## FOREWORD

Crime statistics have been used and abused in the past to suit a variety of interests. Across the country policy decisions have been made, laws have been drafted and immense sums of money have been invested on the basis of information which could only have been fragmentary and has generally lacked perspective. This has not been the administrators' fault. Traditionally, precise information about crime is difficult to obtain on a national basis in federal countries. In Australia, even the basic tool of Uniform Crime Statistics" is still in the early stages. The task of the Australian Institute of Criminology from its inception, therefore, was to remedy this dearth of information and to relate statistical data in such a way that its use could be improved, decisions could be streamlined and opportunities for abuse would be minimised. It is always open to the media to alarm the public; and the law and order and human rights lobbies have to be balanced with precise information. Such information should be not only on crime but on what crime means within the general context of social and economic changes. These changes have included in the past decades an increasing population, changes in the age structure, an inordinate indulgence in law making, health and welfare provisions, increased numbers of police and large investments on the prisons.

The Institute has understood from 1975 when it really got underway that Australia needed both longitudinal and cross-sectional studies of crime related to other social indicators. It could not move itself into uniform crime statistics because legally its role was limited to one of advice. However, it has worked closely with the Australian Bureau of Statistics and the State Governments to improve recording and to develop better measures of crime, and some of these improvements are in evidence within States and between States on particular subjects.

However, to go far beyond this, the Board of Management agreed that Dr Mukherjee should undertake a study of crime in the twentieth century in Australia. This meant that over a number of years, Dr Mukherjee had to collect an enormous amount of information State by State and then work through this statistically with a view to the production of a book, which would give a more precise account of crime in Australia than had ever been available before and which would, in its own way, place Australia in advance of many other federal countries in having this kind of information about its own problems. The book having been produced, it seemed a shame that the information gathered should not be available not only to the Institute, but to other researchers in Australia for further development and for further clarification of the situation in Australia and the eight States and Territories. Accordingly, the Board of Management of the Institute approved the preparation and publication of this Source Book as proposed by the authors. This not only takes the information which was used for the earlier book and presents it to the public, but also augments it with further information which might be useful to anyone trying to get a clearer idea of what crime means in an Australian setting. The national picture is given and the information State by State is made available.

It will be known that, under the *Criminology Research Act*, the Institute services the Federal/inter-State body known as the Criminology

Research Council, which provides funds for individual researchers across Australia, encouraging local research to augment the national studies which the Institute itself undertakes. The present publication should be a tremendous help to those who will be undertaking research into crime and criminal justice and the time series data which are provided will be appreciated by scholars in this field who know only too well that any understanding of crime needs a reading within a broader social context.

Again, there are enormous costs involved in criminological research when data have to be gathered. Another purpose of this book is to reduce those costs, not only to Institutes like this, but to the individual researcher.

The intention is to update the information contained here from time to time, so that not only researchers but politicians and policy-makers will have a hand reference for the development of their approaches to crime and its prevention. It is the objective of the Australian Institute of Criminology not merely to do its own research and to service the Criminology Research Council, but to foster and develop further work on crime prevention throughout Australia. On the one hand it seeks to improve and extend the quality of research. On the other hand it seeks to streamline and make more effective the prevention of crime and the functioning of the criminal justice system. This book contributes to those objectives and it is offered as a service to anyone in Australia who has more than a passing interest in crime and its consequences for the Australian society.

Canberra  
July 1981

William Clifford  
Director

### Acknowledgements

In the production of this Source Book the assistance of a few individuals has been most valuable. Karan Walker joined the team as a research assistant for a few months, and accomplished a large number of tabulations, assisted in entering the data in the computer, and edited a substantial amount of the output. Peter Bishopp made numerous runs to CSIRO, sometimes more than once in a day, and helped in speeding up the work. Christine Grant gave the finishing touches to the page plates and helped in designing the cover. We are grateful to them all.

We are grateful to the Board of Management of the Institute for approving this project. And finally, we are indebted to the Director of the Institute, Mr William Clifford, for his continued interest in and encouragement to the project and for writing the Foreword.

### Introduction

The *Source Book of Australian Criminal and Social Statistics* is a compilation of criminal justice, demographic, social, and economic statistics, published and unpublished, in Australia since the beginning of this century. The idea for producing this volume emerged out of a study *Crime Trends in Twentieth-Century Australia* and over three-quarters of the tabulations in this volume were developed in the above study. However, a lot more work was needed to produce this volume.

