INTRODUCTION

The 1984 edition of the **Federal Court Management Statistics** contains key statistics on the workload of Federal judges during the years ended June 30, 1979 through 1984. Information is compiled from reports submitted to the Administrative Office of the U.S. Courts by the clerks of the U.S. courts.

The data selected and the general format of this report are approved by the Subcommittee on Judicial Statistics. The data also provide the basis for the Biennial Judgeship Survey conducted by the Subcommittee of the Judicial Conference Committee on Court Administration. The one page devoted to each court supplies six years of statistical data on the condition of the dockets.

Because cases in the courts of appeals are generally handled by panels of three judges, workload figures in these courts are shown per panel. District court workload statistics are divided by the number of authorized judgeship positions in each court to provide the workload per judgeship. The per panel and per judgeship figures virtually eliminate the influence of court size and allow comparison between courts of different sizes.

The Federal Courts Improvement Act of 1982 established a new court of appeals under Title 28 U.S.C. Section 41, the Court of Appeals for the Federal Circuit. This court, which was created by joining the appellate division of the U.S. Court of Claims with the U.S. Court of Customs and Patent Appeals, began operations on October 1, 1982. Because of the unique nature of the workload of the new court, statistics have been maintained separately from all other courts of appeals.

The national profile for the courts of appeals appears on the foldout on page 15. The national caseload totals and averages for the district courts are displayed on the last page of this report. Use caution when comparing these national averages to the averages for a particular court. Unique circumstances which could cause a court to vary substantially from the national average are not reflected in the individual court profiles. Some of the factors which could have an impact are long-term judgeship vacancies, an unusual case in progress requiring the full-time service of one judge, a relatively high number of senior judges augmenting regular judgeship strength, or administrative burdens of chief judges in the large metropolitan courts.

The following two pages provide detailed explanations on the data contained in the statistical profiles for the appeals and district courts. Pages 15 and 129 present additional information on specific judicial workload statistics. Refer to these pages before using the statistics in this report.

		Criminal Felony			Includes all criminal felony cases filed whether by indictment, information, or transfer
	Pending Cases			Total pending cases at the end of the year	
	Weighted Filings*	Excludes all misdemeanor criminal cases for 1980-1984 and all minor and petty offense criminal cases for 1979		This figure is a mathematical adjustment of filings which gives heavier count to cases known to be of a more difficult and time consuming nature

For all criminal felony defendants time is computed from the filing date to either the sentencing date or the dismissal/acquittal date including excludable delays reported under the Speedy Trial Act. When the District had less than 10 terminations the median case was not computed.		
		Civil	For civil cases, except land condemnation, going to a trial during profile years, this figure shows the time interval in months for the middle (median) case. Time is computed from the date the answer or response is filed to the date trial begins.		
OTHER	From Issue to Trial (Civil Only)

WHAT THE DISTRICT'S NUMERICAL STANDINGS MEAN
These show where an individual district court stands in relation to other district courts in the circuit and in the country. All "workload" statistics are ranked in descending order (highest value receives rank of 1) and all other statistics are ranked in ascending order (lowest value is ranked first). In some categories fewer than 94 courts are ranked because the information was not available for all districts.

 These figures do not accurately reflect the true reversal rate in this court of appeals. Cases which were both reversed and remanded in the First Circuit were reported as remands, whereas similar situations in other courts of appeals were reported as reversals. This practice resulted in artificially low reversal rates for the First Circuit.

¹ A case participation by an individual judge is defined as an appeal in which the judge hears oral argument or where the appeal is submitted on briefs. Thus, where a single appeal is heard before a panel of three judges, the number of participations would be three.

² Effective October 1, 1981, the Fifth Circuit was divided into districts in Louisiana, Mississippi, Texas, and the Canal Zone (which closed on March 31, 1982). The new Eleventh Circuit includes districts in Alabama, Florida, and Georgia.

³ Statistics have been revised to account for cases previously reported as consolidated appeals.

JUDGESHIP POSITIONS

The Bankruptcy Amendments and Federal Judgeship Act of 1984 (Public Law 98-353, effective July 10, 1984) authorized an additional 24 judgeship positions for the U.S. courts of appeals, bringing the total number of positions to 156 exclusive of judgeships for the Court of Appeals for the Federal Circuit. This report, however, includes only the 132 judgeship positions in existence on June 30, 1984 in the 12 regional courts of appeals.

ACTIONS PER PANEL

The workload statistics for the courts of appeals are presented as "actions per panel" as compared to the "actions per judgeship" profile used for the district courts. This type of profile provides a more accurate indication of the workload of an individual judge since appeals cases are generally handled by a panel of three judges rather than a single judge.

