ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for the COMMERCIAL VICTIMIZATION SURVEYS, 1972-1975 [UNITED STATES]: CITIES SAMPLE were originally collected by the the Bureau of Justice Statistics. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

Commercial Victimization Surveys,
1973-1975 [United States]:
Cities Sample

Study Description

The Commercial Victimization Surveys (CVS) were collected as a component of the larger National Crime Surveys. These surveys were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Their purpose was to obtain current and reliable measures of serious crime in the United States by relying on the public for information, not law enforcement agencies. Overall the commercial victimization surveys provide a supplementary data source for estimating the volume of crime as well as to supply a wide range of descriptive characteristics in criminal victimization over time.

The Commercial Victimization Surveys focus on two crimes relative to business establishments, burglary and robbery. This study does not include crimes of vandalism, shoplifting, or white collar crimes that also effect businesses. All types of commercial establishments are included in the survey, including political, cultural, and religious organizations. Farms, ranches, other units of agricultural production, and government offices at all levels are excluded. Finally, government-operated liquor stores and transportation facilities are included in the study.

Each month, one-sixth of the establishment in the sample were interviewed. Thus, six months were necessary to enumerate the full sample. Every six months re-interviewing of the sample establishment occurred, producing continuous coverage to August, 1977. At that time the survey ended.

During interviews, businesses were asked to report victimizations which occurred during the six-month reference period prior to the interview month. The reference period was variable and depends upon the interview month because only one-sixth of the establishments were interviewed each month. Interviews included questions about business characteristics such as form of ownership, size and type of business and presence or absence of security measures. Screening questions were used to establish the occurrence of any incidents of robbery or burglary (attempted or completed) during the reference period. Then for any reported incidents, detailed information was obtained.

In 1972, eight so-called Impact Cities were surveyed to evaluate extensive federally funded crime prevention programs. In 1973, the 'nation's' five largest cities were surveyed; and in 1974, thirteen other large cities were covered. The eight Impact Cities and five Largest Cities were reinterviewed in 1975. The following list specifies the cities that were surveyed and the year in which the interviews were conducted.

1972 (interviewed July through November)

Eight Impact Cities:

Atlanta	Denver
Baltimore	Newark
Cleveland	Portland, Oregon
Dallas	St. Louis

1973 (interviewed January through March)

Five Largest Cities:

Chicago	New York
Detroit	Philadelphia
Los Angeles	

1974 (interviewed January through March)

Thirteen Other Cities:

Boston	Miami	New Orleans
San Diego	Buffalo	Milwaukee
Oakland	San Francisco	Cincinnati
Minneapolis	Pittsburgh	Washington, DC
Houston		

1975 (interviewed January through February)

Five Largest Cities:

Chicago	New York
Detroit	Philadelphia
Los Angeles	

1975 (interviewed March through May)

Eight Impact Cities:

Atlanta	Denver
Baltimore	Newark
Cleveland	Portland, Oregon
Dallas	St. Louis

Businesses were asked to report victimizations during the 12-months reference period prior to the month of interview. Since the reference period consists of the 12 months prior to the interview, it is variable and depends on the month of interview.

At each interview data were gathered on business characteristics, such as the form of ownership, size and type of business and presence of security measures. A series of screening questions was asked to establish whether any incidents of robbery or burglary (attempted or completed) took place during the reference period. Detailed information was obtained about any reported incidents.

Sample Design

The Commercial Victimization Survey data were obtained from separate samples of business enterprises and organizations in each of the 26 cities. The CVS employed a multistage cluster sample design. The first stage was the systematic selection within the city limits of segments, from which the sample units were ultimately selected. A segment is a small geographical area defined for sampling purposes by clearly identifiable boundaries. Sample segments included in the Cities CVS were chosen from those available after excluding any segments that had been designated as sampling points for the National CVS. The number of segments sampled varied from city to city.