The research, *Crime Trends in Twentieth-Century Australia* is a study which focussed significant attention on national level analysis. Although a number of statistical techniques were used to analyse time series data, such analysis had to be limited to a manageable size. Consequently, detailed analysis of trends in specific offences in each state could not be carried out. Therefore, a substantial body of statistical information, although available and collected, could not be exploited to the fullest extent. Even though it is possible for a researcher to spend the rest of his/her life in analysing the data in this volume, over a period of time the results of such work would become tedious, boring and indeed narrow-minded.

Periods in history are identified by certain dominating characteristics; the history of criminological research is no exception. While criminological research continues to advance quantitative work, within this ambit the 1970s have seen an emphasis on time series analysis and the use of econometric techniques. Many mathematical and statistical techniques used earlier in other disciplines were explored and utilised in criminological research in the last decade, and these are becoming effective tools in time series analysis of crime data.

There are at least five major purposes which this Source Book is intended to serve: (1) to bring together statistics relating to criminal justice aspects and other socio-economic areas which are used to analyse crime; (2) to encourage quantitative research, especially research using advanced methods and techniques; (3) to serve as an aid to administrators and policy-makers in preparing options for decisions; (4) to assist students, scholars, administrators, and policy-makers within Australia to examine comparative standing of the constituent states and territories; and (5) to provide Australian statistics to researchers and scholars in other countries who pursue and take an interest in cross-national and comparative research.

### Organisation

Data included in this compilation are nationwide in scope and it places major emphasis on the series in each state and territory. The six states and the two territories are the foci of attention because almost all criminal justice related transactions occur in these jurisdictions.

The Source Book is divided into nine parts representing the following:

Part I - Australia  
Part II - New South Wales  
Part III - Victoria  
Part IV - Queensland  
Part V - South Australia  
Part VI - Western Australia  
Part VII - Tasmania  
Part VIII - Northern Territory  
Part IX - Australian Capital Territory

Within each part data have been organised into seven sections:

SECTION A - GENERAL, including statistics on population, marriage, divorce, male:female ratio, urbanisation, unemployment rate, workforce, participation rate, gross domestic product, housing construction, motor vehicle registration, infant mortality, life expectancy, and expenditure on social services.

SECTION B - POLICE, including statistics on the size of the police force, police expenditure, crimes reported and cleared, and persons involved in crimes cleared.

SECTION C - MAGISTRATES' COURTS, including statistics on total offences brought before these courts divided into five major categories, viz., Offences Against the Person, Property, Good Order, Forgery and Uttering, and Petty Offences. Also statistics on a number of specific offences from murder to traffic are provided. The data provide outcomes of court hearings.

SECTION D - HIGHER COURTS, including statistics on most of the offences cited in Section C above. Data pertaining to these courts relate to persons and not to offences.

SECTION E - PRISONS, including statistics on daily average number of prisoners, prison accommodation and expenditure.

SECTION F - DRUGS, including statistics on charges by type of offence and type of drugs, and persons charged by age and sex.

SECTION G - CHILDREN. Statistics included in this section vary in content and format.

Descriptions of a general nature pertaining to the variables included in this volume are given in a subsequent section. Specific comments and explanations are provided at the beginning of each section in each part.

We may, however, point out that in spite of our strenuous efforts, we have not been able to achieve complete uniformity in the presentation, data coverage, and content; there exist disparities amongst states and territories.

### Series and Sources

The primary aim of this volume was to concentrate on data available in each of the areas cited above for the entire twentieth century. In some of the substantive areas this objective has been achieved; in others, a combination of reasons made it impossible to assemble data for this length of time. We may have either overlooked or been unable to locate some series; various agencies responsible for producing statistics may not have initiated the series early in the 1900s; some series

may have changed in content and format and thus may have made the early versions of a series redundant.

