CRIME IN TUSKEGEE: AN ANALYSIS

Published By

The Alabama Criminal Justice Information Center R. W. Blaylock, Director

This report is the undertaking of the Statistical Analysis Center (SAC), a component of the Alabama Criminal Justice Information Center. SAC's responsibilities entail collection, analysis, and dissemination of criminal justice information.

This report is one example of the analytic capabilities of the Alabama Criminal Justice Information Center.

#### PREFACE

The Alabama Criminal Justice Information Center has developed an incident-based crime reporting system which utilizes comparable data elements of the Uniform Crime Report (UCR) Summaries. These incident-based reports were designed to serve a twofold purpose: to provide data to ACJIC to generate UCR; and, to develop an internal record keeping system for the individual agency.

The Tuskegee Police Department is scheduled to begin submitting incident-based crime reports to ACJIC in July for UCR purposes. However, they began utilizing these forms in 1977 to organize the department's record keeping system.

Chief Herbert Sears of Tuskegee requested an analysis on these incident-based crime reports for the period January through April, 1979.

A breakdown of types of crimes by location, day of the week, and time of day was requested.

This report is intended to provide pertinent information to Chief Sears about Tuskegee's criminal activity as well as illustrating the potential benefits available to other law enforcement agencies utilizing the incident-based crime reporting forms.

#### INTRODUCTION

Tuskegee is a city of approximately 12,470\* persons. It is centrally located in Macon County and contains 46% of the county's population.

Tuskegee is divided into five (5) patrol districts and this report will use these five districts as a means of pinpointing criminal activity by type of offense, time of day, and day of week.

Procedures used in the development of this report include entering the crime data into the system and writing statistical software which correlates the crime variables with each other. These statistical breakdowns are the basis for this report.

This report will include a written narrative, tables and figures as a means of explaining data. All incidents reported to the Tuskegee Police Department are used in this report.

A map of the City of Tuskegee is included in this report. The boundaries of the patrol districts are outlined over the city map. Due to the size of the map, street names are not included but three main highways are labeled for reference points. Also included is a layout of the patrol districts for Tuskegee.

This report covers the period January through April, 1979.

<sup>\*</sup> FBI population estimates as of January 23, 1979.

#### Frequency Count

A total of 309 offenses were reported to the Tuskegee Police Department between January and April, 1979. These offenses are broken down into 25 categories. The following list is comprised from these offenses and the list includes the absolute frequency and per cent figures.

REPORTED INCIDENTS
January - April, 1979

Offense	Frequency	Per Cent
Robbery	1	.3%
Assault	31	10.0%
Burglary	121	39.2%
Grand Larceny	42	13.6%
Petit Larceny	6	1.9%
Auto Theft	6	1.9%

Bomb Threat	1	.3%
Resisting Arrest	1	.3%
Kidnapping	1	.3%
Possession of Drugs	2	.6%
Other	6	1.9%
TOTAL	309	100.0%

Burglary effected the greatest number of offenses with 121 incidents or 39.2%. Grand Larceny showed the next highest incidence with 42 reported cases or 13.6% of the total number of offenses. Assault, vandalism and disturbance calls effected 10.0%, 9.1%, and 8.1%, respectively.

One hundred forty-eight, or 47.9% of the reported incidents were felonies; 74, or 23.9%, were misdemeanors with the remaining 87 incidents, or 28.2%, being unknown as to crime type.

A frequency count by police district shows that 97 incidents were recorded in District 1, accounting for 31.4% of the reported offenses. District 2 reported 72 incidents or 23.3% of the offenses. District 3 accounted for 56 reported offenses or 18.1% of the total incidents. District 4 reported 60 offenses or 19.4%; and, District 5 reported 19 cases or 6.1%. There were five offenses reported in which the police district was unknown.

The premise type accounting for the majority of the reported offenses in Tuskegee was residences. There were 164 offenses committed at residences accounting for 53.1% of the reported offenses. There were 52 offenses reported in the "other" category comprising 16.8% of the reported incidences. Locations classified as commercial accounted for 39 offenses or 12.6% of the reported offenses.

The following breakdown of incident by premise type includes the actual frequency of offenses and the relative frequency of offenses reported to the Tuskegee Police Department.

#### SUMMARY

From January through April of 1979 there were 309 incidents reported to the Tuskegee Police Department. Of these incidents, 47.9% were felonies, 23.9% were misdemeanors and the remaining 28.2% were in the unknown category.

The City of Tuskegee is divided into five patrol districts with the number of reported offenses for each district as follows:

District 1	97 Offenses	31.4
District 2	72 Offenses	23.3
District 3	56 Offenses	18.1
District 4	60 Offenses	19.4
District 5	19 Offenses	6.2
Unknown	5 Offenses	1.6

In District 1, 29% of the reported offenses occurred between 7 and 11 p.m. District 2 shows 19% of its offenses occurring between 7 and 10 a.m. and 25% of the offenses between 5 and 9 p.m. District 3 effected 32% of its offenses between 4 and 10 a.m. In District 4, 18% of the offenses were reported between 10 a.m. and 1 p.m. Thirty-two per cent of District 5 offenses occurred between 6 and 10 p.m.

Burglary accounted for the greatest number of reported offenses, 121 or 39.2% of the incidents. Thirty-four per cent of the burglaries were reported in District 1; and, District 3 accounted for 28% of the reported burglaries.

Grand larceny accounted for 42 of the incidents or 13.6% of all offenses reported to the police. District 1 and 2 each had 31% of the grand larceny offenses.

This is only a sample of the analytic capabilities of the Statistical Analysis Center. By utilizing the inherent potential contained
within the incident-based crime reporting system, various analyses
are possible, i.e., victim analysis, crime analysis, and various breakdowns such as this report. It is possible that such analyses will
enable law enforcement agencies to better understand and consequently,
combat criminal activity more effectively.