Business establishments within the sample segments were then designated for enumeration. In some segments an interview was sought with all commercial and organizational entities in the scope of the survey. In other segments particular establishments were chosen for enumeration following detailed sampling instructions.*

The probability that any particular establishment would be included in the survey was about 1 in 17 for the 8 Impact Cities and the 13 Other Cities. For the 5 Largest Cities the probability ranged from 1 in 21 for Detroit to 1 in 114 for New York. The sampling procedures followed resulted in the selection of a variable number of establishments for enumeration, ranging from about 1200 in Minneapolis to 8300 in New York.

*Persons interested in more detailed information on the sample procedures should consult the Census Bureau survey documentation: NATIONAL CRIME PANEL (CENTRAL CITIES SAMPLE) SURVEY DOCUMENTATION, U.S. Department of Commerce, Bureau of the Census, Washington, DC 20233.

Conducting the Survey

The Census Bureau began conducting interviews for the Cities CVS in July, 1972. Interviews were conducted in each cities group at different time periods. Interviews were conducted in the 8 Impact Cities from July through November, 1972 and again in March through May, 1975. Field work for the 5 Largest Cities took place in January through March, 1973 and again during January through March, 1975. Interviewing of establishments in the 13 Other Cities occurred in January through March, 1974.

Interviewers were assigned particular segments to canvas with instructions to include commercial establishments of all types, including those located in government buildings or within military reservations. Farms and ranches, or other agricultural units, were excluded, as well as foreign, federal, state or local governmental offices, (except government-run liquor stores and transportation facilities). Also excluded were home businesses if no sign was displayed or the business was not recognizable. Detailed instructions to the interviewers for inclusion or exclusion of establishments may be found in the Interviewer's Manual.*

The interviewer determined if the establishments at sample addresses had changed, become vacant, or had been converted to a non-listable type of activity. In addition, checks were made for mergers or divisions of listed establishments and organizations. New addresses or establishments could be brought into the sample during the course of the survey.

Interviewers made every attempt to conduct an interview with an owner or manager at listed addresses. However, assistant managers, accountants, senior sales clerks or other knowledgeable employees were interviewed if repeated attempts to contact the owner or manager had failed.

Interviews were divided into three parts. In the first part general questions about the business establishment were asked. Part two, consisting of a series of screen questions, elicited information about any incidents of robbery or burglary experienced during the twelve month period preceding the month of the interview. In part three, information about the incidents themselves was collected. The parts of the interview process correspond to the three parts of the questionnaire. The kinds of data collected in this survey may be previewed by examination of these forms.

*INTERVIEWER'S MANUAL, COMMERCIAL VICTIMIZATION SURVEY, U.S. Department of Commerce, Bureau of the Census. (Form CVS-300 October 1974), pp. 16-28.

Of course it is not possible to obtain an interview at every sample address. There are two general types of noninterviews. First the owner or a knowledgeable person at an establishment could not be located, or when located refused to be interviewed. Second, the listed establishment had gone out of business or was otherwise impossible to interview. Noninterviews are classified in three categories.

Type A: The owner or a representative was not available for an interview.

Type B: The establishment was not open for business.

Type C: The establishment was unlistable (e.g., torn down or converted to other uses).

Type A noninterviews represent a very small proportion (usually less than 3%) of establishments in the sample.

Description of the Cities Commercial Victimization Survey

Files

The Cities Commercial Victimization Survey files contain all of the data collected during the surveys, including data for victimized as well as non-victimized establishments. The files are offered on a per city basis; one file for each city.

Reference Period

Interviewing for each set of cities took place over a 10-12 week period, except for the 8 Impact Cities in 1972 where the period of field work was somewhat longer. Therefore the 12-month reference period for which victimizations were reported varies from business to business, depending on the exact month of the interview. Because the month in which the interview was conducted is not recorded in the files it is not possible to determine the exact 12-month reference period.

File Structure

The files are hierarchical in structure. The data for each establishment (case) are contained on two record types: a business record and an incident record. The data are sorted so that a business record is immediately followed by any incident records pertaining to that business. The number of incident records following a business record depends on the number of victimizations reported for that establishment. Many establishments will not have been victimized during the reference period, and therefore no incident record will be present. The file structure for the Cities Sample Commercial Victimization survey is illustrated in Figure 1 below.