In our effort to produce the Source Book we were conscious of the value of the statistics. We, therefore, placed a major emphasis on series that are continuing. In this respect only one major exception has been made and that is to include the magistrates' courts statistics (Section C) of the State of New South Wales (Part II). With the establishment of the Bureau of Crime Statistics and Research in 1971, this series was discontinued and a new series was initiated. The new series was not comparable to the one that existed before, and at the same time it was not detailed enough to be included in the Source Book. Therefore, we have included the earlier series on magistrates' courts. Exclusion of this would have meant a major inadequacy in the Source Book keeping in mind that New South Wales is the largest state in the Federation. With the help of figures for total offences brought before magistrates' courts in New South Wales one can estimate the figures for various offences from 1972 onwards. We have not provided these estimates mainly because we did not want a particular method of estimation with which readers might have objections. On the other hand, a reader can select his/her favourite method of estimation.

The Source Book is intended to cover the period 1900 to 1980. Unfortunately many agencies do not keep up to date in their publication of statistics. As such the most recent year for which statistics are available varies in terms of substantive areas as well as the agency responsible for producing these statistics. This is not intended to be a criticism of a particular agency; on the contrary we have been most fortunate in receiving the fullest cooperation from all concerned agencies. In fact, some of the tabulations in this volume have not yet been published elsewhere nor do we expect them to be published within the next 10 to 12 months. The statistics in the Source Book, therefore, include most current available data.

The sources used for compiling these statistics are many; these have been indicated in appropriate places. Also, at the end of this volume, the sources have been listed under the title 'List of Publications and Documents Used'.

### Explanatory Notes and General Definitions

Under the sub-heading 'Organisation' we have described the layout of the volume. Now we plan to elaborate on the statistics and general definitions of terminologies used; this exercise will be related to data in each of the Sections A to G. Comments and explanations specific to a state or territory or to a particular data set will be made in the appropriate sections.

#### Section A - General

**POPULATION:** All population data are based on census and mid-year (30 June) estimates produced by the ABS. It would appear from the documents available that the projection of population estimates for intercensal years for single year age groups began after the census of 1921. Therefore, population by age data were not available for the period 1902 to 1920, except 1911. Furthermore, the age distribution data for the intercensal years between 1901 and 1961 for each of the eight

states and territories were not available. However, total population by sex for the entire country and the eight jurisdictions have been provided. (Source: census reports, *Demography*, and unpublished intercensal year estimates.)

**MARRIAGE AND DIVORCE:** The figures represent the number of marriages in a year and the number of decrees of dissolution of marriage, nullity and judicial separation. (Source: census reports, *Social Indicators* and *Demography*.)

**MALE:FEMALE RATIO:** Figures represent number of males per hundred females.

**% URBAN:** Refers to per cent of total population living in urban areas, as defined by the ABS from time to time. The changes in definition are reflected in the following statement:

The criteria for classifying areas as *urban* have changed from time to time. In 1947, urban included those cities and towns which were separately incorporated. In 1954, all other population clusters of 1000 and over (750 and over in Tasmania) were also included in addition to incorporated cities and towns. There was no change in 1961. In 1966, 1971 and 1976, basically similar criteria were used except that the lower limit of 1000 persons was not used for centres which were known holiday resorts. In such areas a minimum of 250 dwellings with at least 100 occupied was used.<sup>1</sup>

(Source: census reports and *Demography*.)

**% METROPOLITAN:** Refers to per cent of total urban population living in large cities, as defined by the ABS:

In the 1947 Census, *major urban* (then metropolitan) referred to State capital cities, their suburbs and surrounding urban areas. From 1954 to 1966, the city of Canberra was included. Major urban areas in 1971 and 1976 consisted of urban population clusters with a population of over 100 000. These centres included all State capital cities, Canberra in the Australian Capital Territory, Queanbeyan, Newcastle and Wollongong in New South Wales, and Geelong in Victoria. Population in all other urban centres below 100 000 were included in *other urban areas*.<sup>2</sup>

(Source: *Demography*.)

**UNEMPLOYMENT RATE:** Refers to "the average number of persons unemployed per year as a proportion of the labour force".<sup>3</sup> (Source: RBA, OECD and state year books.)

**WORKFORCE:** Refers to the number (in thousands) of males and females aged 15 years and over employed or seeking employment. These exclude members of the permanent Australian defence forces. (Source: *Seasonally Adjusted Indicators* and state year books.)

**PARTICIPATION RATE:** Refers to workforce as a percentage of the civilian population aged 15 years and over. (Source: *Seasonally Adjusted Indicators* and state year books.)

