers who discovered the offenses. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count (Source, p. 2).
 The Uniform Crime Reporting Program uses seven crime categories to establish a "crime index" in order to measure the trend and distribution of crime in the United States. Crime index offenses include murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft; the "Total Crime Index" is a simple sum of the index offenses. Arson was designated as a Part I index offense in October 1978; data collection was begun in 1979. However, due to the incompleteness of arson reporting by police in 1979, arson data are not displayed (nor are they included in the Total Crime Index or the offenses known to the police).
 The figures in this table are subject to updating by the Uniform Crime Reporting Program, and therefore, may not be consistent with prior editions of the Uniform Crime Reports. It should also be noted that the number of agencies reporting and populations represented may vary from year to year. This table, Table 3.56, and Table 3.57 present estimates for the United States or particular areas based on agencies reporting. For definitions of offenses, see Appendix 3.

	Population ^a	Total Crime Index ^b	Violent crime ^c	Property crime ^c	Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft

Table 3.55 Offenses known to the police in cities over 100,000 population, 1979 and 1980

NOTE: See NOTE, Table 3.54. Arson was designated a Part I Index offense in 1978. Data on arson were first collected by the UCR program in 1979. Because complete arson data are not available for all jurisdictions for both reporting years, they are not presented here nor are they included in the "Total Crime Index." For definitions of offenses, see Appendix 3.

[All 1980 crime figures from reporting units are preliminary. Final figures and crime rates per unit of population are not available until the publication of the Uniform Crime Reports, 1980.]

* Figures for 1979 are not comparable with 1980. Data in this table are based on the volume of crimes reported by comparable units. Agency reports that are determined to be influenced by a change in reporting practices for all or specific offenses, or annexations, are removed.

Source: Table adapted from table provided to SOURCEBOOK staff by the U.S. Department of Justice, Federal Bureau of Investigation.

Table 3.56 Estimated number and rate (per 100,000 inhabitants) of offenses known to police, by offense and extent of urbanization, 1979

NOTE: See NOTE, Table 3.54. These figures are aggregated from individual State statistics presented in Table 3.57. These data include estimated offense totals for agencies submitting less than 12 months of offense reports (Source, p. 317). For definitions of offenses and areas, see Appendix 3.

* Populations are U.S. Bureau of the Census provisional estimates as of July 1, 1971.
^b Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.
^c The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual States, which have varying populations, portions reporting, and crime rates.

Table 3.59 Offenses in Federal parks known to police, by offense, 1975-79

NOTE: The National Park Service is responsible for the administration of 297 park areas that are owned by the Federal Government. Urban park areas are policed by the U.S. Park Police, while non-urban park areas are policed by the U.S. Park Rangers. The offense categories listed below are the Uniform Crime Reports Part I offenses; see Appendix 3 for definitions. Note, however,

that these offenses are not counted in the Federal Bureau of Investigation figures. In 1975, the "Human Kindness Day" activities sponsored by one of the major urban park areas accounted for approximately 500 robbery incidents in that year.

Offense	1975	1976	1977	1978	1979
Total offenses	7,697	7,521	7,763	8,247	8,561
Total annual visitation (in thousands)	238,849	267,827	251,584	283,090	282,435
Criminal homicide	10	10	17	12	15
Forcible rape	84	66	60	91	87
Robbery	779	281	238	261	264
Aggravated assault	385	470	458	494	505
Burglary	1,031	954	1,097	1,188	1,330
Larceny-theft	5,156	5,570	5,662	5,986	6,124
Motor vehicle theft	252	170	231	215	236

Table 3.60 Number and rate (per 100,000 estimated population) of deaths from homicide, suicide, and accidents, by State, 1978

NOTE: Data in this table are submitted to the National Center for Health Statistics and are based on information from all death certificates from the 50 States and the District of Columbia. The population used for computing the rates is based on estimates by the U.S. Bureau of the Census.

[Refers only to resident deaths occurring within the United States. Excludes fetal deaths. Rate per 100,000 estimated population.]

Table adapted by SOURCEBOOK staff.

Table 3.61 Murders and nonnegligent manslaughters known to police, by type of weapon used, United States, 1964-79

NOTE: See NOTE, Table 3.54. In trend tables "constructed" or "adapted" by SOURCEBOOK staff from the Uniform Crime Reports, the data were taken from the first year in which the data were reported. It should be noted that the number of agencies reporting and the populations represented vary from year to year.

The Uniform Crime Reporting Program requests that additional information be transmitted to the FBI when a homicide has been committed. The actual number of offenses presented in the tables displaying characteristics of murders known to the police may differ from figures in other tables that reflect data from only the initial report on the offense.

[Percent]

Year	Type of weapon used						Total ^F	Total number of murders and nonnegligent manslaughters
	Firearm	Cutting or stabbing instrument	Blunt object (club, hammer, etc.)	Personal weapons (hands, fists, feet, etc.) ^a	Other ^b	Unknown or not stated		
1964	55	24	5	10	3	2	100	7,990
1965	57	23	6	10	3	1	100	8,773

Table 3.63 Murders and nonnegligent manslaughters known to police, by victim-offender relationship and circumstances of the offense, United States, 1979

NOTE: See NOTES, Tables 3.54 and 3.61. Law enforcement agencies are requested to describe the circumstances of the murders and nonnegligent manslaughters. These descriptions are

categorized by the Uniform Crime Reporting Program. "Felony type" refers to killings that occur in conjunction with the commission of another felony, such as robbery or burglary.

Table 3.77 Violations of the Federal Bank Robbery and Incidental Crimes Statute and of the Hobbs Act, by type of violation and jurisdiction, 1979

NOTE: The following bank crime statistics were compiled by the Federal Bureau of Investigation. Violations of the Federal Bank Robbery and Incidental Crimes Statute include robbery, burglary (entry of bank and/or theft from bank during non-business hours), and larceny (theft not involving direct confrontation between offender and bank personnel or customers) of commercial banks, mutual savings banks, savings and loan institutions, and credit unions. Violations of the Hobbs Act involve extortion and kidnaping of bank officials or their families.

Jurisdiction	Type of violation

Table 3.79 Assaults on Federal officers, by department and agency, 1978 and 1979

NOTE: These data were compiled from reports of investigations conducted by the Federal Bureau of Investigation, the Department of the Treasury, and the U.S. Postal Service. The Federal Bureau of Investigation is responsible for the investigation of assaults on personnel of the Department of the Interior, the Department of Justice, and the Federal Judiciary. Customarily, the Department of

the Treasury and the U.S. Postal Service investigate assaults against officers assigned to their agencies. All assaults and threats of assault are included in the analysis even though no injury to an officer may have resulted, as are assaults that resulted in the death of an officer.

Department and agency	Number of incidents		Number of officers assaulted		Number of known offenders

Figure constructed by SOURCEBOOK staff.

Table 3.86 Drug thefts, by type of drug and region, 1976-80

NOTE: Registered handlers of controlled substances (pharmacies, practitioners, manufacturers, and hospitals) are required, under the Controlled Substances Act, to report the theft of all controlled drugs to the Drug Enforcement Administration. This table includes drug thefts reported by these registered handlers.
The States included in the regions are as follows: Northeast—Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont; Southeast—Alabama, Arkansas, District of Columbia, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia; North Central—Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, West Virginia, Wisconsin; South Central—Arizona, Colorado, New Mexico, Oklahoma, Texas, Utah, Wyoming; West—Alaska, California, Hawaii, Idaho, Montana, Nevada, Oregon, Washington.

[In thousands of dosage units]

Type of drug and region	1976	1977	1978	1979	1980
Narcotics*	10,614	10,072	11,732	12,210	10,881

Total	66,441	44,269	48,717	44,914	35,191

* Includes methadone, cocaine, and other narcotics.

Source: U.S. Department of Justice, Drug Enforcement Administration, *Drug Enforcement Statistical Report* (Washington, D.C.: U.S. Department of Justice, 1979), p. 39; and data provided by the U.S. Department of Justice, Drug Enforcement Administration. Table adapted by SOURCEBOOK staff.

Table 3.87 Estimated average illegal market retail drug prices, by type of drug, United States, 1973-80

NOTE: The average illegal market retail heroin price is calculated from a sample of evidence exhibits removed from the illicit market by the Drug Enforcement Administration. The sample is selected to include "only those exhibits which fall within a certain range of values representative of a retail level of the illicit market." Beginning in 1978, the estimated national average is derived from regional averages weighted for the "intensity of the narcotic problem." That is, through statistical procedures, a large number of transactions in one location are clustered to limit their influence on heroin price and purity statistics in the sample group (Source, 1979, p. 34). Cocaine prices are derived from the Cocaine Retail Price Index, which is based upon evidence

exhibits purchased by the Drug Enforcement Administration (Source, 1979, p. 37). Beginning in 1979, prices of dangerous drugs (marijuana, hashish, LSD, PCP, barbiturates, and amphetamines) are based on reports for the last quarter of each year submitted by Drug Enforcement Administration's field offices in 24 large metropolitan areas. These prices are compiled through a newly-initiated collection method, which reflects transaction data at the retail level. Comparison with prices of earlier years is not recommended by the Source (1979, p. 35). The notation "d.u." means dosage unit.

Type of drug	1973	1974	1975	1976	1977	1978	1979	1980
Heroin (gm.)*	\$1,150.00	\$1,230.00	\$1,150.00	\$1,400.00	\$1,590.00	\$2,190.00	\$2,290.00	\$2,200.00
Cocaine (gm.)*	410.00	490.00	560.00	530.00	640.00	650.00	780.00	670.00
Marijuana (gm.)	.63	.56	.65	.64	.69	.80	1.42	1.66
Hashish (gm.)	9.66	9.85	8.38	10.20	8.67	9.64	5.37	2.61
LSD (d.u.)	1.56	1.66	1.73	1.91	2.06	2.18	3.18	3.23
PCP (d.u.)	NA	NA	NA	NA	NA	1.59	7.95	8.36

Table adapted by SOURCEBOOK staff.

Table 3.88 Bombing incidents known to police, by type of incident and device, value of property damage, and outcome of incident, United States, 1972-80

NOTE: Detailed information concerning each bombing incident reported as occurring in the United States, Puerto Rico, and the Virgin Islands is submitted by FBI field offices to the Uniform Crime Reporting Program. Local and State public safety agencies bring incidents within their jurisdictions to the attention of the field offices. Because not all bombing incidents constitute Federal violations within the FBI's investigative purview, these other law enforcement agencies greatly facilitate the reporting of occurrences and details of the incidents. Bombing incidents refer to actual and attempted detonations of explosive or incendiary devices

In violation of a State, local, or Federal law. Excluded from the tabulations are threats to bomb, hoax bomb devices, accidental explosions, recoveries of explosive or incendiary devices, and such misdemeanor offenses as the illegal use of fireworks. In comparing the data across years, it should be noted that 3 major bombings occurred in 1975 resulting in the deaths of 15 persons, injuries to 101 persons, and property damage of \$15,050,000.

Year	Total actual and attempted bombings	Actual		Attempted		Property damage (dollar value)	Personal Injury	Death
		Explosive	Incendiary	Explosive	Incendiary			
1972	1,962	714	793	237	218	\$7,991,815	176	25
1973	1,955	742	787	253	173	7,261,832	187	22
1974	2,044	893	758	236	157	9,886,563	207	24
1975	2,074	1,088	613	238	135	27,003,981*	326*	69*
1976	1,570	852	405	188	125	11,265,426	212	50
1977	1,318	867	248	118	85	8,943,300	162	22
1978	1,301	768	349	105	79	9,161,485	135	18
1979	1,220	728	305	104	83	9,273,024	173	22
1980	1,249	742	336	99	72	12,562,257	160	34

* Includes three major bombing incidents resulting in an unusually high number of personal injuries and deaths and substantial damage to property.

Table 3.90 Explosives incidents reported to or investigated by the Bureau of Alcohol, Tobacco and Firearms, by type of incident, United States, 1976-79

NOTE: These figures are from reports to the Bureau of Alcohol, Tobacco and Firearms (ATF) by ATF field offices and other law enforcement agencies; they are not presented as including all explosives incidents. "Explosives incidents" are any explosives-related situation investigated by or reported to the Bureau of Alcohol, Tobacco and Firearms. "Bombings" are criminal incidents using explosives or blasting agents including premature detonations during preparation, transportation, or placement of illegal explosives. "Incendiary bombings" are criminal incidents using an incendiary or chemical device that burns. Arson motivated incidents are not included under this category. "Hoax devices" are devices designed to appear as a bomb to deceive, threaten, or intimidate a victim (Source, pp. 1, 2). Bombing figures for the years 1976 and 1977 include 30 and 21 criminal accidents, respectively, that were separately enumerated by the Source.

Type of Incident	Year			
	1976	1977	1978	1979
Total	2,706	3,177	3,256	3,092
Bombings	870	1,058	963	901

Table 3.91 Explosives stolen and recovered as reported to the Bureau of Alcohol, Tobacco and Firearms, by type of explosive, United States, 1976-79

NOTE: See NOTE, Table 3.90. "Blasting agents" refers to a specific type of explosive that can be classified as either a low or high explosive depending on how it is used. For this reason, it is

separately enumerated. "RDX" refers to an extremely powerful explosive manufactured by the U.S. Army and found, in small quantities, in blasting caps, shells, and bombs.

Type of explosive	Amount stolen				Amount recovered			
	1976	1977	1978	1979	1976	1977	1978	1979

* Other specific types of explosives were identified but not specified in this table due to the small quantities involved.

Source: U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, Explosives Incidents, Annual Report, 1977, pp. 32, 41; 1979, pp. 24, 33 (Washington, D.C.: U.S. Government Printing Office), Table adapted by SOURCEBOOK staff.

Table 3.92 Deaths, injuries, and property damage resulting from criminal bombings and accidental explosions reported to the Bureau of Alcohol, Tobacco and Firearms, United States, 1976-79

NOTE: See NOTE, Table 3.90. These data include detonated and incendiary bombings, and criminal and noncriminal explosives incidents. The 1977 property damage figure includes approximately \$50 million resulting from grain elevator explosions. The dramatic increase in the 1978 injury figure is due to two major incidents: 150 people in New York City were injured in the accidental, noncriminal explosion of an ice cream truck; 250 people in Kentucky and West Virginia were injured by illegal fireworks.

	1976	1977	1978	1979
Deaths	73	127	69	54
Injuries	272	374	707	328
Property damage (in millions)	\$12.1	\$61.3	\$27.5	\$16.0

Source: U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, Explosives Incident, Annual Report, 1977, p. 4; 1979, p. 4 (Washington, D.C.: U.S. Government Printing Office). Table adapted by SOURCEBOOK staff.

Table 3.93 International terrorist incidents involving U.S. citizens or property, by target, 1968-80

NOTE: Terrorism is defined as the threat or use of violence for political purposes by individuals or groups, whether acting for, or in opposition to, established governmental authority, when such actions are intended to shock or intimidate a target group wider than the immediate victims. International terrorism is defined as terrorism conducted with the support of a foreign government or organization and/or directed against foreign nationals, institutions, or governments (Source, p. ii). Terrorist attacks on the United States and allied personnel and installations during the Arab-Israeli conflict, as well as assassinations and cross-border operations associated with the Indochina conflict, are excluded unless those incidents either victimized noncombatant nationals of states outside the principal area of conflict or became the object of international controversy are not included. The figures also exclude bombings, shellings, and incursions by conventional forces. Related but separately targeted actions undertaken by a single terrorist group are counted as individual incidents, even when they were staged on the same day and in close proximity to one another. Terrorist operations that miscarried, as opposed to those that were abandoned or

countered during the planning or staging phases are counted (Central Intelligence Agency, National Foreign Assessment Center, International Terrorism in 1979 [Washington, D.C.: Central Intelligence Agency, 1980], p. 12). The data were obtained from chronologies provided by the U.S. Department of State, U.S. Department of Transportation, U.S. Department of Defense, the Federal Aviation Administration, the U.S. Information Agency, the RAND Corporation, foreign embassies, and the U.S. Senate and House of Representatives; staff reports prepared for congressional committees; Facts on File; reports found in the Associated Press wire service; The New York Times, The Washington Post, The Chicago Tribune, The Detroit Free Press, The Economist; various books on terrorism; and foreign sources, both classified and unclassified. For this year's report, new events have been added for all years based on new sources that were used to correct for a previous overemphasis on U.S. sources. The statistics in this year's report replace all statistics in previous annual surveys (Source, p. iii).

Target	1968	1969	1970	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980	Total*

Table 3.95 International terrorist incidents involving U.S. citizens or property, by type of incident and geographic location, 1968-80 (aggregate)

NOTE: See NOTES, Tables 3.93 and 3.94. The location of the incident is considered to be the place where it began. In the case of aerial hijacking, the location is the nation in which the plane last touched ground before the hijackers made their presence known. In cases where the embarkation point is not known, the location is considered to be that nation in which the plane

landed and the negotiations took place. If both of the above guidelines are inapplicable, the nation of registry of the aircraft is used. This information was provided to SOURCEBOOK staff by the Central Intelligence Agency, International Issues Division.

Table 3.96 Reported hijackings in and outside the United States, by outcome, 1930-67 (aggregate), 1968-80

NOTE: Registry of an aircraft, regardless of the location of a hijacking attempt, is used to classify the hijacking as "inside" or "outside" the United States. Data for "inside the United States" during 1930-67 actually refer to the period 1961-67. Prior to 1961 all reported hijackings occurred outside the United States. "Successful" means that the hijacker controls flight and reaches destination or objective. "Unsuccessful" means that the hijacker attempts to take control of flight but fails (hijacking may be averted either in flight or on ground). An "incomplete" hijacking is one in which the hijacker is apprehended/killed during hijacking or as a result of "hot pursuit." Information concerning "incomplete" hijackings outside the United States was not presented in the Source. The data for the United States include hijackings of scheduled air carriers and general aviation aircraft. "U.S. general aviation aircraft" refers to helicopters, charter planes, and private aircraft.

Year	Inside United States						Outside the United States

Table 3.100 Crime insurance policies in effect in September 1980 and insurance claims paid by the Federal Crime Insurance Program in the 12 months prior to Sept. 30, 1980, by type of policy and coverage, United States

NOTE: The Federal Crime Insurance Program was established by Congress in 1970. It is administered by the Federal Insurance Administrator, who is authorized to offer Federal crime insurance policies in States in which it is concluded that there exists a critical problem in the availability of crime insurance. Policies, offered both to individuals and businesses, cover losses due to robbery and burglary.

"Annual written premiums" are the payments that would be received if all policies were in effect for the entire year. A commercial "package" policy provides equal amounts of insurance for robbery and burglary, while a "combination" policy provides different coverage limits for robbery and burglary.

Type of policy and coverage	Policies in effect in September 1980			Claims paid in 12 months prior to Sept. 30, 1980	
	Number	Amount of insurance (in thousands)	Annual written premiums	Number	Amount
Residential policies	65,216	\$1,035,904	\$4,464,540	3,579	\$9,790,879

Table 3.101 Reports of offenses against railroads, by offense, United States and Canada, 1975-80

NOTE: Data in this table are compiled from monthly statistical reports of railroad police. In 1978, the reporting form utilized by the Association of American Railroads was expanded to more accurately reflect the range of activities comprising the "theft" and "vandalism" offense categories. Prior to 1978 "other vandalism" included "multi-level carriers," "company property and equipment," "track and signals," and "switch tampering." Statistics for "theft from multi-level carrier" and "other theft" were not previously reported.

Offense	1975	1976	1977	1978	1979	1980
Number of rail carriers reporting	32	30	31	36	34	33
Percent of United States and Canadian rail mileage represented	73.0	77.3	72.3	74.3	73.4	78.7

Section 4:

CHARACTERISTICS AND DISTRIBUTION OF PERSONS ARRESTED

Most of the data presented in this section have been compiled through the Federal Bureau of Investigation's Uniform Crime Reporting Program. The summary statistics collected by the FBI on arrests involve—for each offense classification—breakdowns by the age, sex, and race of arrestees, as well as arrest rates for population size groups. It should be recognized, however, that in 1979 police agencies representing approximately 93 percent of the Nation's population reported arrest data to the FBI. These arrest figures, therefore, do not represent all arrests made in the United States. On each arrest table, the number of police agencies reporting and the population living within the jurisdictions of these agencies are reported.

According to the Uniform Crime Reporting guidelines, an arrest is counted "each time an individual is taken into custody for committing a specific crime." (If the offender taken into custody is a juvenile and the circumstances are such that if he/she were an adult an arrest would be made, an arrest is counted.) One of the implications of this measure is that the same person may be arrested several times in the course of a year. Thus, the number of arrests is not simply a measure of people arrested.

The number of arrests made by the police is an indicator of police activity. However, because the police are called upon to perform a number of functions, the number of arrests measures only one aspect of police activity. Another indicator presented by the Uniform Crime Reports for each offense is the "clearance rate"—that is, the ratio of the number of offenses of that type for which at least one person has been arrested, charged, and turned over to the court for prosecution, to the number of offenses of that type known to the police. Measures of investigatory activity and service calls made by the police are currently unavailable on the national level.

Statistical data for some law enforcement activities under the jurisdiction of Federal agencies (Immigration and Naturalization Service, Secret Service, Customs Service, and Drug Enforcement Administration) are maintained by these agencies and have been included in this section. The final tables in this section deal with Federal enforcement efforts—and, particularly, an account of contraband seized in the course of enforcement of Federal laws related to drugs, immigration, customs, and counterfeiting.

Table 4.1 Estimated number of arrests,^a by offense charged, United States, 1979

NOTE: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencies report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, motor vehicle theft, and arson. All of these crime categories, except manslaughter by negligence, are used to establish a crime index in order to measure the trend and distribution of crime in the United States. The "Total Crime Index" is a simple sum of the index offenses. Arson was designated as a Part I index offense in October 1978. Unlike the tables from the Uniform Crime Reports presented in Section 3, arrest statistics for the crime of arson are complete for 1979 and appear in the "Total Crime Index" and "Property Crime" index.

Arrest statistics are compiled as part of this monthly data collection effort. Participating law enforcement agencies are instructed to count one arrest each time a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals taken into custody because one person may be arrested several times during the year for the same type of offense or for different offenses. A juvenile is counted as a person arrested when he/she commits an act that would be a criminal offense if committed by an adult. Two offense categories, "curfew and loitering" and "runaway," are tabulated only for juveniles. Violations of local juvenile acts other than runaway and curfew and loitering law violations are included in the "all other classification" (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook [Washington, D.C.: U.S. Government Printing Office, 1978], p. 72). Data in this table are estimates based on arrest statistics for all law enforcement agencies in the Uniform Crime Reporting Program, including those submitting reports for less than 12 months in 1979 (Source, p. 319). For definitions of offenses, see Appendix 3.

Offense charged	
Total ^b	10,205,800
Murder and nonnegligent manslaughter	19,590
Forcible rape	31,470
Robbery	140,840
Aggravated assault	276,000
Burglary	503,600
Larceny-theft	1,181,500
Motor vehicle theft	154,500
Arson	19,800
Violent crime	467,700
Property crime ^c	1,859,200
Total Crime Index ^c	2,326,900
Other assaults	485,500
Forgery and counterfeiting	76,400
Fraud	261,900
Embezzlement	8,600
Stolen property; buying, receiving, possessing	115,800
Vandalism	257,300
Weapons; carrying, possessing, etc.	164,200
Prostitution and commercialized vice	89,400
Sex offenses (except forcible rape and prostitution)	67,400
Drug abuse violations	558,600
Opium or cocaine and their derivatives	68,100
Marijuana	391,600
Synthetic or manufactured drugs	18,400
Other—dangerous nonnarcotic drugs	80,400
Gambling	54,800
Bookmaking	4,600
Numbers and lottery	7,500
All other gambling	42,700
Offenses against family and children	57,400
Driving under the influence	1,324,800
Liquor laws	416,200
Drunkenness	1,172,700
Disorderly conduct	765,500
Vagrancy	37,200
All other offenses (except traffic)	1,716,600
Suspicion (not included in total)	19,600
Curfew and loitering law violations	84,100
Runaways	164,400

^a Arrest totals based on all reporting agencies and estimates for unreported areas.

^b Because of rounding, items may not add to totals.

^c Includes arson, a newly established index offense in 1979.

* Because of rounding, percents may not add to total.

^a Less than one-tenth of 1 percent.

^b Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

^c Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

^d Includes arson, a newly established index offense in 1979.

Figure 4.10 Arrest rates (per 100,000 inhabitants) for property crimes, by offense charged and region, 1979

NOTE: See NOTE, Table 4.1. For a list of States in regions and definitions of offenses, see Appendix 3.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Uniform Crime Reports for the United States*, 1979 (Washington, D.C.: U.S. Government Printing Office, 1980), p. 187. Figure constructed by SOURCEBOOK staff.

Table 4.16 Offenses known to police and percent cleared by arrest, by offense and size of place, 1979

NOTE: See NOTES, Tables 4.1 and 4.4. "An offense is 'cleared by arrest' or solved for crime reporting purposes when at least one person is: (1) arrested; (2) charged with the commission of the offense; and (3) turned over to the court for prosecution. The prosecution can follow arrest, court summons, or police notice." An offense is also counted as cleared by arrest if any of the following "exceptional" conditions pertain: (1) suicide of the offender; (2) double murder; (3) deathbed confession; (4) offender killed by police or citizen; (5) confession by offender already in custody or serving a sentence; (6) an offender prosecuted in another jurisdiction for a different offense and that jurisdiction does not release offender to first jurisdiction; (7) extradition denied; (8) victim refuses to cooperate in prosecution; (9) for reasons outside police control, offender is

prosecuted for a less serious charge than that for which arrested; or, (10) handling of a juvenile offender either orally or by written notice to parents in instances involving minor offenses where no referral to juvenile court is made as a matter of publicly accepted police policy (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 44, 45). It should be noted that the arrest of one person can clear several crimes or several persons may be arrested to clear one crime. Arson was designated an Index property crime in October 1978. Due to the incompleteness of arson reporting by police for offenses known in 1979, arson data are not included in this table. For definitions of offenses, suburban and rural areas, see Appendix 3.

[1979 estimated population]										
Population group	Total Crime Index	Violent crime ^a	Property crime ^b	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft

RURAL AREA										
2,782 agencies; total population 28,003,000:										
Offenses known	634,103	53,741	580,362	2,065	4,329	6,263	41,084	223,855	316,330	40,177
Percent cleared by arrest	22.8	67.0	18.8	83.0	64.7	43.0	70.0	18.9	16.7	34.0

^a Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. ^b Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson. ^c Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

Table 4.18 Percent of arrests for alcohol-related offenses, by offense and State, 1978

NOTE: These data were compiled from the Federal Bureau of Investigation's Uniform Crime Reporting Program (UCR). The bases for the percent calculations were not presented in the Source. Percents may not sum to the row total because of rounding. The arrest categories, "disorderly conduct" and "vagrancy," were included as measures of alcohol-related offenses because public inebriates may be arrested under these categories in

the 32 jurisdictions that have implemented the Uniform Act for Decriminalization of Alcoholism. However, the proportion of arrests within these categories actually involving the use of alcohol is unknown. The arrest category "driving under the influence," as reported by the UCR, includes arrests for impairment due to any type of drug; it is not limited to alcohol.

[Computed as a percentage of all reported arrests]

Table 4.21 Arrests for drug law violations and arrest rate per 100,000 population, by type of drug, United States, 1970-79

NOTE: This information is compiled by the Drug Enforcement Administration in cooperation with the Federal Bureau of Investigation. State and local jurisdictions voluntarily submit arrest data to the FBI. The data in this table represent arrests made by State and local agencies acting alone, and arrests made by State and local agencies acting in collaboration with the Drug Enforcement Administration. This excludes arrests made solely by the Drug Enforcement Administration. Because the number of police agencies reporting and the populations they represent vary from year to year, arrest rates are computed on the basis of the relevant population estimate for that year. As of 1977, drug law arrests are classified by sale or manufacture and possession.

Type of drug	1970	1971	1972	1973	1974	1975	1976	1977	1978	1979

Source: U.S. Department of Justice, Drug Enforcement Administration, *Drug Enforcement Statistical Report, 1975*, p. 24; 1978, p. 25; 1979, p. 23 (Washington, D.C.: U.S. Department of Justice); and data provided by the U.S. Department of Justice, Drug Enforcement Administration. Table adapted by SOURCEBOOK staff.

Table 4.22 Percent distribution of arrests for drug law violations, by type of drug, region, and type of offense, 1979

NOTE: See NOTE, Table 4.1. In 1979, there were 519,377 arrests for drug law violations. Percents in the table are calculated separately for each region; the base for all percents for each region is the total number of arrests for drug law violations in the region. For a list of the States in each region, see Appendix 3.

Table 4.23 Drug seizures by the U.S. Customs Service, by type, amount, and value of drugs seized, fiscal years 1975-80

NOTE: The data presented for 1975 and 1976 coincide with the former Federal fiscal years, the period July 1 to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The Federal fiscal year is now Oct. 1 to Sept. 30. The drug value is computed using the Drug Enforcement Administration (DEA) retail value lists. The illegal market retail drug prices for heroin and cocaine are based on evidence exhibits purchased by DEA; other dangerous drug prices are derived from monthly availability reports submitted by DEA field offices.

Type of drug seized	1975*	1976*	Transition quarter ^a	1977 ^b	1978 ^b	1979 ^b	1980 ^b
Heroin:							
Number of seizures	438	437	104	245	179	173	149
Quantity (in pounds)	114.8	367.7	45.3	277.7	188.6	122.5	268.7
Value	\$39,367	\$126,089	\$15,534	\$124,705	\$86,823	\$75,080	\$166,150
Cocaine:							
Number of seizures	1,011	1,167	330	1,025	846	1,259	1,307
Quantity (in pounds)	728.9	1,029.6	236.1	952.1	1,418.7	1,438.1	4,742.9
Value	\$155,392	\$219,561	\$50,333	\$246,107	\$380,013	\$424,383	\$1,528,826
Hashish:							
Number of seizures	4,003	5,162	1,343	6,323	4,919	4,379	3,979
Quantity (in pounds)	3,400.9	13,436.7	469.6	15,923.0	22,658.5	50,848.9	14,675.4
Value	\$17,185	\$67,896	\$2,373	\$75,332	\$95,664	\$198,056	\$26,717
Marihuana:							
Number of seizures	13,792	13,555	4,620	14,902	12,826	12,323	12,620
Quantity (in pounds)	466,510.3	759,359.9	115,334.4	1,652,772.7	4,616,883.7	3,583,555.5	2,361,141.5

Table adapted by SOURCEBOOK staff.

Table 4.26 Seizures and arrests by the U.S. Coast Guard, by commodity and amount seized, 1973-80

NOTE: A "thal stick" is a Southeast Asian marijuana bud that is bound onto a short section of bamboo and that may be laced with opium, hashish, or another narcotic in order to increase its potency. This definition was provided to SOURCEBOOK staff by the U.S. Coast Guard, General Law Enforcement Branch. Data for the years 1973-79 have been revised from previous reports.

Commodity	1973	1974	1975	1976	1977	1978	1979	1980

Table 4.27 Aliens deported from the United States, by reason for deportation, fiscal years 1908-79

NOTE: The data presented for years prior to and including 1976 coincide with the former Federal fiscal years. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30. "Aliens deported" refers to those aliens required to leave the country under formal orders of deportation. "Miscellaneous" includes those excluded for violation of narcotic laws and those who had previously been deported or excluded.

[Deportation statistics by reason for deportation not available prior to fiscal year 1908]

Fiscal years	Total	Reason for deportation											
		Subversive or anarchistic	Criminal	Immoral	Violation of narcotic laws	Mental or physical defect	Previously excluded or deported	Failed to maintain or comply with conditions of nonimmigrant status	Entered without proper documents	Entered without inspection or by false statements	Public charge	Unable to read (over 16 years of age)	Miscellaneous
1908 to 1979	795,574	1,528	48,124	16,578	8,151	27,305	40,892	122,691	154,411	320,347	22,555	16,762	16,230

Source: Table adapted by SOURCEBOOK staff from table provided by the U.S. Department of the Treasury, U.S. Secret Service; and U.S. Department of Treasury, U.S. Secret Service, "Annual Statistical Summary, Fiscal Year 1980," 1980. (Mimeographed.)

Table 4.29 Arrests for offenses against railroads, by offense and age group, United States and Canada, 1975-80

NOTE: Data in this table are compiled from monthly statistical reports of railroad police. In 1978 the reporting form utilized by the Association of American Railroads was expanded to more accurately reflect the range of activities comprising the "theft" and "vandalism" offense categories. Prior to 1978 "other vandalism" included "multi-level carriers," "company property and equipment," "track and signals," and "switch tampering." Statistics for "theft from multi-level carrier" and "other theft" were not previously reported. Also prior to 1978, "employee" arrests were included in the "adult" category.

Offense	1975		1976		1977		1978		1979		1980

Section 5: JUDICIAL PROCESSING OF DEFENDANTS

This section presents information relating to the judicial disposition of juveniles and adults in the United States. Although the Uniform Crime Reports and the National Prisoner Statistics programs provide nationwide data on specific law enforcement and correctional activities, no comparable uniform State and local judicial processing data exist. Recent exceptions are data relating to individuals processed in juvenile courts, including the estimated number of delinquency cases handled by courts with juvenile jurisdiction in the United States.

Because of the limited amount of State and local judicial processing data, this section relies heavily on data regarding the judicial processing of Federal defendants. Included here are data on the number and type of civil and criminal cases filed, terminated, and pending in Federal courts; requests for immunity; and the nature of proceedings, dispositions, and sentences imposed on Federal defendants. Additional tables present data on the number and nature of

cases that reach the Federal courts via appeal. For example, information on the number and type of prisoner petitions filed in U.S. District Courts, as well as the number of petitions for review on Writ of Certiorari to the Supreme Court, is included.

Also presented are data on the number and type of court-authorized interceptions by State or Federal authorities of private wire or oral communications. Included is information about the number, location, duration, and cost of the intercept devices; the types of criminal offenses being investigated; the number of interceptions made; and the results (i.e., arrests, convictions) of those interceptions.

Judicial processing of postal violations, violations of U.S. immigration and nationality laws, and cases investigated by the U.S. Secret Service also appear in this section. Finally, there is information relating to General and Special Courts-Martial of Army, Air Force, Navy, and Coast Guard personnel.

Table 5.1 Estimated number and rate (per 1,000 child population 10 through 17 years old) of delinquency cases disposed of by courts with juvenile jurisdiction, United States, 1975-78

NOTE: These estimates are derived from courts that report juvenile court statistics to the National Center for Juvenile Justice. The estimates are derived from a sample of cases. The 1975 estimates are derived from a sample representing 27 percent of the total child population within courts with juvenile jurisdiction; for 1976 estimates, the sample represents 35.2 percent; for the 1977 estimates, 35.5 percent; and for 1978, 34 percent. The estimates for 1975 and 1976 have been revised from earlier reports. Data across courts and across States may not be comparable because the age and the substantive jurisdictions of courts with juvenile jurisdiction differ. The data represent cases disposed of by the courts; they do not represent individuals, nor do they represent incidents or arrests. Estimates of delinquency cases include status offenses, which refer to conduct not considered to be an offense if committed by an adult (e.g., running away, violation of curfew, truancy, ungovernable behavior, incorrigibility, possessing or drinking alcoholic beverages). For a description of the estimation procedures, samples, survey methodology, and definitions of terms, see Appendix 12.

Year	Estimated number of delinquency cases ^a	Estimated child population at risk (in thousands) ^b	Estimated rate per 1,000
1975	1,406,100	30,720	45.8
1976	1,396,800	30,247	46.2
1977	1,355,500	29,551	45.9
1978	1,340,700	28,964	46.3

^a Rounded to the nearest hundred.
^b For a discussion of procedures used to generate child population at risk estimates, see Appendix 12.

Table 5.5 Estimated number and rate (per 1,000 child population 10 through 17 years old) of delinquency cases disposed of by courts with juvenile jurisdiction, by age at time of referral to court, United States, 1978

NOTE: See NOTE, Table 5.1. Although most States provide for juvenile jurisdiction over children 15 years of age and younger, several States do not provide for juvenile jurisdiction over 16- and 17-year-olds. Accordingly, the child population at risk nationwide for the 16- and 17-year-old age categories is less than the total population of 16- and 17-year-olds. The data for 18- and 19-year-olds more often refer to cases in which the juvenile court exercises continuing jurisdiction over the case, although in some instances cases of original jurisdiction may be included in these categories. This may be due to time lag in court processing of the cases. Cases with missing information were allocated to the nonmissing categories in a manner proportional to the distribution of the weighted cases with known information. Although the percent of weighted cases with missing information for age is unknown, 1.2 percent of the unweighted cases were missing. For survey methodology and definitions of terms, see Appendix 12.

Age at time of referral to court	Estimated number of delinquency cases ^a	Percent	Estimated child population at risk ^b	Estimated rate per 1,000 ^c
0 through

Table 5.7 Estimated number and percent of delinquency cases disposed of by courts with juvenile jurisdiction, by reason for referral to court, United States, 1978

NOTE: See NOTE, Table 5.1. Reporting differences, some problems exist with the recoding of reasons for referral to court. "Sex offense" can include cases of forcible rape, but largely includes cases of prostitution, lewd behavior, possession of pornographic materials, and sexual misconduct. "Forcible rape" may also include some of the above-mentioned offenses. Acts of arson may be found in "vandalism" and "other delinquency" categories, or offenses identified as "arson" may be considered cases of vandalism. The reason for this problem is the inconsistency of States' methods of reporting offenses and the variance in the application of labels. For example, most assaults reported in the table constituted minor offenses such as fighting (Source, p. 58).

Cases with missing information were allocated to the nonmissing categories in a manner proportional to the distribution of the weighted cases with known information. Although the percent of the weighted cases with missing information on this attribute is unknown, 2.9 percent of the unweighted cases were missing. For survey methodology and definitions of terms, see Appendix 12.

Reason for referral to court	Estimated number of delinquency cases*	Percent
Homicide	1,400	0.1
Forcible rape	3,100	0.2
Robbery	23,200	1.7

Figure 5.1 Requests for immunity by Federal prosecutors to the U.S. Attorney General and witnesses involved in these requests, by origin of request, fiscal years 1973-80

NOTE: These data reflect requests received from Federal prosecutors under 18 U.S.C. 6001-6005, the statute that now governs the granting of immunity from prosecution. 18 U.S.C. 6003 requires prosecuting attorneys in all Federal capacities to receive authorization from the U.S. Attorney General (or his representative) before seeking a court order for witness immunity. It should be noted that in some cases in which the authorization is obtained, the prosecutor may decide not to seek the immunity order

from the courts. Therefore, the number of witnesses actually granted immunity is probably lower than the data in the figure indicate. It should also be noted that data for 1973 and 1974 include a total of 11 requests, 27 witnesses, and 7 requests, 11 witnesses respectively, falling under an older statute, 18 U.S.C. 2514, which has since been repealed. "Criminal Division" refers specifically to the Criminal Division of the U.S. Department of Justice and includes the U.S. Attorneys. "Other" refers to the remaining

divisions of the U.S. Department of Justice (e.g., Antitrust, Tax, Internal Security, Civil Rights, and Land and Resources), as well as to the other Federal agencies (e.g., Interstate Commerce Commission, Federal Trade Commission, Securities and Exchange Commission, and Department of the Army) and to the Congress, all of which may request immunity of witnesses.

Source: Figure constructed by SOURCEBOOK staff from data provided by the U.S. Department of Justice, Criminal Division.

Table 5.9 Court-authorized orders for interception of wire or oral communication, by nature of order, duration and location of interception, and jurisdiction, 1980

NOTE: The Director of the Administrative Office of the United States Courts is required, in accordance with provisions of Section 2518(3) of Title 18, U.S. Code, to transmit to Congress a report regarding applications for orders authorizing or approving the interception of wire or oral communications. This report is required to contain information about the number of such orders and any extensions granted. Every State and Federal judge is required to file a written report on each application made. This report is required to contain information on the grants and denials, name of applicant, offense involved, and duration of authorized interception. Prosecuting officials

who have applied for intercept orders are required to file reports containing information on the cost of the intercepts and the results of the intercepts in terms of arrests, trials, convictions, and the number of motions to suppress the use of the intercepts (Source, p. 1). A total of 28 jurisdictions had statutes authorizing the interception of wire or oral communications during 1980. Six of these jurisdictions did not have any court-authorized orders for interception during 1980: they were Idaho, Louisiana, New Hampshire, Oregon, Pennsylvania, and South Dakota.

Jurisdiction	Number of Intercept orders					Average length (in days)			Place or facility authorized in original application

Figure 5.2 Civil and criminal trials argued by U.S. Attorneys' offices, fiscal years 1970-79

NOTE: The U.S. Attorney is the highest ranking law enforcement representative in each of the Federal judicial districts. The Attorney and his staff assist the U.S. Attorney General in the enforcement of Federal criminal laws, the investigation and prosecution of corrupt public officials and organized crime figures, and the initiation of environmental litigation. In addition, the U.S. Attorney is responsible for the enforcement of laws pertaining to Federal programs. These include violations involving Medicaid and Medicare, U.S. Government contracts, the use of labor

union funds, educational benefits for war veterans, and the food stamp program. In the civil law area, U.S. Attorneys are involved in numerous tort claim and civil fraud cases, actions filed against the U.S. Government, Freedom of Information cases, and other civil matters. U.S. Attorneys are responsible for collecting criminal fines, civil judgments, prejudgment claims, forfeitures, penalties, and other monies owed to the Federal Government.

Table 5.13 Criminal cases filed, terminated, and pending in U.S. District Courts, years ending June 30, 1955-80

NOTE: There are two reporting changes during fiscal year 1976 that have affected the data base. Beginning Oct. 1, 1975, all minor offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than \$1,000, with the exception of most petty offenses (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than \$500), are included. Minor offenses are generally disposed of by the magistrates and, in past years, most of these minor offenses would not have been counted in the workload of the district courts. Second, when the Federal Government's motion to dismiss an original indictment or information is granted, the superseding indictment or information does not become a new case as in the years prior to 1976, but remains the same case. (An indictment is the charging

document of the grand jury and an information is the charging document filed by the U.S. Attorney.) "Received by transfer" includes defendants transferred by Rule 20, Federal Rules of Criminal Procedure, which provides that defendants who (1) are arrested or held in a district other than that in which an indictment or information is pending against them or in which the warrant for their arrest was issued and (2) state in writing that they wish to plead guilty or nolo contendere, may consent to disposition of the case in the district in which they are arrested or are held, subject to the approval of the U.S. Attorney for both districts.

Year	Pending July 1	Total filed		Total terminated	Pending June 30
		Original proceedings	Received by transfer		
1955	10,100	35,310	1,813	38,580	8,643

Figure 5.5 Criminal cases filed in U.S. District Courts, by type of offense, year ending June 30, 1980*

NOTE: See NOTE, Table 5.13.

[Excludes transfers. Total criminal cases filed = 27,968. Percents do not total to 100 because of rounding.]

* Includes all offenses reported filed in the Federal district courts in accordance with reporting changes necessitated by the implementation of provisions of the Speedy Trial Act of 1974 (P.L. 93-619, approved Jan. 3, 1975).

^b Escape from custody, aiding or abetting an escape, failure to appear in court, and bail jumping.

Source: Administrative Office of the United States Courts, *The United States Courts: A Pictorial Summary for the Twelve Month Period Ended June 30, 1980* (Washington, D.C.: Administrative Office of the United States Courts, 1980), p. 12.

Table 5.16 Defendants disposed of in U.S. District Courts and defendants held in custody, by time in custody, circuit, and district, year ending June 30, 1980

NOTE: The Federal statute, 18 U.S.C. 3164(b), requires that the "trial of any person (held in custody) shall commence no later than ninety days following the beginning of such continuous custody . . ." As of Aug. 2, 1979, "time in custody" refers to time in detention prior to dismissal, guilty plea, or commencement of trial minus "excludable time." Prior to this date, "excludable time" may or may not have been counted as "time in custody." "Excludable time" refers to periods of delay for specified reasons as set forth in 18 U.S.C. 3161. "Custody" refers to detention in a local jail or detention facility for which payment is made to a local or State government by the U.S. Government, or to detention in a metropolitan correctional center or other correctional institution operated by the Federal Bureau of Prisons. Not included is detention by local or State authorities on local or State charges when a Federal charge is also pending.