CITIES COMMERCIAL VICTIMIZATION SAMPLE FILES (IBM Standard Fixed-Length/Blocked)

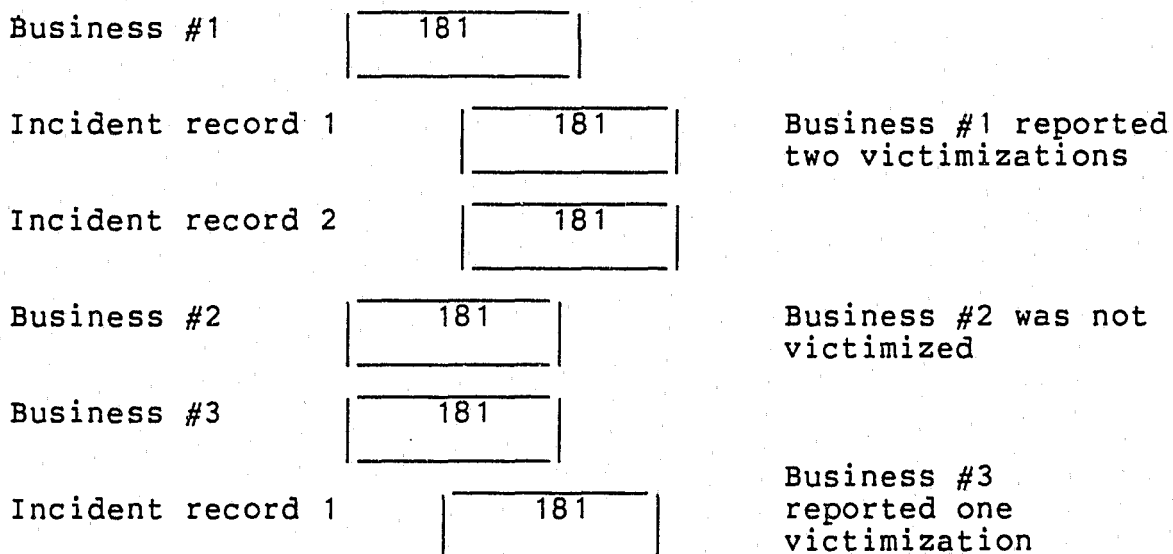

Figure 1

Group types are identified by character positions 1-17, which include two identification variable for group one records, and three identification variables for group two records. A '001' in position 1-3 indicates a business record and a '002' indicates an incident record. Character position 4-8 contain the link variable between business and incident records. Character position 9-17 contain an id variable for incident records only. In addition, the business record contains information on the number of incident records which

follow it. This information is found in character position 40-42.

Sequence of Records

Business records are not sorted in any particular sequence; however each business record is assigned sequentially a 5-digit case number starting with 00001 on the first record in each city file. Incident records for a particular business will have the same case number. Incident records also are not sorted in any particular sequence but a sequence number is assigned to each incident. The highest incident sequence number equals the number of incident records shown on the business record.

Record Type Descriptions

The Business Record is 181 characters in length and contains the following key field components:

<u>Character Positions</u>	<u>Description</u>
17-23	ICPSR ID Variable
27	Record Type Identification
28-37	Control Section - uniquely identifies the establishment in the sample
40-42	Number of following incident records
43-54	Business Characteristics
56-72	Summary of Victimitizations
74-91	Characteristics of Insurance
92-130	Security Measures Present
138-139	Random Group Numbers assigned by Census Bureau for Variance Computation
144-149	Establishment Weight
150-181	Padding

The Incident Record is 181 characters in length and contains the following key field components:

<u>Character Positions</u>	<u>Description</u>
17	Record Type Identification
18-29	Control Section - uniquely identifies the establishment to which the incident belongs
31-34	Time and place of occurrence of incident
35-47	Presence of victim; Presence of weapon; Characteristics of the offender
48-80	Extent and characteristics of injuries or fatalities
85-92	Method of illegal entry
93-140	Characteristics of incident relating to property loss or damage
141-145	Work days lost as a result of the incident
147-159	Security measures taken after the incident
160-170	Characteristics of police notification of the incident
175	Incident Classification
176-181	Incident weight - corresponds to the establishment weight

Cities Commercial Victimization Survey

Tape File Coding Characteristics

Coding Conventions

Data fields in the CVS tape files vary in size from one to six characters. Every possible effort has been made to convert alpha-numeric to numerics. The character set is limited to the ten digits in all documented fields. Values and codes are represented as integers. Some fields have implied decimal places. These fields are noted in the detailed file documentation.

Padding

All padding which occurs in the files is described in the codebook documentation.

Description of Contents

Geographic Identification

The victimization data are for businesses in the central city only and do not apply to the surrounding metropolitan areas. There are no geographic identifiers for areas smaller than the city as a whole due to requirements of preserving the confidentiality of individual respondents. In New York, however, the boroughs of Bronx, Queens, Manhattan, and Brooklyn and Staten Island (combined) may be identified by PSU number. New York is the only city where sub-city identification is possible.

Subject Content

The questionnaire forms best illustrate the kind of data contained in the tape files and are included in this section. Another important reason for reviewing the questionnaire forms is the need to understand the somewhat complex skip patterns used in interviewing. The skip patterns affect the number of cases available for analysis for any given variable.

Guidelines for Using the Tape Files

Estimation Procedures

Every data record in the Cities Commercial Victimization Survey files carries a weight which must be cumulated to produce universe estimates. The assigned weights are the product of one or more of the three components described below. The establishment weight on the business record and the weight on all incident records associated with that business have the same value.

(a) **Sample Weight:** The basic sample weight is the inverse of the probability that a particular establishment would be selected for the sample.

(b) **Noninterview Adjustment Factor:** The noninterview adjustment factor was determined by dividing the total number of sample establishments required for each particular kind-of-business imputation class by the number of useable business records actually collected. The kind-of-business imputation classes are shown below. The noninterview adjustment was made by multiplying the basic weight by the noninterview factor.

(c) **Part-Year Imputation Factor:** This factor represents an upward adjustment of the weighted incident count through duplication of incident records for businesses operating for part of the year. Note that the adjustment was accomplished through physical duplication of records rather than through changing the numerical value of the weight. This imputation factor is applied only to the incident records for businesses with useable reports operating less than 12 months during the reference period. It is an attempt to account for the number of incidents that probably would have occurred had the business been operational for the entire period. The extent of duplication depends on the number of months the establishment was in operation.

Kind-of-Business Classes Defined for
Imputation Purposes for Special City Samples

Retail Major Groups

1. Food
2. Eating and Drinking
3. General Merchandise
4. Apparel
5. Furniture
6. Lumber, Building, Hardware
7. Automotive
8. Drug
9. Liquor
10. Gas
11. Other Retail

Wholesale Major Groups

12. Durable
13. Nondurable

Manufacturing Major Groups

14. Durable
15. Nondurable

Real Estate

16. Apartments
17. Other Real Estate
18. Service
19. Banks
20. Transportation
21. All other

Note: Each numbered group represents a separate imputation class. The brackets indicate groups that were collapsed for imputation purposes if one category had an insufficient number of records.

Number of months the establishment operated during the 12 month period	Number of duplicates added to EACH reported incident
0-1	11
2	5
3	3
4	2
5, 6, 7, 8	1
9, 10, 11, 12	0

Each duplicate incident record then carried the appropriate weight, assigned on the basis of factors (a) and (b) described above.

To obtain an estimate of the total number of businesses, or number in a sub-group, operating during the interview period, the establishment weight for applicable business records must be cumulated. Estimates of total victimizations, or number with particular characteristics are obtained by applying the incident record weight.

Victimization rates per 1,000 businesses are obtained by dividing the estimate of businesses by 1,000. This figure is then divided into the estimated number of victimization to obtain the rate.