**GROSS DOMESTIC PRODUCT:** Figures have been shown in millions of Australian dollars at current and constant 1974-75 prices. The per capita GDP has also been shown. (The deflator has been defined in the document produced by the RBA and factored to convert to 1974-75 prices, in accordance with the OECD *Economic Surveys*) (Source: RBA and OECD.)

**VALUE OF HOUSING CONSTRUCTION ACTIVITY:** This series is derived from Table IV.13 of the RBA document by adding depreciation to the net increase in the value of stock of all dwellings (at prices adjusted to 1974-75

values). Both private and public housing construction are included in these series. (Source: RBA.)

**NEW PRIVATE DWELLINGS COMMENCED:** These statistics are compiled from returns obtained from building contractors, owner builders and government authorities engaged in the erection of new buildings. The number of new dwellings relates to individual living units. (Source: *Seasonally Adjusted Indicators*.)

**MOTOR VEHICLE REGISTRATION:** Refers to all motor vehicles registered at the end of a calendar or financial year. These vehicles include motor cars, station wagons, utilities, panel vans, trucks, buses, and motor cycles. (Source: state and Commonwealth year books.)

**INFANT MORTALITY:** Refers to the number of deaths of children under one year of age per 1000 live births in that year. (Source: *Demography* and year books.)

**LIFE EXPECTANCY:** Refers to the expected years of life remaining to a person of age one year if present patterns of mortality do not change during that life time. (Source: *Demography* and *Australian Demographic Statistical Quarterly*.)

**EXPENDITURE ON SOCIAL SERVICES:** The expenditure data in thousands of Australian dollars have been shown at current as well as constant 1974-75 prices. Expenditure data on only three areas of social services were selected. These are education at all levels, health, and justice including expenditure on courts, police, corrections and public safety areas such as state emergency services and fire protection. The above expenditure data have also been calculated for each inhabitant. (Source: Commonwealth Grants Commission reports.)

#### Section B - Police

**POLICE STRENGTH:** Refers to the number of police personnel employed by police departments in states and territories, excluding native trackers, public service officers, cadets, matrons, rescue instructors, parking police, special constables and female searchers, at the end of each calendar or financial year. Also, personnel of the Commonwealth Police Force were not included. (Effective October 1979, the Commonwealth Police Force and the A.C.I. Police Force merged into one organisation known as the Australian Federal Police.) (Source: police annual reports, statistical registers, year books and parliamentary papers.)

**POLICE EXPENDITURE:** Refers to the total expenditure by various police departments each year and have been shown in thousands of Australian dollars and per capita at current and constant 1974-75 prices. (Source: police annual reports, statistical registers, year books and parliamentary papers.)

**CRIMES REPORTED AND CLEARED:** Crimes reported (REP) refers to all incidents reported or becoming known to the police. An offence is 'cleared' (CLR) when an information (charge, arrest or summons to appear) has been laid against at least one person involved. However, an offence may also be counted as 'cleared' without an information being laid. This may occur when the offender has received an official caution, has died, has been committed to a mental institution, or is serving a sentence, etc. (Source: Australian year book and police annual reports.)

The seven selected crimes include the following:

**Homicide.** Includes murder, attempted murder, and manslaughter; manslaughter arising from motor traffic accidents for some states from 1973-74 has been included.

**Serious Assault.** Unlawful attack for the purpose of inflicting severe bodily injury.

**Rape.** Includes attempted rape and assault with intent to rape.

**Robbery.** Use or threat to use violence to obtain property, including attempts.

**Break and Enter.** Breaking and entering a building (or entering a building and breaking out) and committing or intending to commit a crime. Includes burglaries.

**Motor Vehicle Theft.** Includes illegal, unlawful or unauthorised use of motor vehicles.

**Fraud, Forgery and False Pretences.** Also includes falsification of records, imposition, embezzlement, misappropriation, etc.

**PERSONS INVOLVED IN CRIMES CLEARED:** Refers to the sum of the number of persons dealt with in offences cleared. If the same person is involved in more than one offence cleared he/she is counted separately for each offence. Persons involved have been classified into four age groups. Sex data have been provided where available. (Source: Australian year books.)