[Excludes periods of detention following plea of guilty or conviction]

Table 5.17 Defendants disposed of in U.S. District Courts, by statutory and recommended time limits, circuit, and district, year ending June 30, 1980

NOTE: These data are computed only for the respective time intervals actually begun and terminated during the year ending June 30, 1980. The Speedy Trial Act of 1974 (U.S.C. 3152-3156 and 3161-3174) required each U.S. District Court to adopt a plan for the prompt disposition of criminal cases in accordance with statutory time limits. In the fourth and final implementation year of the Speedy Trial Act, as amended Aug. 2, 1979, the time interval from arrest to indictment or information is 30 days [18 U.S.C. 3161(b)]. In addition, defendants entering a plea of not guilty must be brought to trial not more than 70 days after a filing of an information or indictment, or after an appearance before a judicial officer of the court in which the charge is pending, whichever comes last [18 U.S.C. 3161(c)(1)]. The trial may not commence sooner than 30 days from the date the defendant first appears unless written waiver is given [18 U.S.C. 3161(c)(2)]. The Speedy Trial Act does not establish time limits governing the period between conviction and sentencing, but does require that statistics be furnished regarding the time span of this interval. The Committee on Administration of the Criminal Law of the Judicial Conference has recommended a 45-day time limit for the interval from conviction to sentencing.

Circuit and district	Arrest to indictment 30 days or less		Indictment or appearance to trial 70 days or less		Sentenced 45 days or less after conviction

Table 5.18 Defendants disposed of in U.S. District Courts, by type of disposition, and type and length of sentence, years ending June 30, 1945-80

NOTE: See NOTE, Table 5.13. The District of Columbia is excluded from these data through 1973. The territorial courts of the Virgin Islands, Canal Zone, and Guam are excluded through 1976. Data provided for the year ending June 30, 1977 have been revised by the Source. Since 1977, the periods reported for lengths of sentences of imprisonment are 1 through 12 months, 13 through 35 months, 36 through 59 months, and 60 months and over.

^a Includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences).
^b Beginning in 1968, defendants who were committed pursuant to 28 U.S.C. 2902(b) of the Narcotic Addict Rehabilitation Act.
^c A split sentence is a sentence on a one-count indictment of 6 months or less in a jail-type institution followed by a term of probation, 18 U.S.C. 3651 approved Aug. 23, 1958 (72 Stat. 834). Included are mixed sentences involving confinement for 6 months or less on one count to be followed by a term of probation on one or more counts. For years 1959 through 1982 split sentences are included in prison terms less than 1 year and 1 day.
^d 18 U.S.C. 4205B(1) and (2).
^e 18 U.S.C. 5010(b) and (c).
^f Included with sentences of probation.
^g Split sentences, indeterminate sentences, Youth Corrections Act and youthful offender sentences are not included in computing the average sentence to imprisonment.
^h Includes Federal Juvenile Delinquency Act sentences.

Figure 5.7 Civil and prisoner lawsuits against the Federal Government filed in U.S. District Courts, years ending June 30, 1960-80

NOTE: "U.S. civil" filings involve suits against the Federal Government brought in U.S. District Courts. Prisoner petitions, a subset of this category, include actions brought by Federal prisoners in the form of motions to vacate sentences, U.S. Parole Commission reviews, habeas corpus, mandamus, civil rights actions, and matters involving prisoner's grievances regarding administrative or judicial decisions.

Table 5.23 Cases filed, disposed of, and pending in the U.S. Supreme Court, by method of filing, at conclusion of the October terms 1976-79

NOTE: "Original" refers to those cases that were on the Supreme Court docket previously and disposed of, but that have been reinstated for some reason. For all cases other than "original" ones, a docket filing fee must be "paid." If the petitioner is indigent the docket filing fee is waived and the case is filed "in forma pauperis."

Cases	Total	Original		In forma pauperis
		Paid	Waived	
1976:				
Cases on docket	4,730	8	2,324	2,398
Disposed of	3,918	2	1,852	2,064
Remaining on dockets	812	6	472	334
1977:				
Cases on docket	4,704	14	2,341	2,349
Disposed of	3,867	3	1,911	1,953
Remaining on dockets	837	11	430	396
1978:

Table 5.26 Executive clemency applications for Federal offenses received, disposed of, and pending, fiscal years 1953-79

NOTE: Article II, Section 2 of the U.S. Constitution authorizes the President to grant executive clemency for Federal offenses. Clemency may be a reprieve, remission of fine, commutation, or pardon. A "pardon," which is generally considered only after sentence completion, restores basic civil rights and may aid in the reinstatement of professional or trade licenses that may have been lost as a result of the conviction. A "commutation" is a reduction of sentence. The figures presented in this table do not include clemency actions on draft resisters, or military deserters and absentees during the Vietnam era.

Fiscal year	Received	Granted			Pending
		Pardons	Commutations	Denied	
1953	599	97	8	355	681

Table 5.27 Defendants charged with violation of drug laws in U.S. District Courts, by type of disposition, and type and length of sentence, years ending June 30, 1945-79

NOTE: See NOTE, Table 5.13. These data represent defendants charged with Federal offenses under the following statutes: Title 21 U.S.C. 176(a) (the Marihuana Tax Act); Title 26 U.S.C. 1407 (Customs laws governing border crossing by narcotic addicts or violators); Title 18 U.S.C. 471-82 (provisions for imposition of tax and affixing of tax stamps); 18 U.S.C. 494 (prohibits making false statements with intent to defraud the United States); 18 U.S.C. 1403 (conspiracy to commit an offense under the Narcotic Drug Import and Export Act); 18 U.S.C. 1406 (immunity from prosecution for grand jury testimony concerning violations of the Narcotic Drug Import and

Export Act); other provisions of the Narcotic Drug Import and Export Act (Title 18 U.S.C. 171-200); and other narcotic drug laws (26 U.S.C. 4701-4736, 7237). The District of Columbia is excluded from these data through 1973. The territorial courts of the Virgin Islands, Canal Zone, and Guam are excluded through 1976. Data provided for the year ending June 30, 1977 have been revised by the Source. For 1977-79, the periods reported for lengths of sentences of imprisonment are 1 through 12 months, 13 through 25 months, 26 through 59 months, and 60 months and over.

* Beginning in 1968, defendants who were committed pursuant to 28 U.S.C. 2902(b) of the Narcotic Addict Rehabilitation Act are included in the dismissed column through 1979.
 † Includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences).
 ‡ A split sentence is a sentence on a one count indictment of 6 months or less in a jail type institution followed by a term of probation, 18 U.S.C. 3651. Included in these figures are mixed sentences involving confinement for 6 months or less on one count, to be followed by a term of

probation on one or more counts.
 § Title 18 U.S.C. 4205B(1) and (2). Included in total imprisonment prior to 1978.
 ¶ Title 18 U.S.C. 5010(b)(c). Included in total imprisonment prior to 1978.
 †† Includes deportation, suspended sentences, imprisonment for 4 days or less or for time already served, remitted and suspended fines.
 ‡‡ Excludes split sentences, indeterminate sentences, Youth Corrections Act and youthful offender sentences, and life sentences beginning in 1978.

Table 5.28 Dispositions of persons arrested for offenses against railroads, by offense, United States and Canada, 1975-80

NOTE: Data in this table are compiled from monthly statistical reports of railroad police. In 1978, the reporting form utilized by the Association of American Railroads was expanded to more accurately reflect the range of activities comprising the "theft" and "vandalism" offense categories. Prior to 1978 "other vandalism" included "multi-level carriers," "company property and equipment," "track and signals," and "switch tampering." Statistics for "theft from multi-level carriers" and "other theft" were not previously reported. "Referrals" indicate referrals of arrested persons to other than railroad authorities. Prior to 1978 referrals were included in the "convictions" category.

Table 5.29 Criminal tax fraud cases initiated by the Internal Revenue Service Criminal Investigation Division, by type of disposition, fiscal years 1976-80

Note: The Criminal Investigation Division (formerly the Intelligence Division) of the Internal Revenue Service is responsible for enforcing the criminal provisions of the tax laws, investigating evidence of tax evasion or tax fraud, and recommending prosecution (Source, 1978, p. 30). The Criminal Tax Division of the Office of Chief Counsel handles all criminal tax legal matters for the Internal Revenue Service, reviews criminal cases and decides if cases warrant prosecution, coordinates criminal tax prosecutions with the Department of Justice, and provides assistance to United States Attorneys in criminal tax trials upon request (Source, 1978, p. 53).

	1976	1977	1978	1979	1980
Cases Initiated by Criminal Investigation Division	9,035	8,901	9,481	9,780	7,114

Table 5.31 Criminal Investigations by the U.S. Postal Inspection Service, by type of offense, number of completed investigations, number of convictions, fines imposed, and recoveries and restitutions, fiscal years 1976-80

NOTE: The U.S. Postal Inspection Service, the investigative arm of the U.S. Postal Service, is responsible for the investigation of all violations of Federal statutes relating to the Postal Service and the internal audit of all Postal Service financial and nonfinancial operations. Prosecutions of mail order dealers of obscene matter are brought under 18 U.S.C. 1461. Figures for fiscal years 1977-80 include investigations of dealers of obscene matter only. For 1980, 278 investigations

of child pornography dealers resulted in 14 convictions; 23 investigations of other commercial dealers led to 2 convictions. Previous years report all investigations relating to obscene matter. Bombs/explosives data for 1980 include 49 investigations of mailed bombs resulting in 3 convictions, and 83 investigations of explosives and hoax devices placed in postal facilities or equipment resulting in 28 convictions.

Type of offense	Investigations completed					Convictions

Figure 5.10 Obscenity complaints received by the U.S. Postal Inspection Service and commercial pornography dealers convicted in Federal courts, fiscal years 1969-80

NOTE: See NOTE, Table 5.31, Section 3010 of Title 39 U.S.C. requires the U.S. Postal Service to maintain a list of persons who do not desire to receive sexually-oriented advertisements and prohibits the mailing of such material to any individual whose name and address has been on the list for more than 30 days.

^a Decrease due to U.S. Department of Justice policy of emphasizing prosecution of dealers with large-scale operations and those having known organized crime connections.

Table 5.35 Environmental, Economic Stabilization Act, and Energy Allocation Act cases filed in U.S. District Courts, by circuit and district, years ending June 30, 1979 and 1980

NOTE: Cases labelled "environmental matters" refer to filings under the National Environmental Policy Act of 1969 as well as civil environmental actions pertaining to air, water, solid waste, pesticides, radiation, and noise pollution. Filings are also reported involving the Economic Stabilization Act of 1970, which refers to the authorization of the President to stabilize prices, wages, rents, and salaries. Additionally, cases are reported that were filed under the Emergency Petroleum Allocation Act of 1973, which involves authorizing the President to allocate crude oil, residual fuel oil, and refined petroleum products to deal with existing or imminent shortages and dislocations in the distribution system.

Figure 5.11 Criminal proceedings in cases referred by the Securities and Exchange Commission to the U.S. Department of Justice for prosecution, fiscal years 1968-79

NOTE: The activities of the Securities and Exchange Commission (SEC) include regulation of securities markets, registration of investment companies and advisors, corporate reorganization, and enforcement of Federal securities laws. The Commission has a wide range of enforcement remedies available including injunctions and other court orders. In appropriate cases, the SEC may refer its files to the Department of Justice with a recommendation for criminal prosecution. The data below include criminal contempt violations of injunctive orders. The conviction data in the figure refer to cases terminated in a given year.

Source: Securities and Exchange Commission, Annual Report of the SEC, Fiscal Year Ended June 30, 1976, p. 207; Fiscal Year Ended September 30, 1979, p. 122 (Washington, D.C.: U.S. Government Printing Office). Figure constructed by SOURCEBOOK staff.

Table 5.36 Prosecutions for violations of U.S. immigration and nationality laws, by type of case, type of disposition, and aggregate fines and imprisonment imposed, fiscal years 1968-79

NOTE: The data presented for years prior to and including 1976 coincide with the former Federal fiscal years. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30.

Violations of nationality laws include false representations as citizens of the United States, false statements and procurement of citizenship or naturalization unlawfully, and reproduction of citizenship and naturalization papers.

Type of case and disposition	1968	1969	1970	1971	1972	1973	1974	1975	1976	Transition quarter	1977	1978	1979

Table 5.41 Persons indicted, awaiting trial on Dec. 31, and convicted of offenses involving abuse of public office, by level of government, 1970-79

NOTE: Questionnaires are sent annually to the U.S. Attorneys' offices in each of the Federal judicial districts eliciting data concerning indictments and convictions during the year as well as prosecutions awaiting trial on Dec. 31 of each year. These data cover persons elected or appointed to office and career (staff) government employees; "others involved" include individuals who hold no official position, but who participated in an offense aimed at corrupting another's public office. "Abuse of public office" includes offenses such as extortion, bribery, and conflict of interest.

Table 5.42 Army personnel tried and percent convicted in General and Special (BCD) Courts-Martial, by type of personnel, fiscal years 1971-79

NOTE: In the military justice system, a General Court-Martial consists of a military judge and not less than five members (jurors), although a trial may be heard by a military judge alone, if requested by the accused (10 U.S.C. 815). A Special Court-Martial consists of not less than three members, or a military judge and not less than three members, or trial by military judge alone, if requested by the accused (10 U.S.C. 815). The jurisdiction of the Special Court-Martial is limited to non-capital offenses. In addition, a Special Court-Martial cannot adjudge a dishonorable discharge, dismissal, confinement longer than 6 months, hard labor longer than 3 months, forfeiture of more than two-thirds pay, or any forfeiture of pay for longer than 6 months. If a bad conduct discharge (BCD) is adjudged, the Special Court-Martial must have included a verbatim record of the proceeding, counsel for the accused, and a military judge (10 U.S.C. 819). This is referred to as a Special (BCD) Court-Martial. The data below reflect the combined activity of both General and Special (BCD) Courts-Martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30.

Fiscal year and type of personnel	Total number tried	Percent convicted
1971	3,942	94.9
Officers	42	89.9
Enlisted personnel	3,900	95.6
1972	3,319	93.7
Officers	52	78.8

Table 5.51 Coast Guard personnel tried in General, Special (BCD), and Summary Courts-Martial, by type of court, fiscal years 1966-80

NOTE: See NOTE, Table 5.42. A Summary Court-Martial is a military trial by one commissioned officer who need not be a lawyer. Punishment may not exceed 30 days in confinement, and may include reduction and forfeitures of not more than two-thirds of 1 month's pay. No counsel is furnished for prosecution or defense. Accused personnel have the option to refuse trial by Summary Court-Martial, but refusal may result in the charges being referred to a higher level court-martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years (July 1 to June 30). The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30.

Fiscal year	Type of Courts-Martial		
	General	Special (BCD)	Summary
1966	3	95	212
1967	2	68	211
1968	0	91	216

Section 6:

PERSONS UNDER CORRECTIONAL SUPERVISION

This section presents information on persons under supervision or otherwise detained under some form of court or correctional authority. Data are reported on probation, on post-adjudicatory confinement, on parole, and on persons sentenced to death.

The probation data focus on the Federal jurisdiction. These data describe the flow of persons entering and leaving Federal probationary supervision.

Post-adjudicatory confinement data include characteristics of residents of juvenile correctional facilities, drug treatment programs, local jails, and adult correctional facilities. The juvenile data are broken down according to confinement in public or private facilities, and detention or correctional facilities. For the drug treatment programs, information is given on the characteristics of persons entering federally-funded programs.

Data on inmates of local jails are available from the 1978 National Jail Census and the companion Survey of Inmates of Local Jails, both of which were conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics under the National Prisoner Statistics program. Data are presented, by State, for adults and juveniles. The data on

local jail inmate characteristics include age, race, sex, education, pre-arrest employment and income, military service, heroin use, detention status, offense, bail status, legal representation and method of conviction. In comparison, similar information is available on adult inmates in State and Federal institutions. Additionally, data are presented on the population of U.S. Army, Navy and Marine Corps correctional institutions.

Detailed information is provided on persons under post-release supervision from correctional institutions, with a particular focus on parole. Data regarding persons conditionally and unconditionally released from Federal custody, and persons released to and removed from Federal supervision are reported. Data are presented from the Uniform Parole Reports program on the number of admissions to and departures from parole supervision.

This section concludes with statistics compiled on State and Federal inmates who have been executed or who are presently under sentence of death. These data are presented by the inmates' age, sex, race, commitment offense, and time spent in detention awaiting execution.

Table 6.1 Persons received for supervision by the Federal Probation System, by type of supervision, years ending June 30, 1974-80

NOTE: Persons under supervision of the Federal Probation System include persons placed on probation—either by U.S. District Courts, U.S. magistrates, or at the request of U.S. attorneys (deferred prosecution)—and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has served more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" amounts to fewer than 180 days, then release occurs without supervision.

These data represent persons who began supervision between July 1 and June 30 of the year noted. The Canal Zone, Guam, and the Virgin Islands began reporting data in 1977. "Pretrial diversion" was called "deferred prosecution" in years prior to 1977. "Special parole" refers to a specified period of parole attached to a term of imprisonment at sentencing. This provision is applicable to violations of certain drug laws (see Drug Abuse Prevention and Control Act of 1970, Public Law 91-513, Oct. 27, 1970, 84 Stat. 1260).

Table 6.4 Drug users admitted to federally-funded drug abuse treatment programs, by ethnicity, sex, age at admission, and primary drug of abuse at admission, United States, 1979

NOTE: This table is based on data that were reported to the Client Oriented Data Acquisition Process (CODAP), an information system operated by the National Institute on Drug Abuse (NIDA) that collects admission and discharge reports on each client admitted to federally-funded drug abuse treatment programs in the United States and each of its territories. To assure the quality of the data, NIDA has developed quality control procedures that include manual edits at the State and national levels, as well as computer edits that test the internal consistency of information reported in individual forms. The number of cases for each table may vary because

of missing values in different categories. Clients for whom no primary drug was reported and transfer admissions between CODAP clinics are not included in these data. The "primary drug of abuse at admission" is the drug type causing the most dysfunction at the time of admission to treatment. The subtotals of each category do not sum to the total due to the exclusion of cases with missing data on one or more of these attributes. For other definitions of terms and a discussion of limitations of the data, see Appendix 13.

Table 6.8 Selected characteristics of residents of public juvenile custody facilities, United States, selected years 1971-79

NOTE: These data are from the censuses of State and local juvenile detention and correctional facilities. The censuses were conducted by the U.S. Bureau of the Census for the Law Enforcement Assistance Administration. Data for 1972, 1976, and 1978 are not available. The first two censuses, 1971 and 1973, were restricted to public facilities, but all later censuses were expanded to include private facilities. The data for 1971-75 are as of June 30, and for 1977 and 1979 as of Dec. 31. For a description of data collection procedures and definitions of terms, see Appendix 5.

Table 6.9 Selected characteristics of residents of public juvenile custody facilities, United States, on Dec. 31, 1977 and 1979

NOTE: See NOTE, Table 6.8. The data pertain to juvenile residents only. "Hispanic" refers to persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish origin. A "status offense" is an act that is illegal if committed by a juvenile but is not illegal if committed by an adult. Examples include truancy, possession of alcoholic beverages, incorrigibility, and running away from home. The classification of "physical environment" was first used in the 1977 and 1979 censuses. It was determined by responses to questions on the degree of access to the community and the extent of in-house physical and staff controls. A majority of facilities identified in earlier censuses as detention centers, diagnostic centers, or training schools, and a significant proportion of ranches, fall into the "institutional" category. Most of those previously identified as shelters or group homes, as well as some ranches, are classified as "open." Data on average length of stay are for the calendar year. For a description of data collection procedures and definitions of terms, see Appendix 5.

* In 1977 this category included 5,296 nonoffenders held for dependency, neglect or abuse, and 1,739 for emotional disturbance or mental retardation; 5,087 juveniles who admitted themselves to a facility or were referred by a parent, court, or school, without being adjudged for an offense; and 26 who were not classifiable. In 1979 the corresponding numbers were 5,030, 1,383, 6,204 and 167, respectively.

Source: U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, *Children in Custody: Advance Report on the 1979 Census of Private Juvenile Facilities* (Washington, D.C.: U.S. Department of Justice, 1981), Table 2. Table adapted by SOURCEBOOK staff.

Table 6.12 Number and rate (per 100,000 persons 14 to 17 years of age) of sentenced prisoners under 18 years of age in adult correctional facilities, by sex, region, and jurisdiction, on Jan. 1, 1979

NOTE: These data are from a survey of adult correctional institutions conducted by the National Center on Institutions and Alternatives under a grant from the National Institute of Corrections. The data were obtained through a mail questionnaire of correctional personnel in the 50 States, the District of Columbia, and the Federal Bureau of Prisons. Followup correspondence and telephone contacts were made when necessary. These data represent a 1-day accounting of the population of sentenced prisoners 17 years of age and younger in adult correctional facilities. Excluded from this group were prisoners or parole violators who were being detained or who were incarcerated in State correctional facilities on a holding status. "Adult correctional facilities" includes all facilities for the incarceration of sentenced offenders that are under the jurisdiction of the State's adult correctional system, county jails, and county detention facilities operated by the juvenile corrections department, facilities primarily for delinquents or facilities operated by the juvenile corrections department, county jails, and county detention facilities as well as differences in State and State differ in the maximum age for juvenile court jurisdiction and in restrictions on transfers from juvenile to adult court. These differences will, in turn, influence the number and type of youth offenders in the adult criminal justice system. Population data used to compute rates per 100,000 youth 14 to 17 years of age are from the U.S. Bureau of the Census, Current Population Reports, 1976, Series P-25, No. 646. For survey methodology and definitions of terms, see Appendix 14.

Source: Harvey D. Lowell, Margaret McNabb, and Anthony J. DeMarco, *Sentenced Prisoners Under 18 Years of Age in Adult Correctional Facilities: A National Survey* (Washington, D.C.: National Center on Institutions and Alternatives, 1980), p. 14. Table adapted by SOURCEBOOK staff. Reprinted by permission.

Table 6.13 Sentenced prisoners under 18 years of age in adult correctional facilities, by type of offense, region, and jurisdiction, on Jan. 1, 1979

NOTE: See NOTE, Table 6.12. In cases in which there was more than one offense on commitment, data were coded only for the most serious offense. Some States have statutes that substitute a "youthful offender" status for the original offense designation for young adult offenders at the time of sentencing. In such situations, data were listed under the category "unreported." For survey methodology and definitions of terms, see Appendix 14.

DeMarco, *Sentenced Prisoners Under 18 Years of Age in Adult Correctional Facilities: A National Survey* (Washington, D.C.: National Center on Institutions and Alternatives, 1980), p. 25. Table adapted by SOURCEBOOK staff. Reprinted by permission.

Table 6.14 Number of jails, estimated number of jail inmates, and rate of inmates (per 100,000 population) by sex and legal status of inmate, region, and State, as of February 1978

NOTE: These data were collected in a survey conducted in February 1978 by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. A jail is defined as a local government facility authorized to detain for at least 48 hours any adult suspected or convicted of a criminal offense. Excluded from consideration as local jails were facilities designed specifically for the detention of juveniles, hospitals for the criminally insane, drunk tanks, and lockups. In addition, all facilities operated by Federal, or State correctional authorities, including State-operated jails in Connecticut, Delaware, Hawaii, Rhode Island, and Vermont were excluded. Also excluded from the scope of this survey were 193 small jails, holding about 900 inmates.

This was done because the facilities were not authorized to hold any inmates after they had been formally charged with a criminal offense, a process that usually takes place within the first 48 hours of confinement.

The sample was designed to assure a level of statistical reliability of data on female inmates generally comparable to that for male inmates. Estimates below 300 for all inmates (and for male inmates), and below 100 for female inmates, are based on too few sample cases to be statistically reliable. For survey methodology and definitions of terms, see Appendix 15.

* Five States—Connecticut, Delaware, Hawaii, Rhode Island, and Vermont—had integrated jail-prison systems and, therefore, were excluded in calculating the rate of inmates per 100,000 population at the regional and national levels. Alaska, which had six locally operated jails in addition to an integrated jail-prison system, was included in the calculation.

* Prisoners in local jails are not considered by the State to be under its jurisdiction. For the purposes of this table, however, they are included in the total State prisoner count used to calculate the percentage of State prisoners held in local jails. The figure for Virginia includes inmates housed in jails for reasons other than overcrowding.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Prisoners in State and Federal Institutions on December 31, 1979*, National Prisoner Statistics Bulletin SD-NPS-PSF-7 (Washington, D.C.: Government Printing Office, 1981), p. 15.

Figure 6.6 Sentenced prisoners in State and Federal institutions on Dec. 31, United States, 1925-79

NOTE: Prison population data were compiled by a yearend census of prisoners held in custody in State and Federal institutions. Prior to Dec. 31, 1971, a "sentenced prisoner" was counted as any adult felon serving a sentence in a State or Federal correctional institution. Beginning on Dec. 31, 1971, respondents were asked to disregard the difference between felons and misdemeanants and to count as a "sentenced prisoner" those inmates who had been sentenced as adults or youthful offenders to a maximum term of at least 1 year and 1 day. Comparability of the data is affected by the various reporting differences.

Beginning on Dec. 31, 1978, a distinction was made between prisoners "in custody" and prisoners "under jurisdiction." As defined in the 1978 report (U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1978, National Prisoner Statistics Bulletin SD-NPS-PSF-6 [Washington, D.C.: U.S. Government Printing Office, 1980]), "in custody" refers to the direct physical control and responsibility for the body of a confined person. "Under jurisdiction" is defined as follows: A State or Federal prison system has

jurisdiction over a person if it retains the legal power to incarcerate the person in one of its own prisons. Jurisdiction is not determined by an inmate's physical location; jurisdiction is determined by the legal authority controlling the inmate. Examples of prisoners under the jurisdiction of a given system, but not in its custody, are those housed in local jails, in other States, or in hospitals (including mental health facilities) outside the correctional system; inmates out on work release, furlough, or bail; and State prisoners held in Federal prisons or vice versa. Both custody figures and jurisdiction figures are shown for 1977 to facilitate year-to-year comparison.

Custody figures for 1977 may differ from those published in U.S. Department of Justice, Law Enforcement Assistance Administration, Prisoners in State and Federal Institutions on December 31, 1977, National Prisoner Statistics Bulletin SD-NPS-PSF-5, because some States have refined their definitions of custody in light of the guidelines provided for the 1978 report.

For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 16.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1979, National Prisoner Statistics Bulletin SD-NPS-PSF-7 (Washington, D.C.: U.S. Government Printing Office, 1981), p. 1.

Figure 6.7 Rate (per 100,000 civilian population) of sentenced prisoners in State and Federal institutions on Dec. 31, United States, 1940-79

NOTE: See NOTE, Figure 6.6. Figures for civilian population are based on U.S. Bureau of the Census estimates. Civilian population represents the resident population less the armed forces stationed in the United States.

For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 16.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1979, National Prisoner Statistics Bulletin SD-NPS-PSF-7 (Washington, D.C.: U.S. Government Printing Office, 1981), p. 2.

Table 6.22 Rate (per 100,000 civilian population) of sentenced prisoners in State and Federal institutions on Dec. 31, by region and jurisdiction, 1971-79

NOTE: See NOTE, Figure 6.6. Figures for civilian population are based on U.S. Bureau of the Census estimates. Civilian population represents the resident population less the armed forces stationed in the United States. The data for the years 1971-77 represent sentenced prisoners in the custody of State and Federal institutions. The data for 1978 and 1979 represent sentenced prisoners under the jurisdiction of State and Federal correctional authorities. For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 16.

Table 6.25 Life-term prisoners in correctional institutions, by sex, race, and jurisdiction, 1980

NOTE: The data presented below are from a survey of corrections departments in the 50 States, the District of Columbia, Guam, and Puerto Rico conducted by CONTACT, Inc. The survey was initiated in July 1980 and there was a mail follow-up in October 1980. Eight jurisdictions—Alabama, Arizona, Maine, New Mexico, Ohio, Oklahoma, Utah, and the Federal Prison System

failed to respond to the initial questionnaires or the follow-up contact. Figures presented reflect the figures provided by the reporting agencies. Responses were not verified. Data have been revised from original presentation through information provided by the Source.

Table 6.27. Movement of sentenced prisoners in State and Federal Institutions, by region and jurisdiction, 1979

NOTE: See NOTE, Figure 6.6. All figures on admissions and departures represent the number of transactions and not the number of individual prisoners who were involved in such movements. "Unconditional releases" include expiration of sentence, commutation of sentence, and other such unqualified discharges. "Conditional releases" are those involving some form of supervision over the offender upon return to the community and include parole, probation, supervised mandatory release (early release because of good behavior), and other forms of conditional discharge. For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 16.

Table 6.28 Prisoners in State and Federal adult correctional facilities, by age, sex, region, and jurisdiction, on Mar. 31, 1978

NOTE: The data presented below are from a mail survey conducted by Abt Associates, Inc. for the National Institute of Justice. These data were obtained in response to a questionnaire mailed to correctional agencies in the 50 States, the District of Columbia, and the Federal Prison System. In each of these 52 jurisdictions, a central coordinator was designated to assist in the data collection effort. In 40 jurisdictions, the survey was completed by the central coordinator who was responsible for overseeing the data collection for all the facilities within that correctional system. The remaining 12 officials requested that the survey instruments be mailed directly to the individual facilities. Follow-up telephone calls were used to clarify ambiguous or missing responses. In all, questionnaires were completed by 38 Federal and 521 State correctional facilities during the period between March 1978 and December 1978.

The survey was confined to adult correctional facilities. It did not include juvenile correctional facilities, correctional facilities under the jurisdiction of the Department of Defense or Indian reservations, or police lockups that hold persons for less than 48 hours. The inmate count refers to all persons housed in the correctional facilities. This includes sentenced and unsentenced prisoners, probation and parole violators, civil and diagnostic commitments, and inmates temporarily absent from the facility. It does not include persons under probation or parole supervision. The estimated extent of missing data found in the U.S. total is a function of completely missing information on at least one of the attributes for the States of Alabama, Delaware, and South Dakota, plus incomplete reporting from other jurisdictions not separately enumerated.

Table 6.33 Prisoners in State and Federal adult correctional facilities, by type of offense, sex, region, and jurisdiction, on Mar. 31, 1978

NOTE: See NOTE Table 6.28. In the survey instrument, murder, forcible rape, robbery, and aggravated assault were given as examples of violent crimes. Burglary, larceny-theft, and motor vehicle theft were given as examples of property crimes.

The estimated extent of missing data found in the U.S. total is a function of completely missing information on at least one of the attributes for the States of Alabama, Connecticut, Delaware, and South Dakota, plus incomplete reporting from other jurisdictions not separately enumerated.

* Data are missing on 8 percent of all prisoners.

Source: Kenneth Carlson, *American Prisons and Jails, Volume II: Population Trends and Projections*, U.S. Department of Justice, National Institute of Justice (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 117, 118. Table adapted by SOURCEBOOK staff.

Table 6.34 Estimated number of inmates in State correctional facilities, by selected demographic characteristics, and nature and extent of reported drug and alcohol use, United States, 1979

NOTE: These data are estimates derived from a stratified probability sample of adult and youthful offenders held in the custody of State correctional authorities. The "Vietnam era" encompasses the period August 1964 to April 1975. If an inmate reported lifetime use of more than one drug, only the most serious drug used was counted.

(Detail may not add to totals shown because of rounding)

Characteristics	Estimated number of inmates	Percent of inmates	Characteristics	Estimated number of inmates	Percent of inmates
Sex	274,564	100.0	Pre-Vietnam era	19,499	7.1

Table 6.37 Population and movement of prisoners in Federal institutions, fiscal years 1943-79*

NOTE: The Federal Prison System is responsible for two distinct Federal offender populations: (1) individuals who are housed in, have escaped from, or are in transit between Federal institutions and community treatment centers; and (2) individuals who are housed in, awaiting trial in, or enroute to contract facilities, i.e., State, local, or private facilities that are under contract with the Federal Prison System for the housing of Federal offenders. Approximately 13 percent of the total Federal prison population is housed in contract facilities. These data are not included in the tables except for Table 6.41. Data in this report are often broken down into two sets of mutually exclusive categories: (1) court commitments and other-than-court commitments; and (2) prisoners under sentence and prisoners not under sentence. For an explanation of the sentencing procedures within these categories, see Appendix 17. The tables from the Source that present data on population and court commitments are approximately 91 percent complete, unless otherwise noted. "Completeness" refers to the percentage of known prisoner population on which demographic data are available. For a definition of "mandatory release," see NOTE, Table 6.1.

Fiscal year ^b	Population beginning of year	Received (transfers excluded)						Discharged (transfers excluded)						Transferred to other institutions	Population end of year		
		From courts	Parole	Violators returned	Mandatory release	Study and observation	Escaped prisoners returned	Other ^c	Transferred from other institutions	Sentence expired	Mandatory released ^d	Paroled ^e	Died			Study and observation	Escaped

* Data prior to 1974 reflect sentenced prisoners only.
^b From fiscal year 1970, figures include only Bureau of Prisons institutions.
^c Other includes other temporary movement such as furloughs, writs, etc.
^d Beginning in 1958 the term mandatory release replaces the term conditional release.
^e Includes discharges of Selective Service Act violators paroled under the provisions of Executive Order No. 8641 as follows: 1943-268; 1944-483; 1945-719; 1946-126; 1947-151.

Table 6.43 Normal capacity and average population of U.S. Navy correctional centers, by location, 1980

NOTE: Data have been collected from the organizations or agencies through a mail survey. If no response to the survey was received, information from last year's directory was repeated. The Navy also operates other small correctional centers and detention spaces in the United States and overseas. All facilities are for Naval personnel awaiting court-martial or serving court-martial sentences. "Normal capacity" is the number of inmates the facility was designed to hold.

Correctional center and location	Normal capacity	Average population
Naval Station Activity, Long Beach, California	34	32
Naval Station, San Diego, California	187	162
Naval Support Activity, San Francisco, California	148	107
Naval Submarine Base, New London, Connecticut	23	14
Naval Air Station, Jacksonville, Florida	64	64
Naval Air Station, Pensacola, Florida	55	43
Naval Station, Pearl Harbor, Hawaii	99	42
Naval Administrative Command, Great Lakes, Illinois	202	130
Naval Support Activity, Philadelphia, Pennsylvania	210	143
Naval Education and Training Center, Newport, Rhode Island	75	24
Naval Station, Charleston, South Carolina	95	57
Naval Air Station, Millington, Tennessee	68	57
Naval Air Station, Corpus Christi, Texas	65	35
Naval Station, Norfolk, Virginia	276	264
Naval Support Activity, Seattle, Washington	69	57
Naval Station, Guantanamo Bay, Cuba	24	6
Naval Station, Guam	23	13
Fleet Activities, Yokosuka, Japan	45	40
Naval Base, Subic Bay, Philippines	55	48
Naval Station, Roosevelt Roads, Puerto Rico	10	7
Naval Station, Rota, Spain	15	20

Table 6.45 Residents in pre-release facilities, by age and sex, United States, on Mar. 31, 1978

NOTE: The data presented below are from a mail survey conducted by Abt Associates, Inc. for the National Institute of Justice. These data were obtained in response to a questionnaire mailed to correctional agencies in the 50 States, the District of Columbia, and the Federal Prison System. In each of these 52 jurisdictions, a central coordinator was designated to assist in the data collection effort. In 40 jurisdictions, the survey was completed by the central coordinator who was responsible for overseeing the data collection for all the facilities within that correctional system. The remaining 12 officials requested that the survey instruments be mailed directly to the individual facilities. The State and Federal coordinators were also asked to identify any privately or locally operated pre-release centers that housed sentenced inmates under their jurisdiction. Follow-up telephone calls were used to clarify ambiguous or missing responses. In all, questionnaires were completed by 11 Federal, 205 State and local, and 185 private pre-release facilities operating between March 1978 and December 1978. This represented 100 percent of the Federal, State, and local facilities and 78 percent of the private facilities identified. A pre-release facility was defined as any publicly or privately operated correctional facility that housed and supervised its residents for less than 24 hours daily and whose residents were sentenced and under Federal or State jurisdiction in 1978. Excluded from the survey were facilities for juveniles, facilities under the jurisdiction of Indian reservations or of the Department of Defense, facilities serving only parolees or probationers, police lockups, and large penal institutions having a work release program for only a small number of inmates. For this table, information was not available from three pre-release centers for male residents and from one center for female residents.

Age	Male		Female	
	Number	Percent	Number	Percent
Total	11,943	100	1,300	100
Under 18 years	166	1	46	4
18 to 24 years	4,290	36	442	34
25 to 34 years	4,857	41	550	42
35 to 44 years	1,624	14	178	14
Older than 44 years	1,006	8	84	6

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Prisoners in State and Federal Institutions on December 31, 1979*, National Prisoner Statistics Bulletin SD-NPS-PSF-7 (Washington, D.C.: U.S. Government Printing Office, 1981), p. 26.

Table 6.49 Movement of prisoners paroled from State and Federal institutions, by jurisdiction, 1979

NOTE: These data were collected by the annual Uniform Parole Reports aggregate survey conducted in 1980 and represent information voluntarily provided by the U.S. Parole Commission, the 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands. The survey data include only adults who have been sentenced to 1 year or more imprisonment on a felony-type offense and who have entered parole supervision either by discretionary parole or mandatory release. States are instructed to count all parolees under the official jurisdiction of the paroling authority regardless of supervision location (in-State, out-of-State) or supervision status (active, inactive). The term "conditional releasees" includes parolees and mandatory releasees. A parolee is defined as a person released to community supervision (primarily but not exclusively from prison) by a discretionary act of the paroling authority, who must report to a supervising agent (parole officer), and who must observe other conditions until discharged. A mandatory releasee is a prisoner released to community supervision as a result of good time or other statutory sentence reduction measures. Three jurisdictions were unable to provide any data exclusively on parole population movement: Delaware, Illinois, and Indiana. They did report parole as part of their conditional release population movement as presented in Table 6.51. Tennessee provided data only on parole entries. The U.S. figures are estimates based on the Federal reported figures for population and entries, each State total reported for population and entries, and estimates for the jurisdictions

missing one or more of the figures. The estimating procedures for specific States are described in Appendix 4. The end-of-year population estimates for 1977 and 1978, and the entry estimate for 1978 were used to compute a corresponding 1978 removals figure. This is based on the assumption that, given uniform definitions of categories, the year-end population for a given year plus the next year's entries minus the next year's removals should equal the year-end population for the next year. However, it should be pointed out that many jurisdictions were not able to provide this balanced figure. The 1979 year-end estimated total U.S. parole population figure does not correspond with the figure for the 1978 year-end estimated parole population plus the 1979 estimated parole entries minus the 1979 estimated parole removals as it has in previous years. This is a result of a legislative change in the status of the California Department of Corrections parole cases. As of Jan. 1, 1979, all releases under the jurisdiction of the California Department of Corrections were reclassified as mandatory releasees. Therefore, the 1979 year-end figure for the estimated U.S. parole population is short the number of California cases reported as parolees as of Dec. 31, 1978 since they were counted as mandatory releasees in 1979 (Source, p. 42). These cases are included in the total conditional release population as shown in Table 6.51. Discrepancies in other jurisdictions are discussed in Appendix 4. For survey methodology and definitions of terms, see Appendix 4.

Figure 6.10 Prison and conditional release populations, United States, 1975-79

NOTE: See NOTE, Table 6.49. For survey methodology and definitions of terms, see Appendix 4.

* Prison population (adults sentenced to 1 year or more of imprisonment) data are from the U.S. Department of Justice, Law Enforcement Assistance Administration, *Prisoners in State and Federal Institutions on December 31, 1975; 1976; 1977; 1978* (Washington, D.C.: U.S. Government Printing Office); and U.S. Department of Justice, Bureau of Justice Statistics, *Prisoners in State and Federal Institutions on December 31, 1979* (Washington, D.C.: U.S. Government Printing Office, 1980).

* Estimated conditional release population data for 1975-78 are from the National Council on Crime and Delinquency, Uniform Parole Reports, *Parole in the United States: 1978* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1979).

Source: National Council on Crime and Delinquency, Uniform Parole Reports, *Parole in the United States: 1979* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1980), p. 17. Figure adapted by SOURCEBOOK staff.

Source: National Council on Crime and Delinquency, Uniform Parole Reports, *Parole in the United States: 1979* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1980), pp. 30, 31.

Figure 6.11 Total prison releases and releases to parole from State institutions, United States, 1965-77

NOTE: See NOTE, Table 6.49. Total prison releases and prison releases to parole are derived from U.S. Department of Justice, Law Enforcement Assistance Administration, Parole in the United States: 1976 and 1977, Uniform Parole Reports Series 1, Pubn. 1 (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 54, 55; U.S. Department of Justice, Law Enforcement Assistance Administration, Prisoners in State and Federal Institutions on December 31, 1977, National Prisoner Statistics Bulletin SD-NPS-PSF-5 (Washington, D.C.: U.S. Government Printing Office, 1979), p. 22. The figure for prison releases to parole, drawn from National Prisoner Statistics data, differs substantially from that presented in Table 6.51 for parole entries. In

addition to releases from prison to parole of adults sentenced to 1 year or more, the parole entries reported to Uniform Parole Reports also include reactivations; reinstatements; reparoles from a status other than imprisonment; and paroles from a nonprison facility. Reactivations and reinstatements are those parolees who, temporarily placed in an inactive status (either due to detention on pending charges, temporary detention in a mental hospital, etc.), are returning to the official jurisdiction of the paroling authority. The estimating procedures for specific States are described in Appendix 4. For further information on comparability of data sources, survey methodology, and definitions of terms, see Appendix 4.

Source: National Council on Crime and Delinquency, Uniform Parole Reports, Parole in the United States: 1978 (San Francisco: National Council on Crime and Delinquency, Research Center West, 1979), p. 18.

Figure 6.12 Rate (per 100,000 State inhabitants) of persons conditionally released from prison, by region and jurisdiction, on Dec. 31, 1979

NOTE: See NOTE, Table 6.49. State civilian populations were derived from U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reports for the United States, 1978 (Washington, D.C.: U.S. Government Printing Office, 1979), pp. 40-43. This year's data presentation shows the total conditional release population, which is comprised of two subgroups:

parolees and mandatory releases. Data presentations in previous years referred only to parolees. For further information on estimation procedures, survey methodology, and definitions of terms, see Appendix 4.