Users attempting to generate monthly or quarterly estimates of total crime victimization should do so with caution. Because the month of interview is not available from the tape files it is not possible to determine the precise 12-month reference period. It is possible, however, to define a constant reference period for a set of cities by selecting victimizations which occurred during months common to all interviews. Months common to all interviews are March through December, permitting users to estimate crime occurrence on a monthly basis using the full sample for these months.

Reliability of the Estimates

Estimates derived from the CVS data files are subject to sampling variability. Results based on a sample may differ from one sample to another, and from results that would be obtained from a complete enumeration. In general, any estimate based on 10 or fewer sample (unweighted) cases should be considered unreliable.

In addition to sampling error, estimates from the Commercial Victimization Survey data are subject nonsampling errors. One of the principal sources of such error is the problem of recalling victimizations that occurred during the 12 months prior to interview. Because of a number of factors, however, it is likely that non-sampling errors were less prevalent in the commercial surveys than they were in the household crime surveys. These factors include the greater likelihood of businesses keeping records and reporting incidents to police, as well as the concentration of the survey on two of the more serious crimes, burglary and robbery.

A recheck/reinterview program has also been established for the cities commercial surveys, involving about 10 percent of the sampled segments. This program covered the work of most interviewers. Results indicate that differences between the reinterview and the original interview are minimal, well within the margin of sampling error.

Other nonsampling errors may have arisen from deficient interviewing and from data processing mistakes. However, quality control measures similar to those used in the household survey were adopted to minimize such errors.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

.....

[1] VAR 0035 [2] BUSINESS INSURED

[3] LOC 74 WIDTH 1
 [4] GROUP 1 LEVEL 1
 [5] REF 31 TYPE C

[6] Q.16a
 [7] IS BUSINESS INSURED AGAINST BURGLARY AND/OR ROBBERY
 [8] Do you have insurance against burglary and/or robbery
 by means other than self-insurance?

[9] 0. Not ascertained
 1. Yes
 2. No
 3. Don't know*

[10] *Note: Code 3 (Don't know) is not a legitimate code in 1972 and 1973 files. It is used in the 1974 and 1975 files only.

.....

[1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection, these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.

- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.
- [3] Indicates the code values of missing data. In this example, code values equal to 999 are missing data. Alternative statements for other variables are "MD=0," "MD=8 GE 9," or "NO MISSING DATA CODES." Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "SENTENCE MAXIMUM:YEARS" is 3 columns wide and is located in the 118th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] A variable containing data with implied decimals is denoted by the message "IMP DEC=d," where d is the the number of decimal places implied in the variable.
- [7] This is the full text (question,) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [8] A variable which has a footnote associated with it is denoted by the message, "SEE NOTES(S) X" where "X" is the number of the footnote referenced.

- [9] "Actual number is coded" appears in the codebook to indicate that the variable has been declared continuous.
- [10] Indicates the code values occurring in the data for this variable.
- [11] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).
- [12] Indicates an additional comment or explanation appended to the variable description.

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "[" and "]" signs in the body of the codebook were added by the processors for explanatory purposes.

VARIABLE DESCRIPTION LIST

ICPSR PROCESSING VARIABLES

- 1 ICPSR study number - 8002
- 2 ICPSR edition number - 1
- 3 ICPSR part number - 1
- 4 ICPSR sequence number

BUSINESS LEVEL - CONTROL NUMBERS

- 5 Record designation
- 6 Primary Sampling Unit (PSU) Number
- 7 Case Identification
- 9 Calendar year of interview
- 10 Panel Number
- 11 Number of incidents

BUSINESS INFORMATION

- 12 Person furnishing information
- 13 Is business incorporated?
- 14 Form of ownership if not incorporated

- 15 Number of establishments operated
- 16 Operation of business during reference period
- 17 Number of months operated if not all 12
- 18 Number of paid employees
- 19 Kind of business
- 20 Departments or concessions operated
- 21 Receipt size