#### Section C - Magistrates' Courts

Magistrates' Courts are variously known as Courts of Petty Sessions, Courts of Summary Jurisdiction, and include Children's Courts.

The data in the tables in this section refer to offences for which persons were brought before Magistrates' Courts (charged) by arrests and summonses. These also show court decisions such as convictions, discharges (including acquittals, dismissals, withdrawals and remands), and committals to higher courts for trial. The offences for which statistics have been presented are as follows:

**Total Offences.** Refers to all offences, from the most serious to the least serious (excluding, of course, traffic violations settled by on-the-spot fines).

**Offences Against the Person.** Includes murder and attempt, manslaughter, manslaughter by driving, infanticide, abortion, kidnapping and abduction, rape and attempt, carnal knowledge, incest, bigamy, bestiality, indecent assault, aggravated/major assault, inflicting grievous bodily harm, stabbing, shooting or wounding, common/minor assault, dangerous driving causing injury, administering poison.

**Offences Against Property.** Includes break, enter and steal, larceny or illegal use of vehicle or boat, larceny other than vehicle or boat, stealing from the person, horse, cattle and sheep stealing, malicious/wilful damage, embezzlement (including larceny by clerk or servant), false pretences, fraudulent misappropriation, receiving, unlawful possession of property, arson, robbery.

**Forgery, Uttering and Currency Offences.** Forgery and/or uttering, offences against currency.

**Offences Against Good Order.** Drunkenness, drunk and

disorderly, indecent, riotous or offensive behaviour, vagrancy, offensive, threatening or abusive language, evade fare on public vehicle, public mischief, escape from custody, conduct scandalous or lewd, hindering/resisting arrest.

**Petty Offences.** Driving under the influence, driving with prescribed concentration of alcohol in blood, parking and allied offences, other traffic offences, drug offences, breaches of Acts not elsewhere included such as *Public Health Act, Railways Act, liquor laws, Local Government Act, child welfare laws, gaming and gambling laws, revenue laws, perjury, conspiracy, desertion of wives and/or children.*

**Murder.** Includes murder and attempted murder, accessory to murder, wounding or shooting at with intent to murder, infanticide.

**Manslaughter.** Includes manslaughter, homicide, unlawfully killing, negligence causing death.

**Manslaughter by Driving.** Includes manslaughter by driving, negligent or dangerous driving causing death.

**Assault.** Includes common assault, aggravated assault, assaulting police, inflicting grievous bodily harm, shooting with intent, stabbing, wounding, assault occasioning bodily harm, unlawfully wounding, major assault, minor assault, felonious assault, assault and battery, assaulting females, assaulting children, administering poison, assault in company.

**Rape.** Includes rape, attempt rape, assault with intent to rape, aiding and abetting rape.

**Robbery.** Includes robbery with violence, assault and robbery, robbery in company, robbery under arms, robbery and stealing from the person, stealing with violence, highway robbery.

**Burglary.** Includes burglary, break, enter and steal, housebreaking, break and enter.

**Larceny.** Includes larceny, stealing in company, attempt to steal, stealing from the person, stealing from dwelling/shop, stealing from a vessel/wharf, larceny as bailee/agent/co-partner/servant/public servant, simple larceny, shoplifting, larceny of postal articles. (Excludes larceny of grown crops/stock.)

**Larceny of Motor Vehicle.** Includes larceny of motor vehicles, boats, etc., unlawful/illegal use of motor vehicles.

**Malicious Damage.** Includes malicious damage, malicious injury to property, wilful damage.

**Fraud, Forgery and False Pretences.** Includes fraud, forgery, uttering, false pretences, false representation, misappropriation, embezzlement, fraudulent conversion, currency offences.

**Drunkennes.** Includes drunkenness, habitual drunkenness, drunk and disorderly.

**Traffic.** Offences against traffic laws including drunken driving, unlicensed driving, driving without due care, exceeding speed limit, driving under the influence of liquor or drug, driving with prescribed concentration of alcohol in blood, unregistered motor vehicle. (Excludes negligent driving causing death or injury.)

While the five major categories of offences listed above add up to Total Offences, specific offences from

Murder to Traffic represent only a few offences selected on the basis of their seriousness and frequency. (Source: statistical registers, year books, police annual reports, parliamentary papers and documents produced by ABS offices.)