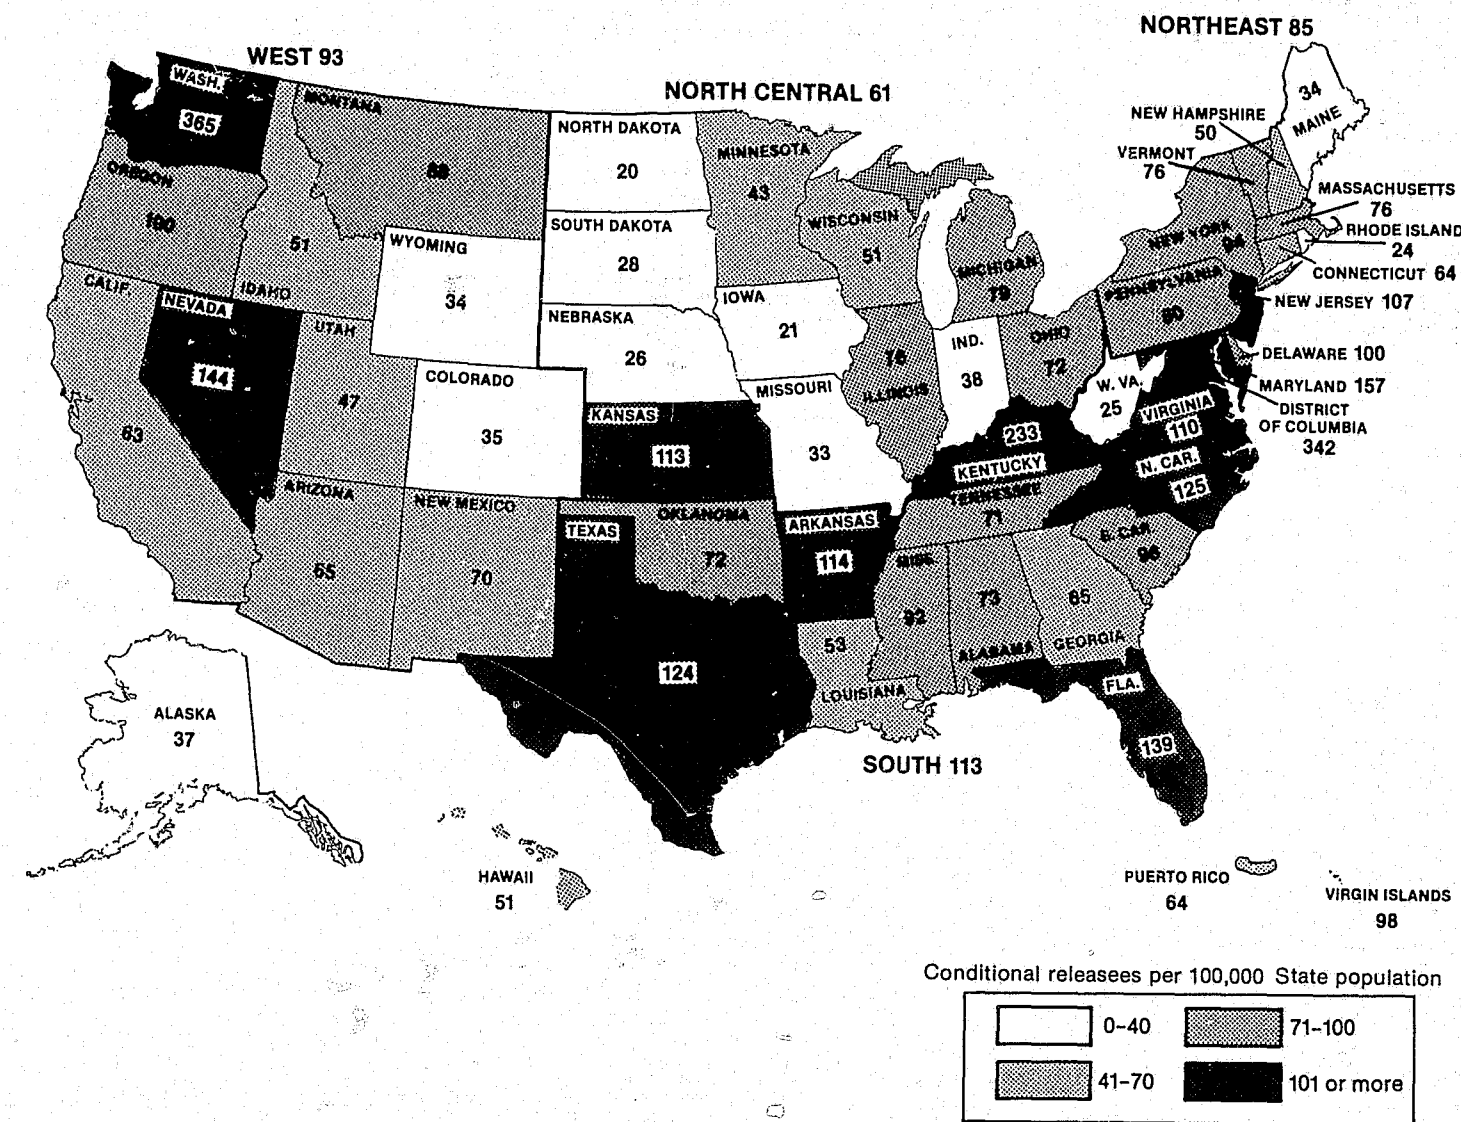

Table 6.52 Prisoners granted parole by U.S. Parole Commission, by region, October 1974 to September 1980

NOTE: These data refer only to defendants sentenced as adults. The "percent" column refers to the inmates who were granted parole as a proportion of the total number of inmates considered for parole. The Source notes, "while the percentage granted parole has traditionally served as an indicator of paroling policy, it has several limitations. First, it is affected by changes in types of offenders entering the system. For example, the rate of parole grants for auto thieves may not be the same as for narcotics dealers. Second, the measure may be affected by changes in the sentencing practices" (Source, 1981, p. 4). The data do not reflect decisions modified under the Commission's appellate or reopening provisions. Data for 1978 have been revised from earlier reports by the Source. All annual data refer to the 12-month period of Oct. 1 to Sept. 30.

The five regions of the United States are defined in the following manner: Northeast—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia; Southeast—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee; North Central—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin; South Central—Arkansas, Louisiana, New Mexico, Oklahoma, Texas; and West—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

Table 6.54 Prisoners under sentence of death, by race and jurisdiction, on Apr. 20, 1981

NOTE: The NAACP Legal Defense and Educational Fund, Inc. periodically collects data on persons on death row. At the time of this survey, 36 jurisdictions had capital punishment laws for the crime of homicide, and 30 States had at least one prisoner under sentence of death. Between July 1976 and Apr. 20, 1981, death sentences have been vacated as unconstitutional in approximately 526 cases and conviction or sentence has been reversed on appeal in approximately 307 cases.

Figure 6.13 Prisoners under sentence of death, by jurisdiction, on Dec. 31, 1979

NOTE: By yearend 1979, 37 States and the Federal Government had death penalty statutes in effect. During 1979, Colorado, Massachusetts, New Mexico, and South Dakota enacted new or revised legislation. In only one State, Rhode Island, was a death penalty law overturned. As a result of a major procedural change regarding dispositions, the number of dispositions other than execution and the number of persons under sentence of death in 1976 and subsequent years are not strictly comparable to corresponding data for earlier years. See Source for further information.

^a The persons enumerated under "other" include one American Indian and one Asian.
^b Two persons under sentence of death at the end of 1979 had multiple death sentences for murder. These include one in Florida with two death sentences and one in Oklahoma with six.
^c The person enumerated under the category "rape" was under sentence of death for sexual battery.

^a Two persons received under sentence of death in 1979 had multiple death sentences for murder. These include one in Florida with two death sentences and one in Oklahoma with six.
^b The persons enumerated under "other" include one American Indian and one Asian.

* Some of the figures for year-end 1979 are revised from those shown in *Capital Punishment, 1979*, NPS Bulletin SD-NPS-CP-8, December 1980. Present figures reflect the exclusion of 5 inmates (4 in Florida and 1 in Tennessee) who were relieved of the death sentence prior to 1980 and the inclusion of 16 inmates (9 in Georgia, 5 in Louisiana, and 1 each in Arizona and Florida) who, although sentenced to death prior to 1980, were either reported late to the NPS program or

were not admitted to the custody of the relevant correctional authorities by Dec. 31, 1979.

^b The death penalty in Massachusetts was declared unconstitutional on Oct. 20, 1980.

^c Includes prisoners under the jurisdiction of the Federal Bureau of Prisons but excludes prisoners under Armed Forces jurisdiction.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Capital Punishment 1979*, National Prisoner Statistics Bulletin SD-NPS-CP-8 (Washington, D.C.: U.S. Government Printing Office, 1980), p. 3. Figure adapted by SOURCEBOOK staff.

Table 6.59 Movement of prisoners under sentence of death, United States, 1968-79

NOTE: See NOTE, Figure 6.13. Figures for 1975, 1977, and 1978 have been revised from those reported in *Capital Punishment 1978*, NPS Bulletin SD-NPS-CP-7, December 1979. In addition, as a result of a major procedural change regarding dispositions, the number of dispositions other than execution and the number of persons under sentence of death in 1976 and subsequent years are not strictly comparable to corresponding data for earlier years. See Source for further information.

Year	Received death sentence	Dispositions other than execution	Executions	Under sentence of death on Dec. 31
1968	138	78	0	517

^a All persons enumerated under the category "other" were American Indians with the exception of one Asian received from court in California.

^b Total for Dec. 31, 1978 was revised from that reported in *Capital Punishment 1978*, NPS Bulletin SD-NPS-CP-7, December 1979, to include 21 inmates (10 in Georgia, 7 in Texas, 2 in Florida, and 1 each in Louisiana and Tennessee) who, although sentenced to death prior to 1979, were either reported late to the NPS program or not admitted to the custody of the relevant correctional authorities by Dec. 31, 1978, and to exclude 2 inmates in Georgia who were relieved

of the death sentence prior to 1979.

^c Two persons received under sentence of death in 1979 had multiple death sentences for murder. These include one in Florida with two death sentences and one in Oklahoma with six.

^d The person enumerated under the category "rape" was under sentence of death for sexual battery.

^e The persons enumerated under the category "other" were under sentence of death for assault by a life prisoner resulting in death.

Table 6.61 Prisoners removed from death row, by current status, region, and jurisdiction, 1979

NOTE: See NOTE, Figure 6.13. This table identifies the 1979 year-end status of persons removed from death row during the year. Disposition is final only for those who are serving reduced sentences, who are deceased, who have been found not guilty, or who have had all charges on

the capital offense dropped. Persons in each of the other categories are subject to further legal proceedings prior to final disposition. The death penalty statute in Rhode Island was overturned in 1979.

^a Persons in this category are subject to further administrative and legal steps before final disposition. This process could result, for example, in a commutation of sentence or in the vacation of sentence with either affirmation or voiding of conviction (see footnote d for further discussion).
^b The category "death other than execution" includes two deaths (one each in Texas and Nevada) due to natural causes.
^c Commutation effects an immediate change in sentence from death to life imprisonment or a term of years.

^d Persons whose capital sentence is vacated or whose capital sentence and conviction are vacated are subject to further legal proceedings (such as resentencing if the conviction has been affirmed or retrial if the sentence and conviction have been vacated) to determine their ultimate disposition. Neither the vacating of the sentence nor the vacating of both sentence and conviction precludes the possibility of reimposition of the death sentence.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Capital Punishment 1979*, National Prisoner Statistics Bulletin SD-NPS-CP-8 (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 40, 43. Table adapted by SOURCEBOOK staff.

Table 6.63 Prisoners executed under civil authority, by region and jurisdiction, 1930-79

NOTE: In three States, Maine, Minnesota, and Wisconsin, the death penalty was abolished for the entire period covered by the table. Alaska and Hawaii have not had the death penalty since 1960, when they were first included in the series as States.

Annotated list of sources and references

The following list of sources and references represents those publications containing data or information used in SOURCEBOOK. The following list references only published documents. In some cases in which data have been provided to SOURCEBOOK staff, the data are made available in the form of single tables or mimeographed reports. These sources are not referenced below.

To aid users who are not familiar with particular sources, an annotation of each source has been prepared. In the instances where data from more than one edition of a publication is used to prepare trend tables, the latest edition of the publication is annotated. Each annotation includes—in addition to standard bibliographic data—information about the periodicity of the source, the time period of the data reported therein, and the nature of the contents of the entire source. (Sources typically contain more tables than are actually selected for presentation in SOURCEBOOK as well as narrative describing or analyzing the tables, or presenting detailed information about the procedures used to collect the data.) Each annotation also lists the SOURCEBOOK table numbers of those tables selected from the publication for use in this volume.

Adelberg, Sheldon. "Workload and Decision Trends: Statistical Highlights, Fiscal Years 1978-1980." U.S. Parole Commission, Research Unit, Report No. 24. Washington, D.C., 1981. (Mimeographed draft.)

Contents:

11 pages, 9 tables

Dates of data presented:

Fiscal years 1978-80

Periodicity:

See narrative

SOURCEBOOK tables:

1.78-1.80, 6.52

This report summarizes the activity of the U.S. Parole Commission and its employees for the fiscal years of 1978, 1979, and 1980. The document presents tabular data on hearing examiner workload, parole grants and violator warrants issued, parole guideline usage, the representation of prisoners at parole consideration hearings, and appeals of parole release decisions.

★ ★ ★

Administrative Office of the United States Courts. **1980 Annual Report of the Director.** Washington, D.C.: Administrative Office of the United States Courts, 1980.

Contents:

308 pages, 134 tables, 2 figures, 1 appendix

Dates of data presented:

Primary period: year ending June 30, 1980

Trend tables: years ending June 30, 1940-80

Periodicity:

Annual

SOURCEBOOK tables:

1.30, 1.31, Fig. 1.7, 1.45, 1.50, 1.51, 5.13, 5.15, 5.18-5.20, Fig. 5.7, 5.21-5.25, 5.34, 5.35, 6.1, 6.2, Fig. 6.2, 6.3

Beginning with an overview of Federal judicial business, administration, appropriations, and expenditures, this report provides data on all aspects of the Federal court system. A detailed analysis of the workload is presented for the U.S. Courts of Appeals and the U.S. District Courts. For the appellate courts, information is presented on filings, terminations, types of appeals, State prisoner petitions, etc. Information for the U.S. District Courts includes civil cases filed, terminated, and pending; prisoner petitions; antitrust cases; juror utilization; Federal public/community defenders; passport and naturalization actions; criminal cases filed; and dispositions of criminal defendants. Data are provided in aggregate form and are also presented by circuit and district courts.

★ ★ ★

Administrative Office of the United States Courts. **Federal Judicial Workload Statistics for the Twelve-Month Period Ended December 31, 1980.** Washington, D.C.: U.S. Government Printing Office, 1981.

Contents:

39 pages, 56 tables, 1 figure, 1 appendix

Dates of data presented:

Primary period: 1979 and 1980

Trend tables: 1965-80

Periodicity:

SOURCEBOOK table:

5.14

This report reviews the judicial workload in the Federal courts for the 12-month periods ending Dec. 31, 1979 and 1980. Data on criminal and civil cases filed, terminated, and pending in U.S. District Courts and Courts of Appeals are presented by district and in aggregate form. Information on persons received and removed from probation supervision under Federal jurisdiction, grand and petit juror usage, and Federal public defenders and community defender organizations are also highlighted. Trend data from 1965 through 1980 are included.

★ ★ ★

Administrative Office of the United States Courts. **Federal Offenders in United States District Courts, 1979.** Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:

363 pages, 46 tables, 13 figures, 5 appendices

Dates of data presented:

Primary period: year ending June 30, 1979

Trend tables: years ending June 30, 1945-79

Periodicity:

Annual

SOURCEBOOK tables:

Fig. 5.6, 5.27, Fig. 5.8, Fig. 5.9

This report on Federal offenders disposed of in U.S. District Courts presents summary disposition and offender information for each of the district courts for each year ending June 30, 1975-79. Data are presented on: convictions or acquittals by plea or type of judicial proceeding; assignment of counsel by case disposition; type and gravity of sentence for defendants convicted; and age, sex, and prior record of convicted defendants. Detailed data for the year ending June 30, 1979 differ from the summary information by making specific reference to charged and convicted offenses.

Trend tables (1945-79) are also included on dispositions of all defendants in U.S. District Courts. Similar trend tables, but of shorter duration (typically 1962-79), are included in the report for selected Federal offenses.

Administrative Office of the United States Courts. **1980 Juror Utilization in United States District Courts.** Washington, D.C.: Administrative Office of the United States Courts, 1980.

Contents:

170 pages, 110 tables, 2 figures, 2 appendices

Dates of data presented:

Primary period: year ending June 30, 1980

Trend tables: years ending June 30, 1974-80

Periodicity:

Annual

SOURCEBOOK figure:
Fig. 1.9

This report on the Federal courts is divided into three sections. The first section presents information on grand jury operation, petit juror activity, and historical comparisons of petit juror utilization data over the past 7 years. The second section contains information on juror expenditures for each district court as well as national figures on juror costs. The last part of the report provides an individual profile for each of the 95 U.S. District Courts. A national profile of juror utilization presents summary statistics on both grand and petit juror use in the year ending June 30, 1980 as well as historical comparisons across years ending June 30, 1974-80. Appendix B lists U.S. District Courts that have adopted rules reducing the size of civil juries.

★ ★ ★

Administrative Office of the United States Courts. **Management Statistics for United States Courts 1980**. Washington, D.C.: Administrative Office of the United States Courts, 1980.

Contents:
129 pages, 120 tables
Dates of data presented:
Years ending June 30, 1976-80
Periodicity:
Annual
SOURCEBOOK table:
1.32

This report presents key workload and performance statistics on both civil and criminal matters for each of the U.S. Courts of Appeals and each of the 95 U.S. District Courts. Data for the former include appeals filed, terminated, pending; number of judgeships; types of appeals; number of opinions; percent reversed or denied; median time from filing to disposition; and other matters pertaining to the appellate courts. Data for the U.S. District Courts include cases filed, terminated, and pending; actions per judgeship; median time from filing to disposition; juror usage index; and other matters related to activities in U.S. District Courts. As part of the profile, each court is ranked on various dimensions. Two tables presenting the national profile for all U.S. Courts of Appeals and all U.S. District Courts on the workload and performance measures are also included.

Administrative Office of the United States Courts. **Report on Applications for Orders Authorizing or Approving the Interception of Wire or Oral Communications for the Period January 1, 1980 to December 31, 1980**. Washington, D.C.: Administrative Office of the United States Courts, 1981.

Contents:
100 pages, 14 tables, 2 appendices
Dates of data presented:
Primary period: 1980
Trend tables: 1969-80
Periodicity:
Annual
SOURCEBOOK tables:
5.9-5.12

This is a report on the applications for orders authorizing or approving the interception of wire or oral communications, as required by Title 18, United States Code, Section 2519(3). There is a description of the reporting requirements of the statute, regulations for filing reports, and summaries of the reports submitted by judges and prosecuting officials. The tables in the body of the report include data on grants, denials, and authorized length of intercept orders; offenses for which court intercept orders were granted; types of locations of authorized interceptions; nature of the intercept order; average costs of the electronic surveillance; arrests and convictions resulting from electronic surveillance; and a summary of authorized intercepts from 1969 to the year of the report. The appendices contain detailed data from reports filed by Federal and State judges and prosecuting officials on court-authorized electronic surveillance activities during the focal year and on arrests, trials, and convictions as a result of intercepts installed during previous years.

★ ★ ★

Administrative Office of the United States Courts. **Sixth Report on the Implementation of Title I of the Speedy Trial Act of 1974**. Washington, D.C.: Administrative Office of the United States Courts, 1980.

Contents:
55 pages, 26 tables, 3 appendices
Dates of data presented:
Years ending June 30, 1976-80
Periodicity:
See narrative
SOURCEBOOK tables:
5.16, 5.17

The Speedy Trial Act of 1974 requires each U.S. District Court, with the approval of the judicial council of the circuit, to adopt a plan for the prompt disposition of criminal cases in accordance with statutory time limits. Pursuant to the provisions of Title I of this statute, the Director of the Administrative Office of the United States Courts is to submit periodic reports to the Congress outlining the speedy trial plans adopted by the planning groups within each district court and summarizing the experiences of the district courts operating under these specified time limits.

In this sixth and final report on the implementation of Title I, data are presented for all U.S. District Courts on the current status of criminal dockets; compliance with statutory time intervals; the incidence of and reasons for delay; detention prior to plea, dismissal, or trial; cases disposed of by plea or trial; and the impact of Title I on court costs, juror utilization, variation in the proportion of indictments and criminal trials, conviction rates, and civil caseload. The first appendix contains statistical data for each of the four prosecutorial stages on the incidence of and reasons for excludable delay, and time data for defendants disposed of in each of the U.S. District Courts. Additional appendices include the Speedy Trial Act as amended Aug. 2, 1980 and a report by ABT Associates, Inc. on the impact of the Speedy Trial Act on civil cases in U.S. Courts.

Administrative Office of the United States Courts. "Summary of the Report of the Judicial Conference Committee to Implement the Criminal Justice Act." Administrative Office of the United States Courts, Washington, D.C., 1981. (Mimeographed.)

Contents:
9 pages, 25 tables, 5 figures, 12 appendices
Dates of data presented:
Primary period: fiscal years 1978 and 1979
Trend tables: fiscal years 1976-79, 1980-82 (estimated)
Periodicity:
Annual
SOURCEBOOK tables:
Fig. 1.5, 1.24

The Federal Criminal Justice Act of 1964 authorizes the establishment of Federal public defender offices and community defender organizations to provide counsel for indigent Federal defendants. Under this Act, defendants may also receive public subsidies to defray the costs of necessary investigative or other services that they may be unable to afford. This summary report includes narrative and tabular data on budget requests; case assignments and distribution of Criminal Justice Act funds among private attorneys, Federal public defenders, and community defender organizations; the appointment of counsel for indigent Federal defendants; the cost of representation by private attorneys; and payments for transcripts, investigative, expert, and other services. The appendices present summary data on caseloads and average hours in court per case for community and Federal public defenders. Detailed reports prepared by each reporting organization present jurisdictional data on cases opened, closed, and pending; dispositions of cases represented by Federal public defenders and community defenders; the number of persons represented by private attorneys in Federal courts; payments to private attorneys, by type of case; and other services rendered by Federal public defenders and community defenders.

American Correctional Association. **Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Paroling Authorities**. College Park, Md.: American Correctional Association, 1981.

Contents:
391 pages, 12 tables, 2 figures
Dates of data presented:
1980
Periodicity:
Annual
SOURCEBOOK tables:
1.77, 6.43, 6.44

This directory describes the organization and administrative structure of correctional services in all 50 States, the District of Columbia, the Federal Bureau of Prisons, and the U.S. territories. For each jurisdiction, information is provided on institutions, parole boards, and parole and probation services for both adults and juveniles. Descriptive listings and addresses of the individual facilities within each jurisdiction are also provided.

Summary statistics are provided on personnel, fiscal expenditures, correctional populations, paroling authorities, types of facilities, and the death penalty. In addition, information is provided on the U.S. Department of Justice, military correctional facilities, and the Canadian correctional system. Jails and county departments of corrections are not included in this report.

★ ★ ★

American Humane Association. **Annual Statistical Report: National Analysis of Official Child Neglect and Abuse Reporting, 1979**. Denver, Colo.: American Humane Association, 1980.

Contents:
106 pages, 38 tables, 3 appendices
Dates of data presented:
Primary period: 1979

Trend tables: 1976-79
Periodicity:
Annual
SOURCEBOOK tables:
3.38, Fig. 3.14, Fig. 3.15

The National Study on Child Neglect and Abuse Reporting of the American Humane Association systematically examines the reporting of child maltreatment in order to be able to describe the national status of the maltreatment problem as well as to assist in the improvement of State child protection information systems. This report presents an overview of national reporting statistics as well as a descriptive analysis of the child abuse and neglect data that were documented nationwide during 1979. Data are presented on demographic characteristics of families, perpetrators, and victim children; types and severity of maltreatment; relationships between perpetrators and victim children; stress factors associated with neglect and abuse; and services provided or arranged for by child protective service agencies. The appendices contain definitions of survey terminology, and survey methodology.

Berkson, Larry C.; Beller, Scott; and Grimaldi, Michele. **Judicial Selection in the United States: A Compendium of Provisions**. Chicago: American Judicature Society, 1980.

Contents:
181 pages, 12 tables
Dates of data presented:
1980
Periodicity:
Special
SOURCEBOOK tables:
1.40-1.44

This document describes the methods by which judges are selected in the 50 States and the District of Columbia. The book begins with a historical review of judicial selection in the United States. It then provides a discussion of trends in selection procedures at the State level, and contemporary changes in the processes of selecting Federal judges. A survey of State statutes collected data for 1980. Data are presented on the selection and retention process for State supreme court justices; intermediate appellate judges; and general, limited, and special jurisdiction trial court judges. Current provisions for selecting judges through commission plans, partisan elections, and nonpartisan elections are also presented in tabular fashion. The book concludes with a State-by-State presentation of relevant statutory citations and their texts.

Carlson, Kenneth. **American Prisons and Jails, Volume II: Population Trends and Projections**. U.S. Department of Justice. National Institute of Justice. Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:

192 pages, 16 tables, 17 figures, 5 appendices

Dates of data presented:

Primary period: 1978

Trend tables: 1930-78 (actual), 1979-83 (projected)

Periodicity:

Special

SOURCEBOOK tables:

6.28, 6.29, 6.33

The Crime Control Act of 1976 required the National Institute of Law Enforcement and Criminal Justice to conduct a national survey of existing correctional facilities with the purpose of assessing future correctional needs and the adequacy of existing programs to meet these needs. This report represents the second of five reports that have been developed in response to this Congressional mandate. The complete five volume series examines the status of American correctional facilities from the following perspectives: summary findings and policy implications, population trends and projections, conditions and costs of confinement, legislation governing sentencing and release, and pre-release facilities.

This second report analyzes the size of prison populations. Data on prison population trends from 1930 to 1978 are presented. From 1930 to 1977, these data were derived from secondary sources. For 1978, data from a survey conducted as part of this study were used. From these trend data, population projections on both State and national levels are made for each year from 1979 to 1983. Several projection techniques, each requiring different assumptions, were used and the various results are presented to allow for comparisons. The appendices include data on prison and jail population movements, State-by-State projection results, and additional methodological information.

Central Intelligence Agency. National Foreign Assessment Center. **Patterns of International Terrorism: 1980.** Washington, D.C.: Central Intelligence Agency, 1981.

Contents:

22 pages, 8 tables, 8 figures, 3 appendices

Dates of data presented:

1968-80

Periodicity:

Annual

SOURCEBOOK tables:

3.93-3.95

The text of this report identifies significant trends in 1980 in terrorist activities, analyses of events causing casualties, and a review of state-sponsored and right-wing international terrorism. The immediate outlook for terrorist activity is evaluated based on these trends. The tables and figures reflect an overview of terroristic activity during the period 1968-80 and present data on the numbers, types, and geographic distribution of all international terrorist incidents, with special attention given to those directed against U.S. citizens and property; deaths and injuries due to terrorist attacks; and nationalities of victims. Appendix A describes the activities of major terrorist groups in 1980. Appendix B reports on international efforts to curb terrorism that took place in 1980. Appendix C provides additional statistical data in the form of tables and figures that are not used in the main text.

SOURCEBOOK tables:

Fig. 1.10, 6.45-6.47, Fig. 6.9

The Crime Control Act of 1976 required the National Institute of Law Enforcement and Criminal Justice to conduct a national survey of existing correctional facilities with the purpose of assessing future correctional needs and the adequacy of existent programs to meet these needs. This report represents the fifth of five reports, prepared by Abt Associates, Inc. under contract to the National Institute of Justice, which have been developed in response to this Congressional mandate. The complete five volume series examines the status of American correctional facilities from the following perspectives: summary findings and policy implications, population trends and projections, conditions and costs of confinement, legislation governing sentencing and release, and pre-release facilities.

This fifth report discusses the physical conditions, staffing, and costs of adult pre-release facilities as reported on Mar. 31, 1978. Data are presented on selected facility characteristics, including regional distribution, operational authority, year of establishment, number and type of residential units, population density, staffing, operating expenses; and on selected resident characteristics, including age, race, sex, legal status, type of crime committed, average length of stay, and reasons for leaving facility. The appendices include a copy of the survey instrument and a listing of the facilities surveyed.

This report is the sixth in a series of reports on the extent of drug abuse in the United States. The document presents information on the prevalence, incidence, and correlates of drug use and abuse among adults (26 and older), young adults (18 to 25), and youth (12 to 17). Data are presented in such areas as the use of 11 types of drugs; the medical and nonmedical use of prescription psychotherapeutic drugs; the use of cigarettes, alcohol, tea, and coffee; the perceived consequences of drug use; and other beliefs and attitudes related to drugs. Trend tables present comparison data from earlier reports. The appendices include a description of the sampling techniques used, attitudes toward and familiarity with various substances, and copies of questionnaires and exhibits.

The Gallup Opinion Index contains the results of opinion surveys conducted by the Gallup Poll. Political, social, and economic trends are presented in issues that include many topics (e.g., June 1980—equal rights amendments, abortion, race relations, and the draft). A brief note on sample size, sampling tolerance, and survey dates is included in each issue.

Dates of data presented:

1963-80

Periodicity:

Special

SOURCEBOOK tables:

1.33, 1.34

This article reports the results of research into the backgrounds of appointees for judgeships to Federal district and appeals courts. Background characteristics of those appointed during Carter's presidency are compared with those of appointees made by Presidents Johnson, Nixon, and Ford. Distinctions between Carter's appointees and those appointed by his predecessors are highlighted. The impact of changes in the judicial selection process, primarily the result of the creation and use of merit-type nominating commissions, is also discussed.

Hoelzel, William E. "A Survey of 27 Victim Compensation Programs." **Judicature** 63 (May 1980), pp. 485-496.

Contents:

12 pages, 2 tables

Dates of data presented:

1980

Periodicity:
Special
SOURCEBOOK table:
1.86

This survey was intended to update a 1978 survey published in Deborah M. Carrow, *Crime Victim Compensation: Program Model*, U.S. Department of Justice, National Institute of Justice (Washington, D.C.: U.S. Government Printing Office, 1980). This survey, which is current as of Apr. 1, 1980, was conducted through an analysis of statutory provisions for each State.

Data are presented on the organization of victim compensation programs, the year the program was enacted, administrative placement of the program, 1979 budget, and sources of revenue. Data are also presented on the operation of victim compensation programs, including the various types of awards and their amounts as well as eligibility requirements. Finally, a directory of victim compensation programs is listed.

SOURCEBOOK tables:
1.82, 1.83

This document provides a summary of States' provisions governing waiver procedures. Information on both transfer from juvenile court and to juvenile court is reviewed. The data were compiled through a survey of statutes and courts' rules of the 50 States and the District of Columbia. The survey was conducted by the National Center for Juvenile Justice, the Research Division of the National Council of Juvenile and Family Court Judges, under a grant from the Office of Juvenile Justice and Delinquency Prevention. The information is current as of 1979 (23 States), 1980 (27 States), and 1981 (1 State); it covers provisions such as the ages at which transfer is allowed, restrictions on who may be waived—due to crime type, mental illness, or retardation, the rights provided at hearings on transfer, and criteria for waiver decisions.

This yearbook provides basic data on the property and liability segment of the insurance industry in the United States. Statistical data are presented on property and liability insurance companies; policies written and in force, by type of coverage; and insurance written through special programs such as flood insurance, the Federal Crime Insurance Program, and others. Data are presented on insurance losses due to fire, natural disasters, traffic accidents, crime, and other causes.

SOURCEBOOK tables:
2.52-2.54, 3.42-3.44, Fig. 3.16, 3.45

This document is the fourth in an annual series reporting drug use and related attitudes of high school seniors in the United States. The report presents only highlights of the larger volume, which is to be published by the National Institute on Drug Abuse in 1981, under the title, *Student Drug Use in America: 1975-1980*. Two of the major topics treated in the report are the current prevalence of drug use (during lifetime, last 12 months, last 30 days) among American high school seniors and trends in drug use since 1975. Also reported are data on school grade at first use; intensity of "high" produced by drug use; attitudes and beliefs among seniors about various types of drug use; and their perceptions of certain relevant aspects of the social environment, such as parental disapproval of drug use or availability of drugs.

King, Jane L. *A Comparative Analysis of Juvenile Codes*. U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:
90 pages, 12 tables, 2 appendices
Dates of data presented:
1979
Periodicity:
See below
SOURCEBOOK table:
1.81

This document presents data collected through a statutory survey of juvenile codes in the 50 States, the District of Columbia, and the 5 U.S. territories. The report updates an earlier survey by Mark A. Levin and Rosemary Sarri entitled *Juvenile Delinquency: A Comparative Analysis of Legal Codes in the United States*, National Assessment of Juvenile Corrections (Ann Arbor, Mich.: The University of Michigan, 1974). Statutory updates of the survey are to be published annually henceforth. Statutory data are presented in 10 areas: (1) juvenile court structure, (2) waiver to the adult criminal court, (3) maximum age of juvenile court jurisdiction, (4) types of juveniles within the court's jurisdiction, (5) the custody process, (6) place of detention, (7) time and petition requirements, (8) dispositions, (9) statutory references to the Interstate Compact on Juveniles, and (10) information on inspection provisions for juvenile facilities. The latter two areas are covered in the appendices. The data are presented by jurisdiction.

Lowell, Harvey D.; McNabb, Margaret; and DeMarco, Anthony J. *Sentenced Prisoners Under 18 Years of Age in Adult Correctional Facilities: A National Survey*. Washington, D.C.: National Center on Institutions and Alternatives, 1980.

Contents:
55 pages, 16 tables, 11 figures, 9 appendices
Dates of data presented:
Jan. 1 and Aug. 1, 1979
Periodicity:
Special
SOURCEBOOK tables:
6.12, 6.13

This document presents the result of a survey conducted by the National Center on Institutions and Alternatives under a grant from the National Institute of Corrections. The mail questionnaire and telephone survey were developed to gather information about sentenced prisoners under 18 years of age in adult correctional facilities. The report presents data on this topic for the two groups surveyed: (1) State and Federal correctional facilities, and (2) local or county jails. The data for county jails are based on a much smaller survey and are presented primarily as projected figures for sentenced prisoners under 18 years of age at the local level. Tables display information on the number of sentenced prisoners under 18 years

of age by age, sex, type of offense, region, and jurisdiction. Survey instruments are included in the appendices.

SOURCEBOOK table:
1.74

The Crime Control Act of 1976 required the National Institute of Law Enforcement and Criminal Justice to conduct a national survey of existing correctional facilities with the purpose of assessing future correctional needs and the adequacy of existent programs to meet these needs. This report represents the first of five reports, prepared by Abt Associates, Inc. under contract to the National Institute of Justice, which have been developed in response to this Congressional mandate. The complete five volume series examines the status of American correctional facilities from the following perspectives: summary findings and policy implications, population trends and projections, conditions and costs of confinement, legislation governing sentencing and release, and pre-release facilities.

In this initial report, the major findings of the study are summarized and the implications of these findings for the development of correctional policy are discussed. The appendices present data on prison and jail populations and incarceration rates; distribution of inmates in Federal and State facilities, by selected institutional and demographic characteristics; and cell occupancy and overcrowding.

SOURCEBOOK tables:
1.62, 1.69-1.72, 1.76, 6.30-6.32

The Crime Control Act of 1976 required the National Institute of Law Enforcement and Criminal Justice to conduct a national survey of existing correctional facilities and to assess future correctional needs and the adequacy of existent programs to meet these needs. This report represents the third of five reports prepared by Abt Associates, Inc. under contract to the National Institute of Justice, which have been developed in response to this Congressional mandate. The complete five volume series examines the status of American correctional facilities from the following perspectives: summary findings and policy implications, population trends and projections, conditions and costs of confinement, legislation governing sentencing and release, and pre-release facilities.

This third report discusses the conditions and costs of confinement. The data presented are directed toward an examination of prison and jail crowding, staffing, operating costs, and capital costs. The five appendices present the survey instruments, detailed State data describing adult correctional facilities and inmates, site visit data from 52 sites, and correctional cost estimation procedures.

National Council on Crime and Delinquency. *Uniform Parole Reports. Parole in the United States: 1979*. San Francisco: National Council on Crime and Delinquency, Research Center West, 1980.

Contents:
48 pages, 13 tables, 24 figures, 4 appendices
Dates of data presented:
Primary period: 1979
Trend tables: 1974-79
Periodicity:
Annual
SOURCEBOOK tables:

1.48, 1.49, 6.49-6.51, Fig. 6.10, Fig. 6.11, Fig. 6.12

This report, the third in the annual *Parole in the United States* publication series, presents summary statistics on various dimensions of adult parole in the United States. Findings from the aggregate parole data survey conducted in 1980 by the Uniform Parole Reports Program (UPR) are included, as well as historical and contextual parole data on State, regional, and national levels. The report has five major sections. The first is the introduction; it deals with the purpose, organization, data sources, and definitions of terms used in the report. The second section presents data on the conditional release population: parole and mandatory release yearend populations, population movement, and outcome. The next section discusses paroling authority characteristics and trends toward determinate sentencing and parole guidelines. The fourth section provides a context within which to discuss parole and mandatory release populations in comparison to crime rates, and prison and jail populations. The final section presents trend data for conditional release populations. The appendices contain explanatory notes pertaining to special features of each table and of data collection procedures in each jurisdiction. A brief listing of references concludes the report.

National Opinion Research Center. **General Social Surveys, 1972-1980.** Storrs, Conn.: Roper Public Opinion Research Center, University of Connecticut, distributors.

Contents:
See narrative
Dates of data presented:
1972-78 and 1980
Periodicity:
Biennial
SOURCEBOOK tables:
2.30, Fig. 2.10, 2.32, 2.33, Fig. 2.11, 2.36, 2.42, 2.55, 2.57, 2.58, 3.41, 4.19

This cumulative data file merges all eight General Social Surveys into a single machine readable data file with each survey year as a subfile. Interviews were conducted by the National Opinion Research Center during February, March, and April of 1972-78, and 1980. The data are derived from a national probability sample of English-speaking adults, 18 years or older, living in non-institutional arrangements in the continental United States. Survey questions relate to a variety of social issues, including politics, abortion, religion, homosexuality, crime, law enforcement, guns, and capital punishment.

The items appearing on the surveys are one of three types: permanent questions that occur in each survey, rotating questions that appear two out of every three years, and a few questions that occur in a single survey. A comprehensive codebook entitled *General Social Surveys, 1972-1980: Cumulative Codebook* is published by the National Opinion Research Center (James A. Davis, Principal Investigator; Thomas W. Smith, Senior Study Director). Survey methodology and the data program are explained in detail in the document.

Otero, Rafael F.; McNally, Donna; and Powitzky, Robert. "Mental Health Services in Adult Correctional Systems." **Corrections Today** 43 (January/February 1981), pp. 8-10, 12, 14, 18.

Contents:
6 pages, 2 tables
Dates of data presented:
1980
Periodicity:
Special
SOURCEBOOK table:
1.75

This article discusses the results of a survey of mental health staff and services in adult correctional systems. The mail questionnaire was sent to the central offices of all correctional systems in the 50 States, Guam, Puerto Rico, the Canal Zone, the Federal system, the Armed Forces, and Canadian regional and Federal correctional systems. The questionnaire had two sections; one asked for basic information on the characteristics of mental health staff and services in the correctional setting and the other addressed the roles and work priorities of the mental health staff and its place in the organizational structure of the correctional system. Data from the first part of the survey are presented by jurisdiction; data from the second part focus on the actual (and ideal) time spent on various mental health tasks (e.g., staff training, crisis intervention) and are presented in summary form.

Parisi, Nicolette. "Part-time Imprisonment: The Legal and Practical Issues of Periodic Confinement." **Judicature** 63 (March 1980), pp. 385-395.

Contents:
11 pages, 1 table
Dates of data presented:
1979
Periodicity:
Special
SOURCEBOOK table:
1.87

Periodic confinement, variously known as intermittent, weekend, or part-time confinement, is a sentencing alternative by which the offender can maintain community ties. Statutory authorization of this disposition in 30 States has given rise to numerous questions concerning the legal and practical utility of this sentence. This article addresses these issues, focusing on the authorization and use of periodic confinement statutes and comparing the structure of this sentencing alternative with the structure of work release provisions. Data are presented on relevant statutory citations; stated legislative purposes; time periods, referring to length of each interval of confinement and/or maximum duration of sentence; specified places of detention; eligibility requirements; and consequences, if any, of failure to appear.

Smith, Daniel D.; Finnegan, Terrence; Snyder, Howard N.; Feinberg, Norma G.; and McFall, Patricia. **Delinquency 1978: United States Estimates of Cases Processed by Courts with Juvenile Jurisdiction.** Pittsburgh, Pa.: National Center for Juvenile Justice, 1981.

Contents:
157 pages, 125 tables, 21 figures, 1 appendix
Dates of data presented:
1978
Periodicity:
Annual
SOURCEBOOK tables:
5.1-5.8

This report presents 1978 national estimates of delinquency cases disposed of by courts with juvenile jurisdiction. Annual reports since 1975 have presented more comprehensive data than in reports of previous years. Analysis of the data is generally by demographic characteristics of the juvenile offender and legal characteristics of the case (e.g., age, race, sex, source of referral, detention status). Bivariate relationships among these variables are also presented. All data are presented in aggregate form only. The appendix is a glossary of terms used in the data research effort.

Periodicity:
Special
SOURCEBOOK table:
1.84

This report is one in a series assessing State compliance with the mandates of the Juvenile Justice and Delinquency Prevention Act (JJDP) of 1974. The JJDP mandated the deinstitutionalization of status offenders and nonoffenders from secure juvenile or adult detention and correctional facilities. The document discusses legislation in this area prior to the 1974 Act and contrasts it with current State statutes. States' provisions relating to deinstitutionalization were compiled using legislative documents and their recent supplements, which in most cases included the 1979 statutory amendments and, for 10 States, included the 1980 revisions. The text of appropriate statutes is presented for each State as well as a summary chart.

This report examines the laws of the 50 States as they relate to the placement of juveniles in adult correctional facilities. The Juvenile Justice and Delinquency Prevention Act of 1974 mandated the separation of juveniles and adults in adult correctional facilities. The document discusses the objectives of the 1974 Act, the progress in the detention area since 1974, and the status of current State efforts to comply with mandates of the Act. The text of State statutes are presented, as is a chart summarizing the legislation. The data were collected from the most recent legislative supplements available, which in most cases included 1979 statutory amendments; legislative changes enacted in 1980 are presented for 10 States.

U.S. Department of Health, Education, and Welfare. National Institute on Drug Abuse. **Executive Report, April 1979, Data from the National Drug and Alcoholism Treatment Utilization Survey (NDATUS)**. Statistical Series F, No. 7. Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:
20 pages, 8 tables, 2 appendices
Dates of data presented:
Primary period: 1979
Trend tables: 1978-79
Periodicity:
Annual
SOURCEBOOK table:
1.61

This report presents highlights of the National Drug and Alcoholism Treatment Utilization Survey (NDATUS). This is the first year that information on alcoholism treatment units is included in the survey, reflecting the joint efforts of the National Institute on Drug Abuse (NIDA) and National Institute on Alcohol Abuse and Alcoholism (NIAAA). The NDATUS is conducted as a point prevalence survey, i.e., the data reflect information applicable to a particular date—in this case, Apr. 30, 1979. The data include information on funding sources and annual funding for drug abuse and alcoholism treatment units, types of treatment modalities and environments (e.g., detoxification vs. drug-free, residential vs. day care), number of treatment units, budgeted capacity, and number of paid and volunteer employees. Appendix A displays the survey instrument; Appendix B is a glossary of terms.

U.S. Department of Health and Human Services. National Institute on Alcohol Abuse and Alcoholism. **State Alcoholism Profile Information System (SAPIS)—National Status Report**. Rockville, Md.: U.S. Department of Health and Human Services, 1980.

Contents:
137 pages, 41 tables
Dates of data presented:
1980
Periodicity:
Annual
SOURCEBOOK table:
4.18

This document presents material from the State Alcoholism Profile Information System (SAPIS), a data gathering service designed to provide information on the impact of the National Institute on Alcohol Abuse and Alcoholism and formula grants on State alcoholism programs. The statistics are derived from a variety of national sources and from self-reported

data solicited from the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands. The report presents data on alcoholism funding sources and the distribution of those funds by program area, funding sector, and amount of appropriation; the numbers and types of alcoholism and intervention programs; the populations served and the total admissions to such programs; certifying and accrediting information; State policies and regulations on alcohol usage and health insurance coverage for alcoholism; selected indicators of alcohol use or abuse; and other alcohol-related subjects.

U.S. Department of Health and Human Services. National Institute on Drug Abuse. **Annual Data 1979, Data from the Client Oriented Data Acquisition Process (CODAP)**. Statistical Series E, No. 17. Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:
400 pages, 362 tables, 3 appendices
Dates of data presented:
1979
Periodicity:
Annual
SOURCEBOOK tables:
6.4, 6.5, 6.7

This report presents data collected by the National Institute on Drug Abuse (NIDA) on clients admitted to or discharged from federally-funded drug abuse treatment centers during 1979, using the Client Oriented Data Acquisition Process (CODAP) system. The content of this report focuses on displaying pertinent relationships among variables, including the race, sex, age, marital status, employment status, education, and frequency of drug abuse. Detailed analysis is presented for the demographic variables according to the particular type of drug abused. For example, one section presents tables on the clients who were admitted because of heroin problems; ten similar sections report on clients who abused other opiates, alcohol, marijuana, barbiturates, tranquilizers, other sedatives, amphetamines, cocaine, hallucinogens, and PCP. The first appendix presents examples of CODAP forms; the second is a glossary of terms; and the third presents an overview of CODAP data for 1979 from drug abuse treatment programs funded by NIDA.