TERMINATIONS AFTER HEARING OR SUBMISSION

In addition to the total number of cases reported terminated after oral hearing or submission on briefs, the percent of cases terminated by active judges after oral hearings or submission on briefs has been included on the profile pages for the first time since 1978. These cases meet the following criteria:

- a reported date of either an oral hearing or submission; and
- a reported date of termination.

Any record which does not meet these two requirements is included in the group of cases terminated "without hearing or submission."

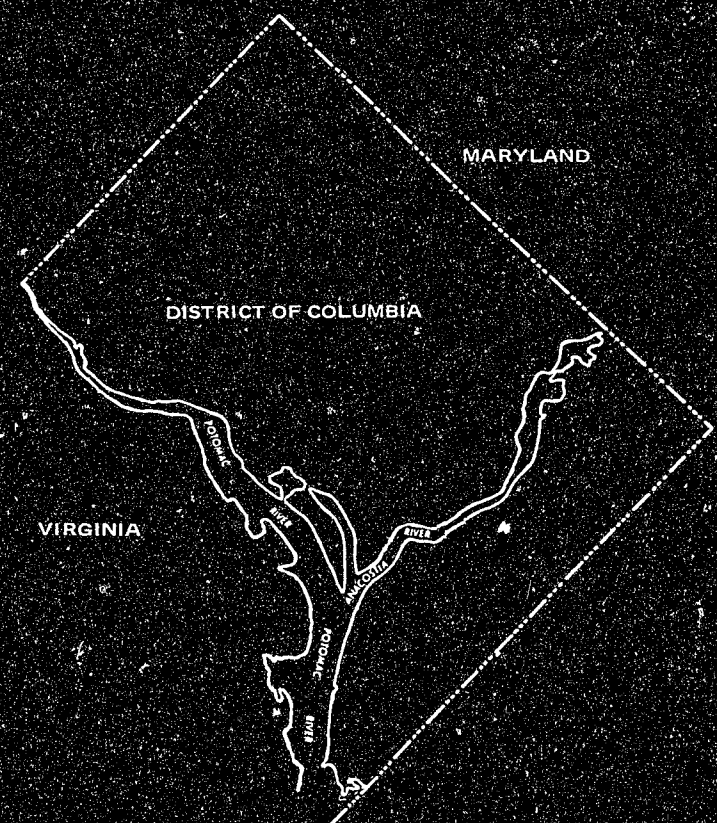

ESTABLISHMENT OF THE ELEVENTH CIRCUIT

With the passage of the Fifth Circuit Court of Appeals Reorganization Act of 1980 (Public Law 96-452, effective October 1, 1981), the Fifth Circuit was reorganized into two circuits - the new Fifth Circuit and the Eleventh Circuit. The Fifth Circuit is now composed of the districts in Louisiana, Mississippi, and Texas. The Eleventh Circuit is composed of the districts in the states of Alabama, Florida, and Georgia.

Statistics on the caseload of the U.S. courts of appeals reflect this re-organization as though it was always in effect. Only civil and criminal appeals, however, are directly comparable to figures for earlier years. Revision of the historical data has been approximated based on information provided by the circuits and other available material.

JUDGESHIP POSITIONS

The Bankruptcy Amendments and Federal Judgeship Act of 1984 (Public Law 98-353, effective July 10, 1984) authorized an additional 61 judgeship positions for the U.S. district courts, bringing the total number of positions to 576. This report, however, includes only the 515 positions existing as of June 30, 1984.

CRIMINAL WORKLOAD STATISTICS

Criminal data for 1979 excludes minor and petty offenses. All other misdemeanors are included. In 1979, the Federal Magistrates Act expanded the authority of magistrates to dispose of all misdemeanors. Consequently, only felonies are included in the 1980 through 1984 criminal data. Filings in the "Overall Workload Statistics" section include criminal transfers, while filings classified in the "by nature of suit" section do not.

WEIGHTED FILINGS

The weighted filings figures for 1979 through 1984 were based on weights developed from the 1979 Time Study conducted by the Federal Judicial Center. A detailed discussion of the 1979 Time Study can be found in the 1979 Federal District Court Time Study, published by the Federal Judicial Center in October 1980. Also, a historical statement about weighted caseload studies completed in the U.S. district courts appears in the 1980 Annual Report of the Director, pages 290-296.

TRIAL FELONY DEFENDANTS IN PENDING CRIMINAL CASES

The classification criteria for triable felony defendants were changed in 1981. Because this is a workload report, persons in certain Speedy Trial exclusions under Title 18 U.S.C. Section 3161(h) are considered part of the district's criminal workload; therefore, such defendants are counted as triable along with those available for plea or trial. The figures for all years in this report then, exclude only defendants who were fugitives on June 30, awaiting sentence after conviction, committed for observation and study, awaiting trial on state or other Federal charges, mentally incompetent to stand trial, or defendants for whom an authorization of dismissal had been requested by the U.S. Attorney to the Department of Justice.