#### Section D - Higher Courts

Higher courts in this Section include District Courts, County Courts, Courts of Quarter Sessions, Circuit Courts, Courts of General Sessions, Judges Courts and Supreme Courts. Generally, these courts try cases committed from the Magistrates' Courts, however, a few cases are referred directly from Coroner's Courts and in some cases through summonses issued by Attorneys-General. Persons charged with relatively serious offences are tried in these courts. Statistics in this section relate to distinct persons or persons. A 'distinct person' is defined as a person who has been dealt with more than once in a year and counted only once in respect of the most serious offence. A 'person' is counted for each appearance during the year for the most serious offence on each occasion.

Theoretically, persons charged with most of the offences listed in Section C under the headings of Offences Against the Person, Property and Forgery & Uttering, can be tried at the higher courts. This, however, depends upon the laws of each state or territory defining the jurisdictions of various courts. Therefore, the offences listed in Section C can be used as guides to offences included in various tables in this Section. (Source: statistical registers, year books, and ABS publications.)

#### Section E - Prisons

**PRISON ACCOMMODATION:** Refers to the number of persons who can be accommodated in cells and dormitories.

**DAILY AVERAGE:** This figure is usually obtained by adding the number of prisoners in prison for each day of the year and dividing the sum by the number of days in that year.

**PRISON EXPENDITURE:** Refers to total expenditure by prisons departments in thousands of Australian dollars at current and constant 1974-75 prices.

**PER PRISONER EXPENDITURE:** Per prisoner expenditure was obtained by dividing the total prison expenditure for the year by the daily average number of prisoners in that year. These figures are shown in current and constant dollars.

Prison statistics, daily average and expenditure, usually do not include statistics from police lockups. (Source: statistical registers, year books, parliamentary papers, and annual reports of prisons/corrective services.)

#### Section F - Drugs

The Australian Federal Police (formerly Commonwealth Police) through the Australian Crime Intelligence Centre exercises national responsibility for the systematic collection, collation, analysis and dissemination of information and statistics on drug offences. Types of drugs included under each of the drug headings are listed below:

**Narcotics.** Cocaine, Codeine, Dextromoramide (Palfium), Diethylthiambutene, Hydromorphone (Dilaudid),

### Guide to Symbols and Abbreviations Used

#### The following symbols and abbreviations have been used:

- or --	Data not available
•	Data not separately available
Italics	Figures in italics are our estimates
M	Male
F	Female
M/100F	Males per 100 females
Rep	Reported or becoming known to police
Clr	Cleared
M/S	Manslaughter
B & E	Break and Enter
ABS	Australian Bureau of Statistics
RBA	Reserve Bank of Australia
OECD	Organisation for Economic Co-operation and Development
GDP	Gross Domestic Product

#### Section G - Children

Information and statistics on children coming in conflict with the law vary greatly between states and territories. Such statistics can be obtained from several reports within each jurisdiction, without much commonality. The selection of series on children from each state, therefore, was, to say the least, problematic. Relevant comments and sources of data appear in Section G of each state.

### Updating

It is hoped that the Source Book will be updated from time to time. In the updating process, we intend to examine new series for inclusion and expand existing series. For instance, we would like to produce series on enrolment by level of education, medical and paramedical personnel, occupational structure of the labour force, etc. Similarly, we would like to expand the substantive area of health to incorporate statistics on causes of death; expand the series on drugs for the states and territories, and expand the series on children.

We do not deny bias in the selection of series for this volume, in fact the non-existence of bias would be inconsistent. We consider the Source Book a modest beginning and we hope this will be of some use. Since a systematic updating of the volume is planned, critical comments and suggestions will be helpful in preparing subsequent editions. We are especially interested in receiving comments on series which have not been included in this volume. So that substantive improvements can be made in the future, it will be of great assistance to know the purpose for which this Source Book was consulted and the extent to which this volume was useful. FOR THE PURPOSES OF SOLICITING COMMENTS, A FORM HAS BEEN INCLUDED IMMEDIATELY FOLLOWING THE 'LIST OF PUBLICATIONS AND DOCUMENTS USED'. THIS CAN BE CUT OUT, COMPLETED, AND MAILED TO THE ADDRESS INDICATED THEREON.