U.S. Department of Health and Human Services. National Institute on Drug Abuse. **Women in Drug Abuse Treatment 1979, Topical Data from the Client Oriented Data Acquisition Process (CODAP)**. Statistical Series C, No. 1. Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:
203 pages, 161 tables, 15 figures
Dates of data presented:
Primary period: 1979
Trend tables: 1976-79
Periodicity:
Special
SOURCEBOOK table:
6.7

This document is the first in the topical series of reports on drug users admitted to federally-funded drug abuse treatment programs. The data presented are collected by the National Institute on Drug Abuse (NIDA) using the Client Oriented Data Acquisition Process (CODAP). Other data collected through the CODAP system by NIDA are published annually. This report focuses on the special population of female drug users admitted to drug abuse treatment programs, but also presents comparison data for males. Detailed analysis is presented for demographic variables such as age, race, marital status, employment status, education, and prior drug treatment history. The data are presented for all clients and for subgroups of clients, according to the primary type of drug abused at admission to treatment.

U.S. Department of Health and Human Services. Public Health Service. **Vital Statistics of the United States, 1978. Volume II—Mortality**

Part B. Washington, D.C.: U.S. Government Printing Office, 1982.

Contents:
711 pages, 21 tables
Dates of data presented:
1978
Periodicity:
Annual
SOURCEBOOK table:
3.60

Volume II of the *Vital Statistics of the United States* pertains to mortality and is divided into two parts. Part A is comprised of sections 1 through 6 that deal with the topics of general mortality, infant mortality, fetal mortality, accident mortality, life tables, and a technical appendix discussing the factors affecting the collection, classification, and interpretation of the mortality statistics.

Part B is comprised of sections 7 and 8. Section 7 contains the geographic detail for mortality. Included in this section are total number of deaths, deaths from selected causes, infant deaths, neo-natal deaths, fetal deaths, and selected rates and ratios. Tabulations are shown by each State and county, specified urban areas, metropolitan and nonmetropolitan counties, population-size groups, and Standard Metropolitan Statistical Areas.

Section 8 contains data on Guam, Puerto Rico, and the Virgin Islands. The trend of the crude death rate is given and frequency tabulations for most of the characteristics shown in other sections of Volume II are also included.

This report, one of the National Prisoner Statistics series, provides information on persons under sentence of death in calendar year 1979, persons removed from death row, executions carried out during the period 1930-79, and recent trends in the evolution of capital punishment legislation. Information on offenders includes age, race, sex, offense for which sentenced, marital status, level of educational attainment, and legal status at time of arrest. Data on persons removed from death row refer to the various alternative dispositions that are available. The appendices present tabular data, a copy of the survey instrument, a discussion of the survey methodology, and a jurisdictional listing of the status of death penalty statutes, as of Dec. 31, 1979.

U.S. Department of Justice. Bureau of Justice Statistics. **Justice Agencies in the United States, Summary Report 1980**. Washington, D.C.: U.S. Department of Justice, 1980.

Contents:
71 pages, 53 tables, 2 appendices
Dates of data presented:
See narrative
Periodicity:
Irregular
SOURCEBOOK tables:
1.1, 1.2, 1.18, 1.26

This report presents information on the number and types of agencies currently listed as criminal and civil justice agencies in the United States. Justice agencies are categorized as law enforcement agencies, prosecution and civil attorney agencies, public defender agencies, courts and related agencies, probation and parole agencies, and correctional facilities and related agencies. Narrative information is presented for State, local,

Federal, and Indian tribal agencies and is summarized in tables. Detailed data are included in an appendix.

The National Justice Agency List is a master name and address file of these agencies and it is continuously maintained and updated by the U.S. Bureau of the Census for the Bureau of Justice Statistics. The List was first compiled in 1970; a summary report presenting the number of justice agencies was published in 1971, followed by separate reports for each State presenting the names and addresses of the individual agencies. In 1975, the updated names and addresses of the agencies were published, along with descriptions and counts. This report reflects revisions obtained through the 1977 Directory Survey, other censuses, and other surveys conducted between 1975 and 1979. Although this report does not contain names and addresses of individual agencies, information on how they can be obtained is provided.

SOURCEBOOK tables:

3.1, 3.2, Fig. 3.1, Fig. 3.2, 3.3-3.7, Fig. 3.3-Fig. 3.10, 3.8, Fig. 3.11, 3.9, Fig. 3.12, 3.10, Fig. 3.13, 3.11-3.32

The National Crime Survey program, sponsored by the Bureau of Justice Statistics (BJS), was begun in 1972, after a period of development and pretesting. Using probability samples of households, the U.S. Bureau of the Census, which conducts the survey for BJS, interviewed household members aged 12 and older about their experiences as victims of common crimes such as assault, robbery, rape, personal and household larceny, burglary, and vehicle theft. Probability samples of businesses were also drawn, and persons knowledgeable about the affairs of the business were interviewed about robberies or burglaries suffered by the business. Data obtained from the interviews of both household members and business personnel are used to estimate the extent and nature of criminal victimization of persons, households, and businesses.

Further information about the survey design, methodology, and estimation procedures is available in Appendix 10 of the SOURCEBOOK and in the sources cited in Appendix 10. Most of the tables in the SOURCEBOOK that present data from the National Crime Survey were compiled from machine-readable data provided to the SOURCEBOOK staff by the Bureau of Justice Statistics of the U.S. Department of Justice (formerly the National Criminal Justice Information and Statistics Service of LEAA). Other tables are from published BJS reports. Tables are included that show (1) estimated nationwide number of personal, household, and business victimizations, by various characteristics of victims and events; (2) estimated nationwide rates of personal victimization, by age, sex, race, and family income; (3) estimated nationwide rates of household victimization, by household characteristics; and (4) changes in estimated nationwide rates of personal and household victimization during the years 1973 through 1979. Additional NCS victimization survey data are published in a number of BJS reports.

SOURCEBOOK table:

3.35

This special report presents trends in the percent of "households touched by crime" for each of the years 1975 to 1980 using data from the

National Crime Survey. "Households touched by crime" is a new statistical indicator that measures the number of households that were victims of burglary or theft, or in which individual household members were victims of a crime of violence or theft during the year.

The trend data are presented primarily in graphic form allowing comparisons across types of crime, and by race. Preliminary estimates of 1980 victimizations are also presented by race of the head of household, family income, and location of the household (rural, suburban, or urban).

Dates of data presented:

1978

Periodicity:

Special

SOURCEBOOK tables:

6.15-6.20, Fig. 6.3-Fig. 6.5

The 1978 Survey of Inmates of Local Jails has collected extensive information on the demographic and socioeconomic background, criminal history, and adjudication experience of a representative sample of jail inmates. All data were provided by inmates who participated in personal interviews on a voluntary basis. Unlike earlier survey procedures, the sample was designed to assure a level of statistical reliability for data on female inmates that is generally comparable to that for data on male inmates.

This report is an overview of the demographic and socioeconomic characteristics of inmates held in local jails. These characteristics include age, sex, race, marital status, education, military experience, and employment. Basic findings concerning the use of drugs and alcohol are also presented.

Appendix I includes the data tables that were generated. Appendix II contains a copy of the interview questionnaire. Appendix III includes technical notes and definitions and Appendix IV contains information on the survey methodology.

SOURCEBOOK tables:

1.19-1.21, Fig. 1.4, 3.54, Fig. 3.19, 3.55, 3.56, Fig. 3.20, Fig. 3.21, 3.57, 3.58, 3.61-3.76, 3.78, 3.81, 3.84, 3.85, Fig. 3.23, 4.1-4.4, Fig. 4.1, Fig. 4.2, Fig. 4.3, 4.5, Fig. 4.4, Fig. 4.5, 4.6, 4.7, Fig. 4.6, Fig. 4.7, 4.8-4.13, Fig. 4.8, 4.14, Fig. 4.9, 4.15, Fig. 4.10, 4.16, 4.17, Fig. 4.11, Fig. 4.12, 4.20, Fig. 4.13, 4.22

This report begins with a summary of the Uniform Crime Reporting Program. Each Index offense (murder and nonnegligent manslaughter, aggravated assault, forcible rape, robbery, burglary, larceny-theft, motor vehicle theft, and arson) is described individually in terms of the volume and trend of offenses known to police, the nature of the offense (e.g., type of weapon used, regional distribution, or target of the offense), clearances of the offense, and persons arrested and charged. Data on Index offenses cleared by arrest are then presented, followed by information on persons arrested and persons charged. The last section of the report focuses on law enforcement personnel.

Data are presented on offenses known to police, by State, region, size of place, and extent of urbanization. Clearance and arrest information are presented for the United States as a whole (estimated), cities, suburban areas, and rural areas. Disposition data are based on a limited number of reporting agencies and are presented by offense, except for juveniles taken into custody. The law enforcement personnel information includes data on (1) number of employees, (2) law enforcement officers assaulted, and (3) law enforcement officers killed. A profile of the officers killed and persons identified as killing law enforcement officers is presented.

The 1979 report includes four appendices. The first appendix describes the data base and construction of each of the major tables in the report. Definitions of the offenses are presented in the second appendix. In the third appendix there are definitions of population categories used throughout the report. The final appendix includes graphic presentations of

quarterly crime data for the 10 year period, 1970-79, and examines basic crime trends.

U.S. Department of the Treasury. Bureau of Alcohol, Tobacco and Firearms. **Explosives Incidents, 1979 Annual Report**. Washington, D.C.: U.S. Government Printing Office, 1980.

Contents:

53 pages, 27 tables, 6 figures

Dates of data presented:

Primary period: 1979

Trend tables: 1978 and 1979

Periodicity:

Annual

SOURCEBOOK tables:

3.90-3.92

This report provides tables and figures, as well as narrative descriptions on criminal bombings and other explosives incidents that were reported to, and investigated by, the Bureau of Alcohol, Tobacco and Firearms. This, however, does not necessarily include all the bombings and explosives incidents that may have occurred in the United States during these years.

The report is divided into four sections. The first section analyzes the bombing incidents. Data are presented on the characteristics, targets, motives, victims, property damage, type of devices, geographic location, and peak occurrences of known bombings. The second section describes stolen and recovered explosives. Data are presented on the amount, geographic location, and peak occurrences of known incidents. The third section analyzes arson incidents investigated by the Bureau. Data are presented on injury, property damage, targets, motives, and types of fire accelerants. The final section provides descriptive narratives on selected explosives incidents for the reporting year.

Trend tables: fiscal years 1940-78

Periodicity:

Annual

SOURCEBOOK tables:

5.29, 5.30

This report details the activities of the Internal Revenue Service and presents data on a wide variety of subjects related to the income tax system. Data are reported on tax returns filed, revenue collections, auditing

of tax returns, tax penalties, tax fraud investigations, tax litigation, and criminal prosecutions for tax-related cases.

This document describes the activities of the U.S. Customs Service for fiscal year 1980. The report discusses the agency's role in collecting revenue from imports and enforcing customs and related laws. Data are presented in such areas as Customs' collections by region, district, and category; carriers and persons entering the United States; merchandise entries; and seizures of property, narcotics, and dangerous drugs for violation of laws enforced by the Customs Service.

Dates of data presented:

Primary period: 1980

Trend tables: 1976, 1978, and 1980

Periodicity:

Annual

SOURCEBOOK tables:

1.52-1.54, 1.63-1.65

This document reports the results of the eighth annual survey of State salaries. The survey, conducted by the Office of Personnel Management, is "designed to assist State governments with their employee compensation determinations." The report presents a listing of 104 job titles and salary ranges within 31 occupational categories. Job titles were chosen to reflect beginning, experienced or supervisory, and administrative or executive levels within each occupational category. The goal was to select those positions that are commonly used by State governments, employ relatively large numbers of persons, represent a new program or one of special significance for State administration, or have key importance as a basis for adjusting State pay plans.

Minimum and maximum salaries, on Aug. 1, 1980, are presented for job titles in each of the 50 States, the District of Columbia, and the Virgin Islands. The trend data presented are aggregated across States to create mean minimum and maximum job salaries for 1976, 1978, and 1980.

APPENDIX 1 Justice Agencies in the United States — Methodology and definitions of terms

NOTE: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Justice Agencies in the United States, Summary Report 1980 (Washington, D.C.: U.S. Department of Justice, 1980). Non-substantive editorial adaptations have been made.

Methodology

Historical Development

In January 1970 the U.S. Bureau of the Census conducted the original National Directory Survey of Criminal Justice Agencies for the Law Enforcement Assistance Administration (LEAA), National Criminal Justice Information and Statistics Service (NCJISS), now called the Bureau of Justice Statistics (BJS). Each county in the United States and each municipality and township with a 1960 population of 1,000 or more persons was surveyed to identify the names and addresses of the criminal justice agencies and institutions administered by their government. State-level government criminal justice agencies were compiled through inhouse research efforts. In addition to the mail canvass, inhouse research was also performed for the 54 counties with a 1960 population of 500,000 or more and for the 43 cities with a 1960 population of 300,000 or more. Inhouse research included reference to a variety of published government documents such as budget statements; organization manuals; and State, county, and municipal directories. In all, information was obtained for 18,000 independent governments and a total of 46,159 public agencies in the criminal justice system were identified. A final response rate of 100 percent was attained for all States and counties; 99 percent for cities with a 1960 population of 25,000 or more; and approximately 95 percent for cities and townships with a 1960 population of 1,000 or more.

Since the original survey, the Census Bureau has continued to maintain a master name and address file of justice agencies in the United States for the Bureau of Justice Statistics. Maintenance activities include updating and expanding the file (now referred to as the National Justice Agency List) through periodic censuses of individual sectors and special inhouse research projects. A chronological listing of the major maintenance activities since 1970 is provided below.

1971: The National Survey of Court Organization was conducted in late 1971 by the Census Bureau to expand and refine the listing of State and local court systems and their locations, and to obtain information on their legal jurisdiction. Information from the survey was incorporated into the National Justice Agency List.

1974: The Census Bureau prepared the agency name and address listings for publication in 10 regional volumes. In preparation for that publication and to improve the utility of the file, several changes were made to the content and format. The file was expanded to include agencies in units of government of less than 1,000 population and the format was standardized and expanded to include the name, county location, and population data.

1976: Federal and Indian tribal agencies were added to the file based on inhouse research. Information obtained from two sector censuses, the Directory Survey of Probation and Parole Agencies and the Directory Survey of Prosecution and Civil Attorney Agencies, was incorporated into the file. The descriptive data for each agency was expanded to include the agency's actual employment size, source of government funding, and agency caseload or inmate population. Another improvement was to list dependent jails separately from the law enforcement agencies (sheriffs and police departments) that administer them.

1977: The Bureau conducted the second Directory Survey which covered approximately 28,000 agencies. Excluded from the survey

were courts (to be covered in a separate survey by the National Center for State Courts), prosecution/civil attorneys and probation/parole agencies (covered in special sector censuses conducted in 1976). Included were law enforcement agencies, independent jails, public defender agencies, and "other" justice agencies. In addition to the information from the Directory Survey, data from the 1977 Census of Public Juvenile Detention, Correctional and Shelter Facilities were incorporated into the file.

1978: A National Census of Jails was conducted in February 1978 and the resulting information incorporated into the file. In addition to the specific large scale research and survey efforts outlined above, various periodic monitoring activities include: researching the LEAA State Criminal Justice Plans for changes in the justice system; updating the National Justice Agency List using various national and State directories, including the American Correctional Association Directory, United States Government Manual, the National Directory of Law Enforcement Administrators and Correctional Institutions, the Directory of Legal Aid and Defender Offices in the United States, and the annual reports of State court administrators and incorporating information obtained in the Annual Survey of Criminal Justice Expenditure and Employment.

Name, address, and data corrections are accumulated and the entire file is updated quarterly.

Coverage

The National Justice Agency List includes the name, address and selected data items for criminal and civil justice agencies defined below:

General and special law enforcement agencies having sworn personnel with general powers of arrest and medical examiners and coroners; criminal and civil courts; prosecutors and civil attorneys; *publicly administered* defender agencies; correctional agencies and facilities; probation and parole agencies; and "other" justice agencies, such as planning agencies, court administrators, judicial councils, training units, crime laboratories, and various boards and commissions with justice responsibilities.

The National Justice Agency List includes courts and public attorneys handling civil matters because many such agencies have mixed criminal/civil jurisdiction and cannot provide separate budget, manpower, and caseload data for their civil and criminal functions.

Branch offices in all sectors are listed separately on the National Justice Agency List. However, the tables in this publication only count the parent agency in the prosecution/civil attorney and public defender sectors since detailed characteristic information was only obtained for the parent agency. The descriptive data for each parent agency in these two sectors include information for branch offices. Branch offices in the remaining sectors are included on the List and counted as individual agencies in the tables.

Classification

Agencies on the National Justice Agency List are assigned to a level and type of government according to the criteria summarized below:

State—Agencies are assigned to the State level if they are administered by the State, if the agencies serve more than one county, or if the agencies are administered in districts not having the same boundaries as single counties, municipalities, or townships.

Counties—Agencies administered by the county or serving more than one local government within the county are assigned to the county government. Organized county governments are found throughout the Nation, except in Connecticut, Rhode Island, the District of Columbia, and limited portions of a number of other States. In Louisiana, the counties are officially designated as parishes; in Alaska, the boroughs resemble county governments in other States. Agencies serving consolidated city-county governments are included in the municipalities category of the tables in this report.

Municipalities—Agencies are assigned to the municipal level of government if they are administered by a municipality. This category includes all active governmental units officially designated as cities, villages, boroughs (except in Alaska) and towns (except in the six New England States, Minnesota, New York, and Wisconsin). This concept generally corresponds to the incorporated places category recognized in Census Bureau reporting of population and housing statistics. Any agencies in unincorporated places are not covered.

Tables displaying municipal data include 47 cities that are independent, being wholly outside any county area, and 15 others that operate wholly or in part as consolidated city-counties. In general, these cities are similar to large counties in the scope of their responsibilities; however, their population density makes them generally more similar to municipalities. The independent cities are: Anchorage, Alaska; Washington, D.C.; Columbus, Georgia; Baltimore, Maryland; St. Louis, Missouri; Carson City, Nevada; and the following cities in Virginia: Alexandria, Chesapeake, Hampton, Lynchburg, Newport News, Norfolk, Portsmouth, Richmond, Roanoke, Virginia Beach, and 31 others. The 15 consolidated city-county governments are: Juneau, Alaska; Sitka, Alaska; San Francisco, California; Denver, Colorado; Jacksonville, Florida; Honolulu, Hawaii; Indianapolis, Indiana; Lexington-Fayette, Kentucky; Baton Rouge, Louisiana; New Orleans, Louisiana; Boston, Massachusetts; Nantucket, Massachusetts; New York City, New York; Philadelphia, Pennsylvania; and Nashville-Davidson, Indiana.

Townships—This category includes governmental units located in 20 States. They are officially designated as towns in the six New England States, New York, and Wisconsin; plantations in Maine; locations in New Hampshire; and townships in other areas. In Minnesota, the terms town and township are used interchangeably with reference to township governments.

Townships vary widely in scope of governmental powers and operations. Most of them, particularly in the North Central States, perform only a very limited range of services for predominately rural areas. However, by general law in New England, New Jersey, Pennsylvania and to some degree in New York, Michigan, and Wisconsin, townships (or towns) are vested with relatively broad powers and, where they include closely settled territory, perform functions commonly associated with municipal governments.

Excluded from coverage are unorganized township areas, townships coextensive with cities where the city governments have absorbed the township functions, and townships known to have ceased to perform criminal justice functions.

Special Districts—Special districts make up the most varied area of local government. They are administratively and fiscally independent of any other unit of government and are usually established to perform a single function (e.g., fire protection, transportation, housing, recreation); however, some have been given authority by their enabling legislation to provide several kinds of services. Law enforcement agencies are the only justice agencies administered by special districts.

Independent School Districts—These are school districts that are administratively and fiscally independent of any other unit of government. As with special districts, law enforcement agencies (school and campus security) are the only justice agencies administered by independent school districts.

Regional Agencies—An agency serving more than one local government was generally assigned to the next highest level of government;

however, regional jails and juvenile correctional facilities are assigned to the largest governmental unit served.

Limitations of Data

The figures for most sectors in this report do not reflect changes that have taken place in the justice system since December 1977 and are therefore subject to revision. In addition, caution should be exercised in comparing one State with another because the temporality and comprehensiveness of data sources varies from State to State and for particular types of government within a State.

While agency counts will help describe the scope and diversity of the justice system, the size and range of activity of justice agencies may not always be reflected by simple counts. The organization complexity varies considerably from one governmental unit to another, even within a single State.

Definitions of terms

Agencies in the National Justice Agency List are grouped into six major justice sectors: 1) Law enforcement agencies; 2) prosecution and civil attorney agencies; 3) public defender agencies; 4) courts and related agencies; 5) probation and parole agencies; 6) correctional facilities and related agencies.

Working definitions and latest sources of information for each sector are as follows:

Law Enforcement Agencies

The agency listings in this sector reflect the results of the 1977 Directory Survey conducted by the Bureau of the Census for the LEAA, NCJISS (now called BJS). A law enforcement agency is generally defined as an agency responsible for maintaining public order and enforcing the law. Specifically, its activities include the prevention, detection, and investigation of crime and the apprehension of criminals. This sector includes five types of agencies: 1) general-purpose police forces of State and local government; 2) sheriffs; 3) special police forces of State and local government; 4) medical examiners and coroners; and 5) agencies that perform administrative and other services for the other four types of agencies.

General purpose police forces are those that primarily provide police protection including activities associated with enforcing the law, preserving the public peace, maintaining traffic safety, and apprehending accused violators of the law. Governments whose police services are provided under a contractual agreement with another government or private agency are not considered to have a police department. Also excluded are marshals and constables whose primary duty is the serving of warrants.

Special police forces include all identifiable and independently administered special police forces such as park rangers, harbor police, transit police, and campus security units. To be included, a special police force must have general law enforcement authority, that is, general power of arrest, even though it may be exercised in a limited geographic area. If the arrest power is limited to violations of specific, narrowly defined State laws (such as liquor laws or fish and game regulations) then the agency is not included. Specialized branches, divisions, or departments administered as part of a general purpose police force are not counted as separate special forces. Private security forces are also excluded.

Sheriffs provide police protection services within their county boundaries (excluding incorporated municipal and township jurisdictions having their own police forces); they perform judicial functions such as serving process papers and maintaining order in courtrooms; and they provide correctional services, operating jails and detention facilities. The functions performed by the sheriff vary greatly from State to State with most sheriff's departments being multifunctional agencies. Sheriffs are included regardless of the nature of their official duties:

Approximately 1,700 medical examiners and coroners are listed in the law enforcement sector, representing 9 percent of the total.

Other related agencies (2 percent of all law enforcement agencies) includes agencies that provide administrative and other services to police departments and to medical examiners and coroners. This includes such agencies as bureaus of identification and investigation, departments of public safety, criminal justice information centers, police training academies, police standards councils, forensic sciences laboratories, and police planning councils.

Prosecution and civil attorney agencies

The agency listings in this sector reflect the findings of the Directory Survey of Prosecution and Civil Attorney Agencies conducted by the Bureau of the Census in 1976 for the LEAA, NCJISS (now called BJS).

Included in this sector are State and local government agencies engaged in the prosecution of alleged criminal offenders and/or in providing civil legal services to the government. Civil legal activities are included because criminal and civil functions are often combined in one administrative unit in which budget, manpower, and caseload data are frequently not separable according to function. Legal services include legal representation of a government in civil matters in the courtroom as well as services short of courtroom representation, such as research and investigation, legal opinions, courtroom assistance, advice at council meetings and preparing contracts. Other related agencies included in this sector are prosecution coordinators, district attorneys associations, and organized crime commissions. Specifically excluded are strictly private law firms that perform legal services periodically for a government and are compensated by retainers and fees. In such instances, neither the firms nor the government consider the attorneys to be public officials. Although branch offices are shown separately on the National Justice Agency List, the tables count only the parent agency.

Public defender agencies

The agency listings in this sector reflect the results of the 1977 Directory Survey conducted by the Bureau of the Census for the LEAA, NCJISS (now called the BJS).

Three basic methods of providing indigent defense services are: 1) assigning private attorneys to represent indigents on a case by case basis; 2) contracting with a law firm or group of private attorneys to provide indigent defense services on a regular basis; or 3) creating a publicly funded defender system. These three methods can be used singly or in combination. Only the last type of program—publicly funded and staffed defender systems—is included in the National Justice Agency List. Although branch offices of public defender agencies are shown separately on the list, the tables count only the parent agency.

Courts and related agencies

The listings on this sector reflect the findings of the National Survey of Court Organization conducted by the Bureau of the Census in late 1971 for the LEAA, NCJISS (now called the BJS). The original list has been updated by two supplemental research efforts covering States with major reorganizations between 1971 and 1977.

A court is generally defined as an agency or unit of the judicial branch of government, authorized or established by statute or constitution, with one or more judicial officers, and having the authority to decide controversies in law and disputed matters of fact brought before it. Included in the tables are all State and local courts. Other related agencies included in this sector are court administrative offices, judicial councils, judicial nominating commissions, jury commissions, and law revision commissions. Specifically excluded are justices of the peace and similar magistrates whose compensation is solely on a direct fee basis. Also excluded are bank, tax and industrial review boards; and land courts.

Probation and parole agencies

The listings in this sector reflect the findings of the Directory Survey of Probation and Parole Agencies conducted by the Bureau of the Census in late 1976 for the LEAA, NCJISS (now called the BJS).

The principal functions of probation agencies are: 1) juvenile intake; 2) the supervision of adults or juveniles placed on probation status; and 3) the investigation of adults or juveniles for the purpose of preparing presentence or predisposition reports to assist the court in determining the proper sentence or disposition. The principal function of parole agencies is the supervision of adults or juveniles placed on parole (or "aftercare," as it is called in some States).

The agencies listed in the probation and parole sector may be independent or administered by another criminal justice agency (usually the corrections department or a court). Branch offices under the administration of a probation and parole agency are listed separately and are counted as separate agencies. There are approximately 280 regional or district offices that are excluded from the listing because the parent agencies did not consider them to be separate agencies and were not able to provide separate information for them. Strictly administrative offices are listed as separate agencies. An agency with multiple functions, e.g., adult probation and parole or adult and juvenile probation, is counted as one agency. Specifically excluded from this sector are halfway houses (listed in the corrections sector), preparole agencies, and work release agencies.

Correctional facilities

The correctional facilities on the agency list are separated into three subsectors: local jails, State adult correctional facilities, and juvenile correctional facilities. In addition, a small number of related agencies (322) are listed whose primary function is administration and similar services, under such names as department of corrections, department of offender rehabilitation, department of youth services and juvenile rehabilitation, etc.

Local jails

The listings in this sector reflect the findings of the 1978 National Jail Census conducted by the Bureau of the Census for the LEAA, NCJISS (now called the BJS).

A jail is listed as a separate facility if it is: administered by a local government authority; used to hold persons detained pending adjudication and/or persons committed after adjudication for sentences usually of a year or less; intended primarily for adults; and is in a separate physical location or is functionally distinct from another facility at the same location.

Not included as local jails are the following: temporary holding facilities, lockups, or other facilities that do not hold persons after they have been formally charged in court (usually within 48 hours of arrest); locally administered community-based pre-release facilities such as halfway houses, work- or study-release facilities, etc.; privately operated facilities even if supported by local government funds on a contractual or per diem basis; facilities financed and operated by the Federal or State governments even if they house local prisoners (e.g., State operated jails in Connecticut, Delaware, Hawaii, Rhode Island and Vermont); facilities located in U.S. territories; treatment facilities for drug addicts and/or alcoholics that treat local prisoners but not exclusively; hospitals that have wings or wards reserved exclusively for local prisoners.

State adult correctional facilities

In 1974 a Census of State Correctional Facilities was conducted by the Bureau of the Census for the LEAA, NCJISS (now the Bureau of Justice Statistics). The facility listings and total inmate counts were updated in mid-1979 to prepare for the 1979 Census of State Correctional Facilities.

Included in this sector are close to 800 confinement or community-based correctional facilities. A facility is listed if it is: administered by a State governmental authority^a; used primarily to hold convicted adults for sentences of more than 1 year; and is in a separate physical location or is functionally distinct from another facility at the same location. Specifically included are: prisons; classification/diagnostic/reception/medical facilities; hospitals exclusively for State prisoners; drug/alcoholic treatment facilities exclusively for State prisoners; prison farms, road camps, and forestry camps; special function facilities (such as youthful-offender facilities,^b vocational-training facilities, honor camps, State operated jails in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont); and community-based pre-release facilities (such as halfway houses, pre-release/pre-parole facilities, work-release facilities, study-release facilities).

Not included are the following: privately operated facilities even if supported with State funds on a contractual or per diem basis; facilities financed and operated by the Federal or local governments, even if they house State prisoners; facilities located in U.S. territories; treatment facilities for drug addicts and/or alcoholics not exclusively for State prisoners; and hospitals that have wings or wards reserved exclusively for State prisoners.

Juvenile detention and correctional facilities

These listings reflect information obtained during the 1977 Census of Juvenile Detention and Correctional Facilities conducted by the Bureau of the Census for the LEAA, NCJISS (now called BJS).

Juvenile detention and correctional facilities include detention

^a The only exception to this criterion are eight adult correctional facilities administered by the municipal government of Washington, D.C., since these facilities are functionally more comparable to State prisons than to local jails.
^b There are 16 facilities operated by the California Youth Authority which house both juveniles and youthful offenders. These facilities are listed with the Juvenile Facilities.

centers; halfway houses and group homes; ranches, forestry camps and farms; reception and diagnostic centers; and training schools. Facilities are included in this sector rather than with adult facilities if they have a resident population of at least 50 percent juveniles. The exceptions to this are the 16 youthful offender facilities in California that house more youthful offenders than juveniles. These facilities were included because they are the only correctional facilities that house juveniles with adults.

Specifically excluded are juvenile detention centers operated in conjunction with jails but lacking a separate staff or budget, Federal juvenile correctional institutions, nonresidential facilities, privately operated establishments, foster homes, and facilities exclusively for drug abusers, alcoholics, dependent and neglected children, unwed mothers, and emotionally disturbed or mentally retarded children.

Other justice agencies

The National Justice Agency List includes close to 700 State and local criminal justice agencies that do not fall within one of the six major sectors. Most of these (90 percent) are criminal justice planning and statistical agencies listed with such other agencies as victim compensation boards, multifunctional criminal justice training academies, and the like.

Prior to this publication, agencies that performed support services for operating agencies in a particular sector were all listed in the "other criminal justice" sector. On the basis of information obtained from the 1977 Directory Survey of Justice Agencies, those support agencies identified as functioning primarily in a single other sector were coded to reflect this, and, in this publication, have been included in the agency count of the primary sector as "other related agencies." For example, the Department of Corrections that provides overall administration for State correctional facilities would be listed in the State Adult Corrections Sector; similarly, the Department of Public Safety would be listed with police agencies in the Law Enforcement Sector.

APPENDIX 2 Expenditure and Employment Data for the Criminal Justice System—Survey methodology and definitions of terms

NOTE: The following information was provided by the Bureau of Justice Statistics and the U.S. Bureau of the Census.

Survey methodology

As in previous editions of this annual publication, several tables show comparisons of criminal justice expenditure and full-time equivalent employment with the total general expenditure and full-time equivalent employment for all functions of the particular government or level of government. Prior to the fiscal year 1971 report, local government total expenditure and full-time equivalent employment included data for independent school districts and special districts as well as for general local governments, i.e., counties, municipalities, and townships. Beginning with the 1970-71 report, however, the total general expenditure and total full-time equivalent employment figures shown for the "local" level of government in these comparisons include data for units of general local government only.

The "variable pass-through" provisions of the Omnibus Crime Control Act of 1970 required that the concept of "local" government be confined to units of general local government in determining the ratio of State-to-local government criminal justice expenditure. Beginning with the fiscal year 1971 report, the same concept was applied consistently throughout the publication to reflect the intent of the law. Therefore, the total general expenditure and total full-time equivalent employment figures used for comparison with criminal justice figures do not include independent school districts or special districts. This change may result in significant differences from the percentages shown for years prior to fiscal year 1971 in those States where education is largely the responsibility of independent school districts, or where there are large special districts. Criminal justice expenditure and employment data in this series have always been for units of general local government only. As in previous reports, however, Appendix 1 of the Source shows those independent school districts and special districts having significant special police expenditures and employment. In addition, Appendix 1 of the Source includes separate data for campus police of colleges and universities that are dependent agencies of State and local governments—data that are also included in the summary figures for State and local governments.

Readers should be generally cautious in comparing governments, because other differences in functional responsibilities from State-to-State and government-to-government can also affect the comparability of expenditure and employment data. For example, some State governments directly administer certain activities that elsewhere are undertaken by local governments, with or without fiscal aid, and the same variation in the division of responsibilities exists for counties and cities. Sampling error and response error are discussed in the following section.

The documents used to collect data did not consistently provide full itemization of expenditure or employment for the sector subcategories presented in this report. As a result, sector breakdowns may be incomplete for particular governmental units.

Because of rounding, the detail data in some tables may not add precisely to the totals shown.

Survey coverage

The survey covered the Federal Government, all State governments, and a representative sample of local governments within each State. Data were collected for all county governments (regardless of size), for all municipalities (and townships in the New England and Middle Atlantic States) having a 1977 population of 10,000 or more, and for a sample of

the remaining municipalities and townships with less than 10,000 population, selected according to the relative size of their annual expenditures as reported in the 1977 Census of Governments. The survey panel included the Federal Government, the 50 State governments, and 11,855 local governments (3,040 county governments, 6,728 municipalities, and 2,067 townships).

The sample selected to develop local government figures is one of all possible samples of the same size that could have been chosen using the same sampling design. Estimates derived from these different samples would differ from each other, and also from a complete census using the same data collection procedures. This variation among all possible estimates is sampling error. Because all State and county governments were included in the survey, State and county figures are not subject to sampling error.

The local government sample was designed to produce an estimate for each State of the portion of total criminal justice expenditures made by local governments with a relative sampling error of less than one-half of 1 percent.

The data are also subject to the inaccuracies in classification, response, and processing that would occur if a complete census had been conducted under the same conditions as the sample survey. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials. Follow-up procedures were used extensively to clarify inadequate and inconsistent survey returns.

Survey period

Federal Government data are shown for fiscal year 1979, which began on Oct. 1, 1978 and ended Sept. 30, 1979.

The State expenditure data presented in this report cover the fiscal year ending June 30, 1979 for all States except four whose fiscal years ended as follows: New York, Mar. 31, 1979; Texas, Aug. 31, 1979; and Alabama and Michigan, Sept. 30, 1979. However, there are some State agencies that operate on a different fiscal year basis from the rest of the State government. In such instances, figures shown are for the agency's fiscal year that ended within the State's regular fiscal year.

For local governments, the 1979 fiscal years reported are those closed between July 1, 1978 and June 30, 1979. Most municipalities and counties ended their fiscal years on Dec. 31, 1978 or June 30, 1979. The fiscal year reported for Washington, D.C. ended on Sept. 30, 1979.

Employment data shown for Federal, State, and local governments are for October 1979.

Data collection

The survey was accomplished using two methods of data collection: field compilation and mail canvass. Trained field representatives compiled expenditure and employment data from the governments' own records for the 50 States, 350 largest counties, 415 largest cities, and selected smaller units. The compilation work was done between October 1979 and June 1980. All other units in the sample were canvassed by mail for expenditure and employment data over a 5-month period beginning in January 1980 and ending in May 1980. Response for field-compiled units was 100 percent. The response from mail canvass units was 91 percent.

The field survey efforts and mail canvass were supplemented by reference to a variety of published government documents such as budgets, financial statements, and audit reports. In some cases, such sources were the basis for breakdowns of totals into more detailed employment and expenditure figures.

The expenditure and employment data for the Federal Government were collected through a special mail survey, with telephone followup, of Federal criminal justice agencies. For reports previous to fiscal year 1971, expenditure data were derived from the *Budget of the United States Government*, and employment figures were obtained from the U.S. Civil Service Commission.

Definitions of terms

The definitions are those applied in the field compilation of data for the 50 States, 350 largest counties, and 415 largest cities. These definitions were necessarily summarized for inclusion in the survey questionnaires (see Appendix 3 of Source) sent to governments on the mail portion of the survey.

Government expenditure—"Expenditure" comprises all amounts of money paid out (net of any correcting transactions) other than for retirement of debt (including interest), investment in securities, extensions of loans, or agency transactions. It includes only external cash payments and excludes any intragovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also includes any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. In several instances, two or more governments share the expense of maintaining a court or other criminal justice agency. In these cases, the allocable direct expenditure amount is reported for each government in the appropriate category. When a government pays pensions directly to retired employees from appropriated funds, such payments are included as expenditure of the government concerned. However, State and local government contributions to retirement systems and various other employee benefits are not included in expenditure data, since the majority of governments make lump-sum contributions to plans covering all government employees and cannot report for criminal justice employees separately. Neither in governments' basic accounting records (from which criminal justice expenditure figures are drawn) nor in the records of their general-coverage employee benefit systems is there usually any breakdown of amounts contributed in terms of the various agencies or functions involved. Nor has an adequate procedure for calculating the proportion of such contributions allocable to criminal justice employees been developed due to the wide variation in the coverage of various plans, employee status requirements, benefit rates, etc.

For those governments whose records reflect contributions for criminal justice employees separately, separate data were obtained. However, these data are subject to variation and neither the amount nor the quality of the data reported would permit any attempt to estimate total contributions for all similar governments in a given State. Given the problems involved, no estimation procedure seemed feasible. Such data as were reported separately were therefore excluded from total criminal justice expenditures to provide a consistent data base for administering the "variable pass-through" requirement.

Expenditure is divided into two major categories by character:

1. "Direct expenditure" is all expenditure except that classed as intergovernmental and is further divided into two principal object categories:

(a) "Direct current," which includes salaries, wages, fees, and commissions, purchase or supplies, materials, and contractual services.

(b) "Capital outlay," which includes expenditure for the three subcategories below:

(1) "Construction:" Production of fixed works and structures, and additions, replacements and major alterations thereto undertaken either on a contract basis by private contractors or through force account construction by the employees of the government. Included are the planning and designing of specific projects, the grading, landscaping, and other site improvement, and the provision of equipment and facilities that are integral parts of the structure.

(2) "Equipment:" Purchase and installation of apparatus, furnishings, office equipment, motor vehicles, and the like having an expected life of more than 5 years. This includes both additional equipment and replacements. Rentals for equipment, including rental payments that may be credited on the purchase price if purchase options are exercised, are classified as current operation

expenditure. Equipment and facilities that are integral parts of constructed or purchased structures are classified respectively under construction or purchase of land and existing structures.

(3) "Purchase of land and existing structures:" Purchase of these assets as such, purchase of rights-of-way, and title search and similar activities associated with purchase transactions.

The other object categories—interest on general debt, assistance and subsidies, and insurance benefits—are not applied to specific functions because they are not ordinarily available on a functional basis from government financial reports. In the few instances where bonded or mortgaged general indebtedness is identified for specific purposes, the interest payments are aggregated with other interest expenditures that make it virtually impossible to arrive at reliable and consistent breakouts of such data over a long period of time.

2. "Intergovernmental expenditure" is payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners). "Total expenditure" is direct and intergovernmental expenditure of a government or level of government for criminal justice activities.

"Total general expenditure" is all expenditure of a government or level of government for all government functions, including criminal justice activities, but excluding utility system expenditure, liquor store expenditure, and insurance trust expenditure. Total general expenditure shown for the local level of government includes expenditure only of general purpose governments, and excludes expenditure of special districts and school districts.

Government employment—"Employees" includes all persons paid for personal services performed, including all paid officials and persons in paid leave status, and excludes unpaid officials, persons on unpaid leave, pensioners and contractors. Under this definition are two classes:

1. "Full-time employees," who are all persons employed during the pay period including Oct. 15, 1979, on a full-time basis, including all full-time temporary or seasonal workers employed during this pay period as well as persons having permanent status.

2. "Part-time employees," who are persons employed during the pay period including Oct. 15, 1979, on a basis other than full-time, and persons paid by more than one government.

Derived from these two classes is:

"Full-time equivalent employees," which means the total number of employees, discounted by applying average full-time earning rates. This is calculated by dividing the total payroll (full-time plus part-time) by the full-time payroll and multiplying this by the number of full-time employees, where both full-time and part-time employees and payroll are reported. Where only part-time employees and payroll are reported, full-time equivalent employees are calculated by dividing the total part-time payroll by the average full-time salary for the particular criminal justice sector and type of government. "Average full-time salary" is calculated by dividing the full-time payroll by the number of full-time employees for the particular criminal justice sector and type of government.

"Payroll" is the gross payroll before deductions and includes salaries, wages, fees, and commissions paid to employees as defined above for the month of October 1979.

Governmental functions—"Police protection" is the function of enforcing the law, preserving order, and apprehending those who violate the law, whether these activities are performed by a police department, a sheriff's department, or a special police force maintained by an agency whose prime responsibility is outside the criminal justice system, but that has a police force to perform these activities in its specialized area (geographic or functional).

Included in this activity are regular police services, the maintenance of buildings used for police purposes, and such specialized police forces (including public and private contract forces) as airport police, free and toll highway police, free and toll bridge and tunnel police, housing police, maritime police, park police, transit and other utility system police, college and university campus police, and alcoholic beverage control agents. Coroners and medical examiners are also included. Excluded are vehicular inspection and licensing, traffic safety and engineering, fish and game wardens, fire marshals, and the like.

The special police forces included in the data are only those that are part of general purpose governments. Security forces, building guards, school crossing guards, and metermaids without the power to make a police arrest were excluded. Those special police forces that are part of

independent school districts or special districts are not included in the data, inasmuch as these districts are not general purpose governments.

In most States, sheriffs' departments are multifunctional agencies providing police protection, judicial, and/or correctional services. In order to allocate expenditure and employment data to the proper activity, the data for sheriffs' departments are prorated using factors developed from a special survey of sheriffs' departments conducted in 1973, or more current estimates of manpower distribution if available.

Short-term custody and detention have traditionally been considered part of the "police protection" function, and in editions prior to the 1969-70 report, were treated as such. However, beginning with the 1969-70 report, the concept was modified on the basis of information obtained from the 1970 *National Jail Census*. Data for institutions with authority to hold prisoners 48 hours or more are included in the "corrections" sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in the "police protection" sector.

"Judicial activities" encompass all courts and activities associated with courts such as law libraries, grand juries, petit juries, and the like. Because the names of courts with similar functions and legal jurisdictions vary from State to State and even within States, data have been categorized by types of court rather than by court name.

1. "Appellate courts" include courts of last resort and intermediate appellate courts. These are courts having jurisdiction of appeal and review, with original jurisdiction conferred only in special cases.

2. "Courts of general jurisdiction" are trial courts of general jurisdiction having unlimited original jurisdiction in civil and/or criminal cases.

In many States, statutes either require or permit local governments to supplement the salary of State-paid judges of general jurisdiction courts. These judges were counted as part-time employees at both the State and local levels when actually receiving a check from both governments.

3. "Courts of limited jurisdiction" are courts whose legal jurisdiction covers only a particular class of cases or cases in which the amount in controversy is below a prescribed sum or that is subject to specific exceptions. Included in this category are probate courts, juvenile courts, and other courts of limited jurisdiction.

4. "Miscellaneous judicial" includes data on judicial activities that could not be reported under any of the above court categories, such as judicial councils and conferences, court administration offices (where identifiable), law libraries, jury commissions, and grand juries.

"Legal services and prosecution" includes the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys and their variously named equivalents; corporation counsels, solicitors, and legal departments with various names. It includes providing legal advice to the chief executives and subordinate departmental officers, representation of the government in lawsuits, and the prosecution of accused violators of criminal law. These activities are included whether performed by one office or several, because in some jurisdictions a single officer provides all legal services, while in others a prosecutor's office handles only criminal matters and a separate attorney's office performs all civil legal services. The operations of various investigative agencies having full arrest powers and attached to offices of attorneys general, district attorneys or their variously named equivalents are also included.

