#### Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with parenthesis indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for GOVERNMENTAL RESPONSES TO CRIME IN THE UNITED STATES, 1948-1978 were originally collected by Herbert Jacob. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

## DATA COLLECTION DESCRIPTION

The Governmental Responses to Crime Project was initiated in October, 1978, as a result of the rising crime rate in the United States and the wide variety of programs seeking to contain it. The project investigated the growth of crime and the ways in which local governments responded to crime during the period from 1948 to 1978 by analyzing policy responses to the rise in crime in 10 American cities: Atlanta, Boston, Houston, Indianapolis, Minneapolis, Newark, Oakland, Philadelphia, Phoenix and San Jose.

The major areas of research included the nature of the rise in crime in the United States, attentiveness to crime, connections between structures and patterns of urban governments and their responses to crime, and urban communities' principal responses to crime.

This data collection is contained in 5 parts: Baseline, Ten City, Local Ordinances, State Laws, and Media Data. There are eighteen files: five contain SPSS control statements and the remaining thirteen files contain the corresponding data.

The baseline data file contains information on all cities having a population of 50,000 or more in 1950, 1960, 1970 or 1975. These data constituted a baseline with which the 10 cities could be compared to other cities in the United States. There are 57 variables and 12,276 cases with 3 cards per case.

The ten city file contains information on changes in the activities, focus, and resources of local police departments, courts, prosecutorial systems, and correctional institutions in the 10 cities named above. There are 61 variables and 310 cases, with 5 cards per case (10 cities, 31 observations).

The city ordinance and state law files contain data on public policy responses by examination of changes in ordinances and laws over time. The city ordinance file has 37 variables, and 422 cases with 1 card per case. The state laws file has 45 variables and 533 cases with 2 cards per case.

The media data files concern attentiveness to crime and criminal justice issues as covered in the news media. The 9 city files (for all cities with the exception of Newark) have 140 variables and approximately 670 cases each. There are 3 cards per case.