CRIME INFORMATION

- 23 Occurrence of break-ins
- 24 Number of break-ins
- 25 Occurrence of attempted break-ins
- 26 Number of attempted break-ins
- 27 Occurrence of robbery
- 28 Number of robberies
- 29 Occurrence of attempted robberies on premises
- 30 Number of attempted robberies on premises
- 31 Occurrence of robberies off premises
- 32 Number of robberies off premises
- 33 Occurrence of attempted robberies off premises
- 34 Number of attempted robberies off premises

INSURANCE INFORMATION

- 35 Insurance against burglary and/or robbery
- 36 Amount of premium for current insurance
- 37 Insurance coverage for other crime losses
- 38 Past insurance coverage for burglary/robbery
- 39 Amount of premium for past insurance
- 40 Past insurance coverage for other crime losses
- 41 Past insurance dropped/cancelled
- 42 Reason business never had insurance

SECURITY INFORMATION

- 43 Security measures present
- 44 Outside alarm ringing
- 45 Installation of outside alarm
- 46 Inside alarm ringing
- 47 Installation of outside alarm
- 48 Central alarm
- 49 Installation of central alarm
- 50 Reinforcing devices (window bars, grates)
- 51 Installation of reinforcing devices
- 52 Guard/Watchman used
- 53 Original use of Guard/Watchman

- 54 Watchdog used
- 55 Original use of Watchdog
- 56 Firearms present
- 57 Firearms obtained (when)
- 58 Cameras present
- 59 Installation of cameras
- 60 Mirrors present
- 61 Installation of mirrors
- 62 Special/Additional locks present
- 63 Installation of special/additional locks
- 64 Compliance with national banking act
- 65 Span of compliance with national banking act
- 66 Lights present-outside/additional
- 67 Installation of lights-outside/additional
- 68 Other security measures
- 69 Installation of other security measures

- 71 Random group number
- 73 Establishment weight

INCIDENT LEVEL - CONTROL NUMBERS

- 200 Record Designation
- 201 Primary Sampling Unit (PSU) Number
- 202 Case Identification

203 Sequential Incident Number
204 Original Incident Number

INCIDENT INFORMATION

205 Month of occurrence
206 Time of occurrence
207 Place of occurrence
208 Anyone present during incident
209 Offender(s) possess weapon
210 Gun present
211 Knife present
212 Another weapon present

OFFENDER INFORMATION

213 Number of offenders
214 Age - single offender
215 Sex - single offender
216 Race - single offender
217 Age - youngest multiple offender

218 Age - oldest multiple offender
219 Sex - multiple offenders
220 Race - multiple offenders

INJURY RELATED INFORMATION

221 Anyone require medical attention
222 Number of persons requiring medical attention
223 Hospitalization overnight/longer
224 Medical expenses covered by business
225 Amount paid by business for medical expenses

FATALITY INFORMATION

226 Incident-related deaths
227 Owner(s) killed
228 Number of owners killed
229 Employees killed
230 Number of employees killed
231 Customers killed
232 Number of customers killed
233 Bystanders killed

- 234 Number of bystanders killed
- 235 Offenders killed
- 236 Number of offenders killed
- 237 Police killed
- 238 Number of police killed
- 239 Others killed
- 240 Number of others killed

ILLEGAL ENTRY INFORMATION

- 242 Did offender attempt to enter illegally?
- 243 Actual/attempted illegal entry
- 244 Evidence of force
- 245 Broken lock
- 246 Forced door
- 247 Alarm
- 248 Other evidence
- 249 Method of non-forced entry

DAMAGED MERCHANDISE INFORMATION

- 250 Any damaged merchandise?
- 251 Damaged items repaired/replaced
- 252 Estimated cost of damage/repair

- 253 Actual cost of damage/repair
- 254 Repair costs-business paid
- 255 Repair costs-insurance paid
- 256 Repair costs-building owner paid
- 257 Repair costs-other paid
- 258 Repair costs-not ascertained