"Public defense" includes legal counsel and representation as provided by public defenders, and other government programs that pay the fees of court-appointed counsel. These include court-paid fees to individually retained counsel, fees paid by the court to court-appointed counsel, government contributions to private legal aid societies and bar association-sponsored programs, and the activities of an established public defender office or program. Employment data are included only for public defenders' offices because fee-paid counselors are not considered government employees, nor are counselors working for bar associations or legal aid societies.

"Corrections" is that function of government involving the confinement and rehabilitation of adults and juveniles convicted of offenses against the law, and the confinement of persons suspected of a crime and awaiting adjudication. Data for institutions with authority to hold prisoners 48 hours or more are included in this sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in "police protection." Corrections includes the operation of prisons, reformatorys, jails, houses of correction, and other institutions. It also includes institutions, facilities, and programs exclusively for the confinement of the criminally insane or for the examination, evaluation, classification, and assignment of inmates; and institutions and programs for the confinement, treatment, and rehabilitation of drug addicts and alcoholics if the institution or program is

administered by a correction agency of the criminal justice system. Pardon boards, parole and probation agencies, including resettlement or halfway houses for those not in need of institutionalization, are included in the correction sector as a separate subcategory.

1. "Correctional institutions" are prisons, reformatorys, jails, houses of correction, penitentiaries, correctional farms, work-houses, reception centers, diagnostic centers, industrial schools, training schools, detention centers, and a variety of other types of institutions for the confinement and correction of convicted adults or juveniles adjudicated delinquent or in need of supervision, and for the detention of those accused of a crime and awaiting trial or hearing. When an institution maintains a prison industry or agricultural program, data on the cost of production or the value of prison labor used by agencies of the same government, if identifiable, are excluded (and classed as expenditure for the function using the products or services). Expenditure for the manufacture, production, sale, and distribution of goods produced for sale or use outside the government are included under this heading.

(a) "Institutions for men" include identifiable expenditure and employment data for institutions exclusively for adult male offenders.

(b) "Institutions for women" include identifiable expenditure and employment data for institutions exclusively for adult female offenders. Where there is no separate women's prison, women offenders are either maintained in a prison complex that also houses other offenders, or are boarded in private facilities or institutions in another State. No attempt was made to prorate data on institutions housing more than one type of inmate, but where females are boarded in private institutions or in another State, available expenditure data were tabulated. Employment data were not tabulated because the personnel were employees of another government.

(c) "Institutions for juveniles" are those institutions identified by the 1977 Juvenile Detention and Correctional Facility Census as housing primarily juveniles, and in some States, "youthful offenders." These institutions include those under the control of a juvenile court, a probation department, or a youth authority or other similarly designated administrative body, as well as independently administered institutions. Also included are government payments to private agencies for the detention or treatment of delinquent juveniles. There is considerable variation from State to State in the legal definition of a juvenile, particularly in regard to the age at which a person is no longer considered a juvenile. Institutions for juveniles have been classified individually in accordance with the laws and age designations of their respective States.

(d) "Other and combined institutions" are those institutions holding a combination of inmates. Where expenditure or employment data for physically separate institutions for juveniles, adult females, and adult males were not separable by institution or type of institution, the entire amounts were included under this category.

2. "Correctional administration" consists of data for the administration of the correctional system, including data on the central administrative office (e.g., the department of corrections or a youth authority). Data on the administration of individual correctional institutions or probation/parole/pardon agencies are included in the appropriate subcategory if it was possible to deduct them.

3. "Probation, parole, and pardon" includes data on probation agencies, boards of parole, boards of pardon, and their variously named equivalents. Although probation agencies frequently function under the administration of the general jurisdiction court, the data are presented here after having been deducted from the judicial data, because of the correctional nature of the probation function. If the probation, parole, and pardon activities, or any of them individually, were part of the correctional administrative office, data were deducted and shown separately here, and the balance was shown under the correctional administration category. The overlapping character of the probation, parole, and pardon activities prevented the separate presentation of these data.

4. "Miscellaneous correction" includes expenditure and employment data which could not be classified under one of the other subcategories. "Other criminal justice activities," shown in some tables, includes expenditure or employment data that are not classified elsewhere, or that cut across more than one category, or that are not allocable to separate categories (e.g., expenditure on a general curriculum in educational institutions, the operation of State criminal justice agencies, crime commissions, etc.). Such data are included in the totals, where they are not shown separately.

APPENDIX 3 Uniform Crime Reports—Definitions of terms

NOTE: The following information has been excerpted from the U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reports for the United States, 1979, (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 1-5, 321-323; and U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 5-33, 89-92. Non-substantive editorial adaptations have been made. See the Handbook for further information on classification and counting rules.

Population definitions

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the Uniform Crime Reporting program are shown in Table 1.

Table 1 Population group, political label, and population coverage

Population group	Political label	Population coverage
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural area)	County	—
IX (Suburban county)	County	—

The major source of Uniform Crime Reporting (UCR) data is the individual police agency; therefore, some population and geographical aggregations may differ from standard U.S. Bureau of the Census definitions to render them consistent to police reporting areas and jurisdictions. The UCR program employs standard city and Standard Metropolitan Statistical Area (SMSA) classifications from the U.S. Bureau of the Census, but rural and suburban areas are slightly changed to match the reporting area of the local police.

Rural areas—Rural areas are unincorporated portions of counties outside of urban places and SMSA's. These areas represent 15 percent of the national population in 1979.

Suburban areas—These areas consist of cities with populations of less than 50,000 together with counties (unincorporated areas) that are within a SMSA. Suburban areas can therefore be subdivided into suburban cities and suburban counties.

Standard Metropolitan Statistical Area—This area includes a core city or cities with a population of 50,000 or more inhabitants and the surrounding county or counties that share certain metropolitan characteristics. SMSA's made up approximately 73 percent of the total U.S. population in 1979.

Other cities—Other cities are urban places outside SMSA's; most of these areas are incorporated. These cities comprise 12 percent of the 1979 national population.

The following diagram illustrates the aforementioned discussion of the community types.

	SMSA	Non-SMSA
Cities	Cities over 50,000 Suburban cities	Other cities
Counties (unincorporated area)	Suburban counties	Rural area

As a general rule, sheriffs, county police, and many State police report on crimes committed within the limits of the counties, but outside cities,

while local police report on crimes committed within the city limits (urban places). The number of full-service law enforcement agencies serving the population groups vary from year to year. This phenomenon is caused through population growth, geo-political consolidation, municipal incorporation, etc. The following table shows the number of agencies within each population group in 1979.

Table 2 Population group and number of agencies

Population group	Number of agencies
I	58
II	111
III	291
IV	638
V	1,599
VI	7,614
VIII (Rural area)	3,736
IX (Suburban county)	1,392
Total	15,439

Regions and divisions

The United States is divided into four regions; these regions are further divided into nine divisions. The following is a list of States within divisions and regions.

Northeast:

New England—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Middle Atlantic—New Jersey, New York, Pennsylvania

North Central:

East North Central—Illinois, Indiana, Michigan, Ohio, Wisconsin

West North Central—Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota

South:

South Atlantic—Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia

East South Central—Alabama, Kentucky, Mississippi, Tennessee

West South Central—Arkansas, Louisiana, Oklahoma, Texas

West:

Mountain—Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming

Pacific—Alaska, California, Hawaii, Oregon, Washington

Part I Offense Class and the Crime Index

A. The Crime Index

The following offenses and attempts to commit these offenses are used in compiling the Crime Index: (1) murder and nonnegligent manslaughter, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) larceny-theft, (7) motor vehicle theft, and (8) arson. Arson was added as the eighth Index offense in October 1978. In situations where there are multiple offenses, only the most serious offense, based on a UCR hierar-

chy, is reported. However, arson is excluded from this hierarchical procedure. All arsons, regardless of their occurrence in conjunction with another crime against property or crime against a person, are counted.

(NOTE—Manslaughter by negligence and simple or minor assaults are not included in the Crime Index.)

B. Part I Offenses

1. Criminal homicide:
 - (a) Murder and nonnegligent manslaughter;
 - (b) Manslaughter by negligence.
2. Forcible rape:
 - (a) Rape by force;
 - (b) Attempts to commit forcible rape.
3. Robbery:
 - (a) Firearm;
 - (b) Knife or cutting instrument;
 - (c) Other dangerous weapon;
 - (d) Strong-arm—hands, fists, feet, etc.
4. Aggravated assault:
 - (a) Firearm;
 - (b) Knife or cutting instrument;
 - (c) Other dangerous weapon;
 - (d) Hands, fists, feet, etc.—aggravated injury.
5. Burglary:
 - (a) Forcible entry;
 - (b) Unlawful entry—no force;
 - (c) Attempted forcible entry.
6. Larceny-theft (except motor vehicle theft).
7. Motor vehicle theft:
 - (a) Autos;
 - (b) Trucks and buses;
 - (c) Other vehicles.
8. Arson

PART I—OFFENSE CLASSES

1. **Criminal homicide**—This is the killing of one human being by another. This class consists of two parts: (a) killings due to willful acts (nonnegligent), and (b) deaths due to negligent acts. The two subdivisions of the criminal homicide class result from a careful study of the variations found in State statutes.

(a) **Murder and nonnegligent manslaughter**—One offense is counted for each person willfully killed by another. As a rule, any death due to a fight, argument, quarrel, assault, or commission of a crime is counted. Suicides, accidental deaths, assaults to murder and attempted murders are not counted as murder and nonnegligent manslaughter. Assaults to murder and attempted murders are counted as aggravated assaults. Certain willful killings are classified as justifiable or excusable under this program. Justifiable homicides are limited to: (1) killing of a felon by a peace officer in line of duty, and (2) killing of a felon by a private citizen. A killing is not justifiable or excusable on the basis of self-defense or the action of coroner, prosecutor, grand jury, or court. These data are police statistics based on a police investigation.

(b) **Manslaughter by negligence**—An offense is counted for each person killed by the gross negligence of another. Traffic fatalities are excluded. While manslaughter by negligence is a Part I offense, it is not included in the Crime Index.

2. **Forcible rape**—This offense is the carnal knowledge or attempted carnal knowledge of a female by force or under the threat of force and against her will. One offense is counted for each person raped or upon whom an assault or an attempt to rape has been made. Statutory offenses (no force and victim under the legal age of consent) are not counted. Any rape or attempt accomplished by force is classified as forcible rape regardless of the age of the victim.

3. **Robbery**—Robbery is the taking or attempting to take any thing of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Robbery involves a theft or larceny aggravated by the element of force or threat of force. If no force or threat of force is used such as in pocket-picking, or purse-snatching, the offense will be reported as larceny rather than robbery. Robbery is divided into: (a) firearm; (b) knife or cutting instrument; (c) other dangerous weapon; (d) strong-arm—hands, fists, feet, etc.

(a) **Robbery—firearm**—In this category of robbery, each "distinct operation" is reported in which any firearm is used as a weapon or employed as a means of force to threaten the victim or put him in fear.

(b) **Robbery—knife or cutting instrument**—This category includes each "distinct operation" in which a knife, broken bottle, razor or other cutting instrument is employed as a weapon or as a means of force to threaten the victim or put him in fear.

(c) **Robbery—other dangerous weapon**—A robbery involving a club, acid, explosive, brass knuckles, or other dangerous weapon would be included in this category.

(d) **Robbery—strong-arm, hands, fists, feet, etc.**—This category includes muggings, yokings, and similar offenses where no weapon is used but strong-arm tactics are employed to deprive the victim of his property. This is limited to personal weapons such as hands, arms, feet, fists, teeth, etc.

In cases involving pretended weapons or those in which the weapon is not seen by the victim but the robber claims to have it in his possession, the armed robbery is placed in the appropriate category. If an immediate "on view" arrest proves that there is no weapon, the robbery will be labeled strong-arm robbery.

In all categories of robbery, attempts are counted the same as completed offenses.

4. **Aggravated assault**—Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. This category includes the commonly entitled offenses of assault with intent to kill or to murder; poisoning; assault with a dangerous weapon; maiming, mayhem, and assault with intent to maim or commit mayhem; assault with explosives; and all attempts to commit the foregoing offenses.

Attempt to murder or assault to murder are reported as aggravated assault. All aggravated assaults coming to the attention of police are classified according to: (a) firearm; (b) knife or cutting instrument; (c) other dangerous weapon; (d) hands, fists, feet, etc.—aggravated injury.

(a) **Assault—firearm**—Included in this category are all assaults wherein any firearm such as a revolver, automatic pistol, shotgun, zippun, rifle, etc. is used or its use is threatened.

(b) **Assault—knife or cutting instrument**—Whenever a knife, razor, hatchet, ax, cleaver, scissors, glass, broken bottle, ice pick, etc. is used, the assault or attempted assault will be classified in this category.

(c) **Assault—other dangerous weapons**—This category includes assaults resulting from the use of any object or thing as a weapon which does or could do serious injury to a victim (such as a club, brick, tire iron). Also included in this category are attacks by explosives, acid, lye, poison, scalding water, burning, etc.

(d) **Assault—hands, fists, feet, etc.—aggravated injury**—This classification is used to record only those offenses which result in serious or aggravated injury. The assault will be aggravated if the personal injury is serious (e.g., broken bones, internal injuries, or where stitches are required). A severe beating, kicking, etc., of a woman or child by an adult will usually be counted as an aggravated assault.

See Part II Offenses for a definition of simple assaults.

5. **Burglary—breaking or entering**—Burglary is defined as the unlawful entry of a structure to commit a felony or theft. Offenses locally known as burglary include: unlawful entry with intent to commit a larceny or felony; breaking and entering with intent to commit a larceny; housebreaking; safecracking; all attempts at these offenses are also counted as burglary.

For the purposes of the "Uniform Crime Reports," a structure is considered to include but is not limited to: dwelling house, out buildings, garage, church, school, house trailer or houseboat that is used as a permanent dwelling, mill, barn, vessel or ship, cabin, public building, office, factory, apartment, room, warehouse, stable, other building, or railroad car. There are three subcategories of burglary: (a) forcible entry; (b) unlawful entry—no force; (c) attempted forcible entry.

(a) **Burglary—forcible entry**—Counted in this category are all offenses where force of any kind is used to unlawfully enter a structure for the purpose of committing a theft or any felony. Burglary by concealment inside a building followed by an exiting of the structure is included in this category.

(b) **Burglary—unlawful entry—no force**—The entry in these situations involves no force and is achieved by use of an unlocked door or window. The element of trespass to the structure is essential on this subcategory. If the area were one of open access, thefts from the area would not involve an unlawful trespass and would be scored as larceny.

(c) **Burglary—attempted forcible entry**—Situations where a forcible entry burglary is attempted are placed in this category.

6. **Larceny-theft**—Larceny-theft is the unlawful taking, carrying,

leading, or riding away of property from the possession or constructive possession of another. All thefts that are not part of a robbery, burglary or motor vehicle theft should be classified in this category regardless of the value of the article stolen. All thefts and attempted thefts are counted. Larceny—thefts are broken down into pocket-picking, purse-snatching, shoplifting, thefts from motor vehicles, thefts of motor vehicle parts and accessories, thefts of bicycles, thefts from buildings (where the offender has legal access), thefts from coin-operated devices or machines, all other larceny not specifically classified.

7. *Motor vehicle theft*—Motor vehicle theft is defined as theft or attempted theft of a motor vehicle. A motor vehicle is defined for this program as a self-propelled vehicle that runs on the surface and not on rails. Taking for temporary use when prior authority has been granted or can be assumed, such as in family situations, or unauthorized use by chauffeurs and others not having lawful access are not counted as motor vehicle thefts. All cases where automobiles are taken by persons not having lawful access thereto and are later abandoned are motor vehicle thefts. For the purpose of obtaining a more specific definition of the types of motor vehicles stolen, three subcategories have been established: (a) autos, (b) trucks and buses, (c) other vehicles.

(a) *Autos*—All automobiles that serve the sole purpose of transporting people from one place to another are included here.

(b) *Trucks and buses*—This breakdown includes vehicles specifically designed to transport people on a commercial basis, and to transport cargo.

(c) *Other vehicles*—Examples of this type of vehicle are snowmobiles, motorcycles, motor scooters, trailbikes, etc. Thefts of farm equipment, bulldozers, airplanes, construction equipment, and motorboats are scored as larceny-thefts.

8. *Arson*—Included are all arrests for violations of State laws and municipal ordinances relating to arson and attempted arson. Any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, church, college, jail, meeting house, public building or any building, ship or other vessel, motor vehicle or aircraft; contents of buildings, personal property of another, goods or chattels, crops, trees, fences, gates, grain, vegetable products, lumber, woods, cranberry bogs, marshes, meadows, etc. are counted.

In the event a death results from arson, the incident would be classified as murder. If personal injury results from the arson, the situation would be classified as aggravated assault.

PART II OFFENSE CLASSES

The Uniform Crime Reporting (UCR) program collects offense data in the Part I offense categories. In addition, the UCR program collects data on persons arrested and charged in both Part I and Part II offense classes.

The Part II offenses encompass all other crime classifications outside of those defined as Part I offenses. In November 1932, the UCR program adopted a Standard Classification of Offenses for the compilation of criminal statistics. This classification was devised and adopted in order that police, judicial, and penal statistics might be uniformly compiled in terms of a single classification of offenses. The definitions of the Part II offenses that follow include some of the offense titles described in local or State law. The inclusion of these titles is intended to serve as descriptive data to aid in determining what offenses should be included or excluded in each classification.

9. *Other assaults*—Assaults and attempted assaults where no weapon was used or which did not result in serious or aggravated injury to the victim are included as other assaults.

Examples of local jurisdiction offense titles which would be included in "other assaults" are: (a) simple assault; (b) minor assault; (c) assault and battery; (d) injury by culpable negligence; (e) resisting or obstructing an officer; (f) intimidation; (g) coercion; (h) hazing; (i) attempts to commit above.

10. *Forgery and counterfeiting*—In the majority of States forgery and counterfeiting are treated as allied offenses. In this class are placed all offenses dealing with the making, altering, uttering or possessing, with intent to defraud, anything false in the semblance of that which is true.

Included are: (a) altering or forging public and other records; (b) making, altering, forging, or counterfeiting bills, notes, drafts, tickets, checks, credit cards, etc.; (c) forging wills, deeds, notes, bonds, seals, trademarks, etc.; (d) counterfeiting coins, plates, banknotes, checks, etc.; (e) possessing or uttering forged or counterfeited instruments; (f) erasures; (g) signing

the name of another or fictitious person with intent to defraud; (h) using forged labels; (i) possession, manufacture, etc., of counterfeiting apparatus; (j) selling goods with altered, forged, or counterfeited trademarks; (k) all attempts to commit the above.

11. *Fraud*—Fraud is defined as fraudulent conversion and obtaining money or property by false pretenses. Included are bad checks, confidence games, etc., except forgeries and counterfeiting.

12. *Embezzlement*—Embezzlement is defined as misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. *Stolen property; buying, receiving, possessing*—Included in this class are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

14. *Vandalism*—Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. This offense covers a wide range of malicious behavior directed at property such as: cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, tipping over grave-stones, defacing library books, etc. All arrests for the above, including attempts, are counted.

15. *Weapons; carrying, possessing, etc.*—This class deals with weapon offenses, regulatory in nature, such as: (a) manufacture, sale, or possession of deadly weapons; (b) carrying deadly weapons, concealed or openly; (c) using, manufacturing, etc., silencers; (d) furnishing deadly weapons to minors; (e) aliens possessing deadly weapons; (f) all attempts to commit any of the above.

16. *Prostitution and commercialized vice*—Included in this class are the sex offenses of a commercialized nature, such as: (a) prostitution; (b) keeping a bawdy house, disorderly house, or house of ill fame; (c) pandering, procuring, transporting, or detaining women for immoral purposes, etc.; (d) all attempts to commit any of the above.

17. *Sex offenses (Except forcible rape and prostitution and commercialized vice)*—Included are offenses against chastity, common decency, morals, and the like, such as: (a) adultery and fornication; (b) buggery; (c) incest; (d) indecent exposure; (e) indecent liberties; (f) intercourse with an insane, epileptic, or venereally diseased person; (g) seduction; (h) sodomy or crime against nature; (i) statutory rape (no force); (j) all attempts to commit any of the above.

18. *Drug abuse violations*—Drug abuse violation arrests are requested on the basis of the narcotics used. The following subdivisions are used: (a) opium or cocaine and their derivatives (morphine, heroin, codeine); (b) marijuana; (c) synthetic narcotics—manufactured narcotics which can cause true drug addiction (demerol, methadone); (d) dangerous nonnarcotic drugs (barbiturates, benzedrine).

Included are all arrests for violations of State and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

19. *Gambling*—All charges that relate to promoting, permitting, or engaging in gambling are included in this category. To provide a more refined collection of gambling arrests, the following breakdown of gambling arrests is made: (a) bookmaking (horse and sport book); (b) numbers and lottery; (c) all other.

20. *Offenses against the family and children*—Included are all charges of nonsupport and neglect or abuse of family and children, such as: (a) desertion, abandonment, or nonsupport of wife or child; (b) neglect or abuse of child (if the injury is serious, it is counted as aggravated assault); (c) nonpayment of alimony; (d) all attempts to commit any of the above.

21. *Driving under the influence*—This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics. Included are: (a) operating a motor vehicle while intoxicated, (b) operating an engine, train, streetcar, boat, etc., while intoxicated.

22. *Liquor laws*—With the exception of "drunkenness" (class 23), and "driving under the influence" (class 21), liquor law violations, State or local, are placed in this class. Federal violations are not included. Included are: (a) manufacture, sale, transporting, furnishing, possessing, etc., intoxicating liquor; (b) maintaining unlawful drinking places; (c) advertising and soliciting orders for intoxicating liquor; (d) bootlegging; (e) operating still; (f) furnishing liquor to a minor or intemperate person; (g) using a vehicle for illegal transportation of liquor; (h) drinking on train or public conveyance; (i) all attempts to commit any of the above.

23. *Drunkenness*—Included in this class are all offenses of drunkenness or intoxication, with the exception of "driving under the influence" (class 21). Such things as drunkenness, drunk and disorderly, common or habitual drunkard, and intoxication are counted.

24. *Disorderly conduct*—In this class are placed all charges of committing a breach of the peace. Included are: (a) affray; (b) unlawful assembly; (c) disturbing the peace; (d) disturbing meetings; (e) disorderly conduct in State institutions, at court, at fairs, on trains, or public conveyances, etc.; (f) prize fights; (g) blasphemy, profanity, and obscene language; (h) desecrating flag; (i) refusing to assist an officer; (j) all attempts to commit any of the above.

25. *Vagrancy*—Persons prosecuted on the charge of being a "suspicious character or person, etc." are included in this class. It includes: (a) vagrancy; (b) begging; (c) loitering (persons 18 and over); (d) vagabondage.

26. *All other offenses*—Included in this class are all other State or local offenses not included in classes 1 to 25, such as: (a) admitting minors to improper places; (b) abduction and compelling to marry; (c) abortion (death of an expectant mother, resulting from abortion is a homicide, class 1a.); (d) bigamy and polygamy; (e) blackmail and extortion; (f) bribery; (g) combination in restraint of trade; trusts, monopolies; (h) contempt of court; (i) criminal anarchism; (j) criminal syndicalism; (k) discrimination; unfair competition; (l) kidnapping; (m) marriage within prohibited degrees; (n) offenses contributing to juvenile delinquency (except as provided for in classes 1 to 28 inclusive) such as employment of children in immoral

vocations or practices, admitting minors to improper places, etc.; (o) perjury and subornation of perjury; (p) possession, repair, manufacture, etc., of burglar's tools; (q) possession or sale of obscene literature, pictures, etc.; (r) public nuisances; (s) riot and rout; (t) trespass; (u) unlawfully bringing weapons into prisons or hospitals; (v) unlawfully bringing drugs or liquor into State prisons, hospitals, etc.; (w) furnishing to convicts; (x) unlawful disinterment of the dead and violation of sepulture; (y) unlawful use, possession, etc., of explosives; (z) violations of State regulatory laws and municipal ordinances (this does not include those offenses or regulations which belong in the above classes); (aa) violation of quarantine; (ab) all offenses not otherwise classified; (ab) all attempts to commit any of the above.

27. *Suspicion*—While "suspicion" is not an offense, it is the ground for many arrests in those jurisdictions where the law permits. After examination by the police, the prisoner is either formally charged or released. Those formally charged are entered in one of the Part I or II offense classes. This class is limited to "suspicion" arrests where persons arrested are released by the police.

28. *Curfew and loitering laws (juveniles)*—All arrests made for violation of local curfew or loitering ordinances where such laws exist are counted.

29. *Runaway (juveniles)*—Included in this category are apprehensions of runaways for protective custody as defined by local statute. The jurisdiction from which the juvenile runs away counts arrests of juveniles made by other jurisdictions.

APPENDIX 4 Parole in the United States: 1979—Definitions of terms and survey methodology

NOTE: This information was excerpted from National Council on Crime and Delinquency, *Uniform Parole Reports, Parole in the United States: 1979* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1980), pp. 2-4, 42-47. Non-substantive editorial adaptations have been made.

The 1979 aggregate parole data were provided to the Uniform Parole Reports (UPR) program voluntarily by the parole authorities/corrections departments of the 50 States, the U.S. Parole Commission, the District of Columbia, Puerto Rico, and the Virgin Islands. These data update the 1978 data published in National Council on Crime and Delinquency, *Uniform Parole Reports, Parole in the United States: 1978* (San Francisco: National Council on Crime and Delinquency, Research Center West, 1979).

Definitions of terms

Active status—Cases required to report to a supervising agent on a regular basis.

Conditional releasees—Conditional releasees from prison to parole supervision, including both parolees and mandatory releasees.

Good-time—Days off the maximum (and occasionally off the minimum) sentence that a prisoner earns by satisfactory institutional behavior. Many jurisdictions allow additional "special" good-time credits for particular work assignments or meritorious performance.

Inactive status—Cases excused from reporting to a supervising agent, but still under the legal jurisdiction of the paroling authority.

Jurisdiction—The legal authority of a parole agency over a case as distinguished from the provision for supervision over a case.

Mandatory releasees—Prisoners released to community supervision as a result of statutory prison term reduction measures, such as good-time.

Parolees—Releasees who entered community supervision (primarily but not exclusively from prison) by a discretionary act of a paroling authority, who must report to a supervising agent (parole officer), and who must observe other conditions until discharged.

Parole/mandatory release population—All persons under the jurisdiction of a paroling authority as of a specified date; out-of-state releasees under courtesy supervision are counted in the population of the agency with jurisdiction.

Parole supervision entries—Entries to community supervision as a result of either parole, reparole, reinstatement, or mandatory release.

Parole supervision removals—Removals from community supervision, including violators returned or recommitted to prison, absconders formally suspended, deaths, early discharges, full-term discharges, and discharges by court order or executive clemency.

Paroling authority—A board, commission, or authority with discretionary power to release offenders from prison prior to the expiration of sentence, to revoke parole and return violators to prison, and to reinstate or grant other forms of entry to parole supervision.

Prison population—All persons sentenced to 1 year or more of imprisonment and who are under the jurisdiction of a State, Federal, or District of Columbia correctional institution as of a specified date.

Supervision agency—The agency responsible for the direct supervision of a parolee, mandatory releasee, or any other case, regardless of where formal jurisdiction over the case may reside. Typically, the agency is a division of a department of corrections, although in some places, the paroling authority administers parole supervision as well as makes parole decisions.

Estimation procedures

The United States estimates for Tables 6.49 and 6.51 were based on the Federal reported figures for population and entries, the State reported totals for population and entries, and estimates for the jurisdictions missing

one or more of the figures. The end-of-year population estimates for 1978 and 1979 and the estimates for 1979 entries were used to compute a corresponding 1979 removals estimate. This was based on the assumption that, given uniform definition of categories, the end of one year's population plus the next year's entries minus the next year's removals should equal the sum of the end of the next year's population. However, many jurisdictions were unable to provide such a balanced figure. The reasons for these discrepancies are discussed in the section on "Agency notes." The estimating procedures for specific States are described below.

Mandatory release as well as parole exists in 18 jurisdictions: Four States (Delaware, Illinois, Indiana, and Tennessee) reported total conditional releasees, but did not break out parolees into one or more of the reporting categories. Using data from jurisdictions that provided complete or virtually complete data on both parole and total parole/mandatory release population movement (Arizona, District of Columbia, Florida, Kentucky, Maryland, Nebraska, New York, Texas, U.S. Parole Commission, Vermont, and Wisconsin), an estimation model was developed. The model is a simple proportional model across populations. Three sets of ratios were developed: ratios of comparable data between the Dec. 31, 1978 parole-only population and the Dec. 31, 1978 total parole/mandatory release population; ratios between the 1979 parole entries and the 1979 total parole/mandatory release entries; and ratios between the Dec. 31, 1979 parole-only population and the Dec. 31, 1979 total parole/mandatory release population. Despite the great variations in scale among the 11 jurisdictions in the model, these ratios were sufficiently stable across jurisdictions to justify the computations of overall (or mean) ratios in each category. The overall ratios then constituted the proportional model. This model was applied to each jurisdiction with missing data.

Exceptions to these estimation procedures occurred for Alaska, Kansas, Tennessee, and Virginia. Previously, Alaska provided a Dec. 31, 1977 total population figure (158 or 160 rounded to the nearest ten). The ratio of this figure to the reported Dec. 31, 1977 parole-only population was used to modify the estimation model described above to derive estimates for 1979 total parole/mandatory release entries and the Dec. 31, 1978 and 1979 total parole/mandatory release populations (Table 6.51). The 1979 total removals were estimated using the procedure discussed in the first paragraph of this section. For Tennessee, which separates out parole entries but not yearend populations, the model was adjusted to account for the ratio between reported parole entries and reported total conditional release entries (Table 6.49). Once the estimates for the Dec. 31, 1978 parole population, 1979 parole entries, and the Dec. 31, 1979 parole population were calculated, the 1979 parole removals were estimated using the previously discussed procedures. Kansas data (Table 6.51) estimates were derived in the same manner as described for Tennessee. Virginia instituted mandatory release in 1979. For this reason, the Dec. 31, 1978 parole-only and total parole/mandatory release populations were assumed to be identical (3,669). Virginia did provide parole entries. The ratio of the Dec. 31, 1979 total population to parole-only population was used to modify the proportional estimation model (described in previous paragraphs) used to derive a 1979 total entries estimate (Table 6.51). The 1979 total removals were estimated by the procedures discussed earlier.

Finally, the 1979 yearend estimated total United States parole population figure does not correspond with the figure for 1978 yearend estimated parole population plus the 1979 estimated parole entries minus the 1979 estimated parole removals as it has in previous years. This is a result of a legislative change in the status of California Department of Corrections

parole cases. As of Jan. 1, 1979, all releasees under the jurisdiction of the California Department of Corrections were reclassified as mandatory releasees. Therefore, the 1979 yearend figure for the estimated United States parole population is short the number of California cases reported as parolees as of Dec. 31, 1978 since they were counted as mandatory releasees in 1979. These cases are included in the total conditional release population, Table 6.51.

Agency notes for Tables 1.48, 1.49, 6.49, 6.50, and 6.51

U.S. Parole Commission (Federal)—All survey data were provided by the Statistical Analysis and Reports Division, Administrative Office of the U.S. Courts. For 1978, the absconder figure also includes those cases incarcerated or otherwise on inactive status pending revocation hearing. For 1979 removals, parole and mandatory release revocation figures include violators who may not have been officially revoked, but whose last activity prior to closing was the violation.

Alabama—All survey data were provided by the Board of Pardons and Paroles. For 1979 removals, the total figure does not include those cases removed due to death.

Alaska—All survey data were provided by the Alaska Board of Parole. Mandatory release and staff resources data were not available.

Arizona—All survey data were provided by Adult Parole Services, Department of Corrections.

Arkansas—All survey data were provided by the Probation and Parole Division, Department of Corrections. For 1978, the total yearend parole population figure does not include those cases reported as absconders. For 1979, the total yearend parole population figure does not include those cases reported as inactive or absconders.

California (Department of Corrections)—All survey data were provided by the Management Information Section, California Department of Corrections (CDC). As of Jan. 1, 1979, all releasees under the jurisdiction of CDC were classified as mandatory releasees as a result of statute changes.

California (Department of Youth Authority)—All survey data were provided by the California Department of Youth Authority (CYA). For 1978, CYA did not break out those cases supervised in-State. For 1979 removals, all discharges were discharged from the jurisdiction of the CYA but may have been transferred to the jurisdiction of another agency. No staff resources data were available.

Colorado—All survey data were provided by the Office of Adult Parole. For 1978, the total yearend parole figure does not include those cases reported as inactive or absconders. For 1979 removals, Colorado did not break out those cases discharged from parole. For 1979, no data were available on those cases supervised out-of-State. Colorado reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Connecticut—All survey data were provided by Parole Services, Division of Parole. For 1978 and 1979, Connecticut reported estimated figures for those cases reported as absconders.

Delaware—All survey data were provided by the Office of Probation and Parole. For 1978 and 1979, only total conditional release (parole and mandatory release) figures were reported. For 1978 and 1979, the total yearend population figures do not include those cases reported as absconders. For 1979 removals, Delaware did not break out those cases discharged and the total figure does not include those cases removed due to death.

District of Columbia—All survey data were provided by the Board of Parole. For 1978, the total yearend parole population figure does not include those cases reported as absconders. For 1978 and 1979, the total yearend mandatory release population figure includes only active, in-State cases. For 1979 removals, the total mandatory release figure includes only those cases discharged due to completion of term. The District of Columbia reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Florida—All survey data were provided by the Department of Corrections. Florida reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to the change from a manual to an automated recordkeeping system during 1979 and to errors in classification regarding the use of split sentences.

Georgia—All survey data were provided by the State Board of Pardons and Paroles. For 1979 removals, the total figure includes only discharges

due to completion of term and revocations or commitments.

Hawaii—All survey data were provided by the Intake Service Centers, Office of Correctional Information and Statistics. Hawaii reported 10.5 authorized full-time equivalent staff positions; for data presentation purposes, this figure was rounded to 10.

Idaho—All survey data were provided by the Commission for Pardons and Paroles. For 1978, Idaho did not break out those cases supervised in-State. For 1979, Idaho reported estimated figures. For 1979 removals, Idaho did not break out those cases discharged from parole.

Illinois—All survey data were provided by the Illinois Prisoner Review Board. For 1978 and 1979, only total conditional release (parole and mandatory release) figures were reported. For 1978, the total yearend population figure does not include those cases reported as absconders or cases supervised out-of-State. For 1979 entries, the total figure includes only releases from prison. For 1979 removals, the total figure does not include those cases removed due to death. For 1979, staff resources data include staff supervising parolees and mandatory releasees only.

Indiana—All survey data were provided by the Adult Authority/Community Services Division, Department of Corrections. For 1978 and 1979, only total conditional release (parole and mandatory release) figures were reported. For 1979 removals, Indiana did not break out those cases discharged from conditional release and the total figure does not include those cases removed due to death.

Iowa—All survey data were provided by the Bureau of Management Information, Department of Social Services. For 1978 and 1979, the total yearend parole population figures do not include those cases reported as absconders or those cases supervised out-of-State. For 1979 removals, Iowa did not break out those cases discharged from parole. Iowa reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Kansas—All survey data were provided by the Kansas Department of Corrections. For 1978, the total yearend parole population figure does not include those cases supervised out-of-State. For 1979 removals, Kansas did not break out those cases discharged from parole and the total figure does not include those cases removed due to death. No mandatory release data were available. Kansas reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to changes made in recordkeeping procedures during 1979.

Kentucky—All survey data were provided by the Research and Evaluation Unit, Bureau of Corrections. For 1978 and 1979, the total yearend population figures do not include those cases reported as absconders. Kentucky reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to errors in classification of cases.

Louisiana—All survey data were provided by the Department of Corrections. For 1979, staff resources data do not include Interstate Compact cases supervised in-State.

Maine—All survey data were provided by the Maine State Parole Board. Maine reported an estimated figure for presentence reports prepared in 1979.

Maryland—All survey data were provided by the Division of Parole and Probation, Department of Public Safety and Correctional Services. For 1979 removals, only the total parole and mandatory release figures were reported.

Massachusetts—All survey data were provided by the Parole Board. For 1979 removals, the total figure does not include those cases removed due to death.

Michigan—All survey data were provided by the Bureau of Field Services, Department of Corrections.

Minnesota—All survey data were provided by the Department of Corrections. For 1979, Minnesota did not break out those cases supervised in-State. For 1979, no Interstate Compact data were reported.

Mississippi—All survey data were provided by the Mississippi Parole Board.

Missouri—All survey data were provided by the Division of Probation and Parole, Department of Social Services. For 1978 and 1979, the total yearend parole population figures do not include those cases supervised out-of-State. Missouri reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Montana—All survey data were provided by the Probation and Parole Bureau, Department of Institutions. For 1978, the total yearend parole

population figure does not include those cases reported as absconders.

Nebraska—All survey data were provided by the Board of Parole.

Nevada—All survey data were provided by Adult Parole and Probation. For 1978 and 1979, the total yearend parole population figures do not include those cases reported as absconders. For 1979 entries, only the total figure was reported. For 1979 removals, Nevada did not break out those cases discharged from parole.

New Hampshire—All survey data were provided by the Board of Parole.

New Jersey—All survey data were provided by the Bureau of Parole. New Jersey reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to changes in recordkeeping procedures during 1979.

New Mexico—All survey data were provided by the Field Services Bureau, Correctional Division or were drawn from the *New Mexico Field Services Bureau Annual Report, July 1, 1978-June 30, 1979*. New Mexico reported fiscal year data rather than calendar year data. For 1978, the total yearend parole population figure includes only active, in-State cases and those cases supervised out-of-State. For 1979 removals, the total figure does not include those cases removed due to death. New Mexico reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

New York—All survey data were provided by the Division of Parole. For 1978, New York did not break out those parole and mandatory release cases supervised in-State. For 1978, the total yearend mandatory release population does not include those cases supervised out-of-State. New York reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

North Carolina—All survey data were provided by Management Information and Research, North Carolina Department of Corrections. For 1978 and 1979, only the total yearend parole population figures were reported. For 1979 entries and removals, only the total figures were reported. North Carolina reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

North Dakota—All survey data were provided by the North Dakota State Department of Parole and Probation.

Ohio—All survey data were provided by the Ohio Adult Parole Authority. For 1978 and 1979, the total yearend parole population figures do not include those cases reported as absconders. Ohio reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Oklahoma—All survey data were provided by the Oklahoma Department of Corrections. For 1978 and 1979, the total yearend parole population figures do not include those cases reported as absconders.

Oregon—All survey data were provided by the Oregon Corrections Division. For 1979 removals, only the total figure was reported. For 1979, Oregon did not break out Interstate Compact data and the number of presentence reports prepared in 1979 was not available.

Pennsylvania—All survey data were provided by the Pennsylvania Board of Probation and Parole.

Puerto Rico—All survey data were provided by the Administration of Correction. For 1979 removals, Puerto Rico did not break out those cases discharged from parole.

Rhode Island—All survey data were provided by Adult Probation and

Parole. For 1979, Rhode Island reported an estimated figure for the number of presentence reports prepared in 1979.

South Carolina—All survey data were provided by the South Carolina Probation and Parole Board. For 1979, South Carolina did not break out Interstate Compact data.

South Dakota—All survey data were provided by the Office of Correctional Services. For 1979, South Dakota did not break out Interstate Compact data.

Tennessee—All survey data were provided by the Tennessee Board of Paroles. For 1978 and 1979, only total conditional release (parole and mandatory release) figures were reported. Tennessee reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Texas—All survey data were provided by the Board of Pardons and Paroles. Texas reported fiscal year data rather than calendar year data. For 1978 and 1979, the total yearend parole and mandatory release figures do not include those cases reported as absconders. For 1979, the number of presentence reports prepared was not available.

Utah—All survey data were provided by Adult Probation and Parole.

Vermont—All survey data were provided by the Department of Corrections. For 1978, only the total yearend parole and mandatory release population figures were reported. For 1979, Vermont did not break out those mandatory release cases supervised in-State.

Virgin Islands—All survey data were provided by the Virgin Islands Board of Parole.

Virginia—All survey data were provided by the Division of Community and Prevention Services. For 1978, the total yearend parole population figure does not include those cases reported as absconders. For 1979, Virginia reported an estimated figure for those parole cases reported as absconders. For 1979 parole removals, Virginia did not break out those cases discharged. For 1979, the total yearend mandatory release population figure does not include those cases reported as absconders or those cases supervised out-of-State. No mandatory release entry or removal data were available. No caseload data were available. Virginia reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Washington—All survey data were provided by the Adult Corrections Division, Department of Social and Health Services. For 1978 and 1979, the total yearend population figures do not include those cases reported as absconders or those cases supervised out-of-State.

West Virginia—All survey data were provided by the Probation and Parole Services, Department of Corrections. For 1978 and 1979, the total yearend population figures do not include those cases reported as absconders or those cases supervised out-of-State. For 1979 removals, the total figure does not include those cases discharged due to completion of term. West Virginia reported that any discrepancies occurring when balancing entry and removal figures with total yearend population figures are due to recordkeeping procedures in use at this time.

Wisconsin—All survey data were provided by the Wisconsin Division of Corrections. For 1978 and 1979, Wisconsin reported estimated figures.

Wyoming—All survey data were provided by the Department of Probation and Parole. For 1978, only the total yearend population figure was reported. For 1979 removals, the total figure was computed from the yearend population and entry figures reported. No caseload data were available.

APPENDIX 5 Children in Custody—Data collection procedures and definitions of terms

NOTE: The following information has been provided by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Non-substantive editorial adaptations have been made.

Introduction

The Juvenile Detention and Correctional Facility Censuses were designed to gather data on the nationwide complex of residential facilities that held juvenile offenders in custody. The first two censuses, 1971 and 1973, were restricted to public residential facilities, but all subsequent enumerations (1974, 1975, 1977, and 1979), partially in response to the passage of the Juvenile Justice and Delinquency Prevention Act of 1974, were expanded to include private as well as public facilities. Data for all censuses were conducted by the U.S. Bureau of the Census for the U.S. Department of Justice.

Facility selection criteria

The facilities covered in the censuses, except for 1971 (see Source for details), were residential juvenile establishments operated by State or local governments or by private entities as (a) detention centers; (b) shelters; (c) reception or diagnostic centers; (d) training schools; (e) ranches, forestry camps, and farms; and (f) halfway houses and group homes. For purposes of tabulation and analysis, the first three of these types of facilities were classified as short-term institutions, whereas the last three were categorized as long-term facilities.

To have been included in each of the censuses, juvenile detention and correctional facilities in the public sector were required to have been in operation at the time the census was conducted, to have been in operation at least a month before the census reference date, and to have had a resident population in which juveniles made up at least 50 percent of the total. The last-mentioned criterion, however, did not apply to facilities that held youthful offenders in addition to juveniles; these facilities were included in the census even though their youthful offender population outnumbered the juvenile component. In addition to meeting the criteria for public establishments, private facilities included in the census had to demonstrate that at least 10 percent of their resident population were classified as adjudicated delinquents, persons in need of supervision, voluntary admissions, persons awaiting transfer to another jurisdiction, or persons held pending disposition by courts. Excluded were facilities in which more than 90 percent of the residents were dependent and neglected or other nonoffenders.

Specifically excluded from the census were juvenile detention centers operated as a part of local jails but lacking a separate staff or budget; Federal juvenile facilities; nonresidential facilities; foster homes; and facilities exclusively for drug abusers, alcoholics, dependent and neglected, unwed mothers, the emotionally disturbed, or the mentally retarded.

Census procedures and response rates

Names and addresses of public and private facilities for the censuses were based on the mailing list used for the most previous survey, where applicable, and from information from current agency compendiums, such as the *Directory of Correctional Institutions and Agencies*, published by the American Correctional Association, and past editions of *State Comprehensive/Law Enforcement Plans*, formerly prepared by each State for the Law Enforcement Assistance Administration (LEAA) of the U.S. Department of Justice. The updated list of agencies was then sent to juvenile correctional authorities in each State for review and correction.