**PART I:**

**AUSTRALIA**

Notes - Part I

Table B1: POLICE STRENGTH - From 1900 to 1957 data relate to six states only; from 1958 onward data relate to all eight jurisdictions.  
 POLICE EXPENDITURE - From 1900 to 1957 data relate to six states only; from 1958 they relate to the Australian Capital Territory. (Expenditure figures for the Northern Territory were not available.)

Table B2: SERIOUS ASSAULT - Changes in the collection procedure and interpretation occurred in 1972-73.  
 BREAK AND ENTER - Figures include all offences regardless of the value of the property involved except for the years 1967 to 1971 when offences involving property valued at \$100 or less were excluded.

Table B3a: Age distribution of 14 persons were not known in 1973-74.

Table C1: Up to 1957 data relate to six states only; from 1958 the statistics include the Australian Capital Territory and from 1959 include the Northern Territory as well.

Tables C2 to C6: Up to 1958 data relate to the six states only; from 1959 the statistics include the Northern Territory. Data for the Australian Capital Territory were not available.

Table C3: Data in this table include forgery, uttering and currency offences.

Table C1 to C6: Statistics after 1971 have not been provided mainly because data were not available from the largest state, that is, New South Wales. Statistics on specific offences dealt with in the Magistrates' Courts were not available for the whole of Australia.

Table D: Information from all the states and territories were not available.

Table E1: Up to 1946 figures relate to six states only; from 1947 they include the Northern Territory as well. The Australian Capital Territory does not have a prison.

Table E2: Expenditure data relate to the six states only.

Table E3: The types of offences are: possession, importation, use or administer, traffic, steal, false pretence, forged prescription, and other.

**Notes - Part II**

Table B2: HOMICIDE includes murder, attempted murder, manslaughter, manslaughter by driving. From 1974 because of the introduction of the culpable driving rule the annual reports showed very few manslaughters by driving.  
 RAPE includes attempts and intent to rape.  
 ASSAULT - Up to 1970 the data relate to serious assaults only; from 1971 they include all except sexual assaults.  
 ROBBERY includes assault and robbery, and armed hold-up.  
 BURGLARY includes breaking, entering and stealing from all kinds of premises.  
 LARCENY includes stealing from the person, stealing-general, and attempts, but excludes motor vehicle thefts.

Table C1 to C19: Comparable data for Magistrates' Courts after 1971 were not available.

Table C8: Up to 1953 statistics include manslaughter by driving.

Table C14: Up to 1953 statistics include larceny or illegal use of motor vehicle.

Table C15: Figures include larceny or illegal use of 'vehicle or boat'.

Tables D1 to D8: Statistics relate to distinct persons.

Table D6: Up to 1954 manslaughter includes manslaughter by driving.

Table D8: Larceny includes larceny of motor vehicle.

Tables G1 to G6: Data were collected from the annual reports of the Department of Youth and Community Services. Statistics relate to juvenile court appearances.

## Notes - Part III

Table B1: POLICE STRENGTH - In 1923 the number of police personnel dropped substantially because of a prolonged strike and the dismissal of over 500 police officers.

Table B2: For definitions of offences see notes in Part II.  
ASSAULT - Up to 1965 figures include all assaults, thereafter serious assaults only.  
LARCENY - includes larceny of motor vehicle.

Table C1: From 1961 statistics do not include drunkenness offences.

Table C3: Figures include forgery, uttering and currency offences.

Table C5: From 1961 statistics do not include drunkenness offences.

Table D1-5: Petty offences include good order offences.

Table D6-7: Up to 1962 manslaughter includes manslaughter by driving. From 1969 manslaughter by driving includes culpable driving causing death.

Table D8: Larceny includes larceny of motor vehicle.

Tables G1 to G11: Data were collected from the Year Books. Figures relate to Children's Court appearances and results of hearings.

G8	Larceny	156
G9	Larceny of Motor Vehicle	157
G10	Malicious Damage	158
G11	Traffic Offences	159
G12	Drunkness	160

#### Notes - Part IV

Table B2: For definitions of offences see notes in Part II.  
 ASSAULT - include serious assault only.  
 ROBBERY - Up to 1957 figures include robbery under arms only.  
 LARCENY - includes larceny of motor vehicle.