THEFT INFORMATION

- 259 Theft - money/equipment/merchandise
- 260 Amount of money taken
- 261 Theft - merchandise/equipment/supplies
- 262 Value of stolen property
- 263 Method of determining value of stolen property
- 264 How much recovered by insurance
- 265 Reason nothing recovered by insurance
- 266 Value of stolen property recovered by other means
- 267 Other means of recovering stolen property

EMPLOYEES' LOST TIME DUE TO INCIDENT

- 268 Time lost?
- 269 Number of persons who lost time
- 270 Number of work days lost - under 10

271 Number of work days lost - over 10

xxii

- SECURITY INFORMATION - AFTER INCIDENT

- 272 Security measures taken after incident?
- 273 Alarm outside ringing installed
- 274 Alarm inside ringing installed
- 275 Central alarm installed
- 276 Reinforcing devices (bars, grates) installed
- 277 Guard/watchman employed
- 278 Watchdog obtained
- 279 Firearms obtained
- 280 Cameras installed
- 281 Mirrors installed
- 282 Special/additional locks installed
- 283 Outside/additional lights installed
- 284 Other security precautions used

REPORTING INFORMATION

- 285 Police informed?
- 286 Police already knew

- 287 Nothing done--lack of proof
- 288 Not of importance
- 289 Too troublesome
- 290 Too inconvenient
- 291 Private or personal matter
- 292 Didn't want involvement
- 293 Afraid of reprisal
- 294 Reported to someone else
- 295 Not reported - other reason

- 297 Incident classification
- 298 Incident weight

- 4. 8-19
- 5. 20 or more

VAR 19 KIND OF BUSINESS

LOC 51 WID 2 MD= 0

GROUP 1 LEVEL 1 BUSINESS

REF 15 TYPE C

Question 6A

KIND OF BUSINESS

What do you consider your kind of business to be at this location?

(See Appendix A for explanation of the code categories.)

- 00. Not ascertained
- 01. Food
- 02. Eating and drinking
- 03. General Merchandise
- 04. Apparel
- 05. Furniture and appliance
- 06. Lumber, hardware, mobile home dealers
- 07. Automotive
- 08. Drug and proprietary
- 09. Liquor
- 10. Gasoline service station
- 11. Other retail
- 12. Wholesale: durable goods
- 13. Wholesale: non-durable goods
- 14. Manufacturing: durable goods(1)
- 15. Manufacturing: non-durable goods(1)
- 16. Apartments
- 17. Real estate
- 18. Service
- 19. Bank(2)
- 20. Transportation
- 21. Agricultural services
- 22. Auxiliary services
- 23. Communications
- 24. Construction
- 25. Electric, gas and sanitary services
- 26. Finance and credit
- 27. Insurance
- 28. Non-profit organizations and churches(3)
- 29. Other

1. In 1972 and 1973 files code 15 is not used. All manufacturing establishments are coded 14; no distinction is made between durable and non-durable goods.

2. Banks were not included in the Cities Commercial Victimization Survey in 1972. Therefore, code 19 is a valid code for 1973, 1974 and the 1975 Largest Cities files. Banks were not included in the 1975 Impact Cities survey because they were not included in the 1972 survey.

3. Code 28, designating a separate category for churches and non-profit organizations, is used only in 1972 and 1973 files. For 1974 and 1975, such organizations are coded 18, Service.

Questions 19A, B

SECURITY MEASURES PRESENT (DETAILED)

What security measures, if any, are present at this location now, to protect it against burglary and/or robbery? When

were these security measures first installed or otherwise undertaken?

(This is a multiple response question. Each response category is coded as a separate variable. Following each type of security measure is a variable designating when the establishment installed that security measure if it is present. Some security measures were not coded for every year of the survey. When a particular measure was not considered in a given year, zero is coded for that category. The specific year(s) is (are) noted and documented as

"padding."

LEVEL 2 INCIDENT
TYPE C

CASE IDENTIFICATION

5-digit number assigned sequentially to allow unique identification of each case.

.....