Each census was conducted by mail. There was an initial mailout of the

Public Juvenile Detention and Correctional Facilities Census questionnaire to public facilities; where possible, questionnaires were sent to central reporting units. Remaining questionnaires were mailed directly to individual facilities, as were the Private Juvenile Detention and Correctional Facilities Census questionnaires. Institutions that failed to respond initially were mailed second and third requests, as appropriate. A subsequent follow-up to those still failing to respond was made by telegram or telephone. For each census survey, a response rate between 95 and 100 percent was achieved.

Census period

The 1971, 1973, 1974, and 1975 censuses covered the period July 1 through June 30 of the census year (i.e., 1971 census—July 1, 1970 through June 30, 1971). The reference date for population and personnel figures was June 30.

For the 1977 and 1979 censuses, the period covered was the calendar year (i.e., 1977 census—Jan. 1, 1977—Dec. 31, 1977). Population and personnel figures used Dec. 30 as the reference date.

Figures on occupancy rates, expenditures, operating costs, and admissions and departures refer to an annual period (calendar or fiscal), but may differ by census year and from the normal period covered.

Limitations of the data

Interpretations of information presented in this study should be made with the understanding that all data collected reflect State-by-State variation among juvenile justice systems in the United States. The comparison of data is also limited by changes in the questionnaires for each enumeration. For several censuses, such as in 1971 and 1979, facilities were self-classified. In others, such as 1973 and 1974, they were instructed to check as many types as applicable, with the primary classification being determined in follow-up efforts. Where administration by more than one level of government was indicated, facilities were classified by the level of government providing the most funding. Various methodological changes were made in the 1973 and subsequent enumerations on the basis of information and experience gained from the administration of the 1971 census. Most of these were definitional changes, indicating differing interpretations for part-time employment, gross salaries and wages, and capital expenditures. For details of these and other definitional changes, consult annual Source reports. Additional changes involved different approaches in tabulation, i.e., whether to use the total resident population as the universe (as was done in 1971), or to restrict the universe to the juvenile population (which was the general pattern in 1973), or to use both methods, i.e., the total resident population as the universe for some tabulations and the juvenile population only for other tabulations (as was the procedure in the later censuses).

Definitions of terms

Adult (nonjuvenile)—With respect to persons in custody, one within the original jurisdiction of a criminal rather than a juvenile court because his/her age at the time of an alleged crime was above the statutory limit; see also youthful offender.

Adjudicated delinquent—Detention status of a juvenile who, as the result of a formal and completed judicial proceeding, is adjudged a

delinquent, usually for a nonstatus offense—one for which an adult could be prosecuted in a criminal court. Includes some status offenders, especially in States without special status offender statutes. Even in States with such statutes, juveniles with previous offenses can be adjudicated delinquent for status offenses. (Conversely, a judge can declare a juvenile to be a person in need of supervision for a felony or misdemeanor—see "person in need of supervision.")

Awaiting transfer to another jurisdiction—Detention status of a juvenile who allegedly has committed a crime in, or run away from, another jurisdiction and is being held pending return to that jurisdiction. Includes runaways from other correctional facilities.

Capital expenditures—Includes costs for new buildings, major repairs or improvements, and new equipment, including single expenditures of any amount.

Dependent and/or neglected—A juvenile over whom a juvenile court assumes jurisdiction because of its finding that the care exercised by parent, guardian, or custodian falls short of a legal standard for proper care. Excludes juveniles held on delinquency charges, adjudicated delinquents, and those declared in need of supervision, even if they also could be considered dependent and/or neglected.

Detention center—A short-term facility that provides temporary care in a physically restricting environment for juveniles in custody pending court disposition and, often, for juveniles who are adjudicated delinquent or are awaiting transfer to another jurisdiction.

Detention status—One of the following statuses under which juveniles are held: adjudicated delinquent, person in need of supervision, held pending court disposition, awaiting transfer to another jurisdiction, voluntary admission, and dependent and neglected.

Group home—See halfway house and group home.

Halfway house and group home—A long-term facility in which residents are allowed extensive contact with the community, such as attending school or holding a job.

Held pending court disposition—Detention status of a juvenile who has not had a hearing or who has had only a preliminary, screening, detention, or similar hearing and is awaiting further court action.

Juvenile—In most States, a person under age 18. With respect to juveniles in custody, a person subject to juvenile court proceedings because a statutorily defined event (usually, but not necessarily, an offense) is alleged or demonstrated to have occurred while his/her age was below the statutory limit of original jurisdiction of a juvenile court.

Long-term facility—A correctional, as opposed to a detention, facility. Includes training schools; ranches, forestry camps, and farms; and halfway houses and group homes.

Nonpayroll staff—Full-time or part-time personnel not on the payroll of the reporting facility. Includes individuals paid by a parent agency or service who are assigned to the juvenile facility, personnel paid under contractual agreements or Federal grants, and college interns. Excludes community volunteers in 1971, when they were not counted, and in 1975, when they were counted as a separate group.

Operational expenditures—Gross salaries and wages, plus other operating expenses.

Payroll staff—Full-time and part-time personnel on the payroll of the

reporting facility.

Person in need of supervision (PINS)—Detention status of a juvenile declared by a juvenile court to be in need of supervision. Encompasses those known variously as child in need of supervision (CHINS), juvenile in need of supervision (JINS), and minor in need of supervision (MINS), as well as those designated as unruly, unmanageable, or incorrigible under special statutes for status offenders. All PINS are not status offenders, and all status offenders are not PINS. Even in States with status offender statutes, juveniles with previous offenses can be adjudicated delinquent for status offenses. Conversely, a judge can declare a juvenile to be a person in need of supervision for a felony or misdemeanor.

Private facility—A juvenile detention or correctional facility subject to governmental licensing, but under the direct administrative and operational control of private enterprise; typically receives substantial governmental funding, in addition to support by private sources.

Public facility—A juvenile detention or correctional facility under the direct administrative and operational control of a State or local government.

Ranch, forestry, camp, and farm—A long-term facility for persons whose behavior does not necessitate the strict confinement of a training school, often allowing them greater contact with the community.

Reception or diagnostic center—A short-term facility that screens persons committed by courts and assigns them to appropriate correctional facilities.

Resident—A person, juvenile or nonjuvenile, held in a juvenile detention or correctional facility.

Shelter—A short-term facility that provides temporary care similar to that of a detention center, but in a physically unrestricting environment.

Short-term facility—A detention, as opposed to a correctional, facility. Includes detention centers, shelters, and reception or diagnostic centers.

Status offense—An act or conduct that is declared by statute to be an offense, but only when committed or engaged in by a juvenile, and that can be adjudicated only by a juvenile court. Typical status offenses are violation of curfew, running away from home, truancy, possession of alcoholic beverages, and leading an immoral life. Both adjudicated delinquents and juveniles declared to be persons in need of supervision can be status offenders.

Training school—A long-term specialized type of facility that provides strict confinement for its residents.

Voluntary admission—A type of admission in which a juvenile voluntarily commits himself/herself to a facility without being adjudged by a court to be delinquent or in need of supervision. The juvenile may be referred to the facility for treatment by parents, court, school, or social agency.

Youthful offender—A person, adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit, for whom special correctional commitments and special record-sealing procedures are made available by statute. The special correctional commitment may be to a juvenile facility, to a special section of an adult facility, or to a separate facility for the confinement of persons between the age limits specified in the particular statute. Such provisions exist in Federal law and in the laws of several states.

APPENDIX 6 Public opinion survey sampling procedures

NOTE: Information on Gallup survey sampling procedures was excerpted from George H. Gallup, The Gallup Poll, Public Opinion 1935-1971, Vol. 1, 1935-48 (New York: Random House, 1972), pp. vi-viii; George H. Gallup, The Gallup Opinion Index, Report No. 162 (Princeton, N.J.: The Gallup Poll, Jan. 1979), pp. 29, 30; George Gallup, The Sophisticated Poll Watcher's Guide (Princeton, N.J.: Princeton Opinion Press, 1976), p. 102; and from information provided to SOURCEBOOK staff from the Gallup Organization. Information on the Harris survey sampling procedures was provided to SOURCEBOOK staff by Louis Harris and Associates, Inc.; similar procedures used in earlier surveys are described in Louis Harris and Associates, Inc., The Harris Yearbook of Public Opinion 1970: A Compendium of Current American Attitudes (New York: Louis Harris and Associates, Inc., 1971), pp. 511-514. Information on the survey procedures employed by the National Opinion Research Center was excerpted from the National Opinion Research Center, General Social Surveys, 1972-1978: Cumulative Codebook (Chicago: University of Chicago, 1978), pp. 1, 171-175. Information on the survey procedures used by the ABC News-Washington Post Poll was excerpted from Jeffrey D. Alderman, Linda A. Cranney, and Peter Begans, ABC News-Washington Post Poll, Survey No. 0030 (New York: ABC News, Mar. 23, 1981), p. 11. Information on the survey procedures used by NBC News and The Associated Press was excerpted from NBC News and The Associated Press, Poll Results NBC News, Report No. 66 (New York: NBC News, April 28, 1981), p. 18. Non-substantive editorial adaptations have been made.

The sampling procedures of five public opinion survey organizations are presented in this appendix: the Gallup Poll, the Harris Survey, the National Opinion Research Center, the ABC News-Washington Post poll, and the NBC News-The Associated Press poll.

GALLUP POLLS

All Gallup polls since 1950, excluding certain special surveys, have been based on a national probability sample of interviewing areas. Refinements in the sample design have been introduced at various points in time since then. However, over this period the design in its essentials has conformed to the current procedure, as described in the following paragraphs.

The United States is divided into seven size-of-community strata: cities of population 1,000,000 and over, 250,000 to 999,999, and 50,000 to 249,999, with the urbanized areas of all these cities forming a single stratum; cities of 2,500 to 49,999; rural villages; and farm or open country rural areas. Within each of these strata, the population is further divided into seven regions: New England, Middle Atlantic, East Central, West Central, South, Mountain, and Pacific Coast. Within each size-of-community and regional stratum the population is arrayed in geographic order and zoned into equal sized groups of sampling units. Pairs of localities in each zone are selected with probability of selection proportional to the size of each locality's population—producing two replicated samples of localities.

Within selected cities for which population data are reported by census tracts or enumeration districts, these sample subdivisions are drawn with probability of selection proportional to the size of the population. For other cities, minor civil divisions, and rural areas in the sample for which population data are not reported by census tracts or enumeration districts, small, definable geographic areas are drawn, with the probability of selection proportional to size where available data permit; otherwise with equal probability.

A block or block cluster is drawn with probability of selection proportional to the number of dwelling units from within each subdivision selected for which block statistics are available. In cities and towns for which block statistics are not available, blocks are drawn at random, that is, with equal probability. In subdivisions that are rural or open country in character, segments approximately equal in size of population are delineated and drawn with equal probability.

In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direction in the selection of households, taking households in sequence, until their assigned number of interviews has been completed. Within each occupied dwelling unit or household reached, the interviewer asks to speak to the youngest man 18 or older at home, or if no man is at home, the oldest woman 18 or older. This method of selection within the household has been developed empirically to produce an age distribution by men and women separately which compares closely with the age distribution of the population. It increases the probability of selecting younger men, who are at home relatively infrequently, and the probability of reaching older women in the household who tend to be under-represented unless given a disproportionate chance of being drawn from among those at home. The method of selection among those at home within the household is not strictly random, but it is systematic and objective, and eliminates interviewer judgment in the selection process. Interviewing is conducted at times when adults are most likely to be at home, which means on weekends or if on weekdays, after 4 p.m. for women and after 6 p.m. for men. Allowance for persons not at home is made by a "times-at-home" weighting procedure rather than by "call-backs." This procedure is a standard method for reducing the sample bias that would otherwise result from under-representation of persons who are difficult to find at home.

The pre-stratification by regions is routinely supplemented by fitting each obtained sample to the latest available U.S. Bureau of the Census estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment (for men and women separately), based on the annual estimates of the U.S. Bureau of the Census derived from their Current Population Survey. The sampling procedure described is designed to produce an approximation of the adult civilian population living in the United States, except for those persons in institutions such as prisons or hospitals. The four regions of the country, as reported in Gallup public opinion surveys, have been defined in the following manner:

East—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Delaware, West Virginia, District of Columbia;
Midwest—Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas;
South—Virginia, North Carolina, South Carolina, Georgia, Florida,

Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas, and

West—Montana, Arizona, Colorado, Idaho, Wyoming, Utah, Nevada, New Mexico, California, Oregon, Washington, Hawaii, Alaska.

Prior to 1950, the samples for all Gallup surveys, excluding special surveys, were a combination of what is known as a purposive design for the selection of cities, towns, and rural areas, and the quota method for the selection of individuals within such selected areas.

The first step in obtaining the sample was to draw a national sample of places (cities, towns, and rural areas). These were distributed by six regions and five or six city-size, urban-rural groups or strata in proportion to the distribution of the population of voting age by these regional city-size strata. The distribution of cases between the non-South and South, however, was on the basis of the vote in presidential elections.

Within each region the sample of such places was drawn separately for each of the larger States and for groups of smaller States. The places were selected to provide broad geographic distribution within States and at the same time in combination to be politically representative of the State or group of States in terms of three previous elections. Specifically, they were selected so that in combination, they matched the State vote for three previous elections within small tolerances. Great emphasis was placed on election data as a control in the era from 1935 to 1950.

Within the civil divisions in the sample, respondents were selected on the basis of age, sex and socioeconomic quotas. Otherwise, interviewers were given considerable latitude within the sample areas, being permitted to draw their cases from households and from persons on the street anywhere in the community.

According to Gallup policy, if the interviewee does not hear or does not understand a question, the interviewer repeats the question and if on the second reading the person does not understand or does not get the point of the question, the interviewer checks the "no opinion" box. It should also be noted that seldom more than 10 percent of all those contacted refuse to be interviewed.

Surveys of college students usually are based on in-person interviews with 1,000 full-time students representing 60 campuses. Occasionally, special surveys conducted by Gallup for other organizations use smaller samples because of time and/or financial constraints.

Sampling error

All sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the entire population surveyed had been interviewed. The size of sampling errors depends largely on the number of interviews. The following table may be used in estimating sampling error. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 percent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

[Percent]	Sample size						
	1,500	1,000	750	500	400	200	100
Percentages near 10	2	2	3	4	4	5	7
Percentages near 20	2	3	4	4	5	7	9
Percentages near 30	3	4	4	4	6	8	10
Percentages near 40	3	4	4	5	6	9	11
Percentages near 50	3	4	4	5	6	9	11
Percentages near 60	3	4	4	5	6	8	10
Percentages near 70	3	4	4	4	5	7	9
Percentages near 80	2	3	4	4	5	7	9
Percentages near 90	2	2	3	4	4	5	7

The table would be used in the following manner: Assume a reported percentage is 33 for a group which includes 1,500 respondents. Proceed to row "Percentages near 30" in the table and then to the column headed "1,500." The figure in this cell is three, which means that at the 95

percent confidence level, the 33 percent obtained in the sample is subject to a sampling error of plus or minus three points.

HARRIS SURVEYS

Harris surveys are based on a national sample of the civilian population of the United States. Alaska and Hawaii, however, are not represented in the sample, nor are those in prisons, hospitals, or religious and educational institutions. The sample is based on census information on the population of each State in the country, and on the population living in standard metropolitan areas and in the rest of the country. These population figures are updated by intercensal estimates produced annually by the U.S. Bureau of the Census, and sample locations are selected biennially to reflect changes in the country's demographic profile.

National samples are stratified in two dimensions—geographic region and metropolitan (and non-metropolitan) residence. Stratification insures that the samples will reflect, within 1 percent, the actual proportions of those living in the country in different regions and metropolitan (and non-metropolitan) areas. Within each stratum the selection of the ultimate sampling unit (a cluster of adjacent households) is achieved through a series of steps, a process which is technically called multi-stage cluster sampling. First States, then counties, and then minor civil divisions (cities, towns, townships) are selected with probability proportional to census estimates of their respective household populations.

Maps of the selected civil divisions are obtained and are partitioned by segments containing approximately the same number of households.

The Harris Survey has four of these national samples, and they are used in rotation from study to study. The specific sample locations in one study generally are adjacent to those used in the next study. For most surveys covering the entire country, more than one national sample may be employed. This avoids having too many respondents in one cluster.

Interviews are usually conducted with randomly designated respondents in 200 different locations throughout the country. Interviewers contact a designated number, generally 8, of households within each segment. Harris surveys of a nationwide sample, therefore, usually include 1,600 respondents.

All interviews prior to 1978 were conducted in person, in the homes of respondents. At each household the respondent was chosen by means of a random selection pattern, geared to the number of adults of each sex who live in the household. Interviews lasted approximately one hour. Almost all interviews conducted as of 1978 have been telephone interviews. Respondents are selected on the basis of random digit dialing. When the completed interviews are received in New York, a subsample of the respondents are re-contacted to verify that the data have been accurately recorded. Questionnaires are edited and coded in the New York office. The Harris sampling procedure is designed to produce a national cross-section that accurately reflects the actual population of the country 18 years of age and older living in private households. This means that the results of a survey among a national sample can be projected as representative of the country's civilian population 18 years old and older.

Harris Survey national results are reported for the East, Midwest, South, and West regions of the country, defined as follows:

East—Maine, New Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, Maryland, New Jersey, Delaware, West Virginia;

Midwest—North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio;

South—Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, Texas; and

West—Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Montana, Wyoming, Colorado, New Mexico.

Sampling error

In reading the tables, it should be kept in mind that the results are subject to sampling error, i.e., the difference between the results obtained from the sample and those which would be obtained by surveying the entire population. The size of a possible sampling varies to some extent with the size of the sample and with the percentage giving a particular answer. The following table sets forth the range of error in samples of different sizes and at different percentages of response:

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

Response	[Percent]					
	1,800	1,200	900	500	250	100
10 (90)	2	2	2	3	5	7
20 (80)	2	3	3	4	6	10
30 (70)	3	3	4	5	7	11
40 (60)	3	3	4	5	7	12
50	3	3	4	5	8	12

For example, if the response for a sample size of 1,200 is 30 percent, in 95 cases out of 100 the response in the population will be between 27 percent and 33 percent. This error accounts only for sampling error. Survey research is also susceptible to other errors, such as data handling and interview recording.

NATIONAL OPINION RESEARCH CENTER

The National Opinion Research Center (NORC) maintains a national probability sample, which is fully revised to accord with 1970 census information. The General Social Surveys are interviews administered to the NORC national samples using a standard questionnaire. They have been conducted during February, March, and April from 1972 to 1978 and in 1980. There are a total of 12,120 completed interviews (1,613 in 1972; 1,504 in 1973; 1,484 in 1974; 1,490 in 1975; 1,499 in 1976; 1,530 in 1977; 1,532 in 1978; and 1,468 in 1980). Since 1973, the median length of the interview has been about one hour. This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary.

Each survey is an independently drawn sample of English-speaking persons 18 years of age or over, living in non-institutional arrangements within the continental United States. (Alaska and Hawaii are not included in any of the samples.) Block quota sampling was used in the 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and in all of the 1977, 1978, and 1980 surveys. At the block level, quota sampling is used with quotas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-at-homes which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to canvass and interview only after 3:00 p.m. on weekdays or during the weekend or holidays.

The first stage of sample selection includes selection of the Primary Sampling Units (PSUs). The PSUs employed are Standard Metropolitan Statistical Areas (SMSAs) or non-metropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection. The units of selection of the second stage were block groups (BGs) and enumeration districts (EDs). These EDs and BGs were stratified according to race and income. The third stage of selection was that of blocks, which were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting. The average cluster size is five respondents per cluster.

The quotas call for approximately equal numbers of men and women with the exact proportion in each segment determined by the 1970 census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed women in the location. Again, these quotas are based on the 1970 census tract data. For men, the added requirement is that there be the proper proportion of men over and under 35 years old in the location. Past experience would suggest that, for most purposes, this quota sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases.

The 1975 and 1976 studies were conducted with a traditional sample design, one-half full probability and one-half block quota. The sample was divided into two parts for several reasons: (1) to provide data for possibly interesting methodological comparisons; and (2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response

patterns. Having allowed for the appearance of all items in the transitional sample design, the General Social Survey then switched to a full probability sample for the 1977 survey.

The 1977, 1978, and 1980 NORC national probability sample is a stratified, multi-stage, area probability sample of clusters of households in the continental United States. The selection of geographic areas at successive stages is in accordance with the method of *probabilities proportional to size*. Furthermore, the clusters of households are divided into replicated subsamples in order to facilitate estimation of the variance of sample estimators of population characteristics.

At the first stage of selection, Standard Metropolitan Statistical Areas (SMSAs) and nonmetropolitan counties covering the total continental United States were grouped according to size strata within the nine census regions. All population figures and other demographic information were obtained from 1970 U.S. Bureau of the Census reports. Within each size stratum, grouping, based on geographic location or racial characteristics (or both), was accomplished before selection. The final frame was further separated into zones or "paper strata" of equal population size in order to facilitate the selection of replicated subsamples of primary sampling units (PSUs). The selection of PSUs was designed to produce four independent subsamples of equal size. The four subsamples were randomly combined to form two larger subsamples of 101 PSUs each. The large subsamples are thus internally separable into two replicated subsamples for variance estimation purposes. NORC has selected one of the two large subsamples described above to serve as its principal frame of households for the remainder of the decade. The PSUs fall into 89 distinct SMSAs and nonmetropolitan counties. (New York, a very large SMSA, represents five PSUs, whereas the smaller counties represent only one PSU).

The second-stage procedure involved the direct selection of census block groups or enumeration districts (EDs) within SMSAs or counties, eliminating the traditional intermediate stage of clustering selections within urban places or county divisions. Before selections, census tracts, minor civil divisions, census county divisions containing the block groups, and EDs were carefully stratified by geographic location, income, and race, in order to maximize the precision of sample estimation within a PSU. Block groups and EDs were then selected with probabilities proportional to size in numbers sufficient to satisfy survey demands for households expected throughout the decade. Lists of the separate households contained in the second stage blocks or EDs were constructed by field personnel or obtained from directories. Thus, the principal NORC national probability sample is, in effect, an inventory of identifiable households, each with a known probability of selection. In a typical sample survey with equal probability of selection for individual households (i.e., a self-weighting sample) households at which interviews will take place are probabilistically selected from the available lists of addresses for blocks and EDs. The method of *probabilities proportional to size* results in the assignment of an approximately equal number of interviews in each final stage cluster, which in turn leads to increased precision in the estimation of overall population characteristics.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast—Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

Midwest—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South—Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia; and

West—Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

Note that Alaska and Hawaii are not included in the NORC sample.

ABC NEWS-WASHINGTON POST POLLS

ABC News-Washington Post Polls are based on telephone interviews with men and women, 18 years and older, living in the continental United States. ABC and the Washington Post select a sample of telephone exchanges which guarantees proportionate representation of each region of the country. Telephone numbers are then formed by adding random digits to the selected exchanges, enabling interviewers to reach both listed and unlisted phones. Responses are weighted by age, sex, education, and race using the most recent U.S. Bureau of the Census figures.

NBC NEWS AND THE ASSOCIATED PRESS

NBC News and The Associated Press polls are based on telephone interviews with adults across the country. Four hundred geographic areas are selected proportionate to the population of each subregion, and within

subregion, by size of place. Individuals are selected in accordance with a probability sample design that gives all telephone numbers (both listed and unlisted) a properly proportionate chance to be included. One adult, 18 years old or older from each household was included, selected by a systematic procedure to provide a balance of respondents by sex.

APPENDIX 7 The Figgie Report on Fear of Crime: America Afraid—Survey methodology and definitions of terms

NOTE: The following information has been excerpted from *Research and Forecasts, Inc., The Figgie Report on Fear of Crime: America Afraid (Willoughby, Ohio: A-T-O Inc., 1980), pp. 3, 149-160* and from *John Crothers Pollock, "Perhaps Evanston Is not America: A Reply to Lavrakas et al.," Criminal Justice Newsletter, 11 (22, Nov. 10, 1980):5-7.*

Purpose of the Report

The *Figgie Report* presents the findings of a survey conducted by Research and Forecasts, Inc., a subsidiary of A-T-O Inc. The purpose of the report is to measure the fear of crime and examine how it has affected the lifestyles of the American public.

Sample selection

The sample used in this study was a national random-digit sample of the telephones of the United States constructed for Research and Forecasts by Survey Sampling, Westport, Conn.

The method used to construct such samples involves the use of a massive data base that is updated frequently. Using the data base, a specialized computer program generates a list of telephone numbers that is organized in such a manner that each telephone has an equal probability of being called.

The use of the random digit dialing technique overcomes one of the main objections to telephone surveys, the problem of unlisted numbers. Because the data base from which the sample is drawn is constructed from working exchanges supplied by the Nation's telephone companies rather than telephone books, both listed and unlisted numbers have an equal probability of being called.

Another criticism of telephone surveys in the past has been that telephone surveys tend to oversample the affluent, because only they can afford telephones. However, U.S. National Health Service surveys in 1976 found that 91.6 percent of American households now contain telephones. Consequently, although national random telephone surveys may still somewhat undersample the poor, it is clear that any bias is relatively small.

Data collection

Twenty trained interviewers conducted phone interviews for a period of 6 weeks during April and May 1980. The interviews were conducted during the week between the hours of 6 p.m. and 11 p.m., and on weekends between the hours of 10:30 a.m. and 10:30 p.m. The interview took approximately 35 minutes.

In order to assure random selection, three call-backs were made for those telephone numbers that resulted in non-response before the number was discarded. Final non-response was 12 percent of the phone calls and consisted of 3 groups: (1) those households where the phone was not answered, (2) those households where individuals simply refused to be interviewed, and (3) those households for whom the given time was not convenient. Although three call-backs were made for all three categories of non-response, the first two categories represent non-response problems that will persist regardless of interviewer persistence. Interviewers attempted to set convenient times to call back respondents in the third category to minimize the number of individuals in the third category. In addition, 3 percent of the phone calls resulted in interviews that were terminated while the interview was in progress.

One thousand and forty-seven interviews were fully completed and usable. This represents an 85 percent overall completion rate.

Sampling distribution

Data collection techniques ensured that the randomness of the telephone number selection process was maintained. The random selection process ensures access to probability theory to measure the sampling error for the sample.

A table of the estimated sampling error for binomial percents at the 95 percent confidence level is presented below.

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

Percentages near	Sample size									
	1,000	900	800	700	600	500	400	300	200	100
10 or 90	2	2	2	2	2	3	3	4	4	6
20 or 80	2	3	3	3	3	4	4	5	6	8
30 or 70	3	3	3	4	4	4	5	5	6	9
40 or 60	3	3	4	4	4	4	5	6	7	10
50	3	3	4	4	4	4	5	6	7	10

The geographic distribution of the respondents is as follows: East, 23 percent; Midwest, 25 percent; West, 21 percent; and South, 31 percent.

Weighting

The initial sample did not exactly correspond to recent U.S. Bureau of the Census estimates of the demographic characteristics of the population over age 18. In order to make the two populations correspond more closely, the sampled population was weighted on two variables: gender and income.

The Census Bureau estimates the 1979 population over 18 as being 41.9 percent male and 58.1 percent female. In order to correct the sample findings to approximate the census figures, males in the sample were increased by a factor of 1.136 and females were decreased by a factor of .902.

Similarly, the income groups were weighted. The group earning under \$2,999 for 1978 (5.9 percent of the sample) was multiplied by a factor of 3.4. Those earning \$3,000 to \$7,999 per year (15.7 percent of the sample) were multiplied by a factor of 1.2. Those earning \$8,000 to \$11,000 (11.5 percent of the sample) were multiplied by a factor of 1. Those earning \$11,000 to \$15,999 per year (14.5 percent of the sample) were multiplied by a factor of .61. Those earning \$16,000 to \$21,000 (16.9 percent of the sample) were multiplied by a factor of .65. Those earning \$21,000 or over (35.5 percent of the sample) were multiplied by a factor of 1.

Construction of composite measures

The "formless fear index" is a Guttman scale constructed from responses to six questions concerning safety felt at home, in the neighborhood, or in the central business district, during the day, and during the

night. For each item, response categories were "frequently," "sometimes," "rarely," or "never." The "concrete fear index" is a Guttman scale built from six questions asking respondents how often they worried about being a victim of murder, sexual assault, mugging, knifing, beating, or armed robbery. For these items, response categories were "very safe," "somewhat safe," "somewhat unsafe," or "very unsafe." In each scale, the individual items were dichotomized into values of 0 and 1 and summed to arrive at a score ranging from 0 to 6. For the concrete fear scale, responses of "frequently" and "sometimes" were given scores of 1. "Rarely" and "never" responses were given scores of 0. For the formless fear scale, responses of "very safe" and "somewhat safe" were given scores of 0. "Somewhat unsafe" and "very unsafe" responses were given scores of 1. In both scales, total scores of 0 to 2 were classified as moderate to low levels of fear and scores of 3 to 6 as high fear level.

The "confidence in the local police index" combines several questionnaire items in order to create an overall measure of attitudes toward local police. The items included in the index were as follows:

- "In general, would you rate your local police department as: excellent or good (1), fair or poor (0)?"

- "The local police treat people of all races the same." (agree = 1, disagree = 0)
- "The local police just enjoy pushing people around and giving them a hard time." (agree = 1, disagree = 0)
- "The local police spend most of their time going after people who do little things wrong and ignore most of the bad things going on." (agree = 0, disagree = 1)
- "Which of the following best describes your local police officers?" (respectful = 1, arrogant = 0)
- "Do police use too much force?" (yes = 0, no = 1)

As with the other composite scores, the police confidence index was the sum of the responses to each index item. However, unlike the other indices, the "confidence in the local police index" did not form a Guttman scale. "High" confidence in the local police was assigned to sums of 3 to 6 and "low" confidence to totals of less than 3.

Community size is the respondents' subjective classification of their residential environment. This is distinct from many other definitions of community size that rely on population counts and U.S. Bureau of the Census definitions.

APPENDIX 8 National Survey on Drug Abuse: 1979—Survey methodology and definitions of terms

NOTE: The following information has been excerpted from Patricia M. Fishburne, Herbert I. Abelson, and Ira Cisin, National Survey on Drug Abuse: Main Findings 1979, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 4-9, 11-21, 148-161. Non-substantive editorial adaptations have been made. More detailed information on the earlier studies can be found in the following: for 1971, Herbert Abelson, Reuben Cohen, and Diane Schryer, "Public Attitudes toward Marijuana: A Nationwide Study of Beliefs, Information, and Experience," in Marijuana: A Signal of Misunderstanding, Vol. II, Appendix (Washington, D.C.: U.S. Government Printing Office, 1972); for 1972, Herbert Abelson, Reuben Cohen, Diane Schryer, and Michael Rappaport, "Drug Experience, Attitudes, and Related Behavior among Adolescents and Adults," in Drug Use in Perspective, (Washington, D.C.: U.S. Government Printing Office, 1973); for 1974, Herbert Abelson and Ronald Atkinson, Public Experience with Psychoactive Substances: A Nationwide Study Among Adults and Youth, (Princeton, N.J.: Response Analysis Corporation, 1975); for 1976, Herbert I. Abelson and Patricia M. Fishburne, Nonmedical Use of Psychoactive Substances: 1975/6 Nationwide Study Among Youth and Adults, (Princeton, N.J.: Response Analysis Corporation, 1976); for 1977, Herbert I. Abelson, Patricia M. Fishburne, and Ira Cisin, National Survey on Drug Abuse: 1977, A Nationwide Study—Youth, Young Adults, and Older People, Volume I, Main Findings (Washington, D.C.: U.S. Government Printing Office, 1978).

Sampling and interviews

A national area probability sample was employed in this study. Sample locations, households, and individuals to be interviewed were specified by the sampling plan and through explicit instructions to the interviewers. The probability procedures used for the selection of locations and housing units were such that each housing unit had, overall, an equal chance of selection. Altogether, 3,015 adults (aged 26 and older), 2,044 young adults (aged 18 to 25), and 2,165 youths (aged 12 to 17) were interviewed. The average response rates were 86.1 percent for the youth sample, 83.6 percent for the young adult sample, and 80.2 percent for the older adult sample. For a more detailed discussion of the sampling frame as well as the achieved national area probability sample, see Source, pp. 4, 148-159.

Interviewers visited selected households in order to list residents for purposes of random selection. The individuals in each household were listed by age group, so that youth, young adults, and older adults could be sampled separately and with varying probabilities of selection. In general, the younger the individual, the higher was his or her assigned probability of selection; this procedure was implemented because of the generally negative relationship between drug use and adult age. In processing data, the "over-sampling" of young adults was compensated for by the use of appropriate weights, so that survey results reflect the actual age distribution of the population. A detailed description of the weighting procedures is presented in the Source, pp. 160, 161.

To accomplish the differential sampling of adults aged 18 to 25, 26 to 49, and 50 and older, household composition was ascertained and households were classified in seven groups, with different selection procedures for each group, as shown in Table 1. If there was only one person in the designated adult age group, that person was the designated respondent. If there were two or more adults in the age groups selected for interview, each eligible person was assigned a number, starting with males from oldest to youngest, then females from oldest to youngest. A random number selection table then indicated which of the adults was to be interviewed.

Table 1 Selection rates for adult respondents, by household composition

Adult household composition	Selection rate
18 to 25 years only	1
26 to 49 years only	1/2
50 years and older only	1/6
18 to 25 years and 26 to 49 years:	
Selected subgroup:	
Persons 18 to 25 years	5/6
Persons 26 to 49 years	1/6
18 to 25 years and 50 years and older:	
Selected subgroup:	
Persons 18 to 25 years	5/6
Persons 50 years and older	1/6
26 to 49 years and 50 years and older:	
Selected subgroup:	
Persons 26 to 49 years	1/2
Persons 50 years and older	1/6
18 to 25 years, 26 to 49 years, and 50 years and older:	
Selected subgroup:	
Persons 18 to 25 years	2/3
Persons 26 to 49 years	1/6
Persons 50 years and older	1/6

The selection procedure for youths within sample households paralleled the selection procedure for adults and young adults. Whether or not an adult was interviewed, persons aged 12 to 17 were listed on the face sheet. When there was only one such youth in the household, that person was designated as the respondent. When there was more than one youth aged 12 to 17, numbers were assigned (starting again with males oldest to youngest, then females oldest to youngest) and one person was randomly designated to be interviewed, as in the case of the adult sample.

As a result of these combined adult and youth sampling procedures, there could be none, one, or two interviews conducted in any assigned household, as indicated by the following schedule. At most, one youth and one adult were selected per household.

None: No youth 12 to 17

No adults 18 to 25

Adults 26 and older, but face sheet specifies no interview to be done

One: Adult selected, but no youth in household

or

Youth present; only adults 26 and older and face sheet specifies no interview to be done

Two: Interview one each of adult and youth

Instruments

The 1979 data collection instruments consisted of personal interviews and interviewer administered answer sheets. Descriptions of these instruments, and the actual proportions of the sample interviewed with each, were as follows:

Personal interview—To reduce the burden on respondents two alternate forms were used in this phase of the survey: *Form C*: *Form C* included a scale on perceived consequences of marijuana and alcohol use. This form was assigned to 82 percent of the young adults and 80 percent of older adults. It was not administered to youth.

Form N: *Form N* included a series of questions on heroin use among the respondents' close friends. This form was assigned to 100 percent of youth, 18 percent of young adults, and 19 percent of older adults.

Interviewer administered answer sheets—All respondents were asked to answer detailed questions about drug use. Seven answer sheets were used with both *Form C* and *Form N*. These answer sheets were filled out by respondents while interviewers read the questions aloud. Each of the first six answer sheets related to a particular drug or drug category; the seventh focused on the sequence of drug use. Those respondents who had orally completed *Form C* were presented with an eighth answer sheet that dealt with perceived consequences of marijuana and alcohol use.

Definitions of terms

Alcohol—1979: beer, wine, and whisky, gin, other hard liquors. 1977, 1976, and 1974: beer, wine, whisky, or anything else to drink with alcohol in it. 1972: beer, wine, hard liquor like cocktails or highballs, or on the rocks, or straight shots. Note: the responses to the 1979 alcohol questions were marked on a private answer sheet rather than being spoken to the interviewer as in 1977, 1976, 1974, and 1972.

Analgesics—1979: Pills used medically to relieve pain. Analgesics are divided into four subgroups: propoxyphene, other analgesics, methadone, and agonist/antagonist. Note: see definition for "Nonmedical experience with psychotherapeutic drugs."

Current drinker—1979, 1977, 1976, and 1974: drank in past month. 1972: drank in past 7 days. Note: the response to the 1979 alcohol questions were marked on a private answer sheet rather than being spoken to the interviewer as in 1977, 1976, 1974, and 1972.

Current smoker—1979: smoked in past 30 days, and has smoked as many as five packs of cigarettes during his/her lifetime. 1977, 1976, and 1974: smoked within past month. 1972 and 1971: smoke at the "present time."

Current user of drugs—1979, 1977, and 1976: has used within the past month. 1974: has used within the past month, and indicates intention to use again. In practice, intention to use was dropped in computation because virtually all past month users indicated intent to use again. 1972 and 1971: *marihuana*—self-designated current users who report usage "once a month or less" as well as those users who report frequent usage; *other drugs*, has used within past month.

Hallucinogens—1979: LSD and other hallucinogens such as phencyclidine or PCP, mescaline, peyote, psilocybin, DMT. 1977 and 1976: LSD and other hallucinogens like mescaline, peyote, psilocybin, and DMT. 1974: LSD or other hallucinogens. 1972: LSD or something like it, such as mescaline, psilocybin, MSA, STP.

Inhalants—1979: 1) gasoline or lighter fluid; 2) spray paints; 3) other aerosol sprays (PAM or deodorants); 4) shoe shine, glue, or toluene; 5) lacquer thinner, or other paint solvents; 6) amyl nitrate, 'poppers'; 7) halothane, ether, or other anesthetics; 8) nitrous oxide, whippets; 9) locker room odorizers; 10) other substances used as inhalants. Data for locker room odorizers are included within general data on inhalants and are also provided separately. 1977 and 1976: glue or some other substances that people inhale for kicks or to get high. Besides glue, there are things like gasoline, some aerosols, nitrous oxide, amyl nitrate that is also called

"poppers" and other solvents. 1974: glue or some other inhalant. 1972: glue or other things you breathe in.

Marihuana—1979: marihuana and/or hashish. 1977, 1976, 1974, 1972, and 1971: marihuana only.

Nonmedical experience with psychotherapeutic drugs—Psychotherapeutic drugs include stimulants, sedatives, tranquilizers, and analgesics. 1979, 1977, 1976, and 1974: A "yes" or "not sure" response to any one (or more) of the following three items: Did you ever take any of these kinds of pills just to see what it was like and how it would work? Did you ever take any of these kinds of pills just to enjoy the feeling they give you? Did you ever take any of these kinds of pills for some other nonmedical reason, and not because you needed it? Note: In 1977 only, questions about nonmedical experience were assigned to a random half of the households in which interviews were conducted. 1972: A "yes" response to any one (or more) of the following five items: Have you ever taken these pills to help you get along with your family or other people? Have you ever taken any of these pills to help you get ready for some big event, or help you accomplish something? Did you ever take any of these kinds of pills just to see what it was like and how it would work? Have you ever taken any of these pills before going out, so that you could enjoy yourself more with other people? Did you ever take these kinds of pills just to enjoy the feeling they give you?

Now a full-time college student—1979, 1977, and 1976: This term is defined by a "yes" response to the question: "Are you a student or taking any course this year in a college or other kind of school?"; and a "college" or "community college" response to the question: "Is that a college or a vocational school, or what?"; and a "full-time" response to the question: "Are you a full-time student or a part-time student?"

Population density

Large metropolitan area—includes the Standard Metropolitan Statistical Areas (SMSA's) with populations of 1,000,000 or more in 1970. Large metropolitan areas include central cities and surrounding areas as defined by the U.S. Bureau of the Census.

Small metropolitan area—includes a sample of those Standard Metropolitan Statistical Areas under 1,000,000 in population in 1970.

Nonmetropolitan area—includes a sample of those areas that were not part of a Standard Metropolitan Statistical Area as of 1970, according to standards set by the U.S. Bureau of the Census. In general, this includes smaller communities, rural non-farm areas, and rural farm areas.

Rural area—a subcategory of "nonmetropolitan" area that comprises rural non-farm areas and rural farm areas.

Race—Race is grouped into two categories, "White" and "Nonwhite." Note: due to recent changes in Federal reporting options for race and ethnicity as well as frequent changes in the administration and content of such items over time, Hispanics have appeared in both racial categories. In 1979, Hispanics were included in the "White" category; in 1977, they appeared in one or the other category depending on how they identified themselves; in 1976 and 1974 they were included in one or the other category depending on how the interviewer identified them; and in 1972 and 1971, all Hispanics appeared in the "Nonwhite" category.

White—1979: those individuals who state that their family origin is White or that they are of Spanish-American origin. 1977: those individuals who state that their family origin is White. 1976, 1974, 1972, and 1971: those individuals whose racial background, according to interviewer observation, is determined to be White.

Nonwhite—1979 and 1977: those individuals who state that their family origin is American Indian, Alaskan native, Asian, Black, Pacific Islander, or some other race (other than White). 1976 and 1974: those individuals whose racial background, according to interviewer observation, is determined to be American Indian, Black, Oriental, or some other race (other than White). 1972 and 1971: those individuals whose category, according to interviewer observation, is determined to be Black, Puerto Rican or other Latin American group, or some other category (other than White).

Region

Northeast—Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont

North Central—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin

South—Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina,

Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, West—Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming

Sedatives—1979: Barbiturates and other sedatives used medically to help people relax or sleep. Sedatives are divided into four subgroups: intermediate/long acting barbiturates, nonbarbiturate/non-benzodiazepine sedatives, short acting barbiturates, and Dalmane. Note: See definition for "Nonmedical experience with psychotherapeutic drugs."

Stimulants—1979: Amphetamines and other stimulants sometimes used medically for weight control. Stimulants are divided into four subgroups: amphetamines, nonamphetamine anorectics, Ritalin, and Cylert. Note: See definition for "Nonmedical experience with psychotherapeutic drugs."

Tranquilizers—1979: Pills used medically to relax nerves and muscles. Tranquilizers are divided into four subgroups: benzodiazepines, Meprobamate, hydroxyzine, and Benadryl. Note: See definition for "Nonmedical experience with psychotherapeutic drugs."

APPENDIX 9 Student Drug Use in America, 1975-1980— Survey methodology and definitions of terms

NOTE: The following is excerpted from Lloyd D. Johnston, Jerald G. Bachman, and Patrick M. O'Malley, Student Drug Use in America, 1975-1980, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1981); and Lloyd D. Johnston, Jerald G. Bachman, and Patrick M. O'Malley, Highlights from Student Drug Use in America, 1975-1980, U.S. Department of Health and Human Services, National Institute on Drug Abuse (Washington, D.C.: U.S. Government Printing Office, 1981), pp. 3-5. Non-substantive editorial adaptations have been made.

Research design and procedures

The basic research design involves annual data collections from high school seniors during the Spring of each year, beginning with the class of 1975. Data collection takes place in approximately 125 to 130 public and private high schools selected to provide an accurate cross section of high school seniors throughout the United States.

One limitation in this design is that it does not include in the target population those young men and women who drop out of high school before the last few months of their senior year (i.e., prior to the survey)—between 15 to 20 percent of each age cohort. The omission of high school dropouts does introduce biases in the estimation of certain characteristics of the entire age group; however, for most purposes, the small proportion of dropouts sets outer limits on the bias. Further, since the bias from missing dropouts should remain just about constant from year to year, their omission should introduce little bias into the various types of change being estimated for the majority of the population.

Sampling Procedures—The procedure for securing a nationwide sample of high school seniors is a multistage one. Stage 1 is the selection of particular geographic areas; Stage 2 is the selection of one or more high schools in each area; and Stage 3 is the selection of seniors within each high school.