Table C3: For 1977 and 1978 data include forgery, uttering and currency offences.

Table C5: Drunkness offences constitute a large proportion of good order offences. The outcome of a large volume of drunkness charges were classified as 'bail estreated' meaning that the alleged offenders did not appear before the courts and forfeited their bail money. All such cases were placed in the discharges category. (For details see Queensland Law Reform Commission, *A Report on the Law Relating to Bail in Criminal Proceedings*, 1978.)

Table C8: Figures include manslaughter by driving.

Table C11: For the periods 1941-42 to 1944-45 and 1971-72 to 1975-76 statistics on rape were included in offences against females.

Table C18: See note to Table C5.

Tables G1 to G12: Data were collected from the Statistics of Queensland. Figures relate to appearances before Children's Courts.

## PART VI:

# WESTERN AUSTRALIA

Table No.	Notes	CONTENTS	
			210
	<b>Section A - General</b>		
A1a	Population by Age-Groupings - Males		211
A1b	Population by Age-Groupings - Females		211
A1c	Population by Age-Groupings - Persons		211
A1d	Mid-Year Population Estimates		212
A2	Marriages, Divorces and Male:Female Ratio		213
A3	Civilian Workforce, Participation Rates and Unemployment Rates		214
A6	Motor Vehicle Registrations - Total Vehicles		215
A7	Infant Mortality Rates		216
A8a	Net Expenditure on Social Services from Consolidated Revenue - Actual Net Expenditure		217
A8b	Net Expenditure on Social Services from Consolidated Revenue - Net Expenditure Per Capita		218
	<b>Section B - Police</b>		
B1	Police Strength and Expenditure		219
B2	Crimes Reported and Cleared		220
	<b>Section C - Magistrates' Courts</b>		
C1	Total Offences		221
C2	Offences Against the Person		222
C3	Offences Against Property		223
C4	Forgery, Uttering & Currency Offences		224
C5	Offences Against Good Order		225
C6	Petty Offences		226
C7	Murder		227
C8	Manslaughter		228
C9	Manslaughter by Driving		229
C10	Assault		230
C11	Rape		231
C12	Robbery		232
C13	Burglary		233
C14	Larceny		234
C15	Larceny of Motor Vehicle		235
C16	Malicious Damage		236
C17	Fraud, Forgery & False Pretences		237
C18	Drunkenness		238
C19	Traffic Offences		239
	<b>Section D - Higher Courts</b>		
D1	Offences Against the Person		240
D2	Offences Against Property		241
D3	Forgery & Currency Offences		242
D4	Offences Against Good Order		243
D5	Petty Offences		244
D6	Persons Tried & Convicted - Murder and Manslaughter		245
D7	Persons Tried & Convicted - Assault and Rape		246
D8	Persons Tried & Convicted - Robbery, Burglary and Larceny		247

<b>Section E - Prisons</b>		
E1	Prison Accommodation & Daily Average	248
E2	Prison Expenditure	249
<b>Section G - Children</b>		
G1	Persons Involved in Crimes Cleared - Serious Assault	250
G2	Persons Involved in Crimes Cleared - Burglary	250
G3	Persons Involved in Crimes Cleared - Larceny of Motor Vehicle	250

**Notes - Part VI**

Table B2: For definitions of offences see notes in Part II.

Table C7: From 1916 to 1938 figures include manslaughter.

Table C12: From 1916 to 1921 figures include 'robbery, burglary, etc.'

Tables G1 to G3: Data collected from the annual reports of the Police Department.

### SOURCE BOOK EVALUATION FORM

The authors of this Source Book would be pleased to receive comments and suggestions which would be helpful in preparing future editions.

The following general headings represent areas of particular interest, although constructive comment of all kinds is welcome.

Written comments should be sent to: The Director,  
 Australian Institute of Criminology,  
 P. O. Box 28,  
 Woden,  
 A.C.T. 2606

For exactly what purpose did you consult the Source Book?

Was the Source Book adequate for that purpose? If not, why not?

Can you suggest data from primary sources (not found in the Source Book) the inclusion of which would have helped you achieve your purpose?

Are there data from any other sources which you would suggest including in future editions?

Can you point to specific features or Tables in the Source Book which are not clear, or additional terms which should be defined?