VAR 203	SEQUENTIAL INCIDENT NO.	
LOC 26	WID 3	
GROUP 2	LEVEL 2	INCIDENT
REF 174	TYPE C	

SEQUENTIAL INCIDENT NUMBER

001-136

(Number assigned sequentially to incident records associated with a single establishment. Numbers start with 01 and continue through the number needed to designate all incidents for a business. The highest number, assigned to the last incident record for an establishment, corresponds to the number of incidents coded on the business record, Reference No. 07.)

.....

VAR 204	ORIGINAL INCIDENT ID NO.	
LOC 29	WID 2	
GROUP 2	LEVEL 2	INCIDENT
REF 175	TYPE C	

ORIGINAL INCIDENT ID NUMBER

01-99

(Number originally assigned the incident by the Census Bureau. This number is retained because incident records were duplicated to adjust for businesses operating during only part of the reference period. This number allows identification of duplicated incidents. In 1972 and 1973 files, however, note that robbery and burglary incidents were numbered independently of one another since they were originally two distinct record types. In those years it is possible to find a robbery incident number '01' in this field, and also a burglary incident '01' which are not duplicates.)

VAR 205 MONTH OF OCCURRENCE

LOC 31 WID 2 MD= 0
GROUP 2 LEVEL 2 INCIDENT

INTRODUCTION

Good morning (Afternoon). I'm Mr(s.) _____ (your name) from the U.S. Bureau of the Census. We are conducting a survey in this area to measure the extent to which businesses are victims of burglaries and/or robberies. The Government needs to know how much crime there is and where it is to plan and administer programs which will have an impact on the crime problem. You can help by answering some questions for me.

Part I - BUSINESS CHARACTERISTICS

<p>2a. Is this establishment owned or operated as an incorporated business?</p> <p>1 <input type="checkbox"/> Yes - SKIP to 3 2 <input type="checkbox"/> No</p> <p>b. How is this business owned or operated?</p> <p>1 <input type="checkbox"/> Individual proprietorship 2 <input type="checkbox"/> Partnership 3 <input type="checkbox"/> Government - Continue interview ONLY if liquor store or any type of transportation 4 <input type="checkbox"/> Other - Specify _____</p>	<p>7. Did anyone else operate any departments or concessions or some other business activity in this establishment during the 12-month period ending _____?</p> <p>1 <input type="checkbox"/> Yes - List each department, concession, or other business activity on a separate line of Section V of the segment folder, if not already listed. Complete a separate questionnaire for each one that falls on a sample line. 2 <input type="checkbox"/> No</p>
---	---

<p>3. Do you (the owner) operate more than one establishment?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p> <p>4. Did you (the owner) operate this establishment at this location during the entire 12-month period ending _____?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No - How many months during the designated period? _____ Months</p> <p>5. Excluding you (the owner) (the partners) how many paid employees did this establishment average during the 12-month period ending _____?</p> <p>1 <input type="checkbox"/> None 2 <input type="checkbox"/> 1-3 3 <input type="checkbox"/> 4-7 4 <input type="checkbox"/> 8-19 5 <input type="checkbox"/> 20 or more</p>	<p align="center">DO NOT ASK ITEM 8 UNTIL PART II AND ANY INCIDENT REPORTS HAVE BEEN COMPLETED</p> <p>8. What were your approximate gross sales of merchandise and/or receipts from services at this establishment for the previous 12 months ending _____? (Estimate annual sales and/or receipts if not in business for entire 12 months.)</p> <p>1 <input type="checkbox"/> None 2 <input type="checkbox"/> Under \$10,000 3 <input type="checkbox"/> \$10,000 to \$24,999 4 <input type="checkbox"/> \$25,000 to \$49,999 5 <input type="checkbox"/> \$50,000 to \$99,999 6 <input type="checkbox"/> \$100,000 to \$499,999 7 <input type="checkbox"/> \$500,000 to \$999,999 8 <input type="checkbox"/> \$1,000,000 and over 9 <input type="checkbox"/> Other - Specify _____</p>