Stage 1—The geographic areas used in this study are the primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center for use in the Center's nationwide interview studies. These consist of 74 primary areas throughout the coterminous United States. In addition to the 12 largest metropolitan areas, containing about 30 percent of the Nation's population, 62 other primary areas are included: 10 in the Northeast, 18 in the North Central area, 24 in the South, and 10 in the West. Because these same PSUs are used in personal interview studies by the Survey Research Center, local field representatives can be assigned to administer the data collections in practically all schools.

Stage 2—In the major metropolitan areas more than one high school is often included in the sampling design; in most other sampling areas a single high school is sampled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

Stage 3—Within each selected school, up to about 350 seniors may be included in the data collection. In schools with fewer than 350 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling.

The three-stage sampling procedure described above yielded the number of participating schools and students presented in Table 1.

Table 1

	Class of 1975	Class of 1976	Class of 1977	Class of 1978	Class of 1979	Class of 1980
Total number of schools	125	123	124	131	131	127
Public schools	111	108	108	111	111	107
Private schools	14	15	16	20	20	20
Total number of students	15,791	16,678	18,436	18,924	16,662	16,524
Student response rate	78%	77%	79%	83%	82%	82%

Each school (except for half of those in the 1975 data collection) was asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year. One motivation for requesting that schools participate for 2 years is administrative efficiency; it is a costly and time-consuming procedure to secure the cooperation of schools, and a 2-year period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to check whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools that participated both years. Thus far, the half-sample approach has worked quite well; an examination of drug prevalence data from the "matched half-samples" showed that the half samples of repeat schools yielded drug prevalence trends that were virtually identical to trends based on all schools.

Definitions of terms

College plans—Respondents were asked the question "How likely is it that you will do each of the following things after high school?" One of the alternatives listed is "graduate from college (four year program)." Seniors responding "definitely won't" or "probably won't" were assigned to the college plans category "none or under 4 years." Students responding "probably will" or "definitely will" were assigned to the college plans category "complete 4 years."

Region—States grouped as "Northeast" (Census classifications of New England and Middle Atlantic): Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania. States grouped as "North Central" (Census classifications of East North Central and West North Central): Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska and Kansas. States grouped as "South" (Census classifications of South Atlantic, East South Central and West South Central): Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas. States grouped as "West" (Census classifications of Mountain and Pacific): Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon and California.

Population density—"Large SMSAs" include the 12 largest Standard Metropolitan Statistical Areas (SMSA) as of the 1970 census: New York, Los Angeles, Chicago, Philadelphia, Detroit, San Francisco, Washington, Boston, Pittsburgh, St. Louis, Baltimore, and Cleveland.

"Other SMSAs" include all other Standard Metropolitan Statistical Areas excluding the 12 above. Except in the New England States, an SMSA is a county or group of contiguous counties that contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In the New England States, SMSAs consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For the complete description of the criteria used in defining SMSAs, see the Executive Office of the President, Office of Management and Budget, *Standard Metropolitan Statistical Areas: 1967* (Washington, D.C.: U.S. Government Printing Office). The population living in SMSAs is designated as the metropolitan population.

"Non-SMSAs" include all areas not designated as Standard Metropolitan Statistical Areas. The population living outside SMSAs constitutes the nonmetropolitan population.

Drug types—The authors note that the terms "hallucinogen," "sedatives," "other opiates," and "stimulants" are used in reporting data to be consistent with the national household survey. Definitions or identifiers

used in survey forms include:
 Marijuana—"pot," "grass" or hashish;
 Other psychedelics—mescaline, peyote, PCP;
 Amphetamines—uppers, pep pills, bennies, speed;
 Quaaludes—quads, methaqualone;
 Barbiturates—downers, goofballs, reds, yellows;
 Heroin—smack, horse;
 Other narcotics—methadone, opium, codeine, paregoric;
 Inhalants—glue, aerosols, laughing gas;
 Tranquillizers—Librium, Valium, Miltown.
 Beginning with the 1979 survey, amyl and butyl nitrites were considered "other inhalants" for questions on one alternate survey form (N = one-fifth of total sample size). This was due to the fact that not all users of this subclass of inhalants were reporting themselves as inhalant users. Hallucinogen use had been similarly underestimated because some users of the hallucinogenic drug PCP do not report themselves as users of hallucinogens—even though PCP was included as an example of a hallucinogenic drug in earlier surveys and on other questions. The alternate questionnaire form contained a special set of questions about PCP, which provided other street names for it (e.g., angel dust). As a result of these definition changes, since 1979 data for drug use in these two drug classes have been adjusted for underreporting. For more information, see Source.

APPENDIX 10 National Crime Survey—Data collection procedures and definitions of terms

NOTE: The following information was compiled by the SOURCEBOOK staff. For further information concerning sampling and interview procedures for the National Crime Survey, see U.S. Department of Commerce, Bureau of the Census, National Crime Survey—National Sample Survey Documentation (Washington, D.C.: U.S. Government Printing Office, 1976).

The National Crime Survey Program surveys a nationwide sample of individuals, households, and businesses (designed to be representative of the country as a whole) to measure changes in the extent and nature of crimes of theft and violence. The same sample is interviewed twice a year for 3 years about experiences with crime in the 6 months since the last interview.

Interview procedure

Household interviews—Before the scheduled field interview, a "Dear Friend" letter informing each household about the National Crime Survey and the interviewer's impending visit was sent to each sample unit. The initial interviewer contact with the household was a personal visit, at which time interviews were obtained for as many household members as possible who were 12 years old or older. Subsequently, in order to save time and money, telephone callbacks were sometimes used to obtain interviews with the remaining eligible household members. The following criteria were used to make the decisions whether or not to make a telephone callback: 1) the size of the assignment, 2) the distance of the sampled household from the interviewer's home, 3) whether it would be less expensive to telephone or to visit the household, and 4) the respondent's preference.

There are three types of respondents in the household portion of the National Crime Survey: household respondents, self-respondents, and proxy respondents.

1. Household respondent—A household respondent was chosen to answer questions that pertained to the entire household. Items asked of the household respondent included screen questions as to whether the residence was owned or rented and total family income. In addition, the household respondent was asked a series of household "screen" questions, designed to elicit information concerning crimes against the household such as burglary and auto theft.

The interviewer was instructed to interview a knowledgeable adult household member as the household respondent; that is, one who appeared to know—or who could reasonably be expected to know—the answers to the household questions. For the data presented in this SOURCEBOOK, this usually was the head of the household or the spouse of the head of the household. If it became apparent that the particular household member being interviewed was unable to answer these questions, a more knowledgeable respondent was found, or arrangements were made to call back when a knowledgeable respondent was available.

2. Self-respondent—Questions that pertained to individual victimization were asked of each household member 14 years of age or older. The questions asked of each individual member include personal characteristics and whether they were victimized in some way during the preceding 6 months.

3. Proxy respondent—Information about each household member age 12 and 13 was obtained by a proxy; that is, the questions for these persons were asked of the household respondent or some other knowledgeable adult household member. Proxy respondents were also utilized for those household members who were physically or mentally unable to answer the individual questions, as well as for those household members who were temporarily absent and not expected to return within the enumeration period.

Commercial interviews—For the commercial portion of the survey, either the owners or the managers of the commercial establishment were to be interviewed. If the owner or manager was not available at an establishment, the interviewer asked for the name and telephone number so that he/she could make an appointment for an interview. If the owner or manager was temporarily absent for the entire interview period, or was ill for the entire period, or was too busy, or if the interviewer could not obtain an interview for some other reason, the interview was conducted with the assistant manager, an accountant, the senior salesclerk, the nurse, secretary, receptionist, or some other employee who was knowledgeable about the business. The commercial survey was suspended as of 1977.

Questionnaires

Household portion—The questionnaire used in the household survey had four parts. The first portion of the questionnaire completed by the interviewer consisted of such items as basic household demographic data and pertinent information concerning noninterviews. The second portion, asked of the household respondent, was designed to obtain—for the purpose of describing the household—characteristics of the household members 12 years old or older as well as to elicit general information concerning crimes committed against the household as a whole during the reference period. Items included in this section included such "screen" questions as: "During the last 6 months, did anyone break into or somehow illegally get into your home, garage, or another building on your property?" and "Did anyone steal or try to steal, or use your motor vehicle without permission?"

The third portion of the household questionnaire was asked of each household member 12 years old or older, or a proxy. It consisted of items of personal characteristics, such as educational attainment and marital status, as well as individual "screen" questions, designed to elicit whether or not the respondent had been the victim of a specific crime during the reference period. For example, the following questions were asked: "Did anyone take something directly from you by using force, such as by a stickup, mugging or threat?" and "Did anyone beat you up, attack you or hit you with something, such as a rock or bottle?"

The final portion of the household questionnaire, the Crime Incident Report, was used to gather detailed information about crimes reported in either the household screen section (portion II) or the individual screen section (portion III). One incident report was filled out for each incident reported in answer to a screen question. For example, if a respondent said that her purse was snatched once and that she had been beaten twice, three Crime Incident Reports—one for each separate incident—were completed.

Commercial—The commercial victimization questionnaire had three primary components. The first contained questions that enabled the interviewer to classify the type of establishment, noninterview reasons, gross income, ownership, and number of employees. The second portion contained "screen" questions regarding whether any burglaries and/or robberies had occurred during the reference period, and if so, how many. This portion also included questions regarding insurance coverage and security measures used by the establishment.

The final portion of the commercial questionnaire consisted of robbery and burglary incident reports. These detailed reports were filed on every

robbery and burglary incident reported in the screen questionnaire. Separate reporting forms were used for robbery and burglary incidents for the survey period from July 1972 through December 1972. Beginning in January 1973, the same incident reporting form was used to record details of both robbery and burglary incidents.

Changes in the 1979 Household Questionnaire

In 1979, a revised questionnaire was used in the household survey. To be able to make data comparable across years, specifications were given for reformatting the responses from the new questionnaire to coincide with the old survey questionnaire. Tables constructed for SOURCEBOOK are based on the format of the old survey questionnaire. However, for Tables 3.6 and 3.14, it was not always possible to reformat the new response categories (and hence column distributions) to those from the old questionnaire. The result is that the tables presented in this edition of SOURCEBOOK are not comparable to those presented in earlier editions. To aid the reader, the table below compares the response codes for these variables from the 1978 and revised 1979 questionnaires.

Table 3.6 Reasons for not reporting the victimization to police

1978 Codes	1979 Codes
Nothing could be done—lack of proof	Lack of proof, no way to find/identify offender
Did not think it important enough	Respondent did not think it important enough
Police wouldn't want to be bothered	Police wouldn't think it was important enough, they wouldn't want to be bothered
Did not want to take time—too inconvenient	Did not want to take time—too inconvenient
Private or personal matter, did not want to report it	Private or personal matter or took care of it myself
Did not want to get involved	No comparable code
Afraid of reprisal	Afraid of reprisal by offender or his family/friends
Reported to someone else	Reported to someone else
Other—specify	Object recovered or offender unsuccessful
	Didn't realize crime happened until later
	Property difficult to recover due to lack of serial or I.D. number
	Police would be inefficient, ineffective, insensitive (they'd arrive late, wouldn't pursue case properly, would harass/insult respondent, etc.)
	Other—specify

Table 3.14 Place of occurrence of victimization

1978 Codes	1979 Codes
At or in own dwelling, in garage or other building on property (includes break-in or attempted break-in)	At or in own dwelling, or own attached garage (always mark for break-in or attempted break-in of same)
	At or in detached buildings on own property such as detached garage, storage shed, etc. (always mark for break-in or attempted break-in of same)
At or in vacation home, hotel/motel	At or in vacation home, hotel/motel
Inside commercial building such as store, restaurant, bank, gas station, public conveyance or station	Inside restaurant, bar, nightclub
	Inside other commercial building such as store, bank, gas station
	On public transportation or in station (bus, train, plane, airport, depot, etc.)
	Commercial parking lot
Inside office, factory, or warehouse	Inside office, factory, or warehouse
Near own home; yard, sidewalk, driveway, carport, apartment hall (does not include break-in or attempted break-in)	Near own home; yard, sidewalk, driveway, carport, on street immediately adjacent to own home, apartment hall/storage area/laundry room (does not include apartment parking lots)
On the street, in a park, field, playground, school grounds or parking lot	On the street (other than immediately adjacent to own/friend/relative/neighbor's home
	Noncommercial parking lot
	Apartment parking lot
	On school property (school parking area, play area, school bus, etc.)
Inside school	In a park, field, playground other than school
Other—specify	Inside school building
	At, in, or near a friend/relative/neighbor's home, other building on their property, yard, sidewalk, driveway, carport, on street immediately adjacent to their home, apartment hall/storage area/laundry room

Confidentiality

A notice of confidentiality appeared on both the household and the commercial questionnaire, indicating to the respondent that the answers given were confidential by law and could be seen only by sworn Census personnel.

National sampling procedures and standard errors of the estimates^a

All of the National Crime Survey data presented are population estimates derived from nationwide probability samples. The samples used for the national survey are large; during a 6-month period, about 60,000 household interviews and 135,000 personal interviews are conducted. However, whenever samples of a population—rather than the entire population—are studied, a certain amount of sampling error is introduced into the results. The size of this error depends on such factors as the size of the sample and the variability of the population. However, the sampling design and techniques were carried out in a way that permits an estimation of the amount of sampling error present in the results.

The sample of particular households or businesses actually drawn is only one of an extremely large number of different samples that could have been drawn. If all possible samples of a given size were to be drawn from a population and the sample results were used to estimate the population value for a particular characteristic, the estimates from the samples would differ somewhat from each other. These differences are distributed in a known way, however, and statistical sampling theory can give an idea of how much confidence can be placed in the estimate of a population characteristic that is derived from a sample of a given size. Using a statistic called the standard error of the estimate, we can create an interval around the sample characteristic in such a way as to know the probability that intervals made in this manner contain the population characteristic.

Because the method utilized in the production of these standard errors and confidence intervals is based on approximations, the standard errors are an indication of the order of magnitude of the standard error, rather than the precise standard error, for any specific item. It should be noted that as finer and finer breakdowns of the population are made—for example, along dimensions of race, income, age, etc.—the size of the standard error, relative to the size of the estimate, can be expected to increase.

Definitions of personal crime categories

1. **Rape and attempted rape**—Rape was the method of attack; or the type of injury suffered; or there was a verbal threat of rape; or the method of attack was attempted rape; or there were attempted rape injuries suffered. This category includes victimizations both with and without theft.
2. **Robbery**—Aggregates categories 3, 6, and 7 below.
3. **Robbery and attempted robbery with injury**—Aggregates categories 4 and 5 below.
4. **Robbery and attempted robbery with injury, serious assault**—In a personal confrontation, something was stolen or taken without permission from the victim; or there was an attempt to steal or take something without permission; and the victim suffered a serious injury. The robbery may or may not have involved a weapon.
5. **Robbery and attempted robbery with injury, minor assault**—In a personal confrontation, something was stolen or taken without permission from the victim; or there was an attempt to steal or take something without permission; and the offender had no weapon or the victim did not know whether the offender had a weapon; and the victim was attacked in some fashion; and received minor injuries.^b
6. **Robbery, without injury**—In a personal confrontation, something that belonged to the victim was stolen or taken without permission; and the victim was threatened or attacked, but not injured in any way. Victimizations in which the offender had a weapon as well as those in which the offender did not have a weapon are included.

^a A description of the city sample is presented below.
^b All cases in which the offender had a weapon and the victim received either minor or serious injuries are classified as serious assault.

7. *Attempted robbery without injury*—In a personal confrontation, the offender attempted to steal something; and the victim was threatened or attacked but not injured in any way. The attempted robbery may or may not have involved a weapon.
8. *Assault*—Aggregates categories 9 and 12 below.
9. *Aggravated assault*—Aggregates categories 10 and 11 below.
10. *Aggravated assault with injury*—Nothing was stolen or taken without permission, nor was there an attempt to steal or take something without permission; and the victim suffered a serious injury. The assault may or may not have involved a weapon.
11. *Aggravated assault, attempted assault with weapon*—Nothing was stolen or taken without permission, nor was there an attempt to steal or take something without permission; and the offender had a weapon; and the victim was threatened with harm, or was actually attacked but received no injury.
12. *Simple assault*—Aggregates categories 13 and 14 below.
13. *Simple assault with injury*—Nothing was stolen or taken without permission, nor was there an attempt to steal or take something without permission; and the offender had no weapon, or the victim did not know whether the offender had a weapon; and the victim was attacked in some fashion; and received minor injuries.
14. *Simple assault, attempted assault without weapon*—Nothing was stolen or taken without permission, nor was there an attempt to steal or take something without permission; and the offender did not have a weapon; and the victim was threatened with harm, or was actually attacked but received no injury.
15. *Personal larceny with contact*—Aggregates categories 16, 17, and 18 below.
16. *Personal larceny with contact, purse snatching*—A purse was taken from the person; and the offender did not have a weapon; and the victim was not threatened with harm or actually attacked.
17. *Personal larceny with contact, attempted purse snatching*—An attempt was made to take a purse from the person; and the offender did not have a weapon; and the victim was not threatened with harm or actually attacked.
18. *Personal larceny with contact, pocket picking*—Cash or a wallet was taken from the person; and the offender did not have a weapon; and the victim was not threatened with harm or actually attacked.
19. *Personal larceny without contact*—Theft or attempted theft except of motor vehicles, occurring away from the residence of the victim; and there was no personal confrontation between the victim and offender (e.g., umbrella stolen from restaurant in which victim was dining).

Definitions of household crime categories^c

20. *Burglary*—The offender did not live where the crime was committed and did not have a right to be there. Aggregates categories 21, 22, and 23 below.
21. *Burglary, forcible entry*—The offender actually got into the building; and there was some evidence that the offender used force to get in, whether or not something was stolen and whether or not there was property damage.
22. *Burglary, unlawful entry without force*—The offender actually got into the building; and there was no evidence that the offender tried to force his way in.
23. *Burglary, attempted forcible entry*—The offender tried to get into the building without success; and there was some evidence that the offender used force trying to get in.
24. *Larceny*—Theft, except of motor vehicles, and except in conjunction with burglary. Aggregates categories 25, 26, 27, and 28 below.
25. *Larceny, under \$50^d*—The sum of the stolen cash and stolen property was equal to \$0 to \$49.
26. *Larceny, \$50 or more*—The sum of the stolen cash and stolen property was equal to \$50 or more.
27. *Larceny, amount not ascertained*—The amount of stolen cash was not ascertained; or the value of the stolen property was not ascertained.
28. *Larceny, attempted*—Attempted theft, except of motor vehicles.
29. *Vehicle theft*—Theft or attempted theft of a car or other motor vehicle. Aggregates categories 30 and 31 below.
30. *Completed vehicle theft*—Theft of a car or other motor vehicle.
31. *Attempted vehicle theft*—Attempted theft of a car or other motor vehicle.

Definitions of business crime categories

32. *Burglary*—The offender tried to get into the building illegally; and there was evidence that the offender used force to get in; or the offender actually got into the building illegally, with or without using force.
33. *Robbery*—The offender used force or threat of force to take or attempt to take money, merchandise, equipment or supplies belonging to the business from an employee of the business, whether or not the offender had a weapon.

^c Each household incident involves some form of crime directed against property without personal confrontation between the victim and the offender during the (actual) commission of the crime.
^d Stolen checks and credit cards were uniformly considered as \$0.

APPENDIX 11 National Analysis of Official Child Neglect and Abuse Reporting—Study methodology

NOTE: The following information was excerpted from the American Humane Association, Annual Statistical Report: National Analysis of Official Child Neglect and Abuse Reporting, 1979 (Denver, Colo.: American Humane Association, 1980), pp. 1-22. Non-substantive editorial adaptations have been made.

The National Study on Child Neglect and Abuse Reporting is a project conducted by the American Humane Association and funded by the National Center on Child Abuse and Neglect of the U.S. Department of Health and Human Services. It began as a grant awarded to the American Humane Association in 1973 to determine the feasibility of operating a national clearinghouse for child abuse and neglect reports in order to be able to describe the national status of the child maltreatment problem. In 1976, detailed analyses of the data were first available. In 1978, the American Humane Association, in conjunction with the Denver Research Institute, was awarded a contract to continue the work of the clearinghouse, to more carefully define the data set, and to provide training and technical assistance to States.

The basic objectives of the clearinghouse function of the National Study are as follows: 1) determine the number of families, alleged perpetrators, and involved children on official reports of child maltreatment; 2) determine the source of referral and the geographic distribution of official reports; 3) describe the characteristics of families, perpetrators, and children involved in official reports and, where possible, compare them against the general population; 4) describe the response of the child protective services system to the report; and 5) identify and describe trends in the reporting data across and within jurisdictions.

Procedures for data collection and analysis

The data collected by the National Study are basically of two types: summary data, used to describe the extent of reported maltreatment on a national basis; and case information, used to describe the dynamics of reporting and also the nature of what was reported. Jurisdictions that submit case data do so voluntarily. Most often, participation in the National Study is integrated into the jurisdiction's child protective services management information system.

During 1979, all 50 States, the District of Columbia, and 3 U.S. territories participated in the National Study to some degree. The 33 fully participating jurisdictions submitted case data by means of either non-identifying copies of official reporting forms or a data tape that contained reporting data organized by case. The remaining jurisdictions submitted summary statistics to the National Study. Table 1 shows the distribution of participation at each level. Also indicated are those jurisdictions that submitted case data on magnetic tape and those that submitted forms.

Prior to inclusion, each record must meet certain minimum criteria for completeness and must successfully pass a series of edit specifications to insure the integrity of the data base. Forms that fail editing at any point are either corrected by the National Study staff or are returned to the originating participant jurisdiction for correction and resubmittal. Potentially any jurisdictional reporting form is appropriate for collection

Table 1

Fully participating		
Reporting forms	Tape	Summary statistics
Arizona	Arkansas	Alabama
Delaware	Florida	Alaska
Georgia	Hawaii	California
Louisiana	Idaho	Colorado
Maine	Michigan	Connecticut
Minnesota	New York	District of Columbia
Mississippi	North Carolina	Guam
Missouri	Pennsylvania	Illinois
Nebraska	South Carolina	Indiana
Nevada	Tennessee	Iowa
New Hampshire	Texas	Kansas
New Mexico	Utah	Kentucky
North Dakota	Virginia	Maryland
Ohio	Wisconsin	Massachusetts*
Puerto Rico		Montana
Rhode Island		New Jersey
Vermont		Oklahoma
Virgin Islands		Oregon
Wyoming		South Dakota
		Washington
		West Virginia*

* These States also submitted case data, but too late to be analyzed for this report.

of National Study data. However, only those data items that are compatible with the National Study's masterfile can be used. Jurisdictions can and do vary in terms of how much of their data can be actually included in the data base.

Data compatibility is determined through a mapping process, which essentially entails verifying with the jurisdiction that the purpose and meaning of a particular data element on their form is the same as that of a corresponding National Study data element. Hence, the total number of reports used in each data table varies. This is a function of two types of data completeness: the actual number of compatible data elements and the combination of compatible data elements that constitute a data category.

Table 2 shows the distribution of reports across jurisdictions that submitted case data. These reports constituted the data bank used in the analyses of case information. It is important to remind the reader, however, that although the majority of reports represent the same set of data elements, some do not. In addition, there was variation in the completeness of each report's data set. For these reasons, all of the reports in the National Study data base were not always used to derive a given statistical summary. The 'N' for each data table varies as a function of data element compatibility and data set completeness.

Table 2

Jurisdiction	Abuse	Neglect	Abuse/neglect	Other*	Total	Percent of total
Arizona	2,235	3,929	1,094	0	7,258	2.45
Arkansas	2,194	4,146	829	0	6,969	2.35
Delaware	281	926	240	0	1,447	0.49
Florida	13,244	29,920	5,731	0	48,895	16.50
Georgia	1,761	36	6	0	1,803	0.61
Hawaii	960	437	105	2	1,504	0.51
Idaho	234	649	78	0	961	0.32

* Includes "missing," "unspecified," and "other."

Interpretation of the data

Reporting on a national level has increased by 71 percent since 1976. This can be attributed to a number of factors. First, it must be pointed out that it may be impossible to determine if an increase in reporting is directly related to an increase in the number of children who are maltreated. The main reason for this is that there is no nationally standardized definition of maltreatment. Further, individual jurisdictions continue to modify reporting legislation to encompass new reportable conditions, e.g., emotional maltreatment. Reporting "measures" different phenomena in each jurisdiction and, in addition, what is measured in each jurisdiction may change each year. Compounding this situation is that it is known that not all occurrences of maltreatment are reported. It is likely that the increase in reporting is due to improved accountability on the part of jurisdictional systems.

In addition to reflecting broadened reportable conditions and improved accountability, the increase in reporting also reflects increased public awareness of the child maltreatment problem, and a corresponding increase in willingness to report.

It is interesting to note, however, that the magnitude of the increase from

one year to another has been steadily decreasing with time. It is unlikely that this means that reported incidence is approaching actual incidence for the reasons mentioned above. Rather, it probably reflects a steady approach to the limit in terms of what child protective services can handle.

Finally, there were approximately 64,769,000 children living in the United States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands in 1978. The 33 States and territories that submitted individual case data for 1979 contained approximately 39,783,000 of these children, or 61 percent. The total number of "involved children" in these jurisdictions, or those who were the subjects of a report of maltreatment, amounted to 396,846, or 1 percent of all the children residing in these jurisdictions.

The actual total of involved children could not be derived from the information provided by the remaining 21 States and territories. However, if the 1 percent figure that prevailed in the 33 case data jurisdictions can be assumed to prevail in the remainder, the total number of involved children in the United States and its territories can be estimated to be at least 647,690.

APPENDIX 12 Delinquency 1975, 1976, 1977, 1978—Survey methodology and definitions of terms

NOTE: The following information has been excerpted from Daniel D. Smith, Terrence Finnegan, Howard Snyder, and Jacqueline Corbett, *Delinquency 1975: United States Estimates of Cases Processed by Courts with Juvenile Jurisdiction (Pittsburgh, Pa.: National Center for Juvenile Justice, 1979), pp. 11-4-11-21*; Daniel D. Smith, Terrence Finnegan, and Howard N. Snyder, *Delinquency 1976: United States Estimates of Cases Processed by Courts with Juvenile Jurisdiction (Pittsburgh, Pa.: National Center for Juvenile Justice, 1980), pp. 17-35*; Daniel D. Smith, Terrence Finnegan, and Howard N. Snyder, *Delinquency 1977: United States Estimates of Cases Processed by Courts with Juvenile Jurisdiction (Pittsburgh, Pa.: National Center for Juvenile Justice, 1980), pp. 18-37*; and Daniel D. Smith, Terrence Finnegan, Howard N. Snyder, Norma G. Feinberg, and Patricia McFall, *Delinquency 1978: United States Estimates of Cases Processed by Courts with Juvenile Jurisdiction (Pittsburgh, Pa.: National Center for Juvenile Justice, 1981), pp. 5-19, 153-157*. Non-substantive editorial adaptations have been made.

Sampling data

The data used to derive the national estimates for 1975, 1976, 1977 and 1978, represent subsamples drawn from a larger data base. The total data base and the subsample for each year are as follows:

1975—The total data base consist of over 580,000 cases reported from 13 States. The total population of these 13 States represented 42 percent of the entire U.S. population and 41 percent of the total youth population at risk (from age 10 to the upper age of juvenile court jurisdiction).

The subsample was generated from 10 States. They include: Connecticut, Maryland, Pennsylvania, and West Virginia in the East; Alabama and Mississippi in the South; Ohio, Kansas, and Nebraska in the Midwest; and California in the West. New York, Florida, and Idaho data were excluded because of inconsistencies in the methods of reporting. The sample of these 10 States comprises a total of 555 counties out of a possible 3,141 nationwide. The sample represents 27 percent of the total child population within the courts with juvenile jurisdiction. A total number of 372,592 cases comprises the sample used to generate 1975 national estimates.

1976—The total data base contains more than 707,000 case records collected from 17 States and the District of Columbia. After a review, data from New York, Idaho, South Dakota, and the District of Columbia were excluded from the estimating sample because of internal variances in reporting methods. The resulting sample includes data from Connecticut, Maryland, Pennsylvania, and West Virginia in the East; Alabama, Florida, and Mississippi in the South; Iowa, Kansas, Nebraska, North Dakota, and Ohio in the Midwest; and California and Utah in the West. The sample used to generate 1976 national estimates includes data from 849 of the nation's 3,141 counties and represents 35.2 percent of the total child population within jurisdiction of juvenile courts in the United States.

1977—The total data base contains more than 700,000 case records collected from 17 States and the District of Columbia. After a review, data from New York, South Dakota, and the District of Columbia were excluded from the estimating sample because of significant differences in reporting methods. The resulting sample includes data from Connecticut, Maryland, Pennsylvania, and West Virginia in the East; Alabama, Florida, and Mississippi in the South; Iowa, Kansas, Nebraska, North Dakota, and Ohio in the Midwest; and California and Utah in the West. The sample used to generate 1977 national estimates includes data from 856 of the nation's 3,141 counties and represents 35.5 percent of the total child population within jurisdiction of juvenile courts in the United States.

1978—The primary data base consists of more than 515,000 case records from courts with juvenile jurisdiction in 13 States (California,

Connecticut, Florida, Iowa, Kansas, Maryland, Mississippi, North Dakota, Nebraska, Ohio, Pennsylvania, Utah, and West Virginia), the District of Columbia, and Clark County, Nevada. Data from 794 of the 3,143 counties in the United States containing more than one-third of the total child population within the jurisdiction of juvenile courts of the United States are represented.

Child population at risk

Developing national estimates required that the child population at risk had to be determined for each of the 3,141 counties in the United States. "Child population at risk" was defined as the number of children from the age of 10 through the upper age of jurisdiction for the juvenile court serving a particular county. Though both public and private sources were checked extensively, no source of population estimates by county and age was available for 1975, 1976, 1977, or 1978. However, the 1970 census data contained information in this form, and this information was utilized. In addition, the U.S. Bureau of the Census, under special contract from the National Cancer Institute, had produced population estimates for each year 1975 through 1978, by county in five-year age groupings (0-4, 5-9, etc.).

Using the following method, estimates of child population at risk were made for each year (i.e., 1975, 1976, 1977, and 1978). From the 1970 census, a summation of the number of children in a county from 0 through 4 years of age was made to obtain a total estimate of the children in this age range. Similarly, the process was repeated for the 5 through 9 and the 10 through 14 age groups. A percentage of the total for a particular age was calculated by dividing the number of children of a single age by the total number of children in its five-year group. Thus, the relative percentages were determined for 5-, 6-, 7-, 8-, and 9-year-olds in 1970; and from the 1975 census estimates, the total number of youth was determined in the 10 through 14 age group in 1975 (from the National Cancer Institute data). It was assumed that the relative percentage of 5-year-olds in the 5-to-9 group in 1970 would be equivalent to the relative percentage of 10-year-olds in 1975. Continuing with this procedure, 1975 estimates of the number of children of each age group from 10 through 19 were developed for each county.

Another assumption was that the change in single age populations from 1975 to 1978 would be minimal. For example, the estimate of 9-year-olds in 1975 was used as the estimate of 12-year-olds in 1978. Knowing the upper age of jurisdiction in each county, an estimate was calculated for the number of children from 10 through the upper age of jurisdiction (the child population at risk) for each of the 3,141 counties. Although migration, undercounting, and death rates would affect the extrapolation of population estimates from one year to another, it was assumed that these factors would be of minimal importance for the target group and that they would

be of minor importance compared with the impact of birth rates and child populations.

Estimating procedure

The primary task was to describe the number and nature of the juvenile court cases handled nationally in each of the years—1975, 1976, 1977, and 1978. Data were available from the reporting counties; for those counties not reporting, estimates had to be generated. The adopted estimating procedure assumed that the best method for predicting the number and types of cases for non-reporting jurisdictions was to use the data for similar reporting jurisdictions as a guide.

"Similar" was operationalized, or given a working definition, by using population at risk as a criterion. Jurisdictions of similar size (based on population at risk) were conceptualized as belonging to the same cluster. Clusters were formed based on the following concerns. First, the range of population at risk within a cluster had to be small enough to assure a reasonable similarity in the relative sizes of the counties. Second, it was necessary to define an adequate number of reporting jurisdictions within a cluster to assure the stability of that cluster's estimates. Accordingly, the 3,141 counties were divided into 11 clusters.

Estimates were made for non-reporting jurisdictions by using the information from reporting jurisdictions within the same cluster. It was assumed that the dynamics that produce the juvenile cases within a cluster are shared by all the counties in the cluster and are unique to that cluster. Thus, if a model could be developed to reproduce the data from reporting counties within a cluster, then this model could be applied to non-reporting jurisdictions of that cluster to generate predictions of their case loads.

Descriptive variables found in the *City/County Data Book* (U.S. Bureau of the Census) were utilized to identify characteristics of the counties, which could be incorporated into the model to produce these estimates. This volume contains approximately 200 descriptive variables on individual counties detailing such information as population, income level, educational characteristics, labor force, housing, and type of government. These data were used as predictors in the model. To reduce the potential predictors to a workable number and to minimize covariation and duplication of information, each variable was correlated with the total number of cases in each of the reporting jurisdictions. Only variables that were significantly correlated with the number of cases were retained. This process reduced the number of variables of interest to approximately 100 (depending on the particular survey year in question). Next, the reduction procedure created summary variables, grouping these individual variables under broader headings. A principal components factor analysis of the variables yielded summary factors that incorporated the distinctions found in the original variables, accounting for approximately 70 percent of the variance of the original variables.

After determining that these summary factors were reliable descriptors of the counties, they were utilized to develop regression equations that produced estimates of the number of cases handled by each jurisdiction reporting within each cluster. Applying the same equations to the non-reporting jurisdictions, estimates of individual caseloads were produced. By summing over the caseloads (either reported or predicted), it was possible to estimate the total number of cases from all the counties in a cluster and, subsequently, the total number of cases handled nationally. (The 1975 estimating procedures differ slightly from those described above, for a discussion of 1975 estimating procedures, see *Delinquency 1975*, pp. II-4-II-11).

It was also necessary to estimate the nature of all the cases handled by the juvenile court system—for example, type of offense, sex of offender, reason for referral, time in system, and disposition. By using the assumption that the reporting courts in a cluster approximately represent the non-reporting courts' data, a weighting procedure was developed to estimate the nature of the cases in the cluster as a whole, including the non-reporting courts. If, for example, the reported cases within a cluster represented 25 percent of the total estimated number of cases for that cluster, by weighting each case by a factor of 4 (total estimated number of cases in the cluster divided by the total number of cases from the reporting jurisdictions in the cluster), it was possible to represent not only the number of cases but also the nature of the cases. By employing this process of developing weights to permit the sample data to represent the population, detailed estimates of the nation's juvenile court cases were produced.

Data collection

Identification of States that collect information on the processing of youths through the juvenile justice system is made through contact with individuals and agencies with responsibility to collect or to report juvenile court statistics. States that compile information on a regular basis and have data on a computer-readable medium are sent written requests for the data; the information is then transmitted to the National Center for Juvenile Justice.

Variations in information compilation and interpretation are checked with the respective State personnel and edited by the National Center for Juvenile Justice staff. The data are then transformed into a standard format for the national file. Jurisdictional differences in juvenile court statutes and procedures used to collect the data cause some problems with uniformity that cannot be corrected. The Source notes, among other limitations of the data, the following:

—The accuracy (reliability and validity) of the original coding process is unknown.

—There are wide ranges of definitions regarding court dispositions.

—The reasons for referral to court and their definitions vary dramatically.

—Some State statutes exclude major crimes (i.e., homicide, forcible rape, and aggravated assault) from the jurisdiction of the juvenile court, while other State statutes exclude types of minor crimes (i.e., fish and game violations).

—Some States differentiated between specific types of crime, while others used broader categories for their offenses (i.e., larceny was alternately defined as grand larceny, petit larceny, shoplifting, and larceny except shoplifting).

—Some States changed their reporting system which altered some of the variables and values reported during the reporting period.

—The offense labels are not always an accurate indicator of actual behavior (i.e., larceny may vary from stealing bubble gum to the theft of a handgun).

—The data represent cases disposed of by courts; they do not represent individuals, nor do they represent incidents.

Definitions of terms

Unit of count—The unit of count refers to a case disposed of by a court with juvenile jurisdiction during the reporting year. The term "disposed of" means that some definite action was taken or some treatment plan was decided upon or begun. Each "case" represents a youth referred to court, with or without a petition during the year, or a new referral for one of the reasons described in "reason for referral"; it does not include traffic, dependency and neglect cases, or special proceedings brought before the court.

Race—The reporting of race varied greatly. Some States reported white, black, and other, while a few States reported ten categories of race. For the purpose of consistency among States, three categories of race were selected. The "other" category refers to all races which were reported as anything other than white or black.

Source of referral:

Law enforcement agency—The term "law enforcement" should be interpreted as including metropolitan police, State police, park police, sheriffs, constables, police assigned to the juvenile court for special duty, and all others performing a police function with the exception of probation officers and officers of the court.

Parents or relatives—This category includes the youth's own parents, foster parents, adoptive parents, step parents, grandparents, aunts, uncles, and other legal guardians.

School department—This term includes counselors, attendance officers, teachers, principals, superintendents of schools, and members of the board of education.

Probation officer—A probation officer was considered to be an officer of the court or any person designated to perform a probation function.

Social agency—This category includes both public and private agencies, such as a department of public welfare, the board of health, a children's aid society, a child-welfare board, and institutions caring for children (such as homes for dependent children, hospitals, group homes, runaway homes, and agencies that perform functions of after-care, parole, and correction).

Other court—1975-77: This category includes any court which is physically located in another district, has no legal jurisdiction over the case, or has concurrent jurisdiction with the juvenile court that had original jurisdiction over the case; 1978: Includes any court other than the court disposing of the case.

Reason for referral—1975-77: This includes attempting to commit or committing offenses (behavior that is defined as constituting juvenile delinquency or in need of supervision by State or local law), but does not include traffic, dependency and neglect cases; or special proceedings brought before the court; 1978: attempts to commit an offense were included under the offense behavior, except for attempted murder, which was included in the assault category.

Homicide—This offense consists of any willful or negligent killing of one person by another.

Forcible rape—This offense involves forced carnal knowledge of one person by another against the will of the victim. (Some States coded forcible rape and sex offenses in one category which might have been coded here or in the "sex offense" category below.)

Robbery—Robbery consists of the taking of property or something of value by use of force, violence, and/or the threat of violence; it also includes purse snatching.

Assault—This category generally includes all forms of assault from simple assault, fighting, and intimidation to cases of aggravated assault, defined as an attack by one person upon another for the purpose of inflicting severe bodily injury.

Burglary—Burglary refers to unlawful entry into a home, business, or other structure and intending to commit or committing a larceny or other offense; it also includes breaking and entering.

Auto theft—Auto theft consists of the taking of a motor vehicle by a person not having lawful access thereto and subsequent abandoning of the motor vehicle or converting of the motor vehicle for the use of the thief or another person; it also includes unauthorized use, grand theft auto, joyriding, and operating a vehicle without the owner's consent.

Larceny—1975-77: This category includes stealing, taking and carrying, leading, riding, or driving away (except motor vehicles) the personal property of another person without claim of right, with the intent to deprive them of their ownership, or to convert such property to the use of the thief or another person; it also includes shoplifting, forgery, fraud, and larceny by check; 1978: Included some purse snatching without force.

Weapons—This category consists of acts in violation of law regulating or prohibiting the possession, carrying, use, manufacture, or sale of weapons or weapon accessories.

Sex offense—This offense includes all law violations of a sexual nature excluding forcible rape; it includes prostitution, pandering or procuring, fornication, buggery, incest, indecent exposure, indecent liberties, sodomy, and statutory rape. (Some States include forcible rape under this category.)

Drugs—The violation of drug laws including unlawful possession,

sale, manufacture, use, furnishing, etc., of narcotic or non-narcotic drugs.

Drunkness—This category includes alcoholic intoxication, drunkenness, and associated behavior forbidden by local law.

Disorderly conduct—Disorderly conduct consists of any behavior that is a breach of the peace under local law; it includes unlawful assembly, disturbing the peace, and disturbing meetings.

Vandalism—Vandalism refers to the willful or malicious destruction, injury, disfigurement, or defacement of public or private property, real or personal, without consent of the owner or person having custody or control; it also includes cutting auto tires, drawing obscene pictures on public rest room walls, smashing windows, destroying school records, tipping over gravestones, and defacing library books. (Some jurisdictions report cases of arson under vandalism.)

Arson—This offense includes willful or malicious burning of personal or public property; it may include burning buildings, houses, boats, ships, contents of buildings, crops, and woods. (Some jurisdictions report cases of arson under vandalism.)

Other delinquency—This category includes all other criminal offenses that do not fall easily under any of the previous reasons for referral and those offenses reported by the court as "other."

Running away—This offense consists of one or more abscondences from a court or from an individual, agency, or institution to which the child has been committed, or to a single or multiple act of leaving or staying away from his/her own home without permission.

Truancy—Truancy refers to unauthorized absence from school as defined under the law.

Curfew violation—A curfew violation refers to being on the street or in a public place after a specified time in violation of a local law applicable only to children.

Ungovernable behavior—Such behavior indicates that the child is persistently beyond the control of parents or others who have charge of the youth.

Possessing or drinking liquor—1975-77: This category includes only those liquor offenses for which adults would not be arrested; 1978: Includes only those liquor offenses which are illegal for children.

Other status—This category includes other status offenses such as endangering the morals of self or others, association with immoral persons, and engaging in an occupation dangerous to life or limb.

Trespassing—(defined in 1978): This includes criminal trespassing, trespassing on private property, and prowling.

Manner of handling—Indicates whether the case was processed with or without the filing of a petition. For courts that did not report such data on cases, the information was often derived from data indicating that a case was handled "formally" or "informally," resulted in a "judicial" or "nonjudicial" disposition, was disposed of "at intake" or at court hearing, or similar data indicative of the degree of formality or judicial involvement in the matter.

APPENDIX 13 Client Oriented Data Acquisition Process (CODAP), 1979 Annual Data—Survey methodology and definitions of terms

NOTE: This information was excerpted from the U.S. Department of Health and Human Services, National Institute on Drug Abuse, Annual Data 1979, Data from the Client Oriented Data Acquisition Process (CODAP), Statistical Series E, No. 17 (Washington, D.C.: U.S. Government Printing Office, 1980), pp. 1, 2, 381-387. Non-substantive editorial adaptations have been made.

Limitations of the data

The data presented are based on a data file that has been edited for internal consistency. The following should be considered when using the reported data:

Each admission reported on a CODAP form does not necessarily represent a different client. To reduce multiple counting of some individuals, records that represent transfer admissions between CODAP clinics within a program are not included in the tables that contain data on clients admitted during the year.

Tables that contain data on clients discharged during the year are based on matched admission and discharge reports. Thus, discharge reports for which there were no matching admission reports are excluded from these tables.

The March 1979 revision for the "source of referral" variable essentially reflects a combining of several 1978 categories into a smaller number of categories. Except for one case (the "other" category), there is a direct correspondence between the two sets of categories. On the 1978 form there was a single "other" category, while the 1979 form has two, "other voluntary" and "other non-voluntary". For this report, data submitted as "other" in 1978 were tabulated with "other voluntary".

Although PCP was not included as a separate category until implementation of the revised CODAP forms in March 1979, some clinics had been collecting and reporting PCP data separately prior to that time. Thus, reporting of PCP as a specific category for the entire 1979 calendar year is somewhat more complete than might be presumed. During January and February, clinics reported approximately 484 PCP admissions per month; the monthly average for March through December was about 739 PCP admissions. Had PCP data been collected separately by all clinics for the entire year, PCP admissions would have probably accounted for almost 3.8 percent of admissions in 1979 rather than 3.5 percent as shown in the national tables, and the proportion of hallucinogen admissions (which included PCP on previous forms) would have been closer to 2.4 percent rather than the 2.7 percent shown.

In January of 1980 it was determined that 15 clinics in Hawaii that provided treatment for alcohol clients only should not be included in the CODAP data reports. Data from these units had been included, however, in all of the 1977 and 1978 reports as well as in the first three provisional quarterly reports for 1979. These client data were removed from the system for all subsequent reports (including all 1979 NIDA Series E reports). If these units are excluded from the 1978 annual national figures, alcohol accounts for 8.2 percent of admissions rather than 9.2 percent as previously reported. Thus the 1979 data, which show 7.5 percent of all admissions for primary alcohol clients, represent less of a decrease in alcohol admissions than might have been presumed. Revised quarterly figures for drug distributions are presented in U.S. Department of Health and Human Services, National Institute on Drug Abuse, *Trend Report, January 1976—September 1979*, Statistical Series E, No. 15 (Washington, D.C.: U.S. Government Printing Office, 1980).

Definitions of terms

Age at admission—Derived by subtracting a client's year of birth from the year of admission to treatment.

Age at first use—The chronological age at which a person first used the drug now listed as his/her primary drug problem.

Drug users (clients)—Persons admitted to a clinic for the prevention or treatment of a drug problem; they are assigned to a treatment plan and receive the clinical and supportive services identified in the regimen. Criteria for completing treatment are established at this time. When a clinic's Federal contract or grant states that both prevention and treatment services are to be provided, the persons receiving prevention services are also considered clients. The guidelines of the Federal funding agencies state that a client is considered active if he/she receives treatment services at least once every 30 days. Only active clients are reported on CODAP. If the client has not received treatment or direct services for 30 days, he or she must be discharged from the CODAP reporting system. Partial services are occasionally offered to community groups, clients' families, and individuals; this activity is not reported by CODAP clinics because the people involved in receiving partial services are not treated for diagnosed drug problems.

Drug types—Drugs are classified into 12 categories: heroin; other opiates—illegal methadone, opium, morphine, codeine, Demerol, Dilaudid, etc.; marijuana/hashish—includes THC, "hash oil," other cannabis preparations; barbiturates—phenobarbital, Seconal, Nembutal, etc.; amphetamines—Benzedrine, Dexedrine, methamphetamine, "speed," and related compounds such as Preludin, Ritalin, etc.; alcohol; cocaine; hallucinated compounds such as Preludin, Ritalin, etc.; LSD, mescaline, psilocybin, MCA, DMT, mushrooms, peyote, etc.; PCP—"angel dust"; tranquilizers—Librium, Valium, Miltown, etc.; other sedatives or hypnotics—methaqualone, chloral hydrate, Placidyl, Doriden, etc.; other—includes inhalants (glue, nitrous oxide, organic solvents, etc.), over-the-counter drugs (legally obtained, non-prescription medication), as well as any drug not falling into one of the above categories.

Employment status—The following categories are used to indicate if the client is legally employed (including self-employment) at the time of admission. To qualify as being employed, the client's earnings must be subject to income taxes. For example, stipends and welfare payments are not taxable; therefore, the client receiving these monies would not be considered employed. The categories are: unemployed, not seeking work—has not sought employment in last 30 days; unemployed, seeking work—has sought employment in last 30 days. This includes registering with employment agencies, etc.; employed, part-time—working less than 35 hours a week; employed, full-time—working 35 or more hours a week. This category also includes clients with concurrent full-time and part-time positions.

Highest grade level completed—Number of years of education the client completed.

Marital status—The following categories indicate the client's marital status at time of admission: never married—this includes annulment; married—this includes common-law marriage and those clients who consider themselves married; widowed; divorced; separated—this refers to married persons not living together by choice, whether or not the separation is legal.

Primary drug—The drug type that is the major problem in that it has caused the most dysfunction. **Primary drug at admission** is the drug problem for which the client was admitted to treatment. Similarly, **primary**

drug at discharge is the drug problem, if any, causing the most dysfunction at the time of discharge from treatment. Only one primary problem may be reported at admission and one at discharge.

Race/ethnicity—Based on staff observation and client self-identification, the following categories have been selected to conform with the Federal Interagency Committee on Education Ad Hoc Subcommittee on Racial and Ethnic Definitions: white (not of Hispanic origin)—a person having origins in any of the people of Europe, North Africa, or the Middle East; black (not of Hispanic origin)—a person having origins in any of the people of sub-Saharan Africa; Hispanic—Mexican, Puerto Rican, Cuban, or other Hispanic; other—includes American Indian (a person having origins in any of the original people of North America), Alaskan Native (a person such as Aleut or Eskimo Indian who has origins in any of the original people of North America), and Asian or Pacific Islander (a person having origins in any of the original people of the Far East, Indian subcontinent, Southeast Asia, or the Pacific Islands).

Reason for discharge—The circumstances under which a client leaves treatment. Several types of discharge are reported as follows:

Completed treatment, no drug use—the client has successfully completed the prescribed treatment regimen in the program and no further treatment services are prescribed within this program or any other program; however, follow-up contact may be recommended. The client is no longer using illegal drugs or abusing alcohol.

Completed treatment, some drug use—the decision of the clinic staff is that the client has successfully completed the prescribed treatment regimen in the program, and no further treatment services are prescribed within this program or any other program. The client meets all other criteria for completion of treatment except concerning the use of drugs during the month prior to discharge.

Transferred/referred—the client is discharged from the clinic and, with no interruption in treatment, is transferred to another clinic that is within the same program; or, the client is discharged from the clinic and

referred to another drug treatment program or to a medical or psychiatric institution.

Program decision to discharge client for noncompliance with program rules—treatment is not completed; the client is discharged for violation of program rules.

Left before completing treatment—the client is discharged because of his/her decision to leave the clinic before completion of treatment, or his/her refusal to continue a further phase of treatment in this or any other program.

Incarcerated—treatment is not completed; the client is discharged because of incarceration.

Died—the client died before completing treatment; however, this does not necessarily imply a drug-related death.

Source of referral—The following categories indicate the agency, individual, or legal situation through which the client is committed to or referred to treatment: self-referral; hospital—includes a general or mental hospital; community services—includes a community mental health center, Federal, State, or local agencies, a private physician, psychiatrist or other mental health professional, central intake unit, or another drug treatment program; family/friend; employer/school; other voluntary; Treatment Alternatives to Street Crime (TASC); Federal, State, and county probation; Federal, State, and county parole; other non-voluntary—includes police, Narcotic Addict Rehabilitation Act (NARA) I, and NARA II; other—includes Bureau of Prison (BOP) and other BOP (formerly DAP), and Veterans Administration Armed Services Medical Referral Office (VA ASMRO).

Arrests within 24 months prior to this admission, number of—Indicates the number of times the client has been arrested and booked during the 24 months prior to admission. This item does not imply conviction and relates to alleged offenses. Arrests for traffic infractions are not included. However, arrests for driving while under the influence of alcohol or drugs and driving while intoxicated because of alcohol or drugs are included.

APPENDIX 14 Sentenced Prisoners Under 18 Years of Age in Adult Correctional Facilities—Survey methodology and definitions of terms

NOTE: The following information was excerpted from Harvey D. Lowell, Margaret McNabb, and Anthony J. DeMarco, *Sentenced Prisoners Under 18 Years of Age in Adult Correctional Facilities: A National Survey* (Washington, D.C.: National Center on Institutions and Alternatives, 1980), pp. 10, 11, 27-35, Appendix I. Non-substantive editorial adaptations have been made.

Survey methodology

Data were obtained through the use of a questionnaire. Telephone contacts were used to establish the location of the desired information within the adult correctional system and to establish accountability for compiling the data requested. After questionnaires were sent out, additional correspondence and telephone contacts were made when necessary in order to expedite data gathering. Telephone cross-checks were made with adult correctional personnel and individual institutions of selected States. Respondents were asked to provide data constituting a one-day picture of the population of sentenced prisoners under 18 years of age in adult correctional systems; Jan. 1, 1979 was selected as the survey date.

Population data used to compute rates per 100,000 youth 14 to 17 years of age are from the U.S. Bureau of the Census, *Population Reports*, 1976, Series, P-25, No. 646.

Definitions of terms

Sentenced prisoners—Includes all sentenced prisoners 17 years of age and under who were incarcerated in adult correctional facilities as of Jan. 1, 1979. It does not include prisoners or parole violators who were being detained or who were incarcerated in State correctional facilities on holding status.

Age—Information pertaining to the age of sentenced prisoners as of Jan. 1, 1979. If this information was not available, other information was accepted with an explanation of the basis upon which age distinctions were made (e.g., age at intake, sentencing date, offense).

Adult correctional facilities—Includes all facilities for the incarceration of sentenced offenders that are under the jurisdiction of the States' adult correctional system. It includes all prisons, halfway houses, community residential centers, work release or prerelease programs, etc., for offenders who have a maximum sentence length of more than 1 year. It does not include facilities for juvenile delinquents, facilities operated by the juvenile corrections department or the department of mental health, detention facilities or county jails, or facilities for civil commitment.

Offenses—The data refer to the offense leading to incarceration; in cases in which more than one offense was committed, only the most serious charge was recorded. Except as indicated, offense distinctions correspond to common practice in reporting jurisdictions. Attempts and conspiracies to commit offenses fall under the category of "other crimes," except in the case of murder. Offenses were categorized according to standard descriptions and were broken into three categories: crimes against people, crimes against property, and crimes against the public order. Definitions were formulated and definitional questions (arising during the conduct of the study) were decided with reference to Clark and Marshall, *A Treatise on the Laws of Crimes* (Chicago: Callaghan and Company, 1952), pp. 489-934.

Crimes against people—murder 1; murder 2; manslaughter/murder 3; attempted murder; rape (includes sodomy); robbery (includes armed robbery, strongarm robbery, robbery involving use of force, etc.; does not include purse-snatching); aggravated assault (includes assault with intent to do serious bodily harm); kidnaping; sex offenses; other crimes

against people (including reckless endangerment, terroristic threats, purse-snatching, assault, assault and battery).

Crimes involving property—arson; auto theft (includes grand theft auto, use without authority, unauthorized use of a motor vehicle); burglary (includes breaking and entering); larceny/theft/stolen goods (includes all forms of larceny and theft other than auto theft, petty larceny, grand larceny, theft by deception, and receiving stolen property, possession of stolen goods, shoplifting, hijacking); extortion/embezzlement/fraud/forgery; other crimes involving property (includes counterfeiting, possession of counterfeit money, malicious mischief, destruction of property, vandalism, trespassing).

Crimes against the public order—narcotics/use and possession; narcotics sale (includes possession with intent to sell, and manufacture); prostitution; other crimes against the public order (includes drunk and disorderly conduct, public nuisance, prison breach, vagrancy, alcohol, tobacco and firearms violations, perjury, gambling, criminal negligence, possession of a dangerous weapon).

Explanation/rates for States

State differentials in both the collection and availability of data will affect the consistency and comparability of data across States. The notes that follow outline such differences with respect to reporting practices, data collection problems, and other pertinent factors in State and county criminal justice operations.

Alabama—Alabama provided data pertaining to the total number and ages of youth offenders in Alabama's adult prison system. State officials were not able to identify the offenses for which all youth had been sentenced. Data were provided for Sept. 30, 1978.

Alaska—No significant variations in reporting practices or definitions were noted.

Arizona—Data pertinent to youth in Arizona's adult prisons were provided for Sept. 24, 1979. The total number of offenders were not included in the data.

Arkansas—No significant variations in reporting practices or definitions were noted.

California—Only 14 prisoners were under 18 years of age. The low number of youth in adult corrections in California is due to the large population in California Youth Authority facilities. The State data is representative of the population on Dec. 31, 1978, a year prior to the survey date.

Colorado—All the requested data were provided. Data for adult persons were provided for Apr. 27, 1979.

Connecticut—The method of characterizing offenses is somewhat different from that requested. Connecticut has a "youthful offender" statute from which individual offenses may not be disclosed. Offenders within this category are therefore listed under the heading "unreported" on the Connecticut data. The data includes the crimes of auto theft within the larceny category and those offenders under auto theft are only those convicted of "Use of motor vehicle without permission". A second violation occurs because Connecticut operates under an integrated jail/prison system. The data, therefore, includes offenders in both jails and prisons

and it is impossible to discriminate between offenders. The data simply reflect the most serious offense of each inmate while representing a combined picture of misdemeanors and felons. It does not necessarily follow that those offenders with less serious convictions are held in the State's jails rather than prisons. Data were provided for Sept. 11, 1979.

Delaware—The Delaware Department of Corrections reported that its adult institutions do not hold inmates under 18 years of age.

District of Columbia—Only four youth offenders were incarcerated in the District of Columbia's adult institution; most are sent to the Youth Center at Lorton and segregated from the general population. Data were reported for Oct. 23, 1979.

Florida—No significant variations in reporting practices or definitions were noted.

Georgia—Georgia provided data for Aug. 21, 1979. No other differences from standard procedures were reported.

Hawaii—Hawaii's adult correctional institution reported no offenders less than 18 years of age.

Idaho—No significant variations in reporting practices or definitions were noted.

Illinois—Illinois corrections officials reported that due to the classified nature of the records, the Illinois Department of Corrections was unable to provide comprehensive information to the survey. Thus, their data do not offer a complete picture of the youth offender population in Illinois. Fifty-one males and 1 female 17 years of age were incarcerated in the adult correctional system on Jan. 1, 1979. However, the offense data supplied represent the total number of offenses, rather than the most serious offense, for each individual offender (79 offenses). It is therefore impossible to identify the offenses that had been committed by the actual 52 inmates. Since male and female offenders were combined, it is also impossible to determine the offenses committed by the one female offender.

Indiana—No significant variations in reporting practices or definitions were noted.

Iowa—No significant variations in reporting practices or definitions were noted.

Kansas—The data reflect the population as of June 30, 1979.

Kentucky—The Kentucky Department of Corrections was unable to provide any information other than population figures. The data reflect the population on Dec. 19, 1979.

Louisiana—The data reflect the inmate population on Sept. 13, 1979. At the time of the survey, eight youths were being held in parish (i.e., county) jails under department of corrections jurisdiction.

Maine—No significant variations in reporting practices or definitions were noted.

Maryland—The data on inmates in the State correctional system do not show a breakdown by age within each offense category. The data also exclude 380 State sentenced offenders held in local jails due to an overflow at the State level and would therefore, exclude any offenders under 18 years old within that population.

Massachusetts—No significant variations in reporting practices or definitions were noted.

Michigan—State institutional data reflect the State population on Dec. 31, 1978.

Minnesota—No significant variations in reporting practices or definitions were noted.

Mississippi—No significant variations in reporting practices or definitions were noted.

Missouri—No significant variations in reporting practices or definitions were noted.

Montana—No offenders incarcerated in Montana's State prison system

were under the age of 18.

Nebraska—No significant variations in reporting practices or definitions were noted.

Nevada—No significant variations in reporting practices or definitions were noted.

New Hampshire—No significant variations in reporting practices or definitions were noted.

New Jersey—The data were reported for Aug. 9, 1979.

New Mexico—No significant variations in definitions or reporting practices were noted.

New York—The data do not include any offenders under 16 years of age. All offenders 15 years of age and under are incarcerated in youth facilities until they become 16. The data also include a category of "youthful offenders" constituting approximately 45 percent of New York's young adult prisoner population and for whom no offense designation can be made.

North Carolina—The large number of unreported offenses occurs because it includes all other crimes, not peculiar to any specific category.

North Dakota—No significant variations in reporting practices or definitions were noted.

Ohio—There were no variations from standard reporting practices for the Ohio data.

Oklahoma—No significant variations in reporting practices or definitions were noted.

Oregon—No significant variations in reporting practices or definitions were noted.

Pennsylvania—No significant variations in reporting practices or definitions were noted.

Rhode Island—The Rhode Island correctional system is structured as an integrated jail/prison system, under the authority of the department of corrections.

South Carolina—No significant variations in reporting practices or definitions were noted.

South Dakota—The data were reported for July 1, 1979.

Tennessee—While data reported for the survey date, Jan. 1, 1979 identified only 8 offenders, corrections personnel indicated that 26 additional youthful offenders were committed to the State system between Jan. 1, and July 1, 1979.

Texas—No significant variations in reporting practices or definitions were noted.

Utah—No significant variations in reporting practices or definitions were noted.

Vermont—No significant variations were apparent in the data on offenders in the State prison.

Virginia—No significant variations in reporting practices or definitions were noted.

Washington—No significant variations in reporting practices or definitions were noted.

West Virginia—West Virginia's State correctional institutions do not incarcerate offenders under the age of 18.

Wisconsin—No significant variations in reporting practices or definitions were noted.

Wyoming—No significant variations in reporting practices or definitions were noted.

Federal Bureau of Prisons—The Bureau of Prisons reported that on June 4, 1979, four youths were held in Federal adult institutions. While two were incarcerated for violent crimes, the offenses for the remaining two were under "other public order crimes." They were convicted of violations of immigration law.

do not measure any systematic biases in the data. Because the full extent of nonsampling error is unknown, however, particular care should be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates. Statistical results from the survey were used for analytical purposes in this report only when based on an estimated count of 300 or more male inmates (or inmates of both sexes) and of 100 or more female inmates. When computed on smaller bases, the estimates were considered statistically unreliable. Nevertheless, such figures are shown in the data tables to permit such combinations of data categories as may serve the need of individual users.

Application of standard errors

Results presented in this report were tested to determine whether or not statistical significance could be associated with observed differences between figures. As a result of such tests, all statements of comparison are significant at a 1.6 standard error level or better, and the vast majority are significant at a minimum level of 2.0 standard errors. This means that, for most comparisons cited in the report, the estimated difference is greater than twice the standard error of the difference. For this report, differences that failed the test at 1.6 standard errors (i.e., at a 90-percent level of confidence) were not considered statistically significant.

APPENDIX 16 Prisoners in State and Federal Institutions on December 31, 1979—Survey methodology and definitions of terms

NOTE: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1979, National Prisoner Statistics Bulletin SD-NPS-PSF-7 (Washington, D.C.: U.S. Government Printing Office, 1981), pp. 37, 42-47. Non-substantive editorial adaptations have been made.

Survey methodology

Data presented in this report are based on yearend 1978 and 1979 inmate counts and on enumerations of prisoner transactions during 1979. As in past years, the data were collected with a standard questionnaire transmitted to the appropriate State authorities and the Federal Prison System. The final date for receipt of information was in March 1980.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. This procedure was also used by the Federal Prison System in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error. Response errors were held to a minimum by means of a systematic telephone follow-up and, where necessary, other control procedures. Thus the yearend counts are generally considered reliable. Because of the absence of standardized administrative and recordkeeping practices from State to State, the data for admissions and departures are not always entirely comparable across jurisdictions.

National Prisoner Statistics (NPS) category definitions

Jurisdiction population, Dec. 31, 1979—Includes all inmates under State jurisdiction on Dec. 31, 1979, regardless of location. Does not include other jurisdictions' inmates (for example, inmates from other States, pretrial detainees) merely housed in prisons.

Custody population, Dec. 31, 1979—Includes all inmates in the State's custody, that is, housed in State correctional facilities on Dec. 31, 1979. Does not include State inmates housed outside State prison facilities; does include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in State's facilities.

Overcrowding, Dec. 31, 1979—Includes all inmates housed in local jails on Dec. 31, 1979, as a direct result of State prison overcrowding. Does not include inmates held in local jails for other reasons (for example, work release, court appearance, etc.).

Admissions

New court commitments—Includes all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences. This category includes probation violators entering prison for the first time on the probated offenses. Does not include parole violators with new sentences as new court commitments.

Parole violators with new sentences—Includes all parolees returned with new sentences.

Other conditional release violators with new sentences—Includes all individuals on conditional release (other than parole) who are returned with new sentences, for example, returns from supervised mandatory release, from shock probations, etc.

Parole violators only, no new sentences—Includes all parolees returned only for formal revocations of parole that were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was

held only temporarily pending a hearing, no admission occurred for NPS purposes.

Other conditional release violators only, no new sentences—Same as above, substituting conditional release violator for parole violator.

Transfers from other jurisdictions—Includes all inmates transferred to this State's jurisdiction to continue sentences already in force. Does not include admissions if State does not acquire jurisdiction. Does not include movements from prison to prison within State.

Absent without leave (AWOL) returns, with or without sentences—Includes all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapee returns, with or without new sentences—Includes all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Returns from appeal/bond—Includes all inmates reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Does not include returns from short-term movements (that is, less than 30 days) to court (that is, where the State retains jurisdiction).

Other admissions—Includes all other admissions not covered by the above categories.

Releases

Unconditional—An unconditional release occurs only if the released inmate cannot be reimprisoned for any sentence for which he was in prison.

Expirations of sentence—Includes all inmates whose maximum court sentences minus credits have been served.

Commutations—Includes all inmates whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.

Other unconditional releases—Includes all other unconditional releases not covered by the above categories.

Conditional—A conditional release occurs if the released inmate, upon violating the conditions of his release, can be imprisoned again for any of the sentences for which he was in prison.

Probations—Includes all inmates who have been placed under probation supervision and conditionally released; includes all shock probation (split sentence) releases.

Supervised mandatory releases—Includes all inmates who must, by law, be conditionally released. This type of release may also be called mandatory conditional release.

Paroles—Includes all inmates conditionally released to parole.

Other conditional releases—Includes all other conditional releases not covered by the above categories.

Death:

Executions—Self-explanatory.

Illnesses/natural causes—Self-explanatory.

Suicides—Self-explanatory.

Accidental injury to self—Includes all inmates who accidentally

caused their own deaths (for example, a fall from a ladder, mishandling electrical equipment).

Death caused by another person—Includes all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.

Other deaths—Includes all other deaths not covered by the above categories.

Other releases:

Absent without leave (AWOL)—Includes all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapes from confinement—Includes all unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Transfers to other jurisdictions—Includes all inmates who were transferred from one State's jurisdiction to another to continue sentences already in force. Does not include the release if State does not relinquish jurisdiction. Does not include movements from prison to prison within State.

Releases to appeal/bond—Includes all inmates released from correctional jurisdiction to long-term jurisdictional absences on appeal or bond. Does not include short-term movements (that is, less than 30 days) to court (that is, where the State correctional system retains jurisdiction).

Other releases—Includes all other releases not covered by the above categories.

Race

White—A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black—A person having origins in any of the black racial groups of Africa.

American Indian or Alaskan Native—A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Other—Any other race not covered by the above categories.

Not known—Any inmate whose race is unknown.

Ethnic origin

Hispanic—A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

Not Hispanic—A person not covered by the above category.

Not known—Anyone whose ethnic origin is unknown.

Explanatory notes for States

Differing legal and administrative requirements as well as diverse recordkeeping practices among jurisdictions hamper efforts to collect uniform nationwide data on the number and movement of inmates in State and Federal correctional institutions. Not all jurisdictions are able to provide information that meets NPS definitions. For some, the discrepancies between what is reported and what meets the criteria are minor, but in others these discrepancies are more serious and, overall, serve to limit the comparability of data among jurisdictions. Limitations in State data, of course, carry over into regional and national figures, which, as a consequence, should be viewed as providing an order of general magnitude rather than precise totals.

The notes that follow identify deviations from the category definitions used in the 1979 questionnaire, provide details on the content of "other" admission and release categories, and specify any revisions that should be taken into account when comparing 1978 and 1979 figures. State inmates housed in local jails because of overcrowding are generally considered to be under State jurisdiction. Exceptions to this rule have been noted below. Some States included an adjustment residual in their admission or release figure in order to balance the yearend 1978 count with the yearend 1979 count.

Alabama—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Differences between jurisdiction and custody counts for 1979 are due to persons housed in local jails. New court commitments: Includes some split sentence violators and some parole violators with new sentences. Other admissions: Adjustment residual. Other conditional releases: Unconditional court-ordered releases.

Alaska—All data include both jail and prison inmates, as prisons and jails form an integrated system. Admission and release figures are estimates based on 1978 data. Parole violators, no new sentence: Includes parole violators with new sentences and other conditional release violators with and without new sentences. Supervised mandatory releases: Includes some (fewer than 5 percent) expirations of sentence and releases to probation of inmates serving a split sentence. The remainder are supervised releases, many of which convert to probation shortly after discharge. Other releases: Adjustment residual.

Arizona—Jurisdiction counts exclude, but custody counts include, persons receiving split sentences, part to be served in prison and the remainder on probation. Arizona considers the incarceration period of such sentences to be jail time served in prison. New court commitments: Includes other conditional release violators with and without new sentences and escapees returned after a prolonged period of absence. Other conditional releases: Includes discretionary releases, work furloughs, and temporary releases.

Arkansas—Yearend jurisdiction counts are revised from those reported in the 1978 publication. Other unconditional releases: Unconditional court-ordered releases. Other conditional releases: Releases under provisions of the Youthful Offender Act. Other releases: Adjustment residual.

California—Other admissions: Includes returns from appeal or bond and court movements occurring on the same day. Other unconditional releases: Unconditional court-ordered releases. Other releases: Includes releases to appeal or bond and court movements not occurring same day.

Colorado—Other unconditional releases: Unconditional court-ordered releases. Race: Figures are estimates.

Connecticut—All data include both jail and prison inmates, as prisons and jails form an integrated system. Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. New court commitments: Includes some parole violators and escapees returned with new sentences. Other admissions: Adjustment residual. Expiration of sentence: Includes some releases to probation. Large increases over 1978 probably due to inaccurate reporting in 1978. Other releases: Adjustment residual.

Delaware—All data include both jail and prison inmates, as prisons and jails form an integrated system. Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from the data unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of movement transactions and the yearend population. New court commitments: Includes probation violators. Other unconditional releases: Unconditional court-ordered releases. Other releases: Releases to Drug Rehabilitation Center.

District of Columbia—The District of Columbia has an integrated jail and prison system. Data include unsentenced inmates and those with sentences of 1 year or less, with the exception of those housed in the District of Columbia Jail or Detention Center. Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, were excluded unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions and the yearend population. Parole violators with and without new sentences and other conditional release violators with and without new sentences: The total number of violators is accurate, but the breakdown by type is estimated from 1978 figures. Escapees and AWOLs returned: May include some sentenced to 1 year or less. Expirations of sentence: Includes supervised mandatory releases with fewer than 180 days remaining on their sentences. Such persons are not considered to be subject to the conditions normally attached to this type of release. Supervised mandatory releases: Includes only those supervised mandatory releases with 180 days or more remaining on their sentences. Escapees and AWOLs: May include some sentenced to 1 year or less. Other releases: Type not specified. Race: Estimates based on 1978 data.

Florida—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Breakdown by sex and sentence length for Dec. 31, 1978 is estimated from June 30, 1978 figures. Total admissions are estimated from fiscal year 1978 admissions. Yearend jurisdiction

and custody figures for 1979 are estimated from June 30, 1979 data. Differences between jurisdiction and custody counts are due in part to persons housed in local jails. Other conditional release violators returned with and without new sentences: Estimates based on 1978 figures. Other conditional releases: Conditional pardons. Race: Racial breakdown estimated from June 30, 1979 figures.

Georgia—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Parole violators returned with new sentences: Includes parole and other conditional release violators returned with and without new sentences. Other admissions: May include some transfers from other jurisdictions. Other deaths: Cause not known. Other releases: Type not specified.

Hawaii—Data include both jail and prison inmates, as prisons and jails form an integrated system. Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Other unconditional releases: Unconditional court-ordered releases. Probation: Inmates whose sentence were reevaluated within 60 days of commitment and modified to probation. Other deaths: Cause not known. Other releases: Adjustment residual. Inmates with 1 year or less maximum sentence: Includes persons convicted of felony offenses and sentenced to 5 years probation, up to 6 months of which may be spent in jail. Race: Race data are not available for unsentenced inmates and those with sentences of 1 year or less; these are included in the "not known" category. "Other" includes American Indians and Alaskan Natives.

Idaho—Other admissions: Returns from agreement on detainees. Other unconditional releases: Releases because of acquittal or dismissal of sentence. Other releases: Releases to agreement on detainees. Unserved inmates (custody count): Civil commitments held for psychological testing and evaluation.

Illinois—Transfers from and to other jurisdictions: Illinois cannot report transfers, but it is believed that the number is very small. Other admissions: Includes returns from court. Other unconditional releases: Includes unconditional court-ordered releases, status discharges, and technical discharges. Other conditional releases: Includes conditional court-ordered releases. Other deaths: Cause not known. Other releases: Adjustment residual.

Indiana—Data on admissions, releases, and race are estimates. Other conditional release violators with new sentences: Includes parole, probation as part of a split sentence, and probation violators with or without new sentences.

Iowa—None. Other admissions: Type not specified. Other releases: Type not specified.

Kansas—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Differences between jurisdiction and custody counts are due to persons housed in other States or Federal facilities. Other conditional release violators returned with and without new sentences: May include some probation violators. Inmates with over 1 year maximum sentence (jurisdiction count—females): Unlike previous years, this category now excludes misdemeanants, who are no longer either housed in Kansas or under Kansas jurisdiction.

Kentucky—None. Other conditional release violators returned without new sentences: Includes some shock probation violators returned with new sentences. Other admissions: Type not specified.

Louisiana—Differences between jurisdiction and custody counts are due to persons housed in local jails. Other unconditional releases: Includes 22 unconditional pardons and 3 unconditional court-ordered releases. Other deaths: Cause not known. Escapees and AWOLs: Figures are estimates. Other releases: Includes court reversals whose status as conditional or unconditional is not known.

Maine—Total admissions and releases are estimated from the sex-specific increase or decrease in yearend figures. Breakdown by type of movement is based on 1978 data. Breakdown of jurisdiction count by sentence length is based on 1978 data. Differences between jurisdiction and custody counts are due to persons housed in local jails, in hospitals, in other States, or at home on work-release. Other admissions: Adjustment residual. Other deaths: Cause not known. Other releases: Adjustment residual. Race: Estimates based on 1978 data.

Maryland—All data include inmates (approximately 6 percent of total) sentenced to a maximum of 1 year or less. Differences between jurisdiction and custody counts are due to persons housed in local jails. New court commitments: Includes parole and other conditional-release violators with new sentences and returns from appeal or bond. Expiration of sentence: Figures are estimates, inasmuch as expiration and supervised mandatory

release are considered one category. Supervised mandatory releases: Figures are estimates, inasmuch as expiration and supervised mandatory release are considered one category. Race: Figures are estimates.

Massachusetts—Both yearend and movement jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Differences between jurisdiction and custody counts are due to persons housed in local jails. New court commitments: Includes parole violators returned with new sentences. Other releases: Adjustment residual. Race: Figures are estimates.

Michigan—Other conditional releases: Preparole furloughs. Other deaths: Cause not known. Other releases: Adjustment residual. Other races: Includes Mexican-Americans and some persons whose race is not known.

Minnesota—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Differences between jurisdiction and custody counts are due to persons housed in other States or in Federal institutions. Other releases: Adjustment residual.

Mississippi—Differences between jurisdiction and custody counts are due to persons housed in local jails. Other admissions: Type not specified. Other conditional releases: Includes work releases and supervised earned releases.

Missouri—Parole violators without new sentences: Includes parole violators with new sentences. Transfers from and to other jurisdictions: A small number of transfers on interstate compacts are erroneously reported in other movement categories. Other admissions: Adjustment residual. Other releases: Includes 49 court-ordered releases and 45 as an adjustment residual. Race: Figures are estimates.

Montana—Differences between jurisdiction and custody counts are due in part to two females housed in local jails. Other unconditional releases: Includes nine court-ordered releases. Other conditional releases: Includes one release to extended furlough and one conditional court-ordered release.

Nebraska—None.

Nevada—Differences between jurisdiction and custody counts are due to out-of-State inmates housed in Nevada and those in mental hospitals. Other unconditional releases: Unconditional court-ordered releases.

New Hampshire—Differences between jurisdiction and custody counts are due to persons housed in other States. Other unconditional releases: Unconditional court-ordered releases. Race: Figures are estimates.

New Jersey—Jurisdiction figures exclude 31 males held in local jails to ease overcrowding. Other admissions: Adjustment residual.

New Mexico—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Other unconditional releases: Unconditional court-ordered releases.

New York—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication to include 269 persons held at Riker's Island to ease overcrowding and to include 1 woman incorrectly omitted in 1978. Differences between yearend jurisdiction and custody counts for 1979 are due to persons housed at Riker's Island. Movement figures incorrectly exclude these persons. Parole violators with and without new sentences: Includes other conditional release violators with and without sentences. Transfers from and to other jurisdictions: Includes transfers from and to the Department of Mental Hygiene. Other admissions: Adjustment residual. Other deaths: Cause not known. Other releases: Adjustment residual. Race: "Not known" comprises American Indians and Orientals.

North Carolina—Differences between jurisdiction and custody counts are due to persons held for safekeeping, presentence diagnosis, or for Federal authorities. Persons receiving partially suspended sentences of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the data unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions and the yearend population. Releases of inmates with partially suspended sentences are counted under "expiration of sentence" rather than "probation." Parole violators with new sentences: Includes parole violators without new sentences. Other admissions: Adjustment residual. Expiration of sentence: Includes some commutations (fewer than 10 percent). Other unconditional releases: Unconditional court-ordered releases.

North Dakota—Differences between jurisdiction and custody counts are due to Federal prisoners held in North Dakota institutions. Other conditional releases: Conditional court-ordered releases.

Ohio—New court commitments: Includes some "other conditional release violators with new sentences." Transfers from other jurisdictions:

Transfers from mental hospitals. Other unconditional releases: Sentences vacated by court. Other conditional releases: Extended medical furloughs and preparole furloughs. Deaths: Deaths classified as due to "illness or natural cause" include a small number of deaths attributable to unknown causes.

Oklahoma—Total female admissions and releases believed to be accurate, but breakdown by type is estimated from 1978 data. It is estimated that some 99 percent of all inmates are sentenced to over 1 year; therefore all prisoners are allocated to this category. Other deaths: Cause not known. Other releases: Adjustment residual.

Oregon—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. New court commitments: Figures are estimates. Other deaths: Cause not known. Other releases: Adjustment residual.

Pennsylvania—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication. Differences between jurisdiction and custody counts are due to persons housed for Federal, county, or other State authorities. Other admissions: Adjustment residual. Other unconditional releases: Unconditional discharges after release on authorized temporary absence. Such releases were excluded from this category prior to 1979.

Rhode Island—All data include both jail and prison inmates, as prisons and jails form an integrated system. Persons receiving a partially suspended sentence of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the data, unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movements transactions and the yearend population.

South Carolina—Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication and are estimates. Differences between jurisdiction and custody counts are due in part to persons housed in local jails to ease overcrowding. New court commitments: Includes a number of parole violators returned with new sentences. Parole violators with new sentences: May include some parole violators without new sentences. Other conditional release violators with new sentences: May include some "other conditional release violators without new sentences." Other admissions: Adjustment residual. Other unconditional releases: Includes unconditional court-ordered releases. Other releases: Adjustment residual.

South Dakota—Other unconditional releases: Unconditional court-ordered releases.

Tennessee—All counts include persons sentenced to exactly 1 year, resulting in an overstatement of yearend and movement populations. Differences between jurisdiction and movement counts are due in part to persons housed in local jails. Parole violators without new sentences: Includes parole violators with new sentences. Other conditional release violators without new sentences: Includes returns from extended furloughs, a program discontinued early in 1979. Transfers from and to other jurisdictions: Includes transfers from and to Federal authorities and persons on interstate compacts. Other unconditional releases: Unconditional court-ordered releases. Other conditional releases: Includes releases to extended furlough, a program discontinued early in 1979.

Texas—All data are custody figures, as jurisdiction counts were not provided. Parole and other conditional release violators with new sentences: Includes parole and other conditional release violators without new sentences. Other admissions: Includes four Mexican nationals received under treaty. Other unconditional releases: Unconditional court-ordered releases. Other conditional releases: Conditional pardons. Other

deaths: Cause not known. Other releases: Includes 46 male and 1 female Mexican national returned under treaty and an adjustment residual.

Utah—Other unconditional releases: Terminations of sentence by Board of Pardons.

Vermont—Data include both jail inmates (except those held in local lockups) and prison inmates, as prisons and jails form an integrated system. Yearend jurisdiction counts for 1978 are revised from those reported in the 1978 publication to exclude 23 persons with weekend sentences held in local lockups. Differences between jurisdiction and custody counts are due to persons housed out of State and in Federal facilities.

Virginia—Both custody and jurisdiction figures exclude 771 male and 40 female inmates held in county jails both to ease overcrowding and for other reasons. All of these inmates had at least 6 months remaining on their sentence and an unknown number had sentences over 1 year. Differences between jurisdiction and custody counts are due to persons housed in other States. Parole violators with new sentences: Includes parole violators without new sentences. Other unconditional releases: Absolute pardons. Other conditional releases: Conditional pardons. Other deaths: Cause not known. Other releases: Type not specified.

Washington—All jurisdiction counts exclude 135 males housed in local jails to ease overcrowding. Washington began housing such inmates in jails in September 1979. Other conditional releases: Includes three paroles to reinstatement and three unspecified conditional releases.

West Virginia—Yearend jurisdiction count for 1978 is revised from that reported in the 1978 publication to include 52 males from one institution erroneously excluded from the count. New court commitments: May include some persons returned from court after being declared unsuited to serve at a particular minimum security institution. Other admissions: Readmission following a West Virginia Supreme Court voiding of a court-ordered release. Other unconditional releases: Unconditional court-ordered releases. Other conditional releases: Includes four conditional court-ordered releases and one suspension of sentence. Other releases: Includes persons returned to court jurisdiction after being declared unsuited to serve at a particular minimum security institution.

Wisconsin—Yearend jurisdiction counts are revised from those reported in the 1978 publication. New court commitments: Includes transfers from other States. Other unconditional releases: Includes some transfers to mental hospitals, a category that Wisconsin considers to be unconditional court-ordered releases.

Wyoming—None.

Federal Prison System—Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from 1978 and 1979 counts for those with maximum sentences of over 1 year unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of these counts. Such persons (totaling 365 on Dec. 31, 1979) are included in the count of inmates with maximum sentences of 1 year or less. New court commitments: Includes "other conditional release violators with new sentences." Parole violators with new sentences: Figures are estimates based on new court commitments. Other unconditional releases: Includes 186 unconditional court-ordered releases and 3 unconditional pardons. Other deaths: Includes six deaths caused by a power plant explosion. Other releases: Consists for the most part of persons granted a release after having been transferred on a temporary basis from a correctional institution to another authority. Race: Data available only for sentenced inmates.

APPENDIX 17 Federal Prison System—Statistical Report, Fiscal Year 1979

NOTE: Data in this report are broken down into two sets of mutually exclusive categories: (1) court commitments and other-than-court commitments; and (2) prisoners under sentence and prisoners not under sentence. Beginning in fiscal year 1974, persons remanded for a mental competency determination or for a mental incompetency commitment were considered to be "study and observation" cases. The figure below presents the breakdowns within these categories:

UNDER SENTENCE	COURT COMMITMENTS	OTHER-THAN-COURT COMMITMENTS
	(1) Regular adult	(1) Parole violator
	(2) Federal Juvenile Delinquency Act	(2) Mandatory release violator
	(3) Youth Corrections Act	(3) Sentenced adult, study and observation
	(4) 18 U.S.C. 4205 (b)(1) and (b)(2)	(4) State commitments
	(5) Narcotic Addict Rehabilitation Act	
	(6) Split sentence	
	(7) District of Columbia, juvenile	
NOT UNDER SENTENCE		(1) Mental competency determination
		(2) Mental incompetency commitment
		(3) Federal Juvenile Delinquency Act, study and observation
		(4) Youth Corrections Act, study and observation
		(5) Narcotic Addict Rehabilitation Act, study and observation

The following information was taken from the U.S. Department of Justice, Federal Prison System, Statistical Report, Fiscal Year 1975 (Washington, D.C.: Federal Prison System, 1977), pp. 113-114. Revisions have been made on the basis of Criminal Code, Title 18, United States Code, with amendments to July 15, 1978, and information received from the Federal Bureau of Prisons.

Regular adult—A District of Columbia adult, military prisoner, or other individual who qualifies under the parole eligibility provisions of 18 U.S.C. 4202 and 4205(a), or 26 U.S.C. 5871 and 7237.

18 U.S.C. 4205(a)—An individual sentenced to a term in excess of 1 year with the parole eligibility date determined to be one-third of the maximum sentence imposed, and no more than 10 years.

18 U.S.C. 4205(b) (1)—An individual sentenced to a term in excess of 1 year with the parole eligibility date determined by the court to be less than one-third of the maximum sentence imposed.

18 U.S.C. 4205(b) (2)—An individual eligible for parole at the determination of the United States Parole Commission.

18 U.S.C. 4205(c) (Sentenced adult, study and observation)—A commitment for a study (deemed to be for the maximum sentence). The results of the study shall be provided by the Director of the Bureau of Prisons to the courts within 3 months at which time the inmate may be eligible for resentencing.

18 U.S.C. 5010(b), 5017(c) (Youth Corrections Act, indeterminate)—A youth offender or young adult sentenced for treatment and supervision who shall be released conditionally under supervision on or before the expiration of 4 years from the date of conviction and who shall be discharged unconditionally on or before 6 years from the date of conviction.

18 U.S.C. 5010(c), 5017(d) (Youth Corrections Act, specific term)—A youth offender or young adult sentenced for treatment and supervision in excess of 6 years, but not to exceed the maximum of the offended statute, and who shall be released conditionally under supervision not

later than 2 years before expiration of the maximum sentence imposed.

18 U.S.C. 5010(e) (Youth Corrections Act, study and observation)—A youth offender or young adult committed for observation and study. The findings of the study shall be provided by the Youth Division of the United States Parole Commission to the court within 60 days.

18 U.S.C. 5034 (Federal Juvenile Delinquency Act, minority)—A juvenile committed for the period of his minority.

18 U.S.C. 5034 (Federal Juvenile Delinquency Act, other than minority)—A juvenile committed for a period of time less than his minority.

18 U.S.C. 5034 (Federal Juvenile Delinquency Act, study and observation)—A juvenile committed for observation and study. The results of the study shall be provided by the Director of the Bureau of Prisons to the court within 30 days.

16 D.C.C. 2318 (District of Columbia, juvenile)—A District of Columbia juvenile.

18 U.S.C. 3651 (Split sentence)—A sentence on one count consisting of a suspended sentence with a definite term, and a confinement portion of 6 months or less followed by a period of probation not to exceed 5 years.

18 U.S.C. 4244, 4245 (Mental competency determination)—An individual whose mental condition is examined prior to sentencing to determine if he is presently insane or otherwise so mentally incompetent as to be unable to understand the proceedings against him or properly to assist in his own defense.

18 U.S.C. 4246 (mental incompetency commitment)—A person found

to be mentally incompetent and committed until such time as the person shall be found mentally competent to stand trial or until the pending charges against him are disposed of.

18 U.S.C. 4252 (*Narcotic Addict Rehabilitation Act, study and observation*)—A person committed for an examination to determine if he is an addict and likely to be rehabilitated through treatment. The examination report shall be furnished to the court by the Attorney General within 30 days.

18 U.S.C. 4253 (*Narcotic Addict Rehabilitation Act, sentenced prisoner*)—An addict committed for treatment for an indeterminate period of time not to exceed 10 years or the maximum period of time which could otherwise have been imposed.

State commitment—A State prisoner serving his State sentence in a Federal institution under contract.

Evaluation form for
Sourcebook of Criminal Justice Statistics 1981

1. For exactly what purpose did you consult the Sourcebook?

2. Was the Sourcebook adequate for that purpose? quite adequate adequate somewhat adequate not adequate
 quite inadequate
Specifically, what helped or hindered your achieving that purpose?

3. Can you suggest data from primary sources (not found in the Sourcebook) the inclusion of which would have helped you achieve your purpose? (Please give full citations.)

4. Are there data from other primary sources which you would suggest including in future Sourcebooks?

5. Can you point out specific table notes which are not clear or additional terms which need to be defined?

6. Are there sources of data included in the Sourcebook which are of strong interest to you, but of which you were not aware before consulting the Sourcebook? (Please specify sources.)

7. To achieve your purpose, was it necessary for you to consult the original source of the data? For what reason?

8. In what capacity did you consult the Sourcebook? criminal justice agency employee (specify functional area) researcher student other governmental agency employee educator other

9. On about how many separate occasions have you consulted the Sourcebook?

10. Add any additional comments you care to make.
